Date: March 2007

ISLE OF PORTLAND INDUSTRIAL ARCHAEOLOGY SURVEY: PHASE 1 ASSESSMENT REPORT

Peter Stanier & Peter Cox

1. INTRODUCTION

- **1.1** This report sets out the results of Phases 1 and 2 of the *Isle of Portland Industrial Archaeology Survey*, commissioned and funded by English Heritage through the Aggregates Levy Sustainability Fund (ALSF). The study has been undertaken by AC archaeology with Peter Stanier during the period November 2006 to March 2007.
- **1.2** The project has been undertaken in accordance with a Project Design approved by English heritage on October 2006. Phase 1 of the project comprises two stages of research:
 - Stage 1: identification of past, current and future aggregates extraction areas
 - Stage 2: desk study to identify data for inclusion in the county Sites & Monuments Record
- **1.3** The overall aim of the project is to improve the regional and local curatorial management of the Historic Environment of Portland in relation to the exploitation of crushed limestone aggregate. The principal objectives are:
 - To incorporate were possible, information (location/date/extent) about past, current, and future quarrying of Portland stone and the production of aggregate on to the county SMR.
 - To enhance and validate the county SMR records for aggregate producing areas of Portland.
- **1.4** An assessment of the currently recorded data will be made and used as the basis of future survey proposals, This will be proposed in an updated project design in due course.

2. RESULTS OF STAGE 1: LOCATION OF PAST, CURRENT AND FUTURE EXTRACTION ON PORTLAND

2.1 Historical Background

- **2.1.1** The winning and working of stone on Portland has taken place for at least 2,000 years. Extraction has been dominated by the winning of dimension stone, but aggregates are being or have been extracted as a secondary part of the Portland quarrying industry at various quarry sites, such as at Admiralty, Bowers, Broadcroft, Coombefield and Independent. This relates to quarrying of bedrock (cherty series) beneath the true Portland freestone beds, and the 'cap' stone formerly removed as overburden and discarded as waste, as well as freestone wastes used as aggregates.
- 2.1.2 Stone was first crushed in the mid-1930s for agricultural lime. In 1938-39 capstone was crushed for mass concrete and dry crushed rock. A new tar macadam plant was built in 1947 and used crushed rock. The 1950s saw cap and roach being crushed for special cement making and as a fluxing limestone, both shipped from Castletown Pier to the Thames. This material was acquired during quarrying for dimension stone as well as by removing waste banks. In 1962 Kingston Minerals (B&P Group) were crushing cap at their active Broadcroft Quarry, where they had a crusher, and in 1964 they began clearing waste banks here. A peak of 191,000 tonnes of aggregates was reached in 1968, the same year that large-scale quarrying of the underlying Cherty Series began at Broadcroft. By 1977 this had reached the base of these beds. Meanwhile, high competition in the late 1960s had resulted in the loss of the markets for fluxing limestone, specialist cement, tarmacadam and agricultural limestone. Portcrete Ltd, which made precast concrete building components (including Centre Point in London), closed in 1977. Its Wide Street works had used crushed cap. Losses of markets for crushed rock and the traditional dimension stone led to a review of future quarrying in 1977. This acknowledged there were potentially huge reserves of crushed rock aggregate on Portland lying beneath the worked out

quarries. The idea of extracting this and shipping it from new piers was examined, alongside environmental considerations.

- **2.1.3** Quarrying for crushed stone (aggregates) beneath the Portland dimension stone beds into the Cherty Series has taken place at Broadcroft Quarry and is now taking place at Coombefield. This latter quarry is certainly processing and crushing all suitable stone not required as building stone. The same may be true of Albion Stone's quarries at Bowers and Independent. Elsewhere, the overlying cap, some roach and waste Portland building stone has been taken for crushing from, for example, Perryfield, Inmosthay and Tout. This last quarry has evidence of disturbance and removal of waste banks at the south end, probably in the 1960s or '70s and perhaps for the Portcrete works. The removal of much earlier waste banks for crushing is a form of 'delayed quarrying', many decades after the dimension stone was first quarried and the overlying cap thrown aside.
- **2.1.4** The re-working of old dimension stone quarries for aggregate is a potential threat to aspects of the historic landscape in particular (see 2.2.5) the nationally important dimension stone industry, and areas of importance should be identified to provide for the better understanding of the landscape and appropriate management of the impact of future extraction.

2.2 Future proposals

- **2.2.1** The Dorset Minerals and Waste Local Plan adopted in 1999 is the current minerals plan for mineral working on Portland. This plan acknowledges that aggregates from crushed limestone are sourced in Dorset only from Portland and the Isle of Purbeck.
- **2.2.2** Changes to the Planning & Compulsory Purchase Act 2004 have included the abolition of Structure Plans and requires local authorities to replace them with a system of Development Documents; principally the Minerals and Waste Development Framework (MWDF). This document exists for the period 2004 2007. The policies contained in the original Minerals Plan are *saved* until September 2007. The Local Development Frameworks will eventually be replaced by appropriate parts of a new Regional Spatial Strategy (RSS), the draft of which was issued in 2006, and Development Documents (DDs). Annual monitoring of progress towards the development and implementation of the MWDF is presented in the Annual Monitoring report (AMR); the latest available for Dorset covers the period 1 April 2005 to 31 March 2006.
- **2.2.3** The 2006 AMR shows a decline in crushed rock produced during the period 2001 (0.44 million tons) to 2006 (0.20 million tons). There were no new planning applications determined during the period that relate to working minerals on Portland.
- **2.2.4** There are extensive areas of Portland that are included in existing permissions that have, or are undergoing ROMPP (Review of Mineral Planning Permissions) procedures (**Fig. 1**). Within these areas there is pressure on mineral operators to include restoration proposals. These may include historic quarries that contain important industrial archaeology evidence. Discussion with the MPA has established that only those areas nominated in the existing ROMPP planning applications and ES submissions will be allowed in the duration of the current mineral structure plan. These may emerge during 2007 as the MWDF develops.
- **2.2.5** Of particular note within the Draft RSS is the inclusion of policy RE12 *Recycled and Secondary Aggregates*. This seeks provision to be made for 121 million tons of secondary or recycled aggregates to be utilized during the plan period of 2006 2016. This specifically includes the re-use of waste tips in (China Clay) quarries, but does not exclude the possibility that limestone quarry waste could also be used.

March 2007

Page 2

3. RESULTS OF STAGE 1: IDENTIFICATION OF ARCHAEOLOGICAL SITES

3.1 Introduction

3.1.1 About 400 sites belonging to the industrial period (c.1750 onwards) have been identified, mostly from map sources and the Dorset SMR. The scope is wide but those sites most relevant to the stone industry include: quarries, tramways, railways, stone saw mills and masonry works, limekilns, stone-loading quays and cranes. Other industrial sites on Portland include: lighthouses, navigational aids, coastguard stations, waterworks, gas works, blacksmiths shops, a foundry and numerous boundary stones. The Convict Prison as well as chapels and churches also fall within the period. The prison is directly related to quarrying, as are numerous Victorian and C20 defensive military works around the island, erected on a truly 'industrial' scale. Identified sites of potential interest have been listed on a spreadsheet, although there is space for the addition of further sites (See **Fig. 2** and **Appendix 1**)

3.2 The Dorset SMR, National Monuments Record, Listed and Scheduled sites

- **3.2.1** The Dorset SMR has been examined at County Hall, Dorchester. Of the c400 sites noted above, only c146 are listed in the Dorset SMR. This current work should therefore go a long way in remedying this shortfall. The SMR is also, for example, top-heavy with military sites because of input from the Defence of Britain Project. Considering that quarries represent the main industry and physical features in the Portland landscape, they are very lightly reported with no attention to detail. Only 16 quarries are listed in the SMR, of which two are vaguely named as 'Roman' and 'medieval' quarries covering the whole island. This compares with a total of 74 quarries identified in this current work. A combination of mapwork and fieldwork is required to define the margins of individual quarries, especially where some merge into each other. At least 15 limekiln sites have been identified from maps, whereas the SMR appears to include just two sites (one related to the post-medieval Portland Castle and the other a place name).
- **3.2.2** Some sites appear to be duplicated in the SMR and their grid references require checking. Occasionally the local geology for sites of all periods is described as 'carboniferous limestone'. It is not carboniferous.
- **3.2.3** Of the sites identified, only 69 appear to be on the National Monuments Record.
- **3.2.4** There are 78 sites with Listed Building status. These include five tramway bridges, a limekiln, three lighthouses, two windmills, a daymark, a water cistern and the breakwater. Of the eight Scheduled sites on Portland, four date from the Industrial period. Of these, three are related to military defence, while the last is the Portland Bill stone loading guay.
- **3.2.5** The Images of England list is also a useful source of information and recent photographs of Listed sites.
- **3.2.6** SMR, NMR, Listed and Scheduled sites are noted in **Appendix 1**.

