<p><b>Summary description of evidence</b> Prehistoric features located in Geophysics (possible Bronze Age barrows in HAN205 and possible Iron Age enclosure in HAN217). Iron Age enclosure excavated by Webster beneath the Macellum. Artefacts include Bronze Age incense cup, Neolithic and Bronze Age flintwork and Iron Age coins.</p>				 <p>Figure 4: Plan of Wroxeter showing insulae numbers.</p>		 <p>Gradiometry plot for insula xi (HAN511) showing part of possible Bronze Age barrow (top).</p>	
<p><b>Designation</b> The most difficult of all phases to characterise as it is the most deeply buried. The Bronze Age barrow cemetery may be associated with the establishment of the ford while the enclosures suggest the fortress was founded on existing cleared and farmed land.</p>							
<p><b>Statement of Significance</b> The key period for characterising our understanding of pre-Roman Wroxeter.</p>							
<b>Period</b>		Pre-Roman (ca.1500 BC-ca. AD 47)					
<b>Documentation</b>		G. Webster 2002 <i>The Legionary Fortress at Wroxeter. Excavations by Graham Webster, 1955-85</i> English Heritage Archaeol Rep 19, 17 R. White and V. Gaffney (forthcoming) <i>Wroxeter, The Cornovii and the Urban Process. Volume 2: Characterising the City</i>					
<b>Assessment of importance/significance</b>							
<b>Criteria</b>	<b>High</b>	<b>Med.</b>	<b>Low</b>				
<b>Rarity</b>	✓						
<b>Group value</b>	✓						
<b>Survival/condition</b>	✓			Deeply buried – more than 2m in places.			
<b>Fragility/vulnerability</b>		✓		Damaged by later (Roman) activity			
<b>Diversity</b>	✓			Covers a wide date spectrum of activity and probably also types of activity.			
<b>Potential</b>	✓						
<b>Amenity value</b>			✓	Not visible to the public

**Summary description of evidence**  
Geophysical evidence collected from all except the south-west corner where the museum car park is located. Stone-founded houses visible in both geophysics and aerial photographs. Excavations of the south frontage in the baths basilica excavation and of the levels beneath the former Smithy (HAN100).

**Designation**  
Insula ii of the Roman city. Evidence for town houses and also for the aqueduct carrying water to the baths (diagonal line).

**Statement of Significance**  
Overlies the fortress and is one of the core insulae of Wroxeter's town centre.

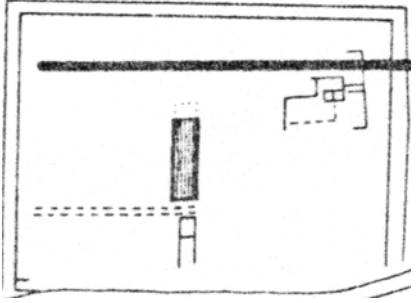

**Period**  
Roman (1<sup>st</sup> – 6<sup>th</sup> cent.)

**Documentation**  
D.R. Wilson 1984 *The Plan of Viroconium (Wroxeter)* *Antiquity* 58, 117-20

<p><b>Summary description of evidence</b> Although surveyed by gradiometry little was visible in this survey. The aerial photographs show a possible military granary and the intervallum road of the fortress. The visibility of these remains, the larger size of the insula and evidence for a surrounding wall, suggest this area was open during the life of the town.</p>		 <p>Figure 4: Plan of Wroxeter showing insulae numbers.</p>		 <p>Plan of HAN503 from Wilson 1984.</p>			
<p><b>Designation</b> It is suggested that this insula was the town cattle market (<i>forum boarium</i>) located here at the highest point of the town and adjacent to the source of the town's water supply.</p>							
<p><b>Statement of Significance</b> If correctly identified, this will be the only known <i>forum boarium</i> in Britain.</p>							
<b>Period</b>		Roman (1 <sup>st</sup> -6 <sup>th</sup> cent.)

<b>Summary description of evidence</b> Little geophysical or aerial photograph evidence as virtually the whole insula has been excavated to reveal the town baths and associated macellum. Abundant artefactual evidence with key archive of late / post-Roman phase of national importance.		 <p style="font-size: 0.8em; margin-top: 5px;">Figure 4. Plan of Wroxeter showing insulae numbers.</p>		 <p style="text-align: right; margin-top: 5px;">Plan of HAN505 from Wilson 1984</p>			
<b>Designation</b> The public baths on insula v. Initially part of the fortress, some buildings of which have been excavated then the site of the baths which was completed in the mid 2 <sup>nd</sup> cent. And survived until the end of the 5 <sup>th</sup> cent. There was then evidence of late / post-Roman occupation in Roman fashion.							
<b>Statement of Significance</b> The only complete public baths visible in the country.							
<b>Period</b>		Roman (1 <sup>st</sup> - 6 <sup>th</sup> cent.)

