		TG 49845	19802

COUNTY Norfolk
DISTRICT Great Yarmouth
PARISH Winterton-on-Sea
LOCATION Area of carpark for the beach, N and S of the Coast Guard lookout post (which is built on top of the cubes), Winterton-on-Sea.

DESCRIPTION

TYPE	DATE
Field Visit	2002/08/02

Anti-tank cubes, now forming the edges of a beach carpark. These are set edge to edge, and are some 5ft x 5ft x 5ft in size. The coastguard lookout post has its feet set on four of the cubes. Owing to cliff erosion the northernmost end of the principal double line of cubes has tumbled onto the beach below, and others are buried by sand. The westernmost cubes of the joining single line also appear to have been removed. Some 68 cubes survive in a visible state today (including the fallen ones) out of an original 98 (approx.).

TYPE	DATE
Air Photograph	1940/12/17

Lines of anti-tank cubes that were developed in 1940 and 1941. In August 1940 there was a single line of cubes (about 20 in all) with a pillbox at the N end [see UORN]. By September 1940 the lines had been lengthened, so that they appeared as two distinct, but joined, lines. By 1944 (and probably much earlier, 1941?) the

principal line had become a double row of cubes, crossing Beach Road for which a gap was left. [Bird in 'Silent Sentinels' states that the second line of cubes to make the double line was because the first had sunk into the sands]. The cubes were placed point to point. What appear to be fences (of barbed wire?) were constructed on the beach, joining at one point with the lines of cubes. The rows of cubes were still there complete until 1973 when a car park was made in front of them. From 1979 the seawards rows were being lost to erosion, and by 1981 almost all the N blocks had disappeared.

TYPE	DATE
Document	1941/07/15

This is probably the same site as listed in a documentary source in the 'Winterton Gap' as a roadblock - 56 x 5ft cubes, 7 rails bent.

TYPE	DATE
Map	1977/ __/ __

Double row of anti tank cubes plotted from OS 1:2500 sheet. A further single side row runs from TG 4984519802 to TG 4988019811.

TYPE	DATE
Document	1950/ __/ __

94 x concrete blocks detailed on map of post-war coastal survey of defences.

TYPE	DATE
Field Visit	2001/10/ __

A twin line of anti-tank cubes running parallel to the coast to the rear of the dunes for about 100m before turning almost due E towards the sea at which point they previously disappeared into the sand. Recently, many more cubes have been exposed by erosion and fallen onto the beach. Some inscriptions on the cubes indicate construction in 1941. The number '575' can be seen stencilled on some of the cubes. This is either a beach sector number, or just possibly the company number of the Royal Engineers unit doing the construction work.

TYPE	DATE
Field Visit	2000/06/15

Recorder revisits site to note the names appearing in the main on the landward row of the two rows of cubes, with one from the seaward row. The dates suggest that there was over a year's gap in the construction of the two rows. On all the cubes are the remains of wires for camouflage netting to be attached [?].

Pte Vickers 1941
 Jack Hindle
 A. Claptian [or Ciaptian] 15th Sept. 1941
 Pte F. Howell 18.9.41
 Pte Russell 1941
 Pte. D. Wells 18.9.41
 G E 31 [?]

TYPE	DATE
Field Visit	1999/10/16

Working from the SE end after 4 cubes there is a gap providing access to the beach. Then there is a continuing double row which finally disappears into the dunes. The dunes are subject to movement and may have covered further blocks at this end. At the gap for beach access next to the most northern of the double row of 4 cubes is a large rectangular concrete block with two large steel girders projecting out. At about cube number 18 towards the northern end of the long double row is a single row of cubes running at a right angle to the W: there are nine cubes in this line.

[Henry Wills lists 80 anti-tank blocks in the area of TG 498197].

CONDITION

Good

THREATS

The coastal erosion will destroy more of the in situ blocks before long.