3.3 A recording methodology

- **3.3.1** A review of currently used terminology for industrial monuments has been undertaken with the Dorset SMR Manager. The principal issues are summarized below.
- **3.3.2** In general the currently used Monuments Thesaurus is inadequate when entering QUARRY in Portland. Quarries have special elements and the term 'Quarry' fails to address these. A quarry is more than just a void for example, key elements include a stone working face, areas of waste tipping, sites of cranes and tramways. Stone working faces are unusual in some Portland quarries, being 'islands' of unquarried stone rather than faces defining the margins of the excavation.

3.3.3 There appears to be no word to cover stone quarry waste. The term SPOIL HEAP (conical or flat-topped) has been defined in relation to mines or 'similar sites'.) Apart, perhaps, from overburden, the material tipped from a building stone quarry is completely different from that of a coal or other mine. On Portland there are particular types of waste tipping – the 'spoil heaps' can be distinguished as 'benches' and 'beaches' or more conventional tips. The three main types need to be examined by fieldwork in order to make definitions that can be transferred (hopefully) to other quarry areas. Cliff-side tips have special tipping places.

SAW MILL refers to timber and not stone. Stone saw mills were once common on Portland.

The following Glossary of terms illustrates the variety of distinct features to be found at Portland quarry sites that are to be incorporated into the SMR:

Quarry

Broad term including whole area of **quarry face**, **gullet**, **bank** and **waste tips**, within which may be **cranes**, tramways, buildings etc. Quarry bounds may be determined by property boundaries, which sometimes result in 'islands' of unquarried ground within the main quarry area (e.g. at Tout and Inmosthay).

Quarry face

The exposure of natural stone beds *in situ* - the latest working area. May have **bore holes**, **pits** or evidence of machine **channelling** or **broaching**.

Bank

Waste tip including quarried blocks of cap, roach, etc. May be faced with a *bank wall*. Top may provide support for a crane, etc. Term refers more to older type of well-built tip rather than modern type of dump.

Bank wall

Built of large squarish quarried cap and roach blocks, as a retaining wall for waste material behind. This is called a **stack** in South Western Stone Co.'s book *Portland Stone*, 1933.

Beach

Waste tip of mainly Purbeck overburden. Smaller material than in bank.

Finger dump

Narrow overburden tip or beach, formed by barrowing or tramming waste in systematic manner; level top.

Stack

A stockpile of quarried blocks ready for sawing etc. also refers to bank wall.

3.4 Mapping Portland's Quarrying History & Industrial Archaeology

3.4.1 Historical maps chart the progress of quarrying on Portland from which it may be possible to date existing quarry remains. Not all of the earliest maps give accurate details of quarries, workyards, tramways and piers. Maps published in 1800, 1832 and 1841 are of a large enough scale to be useful before the first large-scale Ordnance Survey maps were made in 1863. These accurately depict the full extent of quarrying for the first time. Subsequent revisions of 1901, 1926 and 1959 chart developments through the twentieth century and include the layout of masonry workyards. It should be noted that quarry maps show conditions only at the time of

survey, for within days the face could be extended or the positions of cranes or tramways altered. However, the maps remain a useful tool for interpreting quarry layouts and their historical development.

- **3.4.2** These maps also depict industrial archaeology (exclusive of quarries) on the Isle of Portland. The earliest maps show the location of stone-shipping piers, the two windmills, lighthouses and other features. Later maps include railways, tramways and inclines, stone masonry works, limekilns, gasworks, waterworks, military installations, Portland harbour and breakwater, etc. (see **Appendix 2**)
- **3.4.3** Eleven stages have been identified for the purposes of constructing a Historic Quarrying Map of Portland. The maps chosen are those considered to have been the most accurate and informative, dating from 1710 to 2006. (**Fig. 3**)

3.5 Secondary Sources

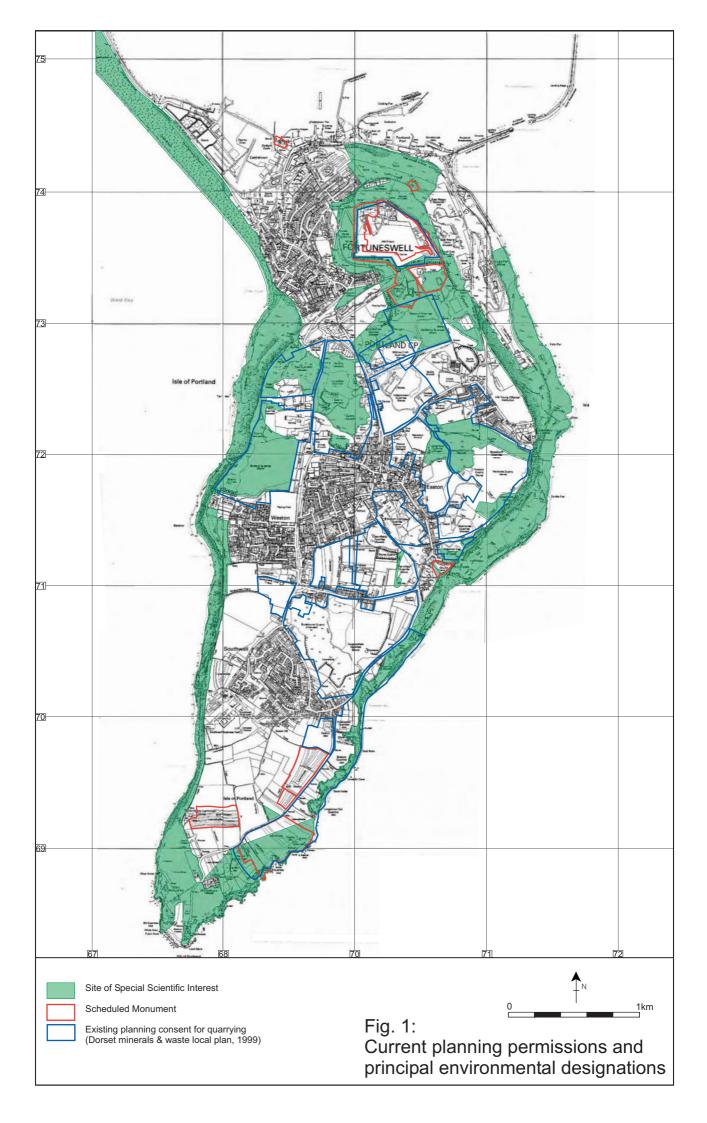

3.5.1 A list of secondary sources has been complied, including all relevant references to quarrying and industries on the Isle of Portland. Some are clearly more useful than others. (**Appendix 3**)