<p><b>Summary description of evidence</b> Geophysics and aerial photographs show a number of buildings, evidently stone-founded whose plans indicate residential houses. Excavation has been limited to a small area dug by Barker in advance of road widening. This demonstrated good survival of the levels, including possible post-Roman evidence.</p>			 <p>Figure 4: Plan of Wroxeter showing insulae numbers.</p>		 <p>Plan of HAN506 from Wilson, 1984</p>	
<b>Designation</b> Insula vi within the Roman city but also probably includes either the <i>principia</i> or <i>praetorium</i> of the fortress.						
<b>Statement of Significance</b> One of the core insula of the city. Virtually untouched in terms of excavation						
<b>Period</b>	Roman (1 <sup>st</sup> -6 <sup>th</sup> cent.)					
<b>Documentation</b>	P. Barker 1968 Road widening at Wroxeter, 1964 Trans Shropshire Arch Soc 58.2, 117-21 D.R. Wilson 1984 The Plan of Viroconium (Wroxeter) <i>Antiquity</i> 58, 117-20 R. **Summary description of evidence**  
No known excavations but geophysics and aerial photographs suggest a relatively built up insula.

Figure 4: Plan of Wroxeter showing insular numbers.

Plan of HAN507 from Wilson 1984

**Designation**  
Insula vii of the city but also overlies part of the fortress. The buildings suggest a strongly residential area.

**Statement of Significance**  
Widespread evidence of stone-founded buildings suggests a relatively high-status insula,

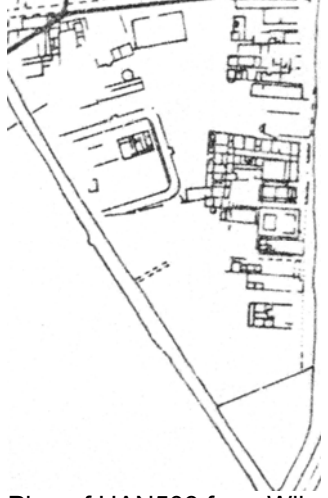

**Period** Roman (1<sup>st</sup>-6<sup>th</sup> cent.)

**Documentation** D.R. Wilson 1984 *The Plan of Viroconium (Wroxeter)* *Antiquity* 58, 117-20  
R. White and V. Gaffney (forthcoming) *Wroxeter, The Cornovii and the Urban Process. Volume 2: Characterising the City*

<p><b>Summary description of evidence</b> Excellent evidence from aerial photographs and geophysics indicate that despite the large-scale excavations carried out by Bushe-Fox, 1912-14, the remains still survive in good condition. Artefactual evidence is good but restricted in significance by the relatively poor record and curatorial control over the resource.</p>		 <p>Figure 4: Plan of Wroxeter showing insulae numbers.</p>		 <p>Plan of HAN508 from Wilson 1984</p>		
<p><b>Designation</b> Insula viii of the city but also overlies the annexe to the fortress, parts of which were explored by Bushe-Fox. Possible evidence of a public entertainment building on the east side but the function of this structure is unclear.</p>						
<p><b>Statement of Significance</b> An important insula in demonstrating the quality of the surviving evidence from Wroxeter.</p>						
<b>Period</b>		Roman (1 <sup>st</sup> -6 <sup>th</sup> cent.)				
<b>Documentation</b>		Revd. Leighton 1789 Memoir concerning the Roman Baths discovered in the year 1788, at Wroxeter ... <i>Archaeologia</i> 9, 323-8 J P Bushe-Fox 1913-16 Excavations on the site of the Roman Town at Wroxeter Shropshire <i>Rep Res Ctte Soc Antiq London</i> 1, 2 & 4 D.R. <p><b>Summary description of evidence</b> Good evidence from aerial photography and from geophysics demonstrate survival of extensive remains. Only one known excavation, by K. Colls in 2005, as a training excavation. This demonstrated good survival of the strata.</p>			 <p>Figure 4: Plan of Wroxeter showing insulae numbers.</p>		 <p>Plan of HAN510 from Wilson 1984</p>	
<p><b>Designation</b> Site of insula x. Predominantly appears to be higher status housing (as it is stone-founded). Thought to be the site of a possible church but its evaluation in 2005 unable to substantiate this claim.</p>						
<p><b>Statement of Significance</b> One of the key insulae in the centre of the site where the remains of the town of the 2<sup>nd</sup>-5<sup>th</sup> cent era predominates. These remains mask the fortress phase when this insula was the site of the <i>principia</i>. (Webster suggests the colonnade of this building is visible in the plot above.) Possible presence of post-Roman remains too.</p>						
<b>Period</b>		Roman (1 <sup>st</sup> -6 <sup>th</sup> cent.)

