- 78 **Farthingloe, Dover**, Kent

Note: The Defence Areas were numbered at the commencement of the Project for ease of reference. The order of the numbers in no way represents their position topographically, or their place in the defence strategy of 1940/41. Of the seventy-eight Defence Areas originally selected for research, eleven were subsequently found not to satisfy one or more of the various criteria [see 'Introduction and Overview'] and were abandoned. These areas are shown in the above list as 'Number not used' .