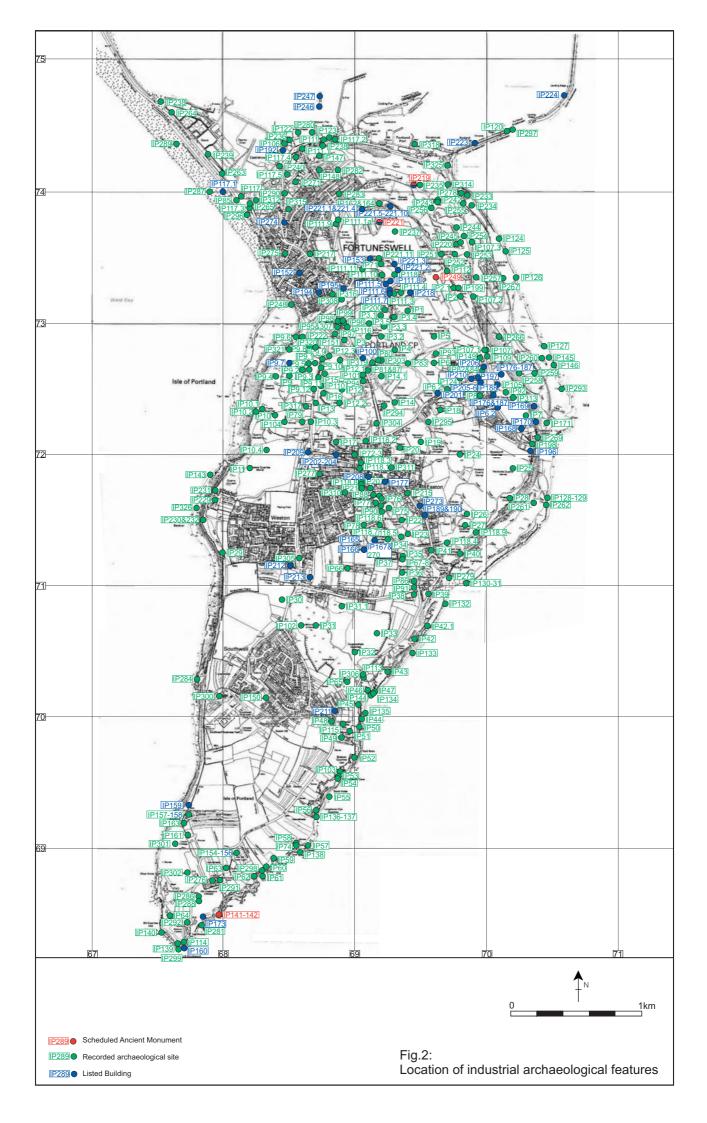

3.6 Illustrations and Photographs

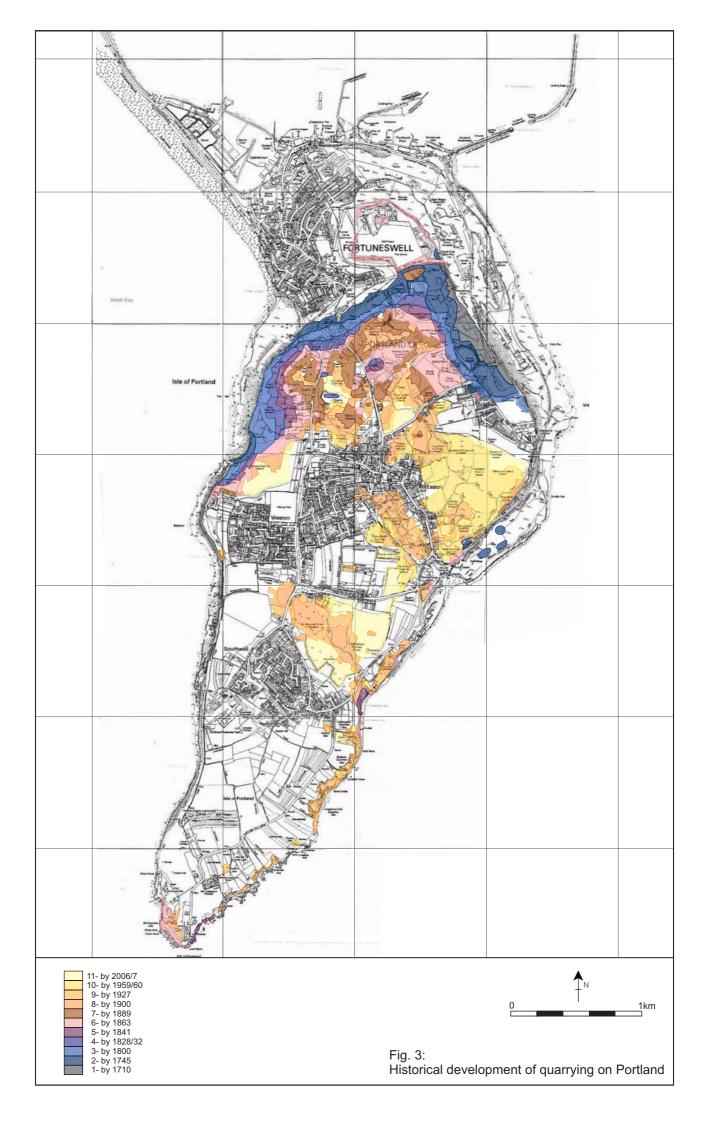

- **3.6.1** It is possible that illustrations, such as prints, engravings, paintings, etc, can be informative but their technical accuracy depends on the artist (see, e.g. Pentin, 1916). Photographs may be used to support field evidence and contemporary accounts. They provide records from the midnineteenth century onwards. However, many are undated and unlocated, so can only be useful as background material. The most valuable photographs have been dated, with accurate locations, and the fine collection of the British Geological Survey, Nottingham, is one of the best examples.
- **3.6.2** While many photographs are still held in private hands, those in the public domain either published or held in library or museum collections are of the greatest immediate value for a study of the quarries. Other images are available, for example, through the website of the Dorset Coast Digital Archive (www.dcda.org.uk) which includes photographs, engravings, and paintings etc from Dorset County Museum, Weymouth Ref Library and Russell Coates Museum.
- **3.6.3** Published photographs have been listed (**Appendix 4**). This study has also included a digital compilation of over 200 of the most useful photographs and illustrations. (**Appendix 5 but not included**)

3.7 Aerial photographs

3.7.1 The NMR holds a large collection of oblique and aerial photographs which could prove useful in determining the dates and progress of quarry developments, tramways, etc. Obliques date from 1923-4 (4), 1941 (3), 1948 (47), 1949 (4), 1950 (75) and 1995-2004 (36). Verticals date from 1942 (1), 1945 (1), 1946 (3), 1948 (1), 1949 (9), 1950 (14), 1951 (10), 1961 (4), 1963 (1), 1967 (5), 1968 (5), 1969 (2), 1971 (3) and 1987 (18). Earlier dates and those of the 1950s and 1960s could prove particularly useful. These have not yet been examined. **(Appendix 6 & 7)**

Appendix 1: archaeological sites

ACNo	SMR	NMR	Grid Ref	Site Name	Mon Type	Date	Description	Sources	Status	
										Current record
IP1			SY 6940 7310	Waycroft Quarries	Limestone Quarry		Large quarry area worked progressively throughout C19, as indicated on maps. Served by incline from Merchants' Railway			
IP2			SY 6979 7320	Nicodemus Quarries'	Limestone Quarry	pre 1710	Site of earliest quarries, shown on 1710 map.			
IP2.1			SY 6975 7327	Nicodemus Knob	Quarry face	C19	Pillar of unquarried stone remaining from C19 deeper quarrying of cherty series.			
IP3			SY 6910 7290	King Barrow Quarries	Limestone Quarry		Large quarry area worked progressively throughout C19, as indicated on maps. Served by branches from Merchants' Railway			
IP3.1			SY 6920 7305	King Barrow Quarries	Quarry Face		Isolated 'island' with surrounding quarry face; north side buried			
IP3.2			cSY 6920 7290	King Barrow Quarries	Waste tips		Extensive areas of waste beaches			
IP3.3			SY 6928 7305	King Barrow Quarries	Tramways		Main tramway course and branches in deep cutting between waste beaches			
IP3.4			SY 6922 7299	King Barrow Quarries	Tunnel		Tramway tunnel beneath waste, constructed of large rough blocks (1)	(1) Map: OS 1889		
IP3.5			SY 6911 7300	King Barrow Quarries	Tunnel		Site of tramway tunnel beneath waste (1)	(1) Map: OS 1889		
IP4			SY 6930 7280	Withies Croft Quarries	Limestone Quarry		Large quarry area worked progressively throughout C19, as indicated on maps. Served by incline from Merchants' Railway; large areas backfilled and difficult to interpret			
IP5			SY 6960 7290	Admiralty Quarries	Limestone Quarry		Extensive quarry area opened and worked for Breakwater Works and served by network of tramway branches. Difficult to interpret.			
IP6			SY 6960 7270	Prison Quarries	Limestone Quarry		Extensive quarries worked by convicts for government works. Quarry face on south side; also includes limekiln. Now partly filled and levelled for playing fields.			
P6.1			SY 6975 7255	Prison Quarries	Quarry Face		Quarry face along south side of area			
P6.2			SY 6970 7250	Prison Quarries boundary wall	Wall		Boundary wall along Grove Road for Prison quarries; also to north		Listed II 969- 1/1/131	
IP7	4 001 010 - MDO6514	SY77 SW8	SY 703 723	HM Young Offender Institution, The Grove	Limestone Quarry		Long description. Includes quarry area levelled and converted to recreation ground			
IP8	1		SY 6995 7246	Grove Quarry	Limestone Quarry	1863-1960	Site, now filled and developed for housing			
IP9			SY 6850 7260	Tout Quarries	Limestone Quarry		Large quarry area worked progressively throughout C19, as indicated on maps. Served by branches from Merchants' Railway			
IP9.1			SY 6868 7270	Tout Quarries	Quarry Face		Small isolated 'island' with surrounding quarry face; north side buried			