**Site Number: 670**

<b>Location</b> Wroxeter Roman City, Shropshire		<b>Grid.ref.</b> (centred) SJ56630840		<b>Heritage Asset Type</b> BURIED ASSETS		<b>Heritage Asset Number:</b>  <b>513</b>	
<b>Associated HER Nos.</b> 06464 MSA13124		<b>AMP ref.</b>		<b>NT ref.</b>		<b>EH Ref. No.</b> <b>Compiler / Date</b> RHW July 2010	
<p><b>Summary description of evidence</b> Good evidence from geophysics using a variety of technologies and from aerial photographs but no known excavation.</p>		 <p>Figure 4: Plan of Wroxeter showing insulae numbers.</p>		 <p>Plan of HAN513 from Wilson, 1984</p>			
<p><b>Designation</b> Site of insula xiii. The distinctive plan dominating the west side of the insula is suggestive of a <i>mansion</i> which appears to date from the early civic period. It is one of the few buildings that can be assigned to that period. Its bath house is particularly prominent.</p>							
<p><b>Statement of Significance</b> Of great importance for exploring the early phases of the town. Will also have evidence for the fortress and later civil phases.</p>							
<b>Period</b>		Roman (1 <sup>st</sup> -6 <sup>th</sup> cent.)					
<b>Documentation</b>		D.R. Wilson 1984 <i>The Plan of Viroconium (Wroxeter)</i> <i>Antiquity</i> 58, 117-20 R. White and . Barker 1998 <i>Wroxeter. Life and Death of a Roman City</i> , 75-6, fig.38 R. White and V. Gaffney (forthcoming) <i>Wroxeter, The Cornovii and the Urban Process. Volume 2: Characterising the City</i>