ACNo	SMR	NMR	Grid Ref	Site Name	Mon Type	Date	Description	Sources	Status	
										Current record
IP9.2			SY 6860 7265	Tout Quarries	Quarry Face		Isolated 'island' with surrounding quarry face			
IP9.3			cSY 6865 7265	Tout Quarries	Waste tips	C19	Large area of waste tips (beaches) with walls and tramway courses			
IP9.4			cSY 68407260	Tout Quarries	Overburden waste tips	C19	Large area of high waste tips dissected by cuttings for tramway courses to West Cliff tipping places			
IP9.5			SY 68657270	Tout Quarries	Shelters	C19	Example of 7 quarrymen's shelters built into waste tips			
IP9.6			SY 6855 7290	Tout Quarries 'Big Tip'	Waste tip	C19	Prominent waste tip over West Cliff with tramway course leading out from entrance to Tout Quarry			
IP9.7			SY 685 727	Lano's Arch	Bridge	1854	Drystone arch of fine proportions with datestone inscribed JC Lano 1854. Listing calls this 'foot bridge over track or quarry rail bed'. It carried waste tramway over a branch of Merchants' Railway and/or lower tipping tramway.	Map: OS 1864	Listed II 969- 1/1/191	
IP9.8			cSY 6865 7281	Tout Quarries	Tramways	C19	Tramway courses, branches of Merchants' Railway, various phases; there was a double track through main entrance, shown on the 1889 OS map, and indicated by sleeper blocks.			
IP.9			SY 6875 7273	Tout Quarries Wide Street Tunnel	Tunnel	1862	Stone arch with 'J.C. LANO 1862' on keystone. Sealed with brick wall with keystone crudely carved 'E.C. GILLINGHAM MAY 25TH 1914' and below this a concrete block wall crudely inscribed 'CLOSED BY G. RICKETT G. JAMES JULY 4TH 1972'. (1-2)	(1) Map: OS 1864 (2) Field observation:		
IP9.10			SY 6874 7267	Tout Quarries Wide Street Tunnel	Tunnel	C19	West portal of tramway tunnel beneath Wide Street. Arch has no apparent date stone. Unusual alignment towards NE.			
IP9.11			SY 6871 7259	Tout Wide Street Tunnel	Tunnel	1866	West portal of tramway tunnel beneath Wide Street. Stone arch with '1866' carved on keystone.			
IP9.12			SY 6869 7250	Tout Wide Street Tunnel	Tunnel	C19	Not shown on 1889 map. 'Disused subway' beneath Wide Street marked on 1960 map. (1) Site now buried.	(1) Map: 1960 25-inch OS map.		
IP10			SY 6840 7230	Trade Quarries	Limestone Quarry	C19	Large quarry area developed in C19, now mostly backfilled and much redeveloped as a trading estate. Wide Street Works and limekilns are listed elsewhere.			
IP10.1			cSY 6830 7235	Trade Quarries	Overburden waste tips	C19	Large area of high waste tips dissected by cuttings for tramway courses to West Cliff tipping places; continuation of Tout Quarries			

ACNo	SMR	NMR	Grid Ref	Site Name	Mon Type	Date	Description	Sources	Status	
										Current record
IP10.2			cSY 6825 7233	Trade Quarries	Tipping places	C19	Numerous tipping places along West Cliff, a contination of Tout Quarries			
IP10.3			SY 6867 7226	Trade Wide Street Tunnel	Tunnel	C19	Tunnel' on 1889 map with track but no tramway (1) The 1864 map names no tunnel but suggests there was a tramway when quarrying was starting on the east side of Wide Street (2)	(1) Map: OS map 1889 (2) Map: OS 25-inch map 1864		
IP10.4	4 001 368 - MWX4405		SY 68325 72027	Magazine			Magazine site, according to SMR (1)	(1) Map: OS 1891		
IP11	WX3877 - MWX3877		SY 6820 7190	Bowers Quarries	Limestone Quarry		Much enlarged in later C20 but older quarries and waste tips survive along West Cliff			
IP12			SY 6890 7250	Inmosthay Quarries	Limestone Quarry		Extensive quarried area in centre of island with tramway courses and waste tips. Disturbed by late C20 quarrying. Backfilled to north where there is a small 'island' of unquarried stone. A larger 'island' remains towards the south. This includes the historic spoil tip known as Fancy Beach (AC site No.IP15).	Maps: 1864 onwards		
IP12.1			SY 6889 7272 (centre)	Inmosthay Quarries	Quarry Face		Small 'island of unquarried stone, north side formed bny 1889 and south side by 1900 (1-2)	(1-2) Maps: 1889 and 1901		
IP12.2			SY 6887 7240	Inmosthay Quarries	Quarry Face		Large 'island' of unquarried stone. Impressive quarry face worked back to a corner along a major joint. Perhaps worked in 1930s? - certainly since 1927.			
IP12.3			SY 6880 7275	Inmosthay Quarries	Tramways		Course of tramways through north part of quarries, with some stone sleeper blocks. Tunnel portal under Wide Street to Tout Quarry is blocked (2006)			
IP13			SY 6870 7240	Wide Street Quarries	Limestone Quarry		Along east side of Wide Street, named on maps as separate quarries but now incorporated within the Inmosthay workings			
IP14			SY 6930 7240	Independent Quarries	Limestone Quarry		Finally worked out in early C21			
IP14.1			SY 692 726	Independent Quarries bridge	Bridge	pre-1889	Bridge over quarry tramway on 1889 map and surviving in 1926-7			
IP15	4 001 325 - MWX4239		SY 6875 7262	Fancy Quarry	Limestone Quarry	1828	Fancy Quarry in Wide Street with tramway into a strip field in Inmosthay in 1828 (1). 1841 map shows quarry in Wide St but not named (2). Not shown on 1864 map (3)	(1) Map: 1828 (2) Map: Tithe Map 1841 (3) Map: OS map 1864		
IP16			SY 6880 7243	Fancy Beach	Quarry waste tip	1828	1828 map shows 'Rail Road' from 'Fancy Quarry' in Wide Street leading into a strip field in Inmosthay owned by Wake & Daniel, the origin of the Fancy Beach waste tip which survives today. (1)	(1) Map: 1828

1P110			SY 6875 255	Fancy Quarry tramway	Tramway	1828	First quarry tramway on any map (1828) named as 'Rail Road' from 'Fancy Quarry' in Wide Street leading into a strip field in Inmosthay, the origin of the Fancy Beach waste tip. (1)	(1) Map: 1828		
1P111		LINEAR 1928	SY 68607293 (Priory Corner) to SY 68607432 (foot of incline) or SY 6872 7445 to SY 68537285	Portland (Merchants') Railway	Railway	1826-1939	Act 1825, 4ft 6in gauge. Horses drew trains of loaded wagons around the contour from Priory Corner to the top of the incline for descent to Castletown Pier. Many tramways branched into Waycroft, King Barrow, Tout, Inmosthay quarries. 1861 plan shows upper branches of Portland Railway including incline and East Drum, and Cottage & Stable (removed 1866 for fort). Reached greatest extent c1889 (1). Reduced to single track to Priory Corner (short sidings and a crane) by 1927 (2). Closed 1939 and rails lifted in 1956.(3) Traces of stone sleeper blocks survive. Other features include massive stones bordering the line, a curved stone-walled cutting at Tillycombe with a milestone 'II'. Site of Priory Corner terminus destroyed during road works. (4)	(1) Map: OS 1889 (2) Map: OS 1929 (3) Monograph: Jackson, BL. 1999. Isle of Portland Railways, vol 1, 15- 61 (4) Field observation: P. Stanier 7 February 2007		
IP111.1			SY 68607432 - SY 68887378	Merchants' Incline	Railway		First built in two parts with top and lower winding drums, later replaced by continuous incline with three rails on stone sleeper blocks, a half-way passing place and single top brake drum. Sleeper blocks survive. (1-2)	(1) Monograph: Jackson, BL. 1999. Isle of Portland Railways, vol 1, 15- 61 (2) Field observation: P. Stanier 7 February 2007

PORTLAND INDUSTRIAL SURVEY APPENDICES 2-5

Appendix 2. Historic Map Sources

The following maps have been identified as the most reliable for determining the historical development of quarries and industrial archaeology on the Isle of Portland. Those used for compiling the historical quarry development map are marked thus *.

* 1710:

A Plan of the Isle of Portland and parts adjacent

[John Hutchins, History and Antiquities of the County of Dorset, 3rd ed. vol. 2, 1863]

Shows 'The Quarries' on the north east cliffs, with a track down to 'The Crane & Pier; above which are the rolls of Earth occasioned by the sliding down of the Rubbish from CC 1695 & 1708.' 'The Crane & Pier' (not named) are King's Pier [SY 70177352].

The 'Quarries' appear to have been cut back from the top of the natural cliffs by this date, somewhere in the region of Quarry Head at the top of the later Breakwater Incline. [cSY 700729] but extending from perhaps SY 703724 to SY 696736. Although not shown on the map, it must be assumed that fallen blocks were being quarried in the landslips of the East Weares ('The Common'). The depiction of a scattering of buildings(?) here may be related to stone cutting. Shows the two windmills as sketches (not named).

* 1745:

A Plan of the Island of Portland in the County of Dorsett, with a description of his Ma'ty's Demesne Lands and Quarries there, taken by Virtue of a Royal Warrant from the Honourable Thos. Walker Esqr. his Ma'ty's Surveyor General bearing date the 25th day of September 1745. by me Thos. Roper Guardian & Keeper of the Said Quarries 6 Novr 1745

[Weymouth Reference Library L912.332RO.1, a photocopy of PRO MPE 1/356]

Clearly marks 'Quarried out' ground in the King's Lands ('A'), Common (B') and Private Lands ('C') on the north east and north of the island approximately from the Grove around to Priory Corner. There are other clifftop quarried out areas on the west above Clay Ope [SY 68237205] and a small one on the east beside Rufus Castle [SY 69807120]. Small quarries are shown at the Grove [SY 699726] and near the Verne. In addition three 'quarried out' areas are indicated in the Penn's Weare section of East Weare. Two have a track leading past 'Church hope key' to the top, while the third has a track leading to 'Dirtle [?] key'. Shows 'Old Pier at present useless being destroy'd by the Sea' (this is Folly Pier) and 'King's Pier'. This map closely coincides with John Smeaton's visit in 1756, when he was shown around by a Mr Roper (the same?), a quarry manager and 'a very plain, sensible, intelligent person.'

Shows the two windmills as sketches (not named), two 'Lighthouses' as sketches on the site of the higher light.

1765:

Dorset Shire by Isaac Taylor

Despite being a map of the whole of Dorset, this is surprisingly detailed for Portland, naming Kings Key, New Pier, New Key or Dirtle Pier and Hop Pier [or 'Old Church Hop Pier'?]. Also named are 'Tongue Quarry' in the Tout area, 'New Quarry' at the Verne and 'Geave Quarrys' along the north east cliffs. 'Ramsgate' and 'Blackfryers' at this last location suggest destinations for Portland stone.

Names the two 'Light Houses'.

1770:

Plan of Roads and Piers in the Isle of Portland, Dorsetshire [PRO MPE 1/411]

This plan of the East Weares shows a road descending from the cliff top at Quarry Head and branching to King's Pier and New Pier; blocks of stone are depicted at all three locations. Also shown is the much smaller 'Mr Gilbert's Pier Commonly known by Folly.'

1772:

A Plan of the South East Part of Portland against the Sea from Church Hope to the Lighthouses. Taken the 1st December 1772. copied from original late in the possession of John Henning, Esq. [Weymouth Reference Library]

1794:

A chart of the Isle, Roads and Race of Portland, published by Laurie and Whittle [Weymouth Reference Library]

Shows Hop Pier or South Pier, New Key or Dirtle Pier, New Pier and Kings Key or North Pier; two lighthouses and two windmills

* 1800

A Map of the Isle of Portland by F.Webb and Co. Salisbury

[Weymouth Reference Library, a photocopy of PRO MPE 1/356]

A map of the Isle of Portland, copy of map drawn by Gilbert Steward, appears to be a copy of Webb's map [Portland Museum]

Shows the extent of the quarried land which is continuous from the Grove all around to Trade and Bowers, as well as <u>indicating</u> trackways within the quarries for development and for tipping from the cliffside. 'Common Rubble Ground', indicating back-filled quarry workings, skirts the north east side.

There is a possible small quarry at the south end of Wide Street, and probable quarrying at Freshwater Bay (served by Underbank Pier) and in the Southwell landslip area (served by Church Hope Chine Pier). In the East Weares, a track leads down from the top to King's Pier and numerous smaller tracks lead from the landslips to Dirtle Pier. There are three Church Hope Piers. Other piers are New or Folly Pier, Church Hope Chine Pier and Underbank Pier on the east coast. At the Bill are the 'New Light House' (lower) and 'Old Light', Attendants House and Signal House. The two windmills are shown as sketches in 'Windmill Field'.

The Portland museum map shows 'Boat Hall' and 'Sturt Shipping Place' just north east of Portland Bill. This would suggest some stone quarrying from the shore or cliffs

Piers: trackways lead to King's Pier, Dirtle Pier and Church Hope Piers (three).

1805-6:

Ordnance Surveyors' Drawing OSD 56

Shows 'Quarries' around north, 'Quarry Head', King, Folly and Dirdale Piers, two windmills (symbols), 'Hr Lighhouse', 'Lr Lighthouse' and 'Bill Signal'.

1811:

Ordnance Survey 1-inch map first series, sheet 17 (from OSD 56 of 1805-6) Shows quarries (not named) around north, 'Quarry Head', 'Kings Quay', 'Folly Pier' and 'Dirdale Pier', two windmills (symbols), 'Hr Light', 'Lr Light', 'Signal Ho' and 'Verne Signal'.

1824:

Plan of Railway or Tram Road in over and through certain lands in the Parish of St George, Island of Portland in the County of Dorset 1824. [DRO QDP(M) R3 1]

'The dotted line shews the intended track of Railway.' It is indicated from the top of 'New Road', around the head of Tillycombe (not named), with double sharp beds above Fortuneswell and another sharp bend above Castletown (not named) and then dividing to two piers west of the Castle and five piers to the east. These piers are already linked by road from Fortuneswell.

1825-26:

Printed map of Dorset, by C. & J. Greenwood, surveyed in 1825-6. [DRO M13]

Shows quarries (not named) around north, 'Quarry Head', 'Kings Quay', 'Folly Pier' and 'Dirdale Pier', two windmills (symbols), 'Higher Light', 'Lower Light', 'Signal Ho', 'Vern Signal' and 'Boat Hole'.

* 1828:

Plan of the Island of Portland in the County of Dorset, by J. Wyld [DRO Photocopy 365/11]

Large-scale plan with field names and strips

• requires permission to copy from depositors, Trustees of H.J.Sansom Shows quarried areas around north east, north and north west with many tracks leading out to cliff edges, but not named. Gives owners of properties next to the quarries. Marks 'Rail Road' from 'Stone Piers' to Priory Corner (not named), as single track with six branches onto pier. Similar to Webb's 1800 but also shows two early inland quarries. 'Maggot Quarry' is 'New', while a small 'Fancy Quarry' in Wide Street has a 'Rail Road' leading away into the fields of Inmosthay; herein lies the origin of the Fancy Beach waste tip which survives today. This is also the first quarry tramway on any map. Shows 'Quarry Head', 'Nicodemas Knob', New, Kings, Folly and Dirdale Piers, and also 'Salt Pool'. Possible quarry workings and tracks are shown at the Bill. Marks 'Lower Light House, Higher Light House and Signal House at Portland Bill, and Verne Signal House at Verne. Names different Weares.

1832:

Plan of Grove and Easton area of Portland, showing proprietors of quarry lands, by Roger Hopkins & Sons

[Weymouth Reference Library, a photocopy of PRO MR 1/538] Similar to 1828 map, and it must be a copy. A minor exception is the addition of a small quarry near the West Cliff in the Bowers quarry working area.