<b>Summary description of evidence</b> Good evidence from geophysics but poor aerial photographic coverage. No known excavation.			 <p>Figure 4: Plan of Wroxeter showing insulae numbers.</p>		 <p>Plan of HAN514 from gradiometry survey (Gaffney 2000)</p>	
<b>Designation</b> Site of insula xiv. Little can be said of the evidence here but the fortress must lie beneath and there is some structural evidence of housing.						
<b>Statement of Significance</b> Important as an element of the fortress and town close to its core.						
<b>Period</b>	Roman (1 <sup>st</sup> -6 <sup>th</sup> cent.)					
<b>Documentation</b>	D.R. Wilson 1984 The Plan of Viroconium (Wroxeter) <i>Antiquity</i> 58, 117-20 C. Gaffney et al. 2000 Large-scale systematic fluxgate gradiometry at the Roman City of Wroxeter <i>Archaeol Prospection</i> 7.2, 81-99 R. White and V. <b>Associated HER Nos.</b> 06438 MSA13098		<b>AMP ref.</b>		<b>NT ref.</b>		<b>EH Ref. No.</b>	
<b>Compiler / Date</b> RHW July 2010							
<p><b>Summary description of evidence</b> A complex area as it is contiguous with <a href="#">HAN529</a>. The gradiometry survey and aerial photographs show a densely built up frontage of houses and shops but there has been no excavation here.</p>		 <p>Figure 4: Plan of Wroxeter showing insulae numbers.</p>		 <p>Plan of HAN515 from gradiometry survey (Gaffney 2000); see <a href="#">HAN529</a></p>			
<p><b>Designation</b> Site of insula xv. The dense settlement suggests this is an important part of the town. This activity might be related to the fact that the insula sits between the forum and the river.</p>							
<p><b>Statement of Significance</b> An ill-defined insula but of seeming importance. May have evidence for a military phase as part of an annexe to the fortress.</p>							
<b>Period</b>		Roman (1 <sup>st</sup> -6 <sup>th</sup> cent.)					
<b>Documentation</b>		<p>D.R. Wilson 1984 The Plan of Viroconium (Wroxeter) <i>Antiquity</i> 58, 117-20  C. <b>Summary description of evidence</b> Excellent coverage from aerial photographs as well as good results from the geophysics. No known excavation unless this is the site of the 1701 excavation of a bath house.			 <p>Figure 4: Plan of Wroxeter showing insulae numbers.</p>		 <p>Plan of HAN516 from Wilson 1984</p>	
<b>Designation</b> Site of insula xvi. The extensive evidence demonstrates the existence of a number of town houses here but the depth of stratigraphy is uncertain as this lies outside of the fortress defences. It is suggested by Webster that this was part of the <i>canabae</i> (military-controlled area outside fortress) but this is unproven.						
<b>Statement of Significance</b> Potentially an important area for exploring the relationship between the Roman army and the native population in the early stages of the town's occupation.						
<b>Period</b>	Roman (1 <sup>st</sup> -6 <sup>th</sup> cent.)					
<b>Documentation</b>	D.R. Wilson 1984 The Plan of Viroconium (Wroxeter) <i>Antiquity</i> 58, 117-20 G. Webster 1988 Wroxeter (Viroconium) IN G. Webster (ed.) <i>Fortress into City</i> , 132-6 R. <b>Summary description of evidence</b> Fair evidence from geophysics but poor aerial photographic coverage. Close to the site of Houghton's Cistern excavation.		 <p>Figure 4: Plan of Wroxeter showing insulae numbers.</p>		 <p>Plan of HAN517 from gradiometry survey (Gaffney 2000)</p>		
<b>Designation</b> Site of insula xvii. Lies beyond the fortress' northeast corner on the crest of the Bell Brook valley. Difficult to establish what kind of occupation there might be here.						
<b>Statement of Significance</b> Important as the site where Wroxeter's aqueduct entered the town.						
<b>Period</b>	Roman (1 <sup>st</sup> -6 <sup>th</sup> cent.)					
<b>Documentation</b>	<p>J. Houghton 1965 A Water Cistern at Viroconium (Wroxeter) <i>Trans Shropshire Archaeol Soc</i> 58.1, 19-26</p> <p>D.R. <p><b>Summary description of evidence</b> Aerial photographic coverage is rather poor but the geophysics demonstrates a wealth of activity here, at a point just immediately within the fortress' north-east corner. This area was trenched by Johnson in 1975-6.</p>			 <p>Figure 4: Plan of Wroxeter showing insulae numbers.</p>		 <p>Plan of HAN518 from gradiometry survey (Gaffney 2000)</p>	
<b>Designation</b>						
Site of insula xviii. The evidence indicates fortress occupation continuing into the civil period. Lies immediately to the north of the east gate.						
<b>Statement of Significance</b>						
Another element of the fortress and probably significant remains associated with the nearby town gate.						
<b>Period</b>		Roman (1 <sup>st</sup> -6 <sup>th</sup> cent.)				
<b>Documentation</b>		<p>D.R. Wilson 1984 The Plan of Viroconium (Wroxeter) <i>Antiquity</i> 58, 117-20  C. <p><b>Summary description of evidence</b>                  Poor aerial photographic coverage with the exception of a single building. The gradiometry survey data (see HAN522) suggests more activity is present but not with great clarity.</p>			 <p>Figure 4: Plan of Wroxeter showing insulae numbers.</p>		 <p>Building on HAN523 as shown on Wilson 1984.</p>	
<p><b>Designation</b>                  Site of insula xxiii. Appears to be residential and unlikely to be much underlying from the military phase as it lies outside the fortress defences. The building was excavated by Houghton but little record was kept.</p>						
<p><b>Statement of Significance</b>                  The excavation, although of poor quality, demonstrates good survival of remains in this part of the monument.</p>						
<b>Period</b>		Roman (2 <sup>nd</sup> -6 <sup>th</sup> cent.)				
<b>Documentation</b>		C. Gaffney et al. 2000 Large-scale systematic fluxgate gradiometry at the Roman City of Wroxeter <i>Archaeol Prospection</i> 7.2, 81-99 J. Houghton and P. <p><b>Summary description of evidence</b> Poor aerial photographic and gradiometry evidence for this insula. One or two isolated structures are all that can be seen. Lies beyond the legionary defences. No known excavations</p>			 <p>Figure 4: Plan of Wroxeter showing insulae numbers.</p>		 <p>Plan of HAN524 from Wilson 1984</p>	
<b>Designation</b>						
Site of insula xxiv. Seems to be a relatively open and undeveloped part of the town with isolated houses.						
<b>Statement of Significance</b>						
An area of apparently limited activity but could be associated perhaps with food production (market gardening, etc). Note that part of this insula has not been ploughed in recent times.						
<b>Period</b>		Roman (2 <sup>nd</sup> – 6 <sup>th</sup> cent.)				
<b>Documentation</b>		D.R. Wilson 1984 The Plan of Viroconium (Wroxeter) <i>Antiquity</i> 58, 117-20 C. <p><b>Summary description of evidence</b> Only the eastern half of this insula is visible, the remainder being under the houses and gardens of the village. Some evidence of buildings can be seen on aerial photographs and the gradiometry survey but these fields have been under pasture since the 18<sup>th</sup> century as Glebe lands. The northern end of the insula was the site of the discovery of a mosaic in 1827.</p>		 <p>Figure 4: Plan of Wroxeter showing insulae numbers.</p>		 <p>Plan of HAN526 from Wilson 1984</p>		
<p><b>Designation</b> Site of insula xxvi. Difficult to characterise but the evidence suggests an area of isolated houses set within gardens.</p>						
<p><b>Statement of Significance</b> Likely to be a good area of preservation of the archaeology with some evidence from excavations of good quality remains.</p>						
<b>Period</b>		Roman (2 <sup>nd</sup> – 6 <sup>th</sup> cent.)