1837:

Plan of a Customary Freehold Estate in the Isle of Portland, For Sale, By E. & G.N. Driver

[Weymouth Reference Library]

Accompanied by auction sale catalogue of Messrs Driver, London, 23 June 1837, indicates the state of quarrying in some properties of the late Gabriel Tucker Steward.

Shows 'Rail Road' from 'Priory' to shipping piers at Castletown (not named). Indicates quarried areas with trackways drawn inside. The 'New Road' climbs from Fortuneswell and continues along the top of West Cliff at Tout. 'Maggot Quarry' is marked. A track leads down to King's Pier and numerous tracks in East Weare lead to Dirdale (?) Pier. Also marked and named are Folly Pier, Church Hope Piers (three), Church Hope Chine Pier, Underbank Pier and 'Shipping Place' near Portland Bill. On the west coast is Gilberts Pier.

In Inmost Hay Field:

Strip 126 'Four Yards of Land' is 'Not yet quarried, but may fairly be presumed to be so at no very distant period.'

Strip 128 'West Yeates' is 'Rubble' and 'Worked out, but profit derived from Road and Rubble dues.'

Strip 129 adjoining is also 'Rubble' and 'Valuable for Road dues.'

Priory Ground:

'Not shewn on Map, four parcels of 'Rubble' land, 'Good Road Dues, and Public Railway Crane stands on part.'

Tout Field:

135 & 136 'Chappark', described as 'Rubble', 'Capable of receiving Rubble Dues.' 133 'In Purse's Chappark, 'Rubble'.

135a 'In Tout' single strip of 'Arable', 'Recently begun to be worked.'

* Many others indicate rubble areas (quarried out) or areas about to be quarried..... Marks windmills (not named) in Droop or Windmill Field, 'Old or Northmost Lighthouse', 'New Light House', Signal Post, Signal House at the Bill and Signal Post on the Verne.

1841:

Portland Tithe Map

[DRO T/PTD, on a CD]

[tracing of north of island, with additional details elsewhere]

Shows a similar boundary to the main quarried area. All these maps point to early quarrying from the cliffs in the Bowers area, for some reason never extended further south.

1850

Admiralty chart of Weymouth and Portland, by Capt Sheringham, Lieut Cox and Mr Taylor.

[Weymouth Reference Library]

Shows quarries all around north and at Portland Bill (with two sheds) and Longstone Ope, King Pier, Folly Pier, two windmills (symbols), 'High Light' and 'Low Light'.

1861:

Plan of Lands in the Isle of Portland Dorsetshire Intended to be Purchased by Her Majesty's Principal secretary of State for the War Dept., August 1861 [in Jackson, 1999, 26]

shows outlines of Yeates E and W limekilns, upper branches of Portland Railway including incline and East Drum, and Cottage & Stable.

1863/4:

Ordnance Survey 25-inch map by Capt Carey, published March 1864 [Portland Museum, a photocopy in 13 sheets] Surveyed 1863 Ordnance Survey 6-inch map [DRO?]

*1889:

Ordnance Survey 25-inch map

[extract covering northern Portland quarries published by Alan Godfrey Maps]

1889:

Ordnance Survey 10.56-feet sheet LVIII.7.25 revised for War Department only [Nothe Fort, Weymouth]

Shows C Battery, Balaclava Coastguard Station and Railway ('in construction')

1901:

Ordnance Survey 25-inch map [DRO]
Ordnance Survey 6-inch map [DRO?]

1920:

Portland Depot Quarries map (OS 25-inch) [DRO D49/10]

I have a photocopy of most of this map, covering The Grove and Admiralty Quarries area, printed in 1920.

1923:

Ordnance Survey 25-inch map

1929:

Ordnance Survey 25-inch map (surveyed 1927-27) [DRO & Alan Godfrey maps facsimiles]

1933:

Map of south part of Portland, with 'Quarry Lands ... controlled by The South Western Stone Co. Ltd.'

[in Portland Stone (South Western Stone Co. Ltd, 1933)

Map is useful in showing the wide distribution (and problems) of small quarry properties acquired by this company, all conforming the Portland strip fields.

1938:

Ordnance Survey 25-inch sheets LVIII 4, 7, 8, 11 & 12, War Department revision [Nothe Fort, Weymouth]

Shows part of King Barrow Quarries, Nicodemus Knob, Portland tramway and incline, Admiralty incline, King's Pier, Castletown Pier, stone saw mills at Chiswell, and old limekilns.

1959:

Ordnance Survey 25-inch map, SY 6872 and SY 6972 [Nothe Fort, Weymouth] Revised September 1959, published 1960.

Appendix 3. Secondary sources for Portland background, quarries, railways and industrial archaeology

Appendix 4. Published Photographs of Portland quarries and industrial archaeology

Anon, 'The Quarrying of Portland Stone', *Quarry Managers' Journal*, June 1962, 223-230

Quarries

p.225: A 'quarry' at Easton, shows at least 7 electric cranes. Not located or dated.

p. 227 (top): A quarry with 2 electric cranes near Easton. Not dated.

p.227 (btm): Excavator excavating overburden, with dumper lorry. Not located or dated.

p,228 (top): Excavator loading lorry with capstone. Not located or dated.

p.228 (btm): Conveyor from primary crusher to screen house and stockpile. Not located or dated.

p.229: Screen house and stockpile area. Not located or dated.

Transport

p.223: Red crane, near Portland Bill (caption says 'stone is being worked'). Not dated.

p.230: Loading system and Dutch coaster Antje at Castletown Pier. Not dated.

N. Bezzant, Out of the Rock..., Heinemann, 1980

Quarries

Plate 5 (btm): Measured and marked stone block of 42 cu ft

Plate 30 (top): view from Freshwater along coast to NE, with crane. Not dated [Herbert, Weymouth]

Plate 31: Lifting out a broken hand crane. 1893. No location.

Stone works

Plate 40 (btm): Bottomcombe masonry works after extensions and conversion to electricity in 1931 [Markus, Weymouth].

Plate 41 (top): Bottomcombe: grinding machine puts in a groove. No date. [Evan Jones, S. Dorset]

Plate 41 (btm): Drilling dowel-holes for fixing, at Bottomcombe works. No date.

Plate 42 (top): Bottomcombe works: twin-bladed secondary circular saw. No date.

Plate 42 (btm): Bottomcombe works: jointing off after planing. No date. [Evan Jones, S. Dorset]

Plate 47 (a): Masons at Portland tooling a Cross of Remembrance. No date.

Transport

Plate 5 (top): Drawing of horses with stone cart descending hill at Mallams

Plate 26: Barge May leaving Portland in 1972 [Bristol & West Photography]

Plate 28 (btm): Bottom of Merchants' railway incline. Not dated.

Plate 29: Incline at Verne Yeates, under bridges. Not dated.

Plate 30 (btm): Priory Corner with derrick and a stone truck on Merchants' Railway. No date [Herbert, Weymouth]

Plate 40 (top): Traction engine and two trailers. Poor view. No date.

D. Burnett, A Dorset Camera, Dovecote Press, 1974

Quarries

Plate 89: 'Convicts Quarry' [this is actually the granite quarry at Princetown Prison, Dartmoor!]

Transport

Plate 88: Incline on branch of Merchants' Railway before building the Verne fort, c.1855

T. Gosling, Britain in Old Photographs: Weymouth and Portland, Alan Sutton,

Photographs from Dorset County Museum collection:

Quarries

- p.119 (top): Lifting a block of Portland stone by crane and chain sling, summer 1966. Not located. [David Willis]
- p.119 (btm): pneumatic drilling holes for blasting cap, summer 1966. Quarry not located
- p.120 (top): Quarryman driving in plugs and feathers in a block, August 1966. Not located [David Willis]
- p.120 (btm): Quarryman driving in plugs and feathers in a block, August 1966. Not located [David Willis]
- p.121 (top): Quarryman driving in plugs and feathers in a block, August 1966. Not located [David Willis]
- p.121 (btm): Quarryman prising apart a block split with plugs and feathers, August 1966. Not located [David Willis]
- p.122 (top): Quarryman shaping a block with a big kivel, summer 1966. 'One of the Grove quarries'. [David Willis]
- p.122 (btm): Quarryman removing plugs and feathers, summer 1966. Not located [David Willis?]
- p.123 (top): Quarryman using pneumatic drill to make holes for plugs and feathers in a block, summer 1966. Not located [David Willis?]
- p.123 (btm): Collection of tools including large and small kivels. Not dated.

Stone yards

- p.117 (top): Masons inside F.J. Barnes' masonry shop at Wide Street; includes Jummy Durston, Tom Croad and Harry Hawkins. 1928.
- p.117 (btm): Bath & Portland Stone Firms' main shop of no.4 yard, Bottom Coombe. c.1950
- p.118 (top): masons' workshop. not located. (looks like older section of Top Yard)
- p.118 (btm): giant circular saw at work, 1965. Not located, but Bottomcoombe.

B. Hounsell, 'Portland and its Stone', *Mine & Quarry Engineering*, April 1952, 107-114

Quarries

- p.112: A quarryman's tools, displayed on a block.
- p.113: Quarrymen making a pit for cutting a block. Not located or dated.

K. Hudson, The Fashionable Stone, Adams & Dart, 1971

Quarries

Plate 10: Four men working a hand operated crane, during the 1930s. no location. **Stone works**

Plate 13: Diamond-tipped circular saw cutting stone at Portland works. no date and no location.

K. Hudson, *Industrial History from the Air*, Cambridge University Press, 1984 *Cambridge University aerial photographs*:

Quarries

Plate 9: Aerial view looking NE over Bowers, Trade, Tout, Inmosthay and beyond, December 1965 [CUC, AMN 74]

Plate10: Aerial view looking SE across Suckthumb and Coombefield quarries from Weston, June 1948 [CUC, AS 14]

P. Irvine, *Victorian and Edwardian Dorset from old photographs*, Batsford, 1977 Quarries

Plate 82: Portland quarry crew loading stone at Priory Corner, c.1900.

Stone works

- p.54 (lower): Easton Station, goods shed & loading gauge, derelict before track lifted, 22 July 1966

J.E. Mallory, 'Places and Products VIII. Portland Stone', *The Geographical Magazine*, vol. IX, no. 5, Sept 1939, 327-338

* None of these good photographs is dated, but presumably c.1938/9

Quarries

- p.330: A Portland Quarry, showing cranes, gullet, banks and horse with rubble truck. Informative, but not located or dated.
- p.331: stone being freed by the 'dog'. Not located or dated.
- p.332: block being scappled with kivels. Not located or dated.

Transport

p.333: Derrick crane at Priory Corner, witrh stone laden trucks on Merchants' Railway. Not located or dated

Masonry works

- p.334: stacks of finished masonry in yard with overhead traveller, for Imperial Airways Building, Not located or dated.
- p.335 (top): Frame saw at stone yard. Not located or dated.
- p.335 (middle): Circular diamond saw at stone yard. Not located or dated.
- p.335 (btm): Circular carborundum saw at stone yard. Not located or dated.
- p.336 (top); Planer at work on jamb for Wolverhampton Municipal Hall, Stone Yard. Not dated.
- p.336 (btm): Column being turned on giant lathe, Stone Yard. Not dated.
- p.337 (top): Three masons working on stones for Leeds Town Hall. Stone Yard. Not dated.
- p.337 (btm): Mason finishing stone for Leeds Town Hall. Stone Yard. Not dated. **Buildings**

pp329-330: London buildings in Portland stone: St. Paul's Cathedral, Bow Spire, Horse Guards' Parade, Somerset House, London University, Imperial Airways Terminus.

S. Morris, *Portland: An Illustrated History*, Dovecote Press, 1985

Quarries

- p.18: Drawing of Rufus Castle and ruins of St Andrews Church; squared blocks can be seen in background. S. Grimm, c.1791.
- p. 24: Wooden hand crane at Durdle Pier lowering a boat. no date. [same as Trim, 1991, Fig 3]
- p. 24: Two drawings of quarryman with tools and wedges, S. Grimm, c.1790
- p. 31: Drawing of stone merchants or quarrymasters taking a meal break near Rufus Castle, S. Grimm, c.1790
- p.33: Stone showing Wren's distinctive mark
- p.55: Drawing of quarrying at Verne Yeates (Priory Corner crane behind?), c.1865.
- p.95: Drawing of Convicts Quarry with overhead traveller, ILN, 1881.
- p.101: Quarry gangs beside a hand crane crudely adapted to steam power in the 1890s. No location.
- p.146: Lifting a stone block with dogs in an island quarry, 1960s. No location.

Stone works

- p.97: Convicts in stone masonry yard. 1909.
- p.147: Masons working on Corinthian capitals, Bottomcombe works, 1960s.

Transport

- p.55: Drawing of horses and cart with stone + sledge descending hill. No date. (S.Grimm?)
- p.56: Bottom of Merchants' Railway incline, c.1910
- p.56: Top of Merchants' Railway incline with truck about to descend. No date.
- p.57: Priory Corner, crane loading Merchants' Railway from traction engines. 1899.
- p.58: Loading stone barges at Castletown Pier. 1899.
- p.71: Merchants' Railway branch incline and bridges at Verne Yeates, c.1890.
- p.123: Traction engine and two stone trailers descending New Road hill, dated

'between the wars'.

Railway

p. 115: Easton Station. No date.

Foundry

p.104: Casting in interior of Easton Foundry. 1905.

Windmills

p.20: Drawing of north windmill tower with sails and tailpole.

Lighthouses

- p.37: Drawing of old Higher Lighthouse. No date.
- p.38: Drawing of Lower Light, shortly after construction in 1789 (S.Grimm?)
- p.118: Building Portland Lighthouse in 1905.
- p.80: Upper Lighthouse, as rebuilt in 1869
- p.80: Lower Lighthouse, as rebuilt in 1869

S. Morris, Portland Camera, Dovecote Press, 1990

Quarries

- plate 11: Portland Bill, showing cranes and quarries near Pulpit Rock. 1936.
- plate 12: View NE from top of Portland lighthouse, showing line of old tramway and quarry cranes at Butts and Cave Hole. 1930s.
- plate 41: Cove House Inn, Chiswell, with cranes on skyline at Verne Yeates and Tout; also Tout tips. 1890.
- plate 79: Hand crane and workers. N date or location.
- plate 80: Tipping over cliff near Priory, with rail wagon. c.1870.
- plate 81: Steam crane, converted from hand, with men. post 1890. No location.
- plate 82: A.G. Coombes cutting first turf at Silklake. 6 June 1910.
- plate 83: Three steel electric derricks (nearest by John A. Sangster, Aberdeen), 'by 1930s'. No location.
- plate 84: Typical quarry gang, 7 men and 3 dogs. No date or location.
- plate 85: Measuring and marking a stone block in paint. No date or location (near prison?)
- plate 116. Vertical aerial photo of Verne also shows Tout, Kingbarrow, Withiescroft and part of Inmosthay quarries. 1972.
- plate 128: Convicts at work in quarry near the Grove. No date. (same as Jackson, 1999, p.106 btm)

Stone works

- plate 99: Masons at Wide street works, 1920s.
- plate 100: Easton Masonry Co. workforce; carved facade for Sainsbury wing of National gallery, 1989-90
- plate 60: Aerial view of Easton, with railway, Bottomcombe works and France quarries. c.1960.

Transport

- plate 87: Priory Corner, with trucks and old crane. No date.
- plate 88: Priory Corner derrick with traction engine and stones. post 1927.
- plate 89: Team of Merchants' Railway horses with nosebags at Priory Corner. No date.
- plate 90: Three traction engines delivering trailers of stones at Priory Corner crane. 1920s?
- plate 91: Merchants' Railway at time of building Verne fort, 1877.
- plate 92: Incline and bridges of Merchants' Railway branches below Kings Barrow. No date.
- plate 93: Top of Merchants' Railway incline with loaded truck about to descend. No date.
- plate 95: Bottom of Merchants' Railway incline at Castletown. No date.
- plate 96: Stone pier at Castletown, looking inland. Stone trucks on quay. No date.
- plate 98. Fleet of Bath & Portland Stone Firms lorries outside stone works. 1957.

plate 86: F.J. Barnes' 2-ft gauge loco *Excelsior* of 1898 and tipper wagons for overburden. No date. [same as Jackson, 1999, 130 (top)]

Windmills

plate 107: 'Ploughing out by windmills', shows north tower behind, with stocks and sails and tailpole for turning cap. Not working. late 1890s?

S. Morris, Portland Then and Now, Dovecote Press, 2006

Transport

Plate 130. Old Lower Lighthouse

M. Smith, Railways of the Isle of Portland, Irwell Press, 1997

All photographs reproduced to a high quality. British Geological Survey prints also published in Stanier, 1995. Only the railway photographs relevant to the stone industry are listed here:

Quarries

- p.i: Suckthumb Quarry with steam cranes, etc, looking east. April 1930 [BGS]
- p.2: Steam channeller at work in Bowers Quarry. April 1930 [BGS]
- p.21: ridding at Suckthumb Quarry with tipper trucks on rails, April 1930 (poor caption) [BGS]

Stone works

- p.iv: Rubbing a stone at Easton masonry works. April 1930. [BGS]
- p.14 (btm): Bottomcombe works of B&PSFLtd with railway trucks and overhead traveller. April 1930.
- p.14 (top): Masons' workshop at Easton: pulleys and wheels. April 1930. [BGS]
- p.31 (btm): Portland Station, SE with sidings and F.J.Barnes' steam stone works [Lens of Sutton]

Transport

- p.20: Traction engine of B&PSFLtd with two trailers + stone, at Easton. April 1930. [BGS]
- p.14 (top): loading railway trucks at Quarry Tip siding, April 1930 [BGS]
- p.iv (btm): Easton station, footbridge and train from the south, 1930s
- p.2 (btm): trck with stone blocks descending Merchants' railway incline, n.d.
- p.4: site of exchange sidings at Castletown, 16 Jan 1965
- p.12 (top): Easton Station, looking north, c.1905-10 [J. Smith]
- p.12 (btm): Easton Station, looking south, with train, c.1930s [J. Smith]
- p.15 (btm): Easton Station, looking south, c.1905
- p. 17 (btm): End of Easton & Church Hope Railway in stone cutting, n.d. [H.C. Casserley]
- p.31 (btm): Portland Station, SE with sidings and F.J.Barnes' steam stone works [Lens of Sutton]
- p.34/35 (top): Old Portland terminus with stone crane, 27 March 1965 [C. Caddy]
- p.37: Footbridge at Easton Station, with train, looking N, 29 May 1939 [R.E. Tustin]
- p.38: Goods loco at Easton, with footbridge and Bloomfield Tce, ,looking S, spring 1962 [C. Caddy]

South Western Stone Co., Portland Stone, 1933

Quarries

- 1. Typical section of a Portland stone quarry
- 3. Boring trial hole to ascertain depth of stone beds
- 4. First mechanical excavator introduced into Portland. 1933.
- 5. The excavator commencing to dig its way down. 1933.
- 6. Perryfields Quarry: beginning of ridding operations; shows rail mounted steam crane and railway siding behind
- 7. Perryfields Quarry: removing overburden, and a natural gully
- 8. Electric compressor and driller at work
- 9. Quarry after blasting cap
- 10. Drilling holes in cap by compressed air operated by electric compressor
- 11. Channelling by the aid of a guarry bar (drill and broach) to form an artificial joint
- 12. Removing the roach, between the cap and whitbed
- 13. Full size panel of Perrycot (H bed) showing beauty of the grain and fossil formation
- 14. General view of a Perryfields Quarry, showing removal of rubble and cap.
- 15. Stack building in Cottonfields Quarries, with stone works behind.
- 16. General quarry view with mechanical excavator, and 'built up stack'.

- 17. View of a Cottonfields Quarry, with beds above Portland stone. North windmill beyond.
- 18. Breston Quarries, with depth of Portland beds and an electric crane.
- 19. View along a gullet between stack and face.
- 20. View showing dividing line between overburden and stone below.
- 21. Natural gully and cavity with stalactite formation
- 22. Gully and natural bed planes
- 23. Separations of beds by horizontal risings, with pits for lifting
- 24. Preparing to lift rock along 'cockle bed'.
- 25. Wedges inserted between pigs in pits cut along horizontal bedding plane
- 26. Five men driving in wedges in pig pits
- 27. Rock being cut vertically by wedges and scales
- 28. Quarry dog being inserted in readiness for lifting block
- 29. Lifting block from shell rising with a dog, ready for slinging
- 30. Block being lifted by chain sling and 15-ton crane to surface level or quarry bank
- 31. Block being landed on quarry bank.
- 32. Two men scappling a block
- 33. Inspection of block before despatch
- 34. Block, showing identification marks, being landed for transportation. Perryfields H Quarry. Offices behind.
- 35. Perryfields Quarry, showing one of loading depots. Railway trucks behind **Offices**
- 2. Quarry Offices at Portland (Perryfield House)

Transport

- 36. Loading direct from Cottonfields Quarry into railway trucks
- 37. Blocks from outlying quarries being motor hauled to Perryfields sidings
- 38. Making up a train load of Portland stone. Bottomcombe works behind
- 39. Train load of Portland stone leaving the quarries (at Cottonfields, probably backing dpown slope of siding to join main line)

P. Stanier, Quarries and Quarrying, Shire Publications, 1985

Quarries

cover: Weston Quarry, with steel electric derrick. Not dated, but it is June 1984 [since backfilled]

p.7: Suckthumb Quarry, steam crane building a bench. April 1930 [BGS A4976]

P. Stanier, Quarries of England and Wales, Twelveheads Press, 1995

Photographs from British Geological Survey

Quarries

p.74: Stone quarry at Easton: hand derrick and stones on railway truck. June 1912 [BGS A1419]

p.75: Longacre Quarry, looking WNW; six cranes. June 1912 [BGS A1422]

p.75: Quarry jack at Bowers Quarry, April 1930 [BGS A4972]

p.76: Suckthumb Quarry with steam cranes, etc, looking east. April 1930 [BGS A4952]

p.77: Silklake Quarry, 5 steel cranes, rubble but no face visible. April 1930 [BGS A4974]

p.77: Steam channeller at work in Bowers Quarry, cuts c.4ft deep. April 1930 [BGS A4981]

p.78: St Paul's Quarry, splitting a block with scales and wedges. April 1930 [BGS A4987]

Stone works

p.79: Bottomcombe works of B&PSFLtd with railway trucks and overhead traveller. April 1930. [BGS A4997]

- p.80: Frame saw at Easton sharp sand added. April 1930. [BGS A4998]
- p.80: Coulter planing machine at Easton. April 1930. [BGS A5004]
- p.81: Rubbing a stone at Easton masonry works. April 1930. [BGS A5006]
- p.82: Masons' workshop at Easton: pulleys and wheels. April 1930. [BGS A5008] **Transport**
- p.78: Traction engine of B&PSFLtd with two trailers + stone, at Easton. April 1930. [BGS A4995]

P. Stanier, *Dorset's Industrial Heritage*, Twelveheads Press, 1989 Quarries

p.31: Suckthumb Quarry, derelict timber hand crane, 1989 [P. Trim]

P. Stanier, *Discover Dorset: The Industrial Past*, Dovecote Press, 1999 Quarries

p.12: Longacre Quarry in 1912 [same as Stanier 1995, 75: BGS A1422] **Transport**

p. 76: two old cranes at Longstone Ope.

P. Trim, The Quarrying of Portland Stone, 1991

Quarries

- Fig 1: Pigs and wedges in place ready for 'reaming up'. No date or location.
- Fig 2: Stone being split with scales and wedges. No date or location.
- Fig 4: Coastal quarries at Portland Bill, looking s.w. at least 4 cranes. No lighthouse, so pre-1906
- Fig 5. Cliff edge cranes at Pulpit rock and Portland Bill, with lighthouse. Earlier than Morris, 1990, plate 11
- Fig 14. Convict quarries; no cranes; jack. Poor quality. No date.
- Fig 15. Convict quarries with many cranes, postcard not dated.
- Fig 16. Typical wooden hand derrick crane, with 4 men. No date.
- Fig 19. Coastal quarries at Longstone Ope to Breston [same as Jackson, 1999, 136 (btm)]

Transport

Fig 3: Wooden hand crane at Durdle Pier lowering a boat. No date. [same as Morris, 1985, p.24]

Appendix 5. Digital images of historic illustrations and photographs –not included

This study has also included a digital compilation of over 200 of the most useful photographs and illustrations. This is ongoing.