<p><b>Summary description of evidence</b> A complex area set within earthworks (HAN311). Excavations have identified very deep deposits associated with the Roman road running north-east – south-west across the site and the pipeline excavations found evidence for very early Roman activity as well as evidence for terracing of the later Roman deposits, perhaps to create the platforms for medieval houses.</p>		 <p>Figure 4: Plan of Wroxeter showing insulae numbers.</p>		 <p>Plan of HAN527 and 528 from gradiometry (Gaffney 2000)</p>			
<p><b>Designation</b> Site of insula xxvii. Extensive remains surviving to over 1m in places demonstrating a complex area of occupation and industry (glassworking) associated with traffic around the ford.</p>							
<p><b>Statement of Significance</b> Key area for understanding the early history of Wroxeter as a civilian settlement and its later development around the ford.</p>							
<b>Period</b>		Roman (1 <sup>st</sup> – 6 <sup>th</sup> cent.)					
<b>Documentation</b>		<p>C. Gaffney et al. 2000 Large-scale systematic fluxgate gradiometry at the Roman City of Wroxeter <i>Archaeol Prospection</i> 7.2, 81-99  R. <p><b>Summary description of evidence</b> Aerial photographic evidence is limited but the gradiometry survey and excavation demonstrate good survival of the archaeology here and especially so in relation to the glassworks excavation.</p>		 <p>Figure 4: Plan of Wroxeter showing insulae numbers.</p>				
<p><b>Designation</b> Site of insula xviii. Where excavation has taken place, good survival has been demonstrated. Occupation here is likely to be industrial and low status housing / shops associated with the vicus of the fortress and then the settlement around the ford</p>						
<p><b>Statement of Significance</b> An important insula for understanding the earliest phases of civilian settlement in the town and its developing economy.</p>						
<b>Period</b>		Roman (1 <sup>st</sup> – 6 <sup>th</sup> cent.)

<b>Compiler / Date</b> RHW July 2010							
<p><b>Summary description of evidence</b> An impressive area of dense aerial photographic and gradiometry / GPR plots. The plan of a very large town house dominates the western half of the plot and will have commanded a view over the Severn plain to the west. Beneath, the curving ditches of a military annexe can be seen. This is known to be about 2m below the surface from the GPR survey. No known excavations.</p>		 <p>Figure 4: Plan of Wroxeter showing insulae numbers.</p>		 <p>Plan of HAN529 &amp; 215 from Wilson 1984</p>			
<p><b>Designation</b> Site of insula xxix. One of the more prestigious areas of housing in Wroxeter and, before then, site of the military annexe associated with the fortress.</p>							
<p><b>Statement of Significance</b> Clearly an important and significant insula as it contains the largest town house known in Wroxeter</p>							
<b>Period</b>		Roman (1 <sup>st</sup> – 6 <sup>th</sup> cent.)					
<b>Documentation</b>		C. Gaffney et al. 2000 Large-scale systematic fluxgate gradiometry at the Roman City of Wroxeter <i>Archaeol Prospection</i> 7.2, 81-99 R. White and V. Gaffney (forthcoming) <i>Wroxeter, The Cornovii and the Urban Process. Volume 2: Characterising the City</i>

<p><b>Summary description of evidence</b> Extensive aerial photographic and gradiometry information. The clarity of the photographs is excellent – in some individual hypocausts can be seen. Despite this, none of the remains have been excavated. The dark line defines the southern edge of the Bell Brook valley where there was a prominent earthwork of a bank and ditch that was bulldozed in the 1960s. This will have severely damaged the archaeology in this area.</p>			 <p>Figure 4: Plan of Wroxeter showing insulae numbers.</p>		 <p>Plan of HAN530 from Wilson 1984</p>	
<p><b>Designation</b> Site of insula xxx. Apparently an area of prestigious town houses. Thought to be part of the <i>canabae</i> of the fortress (see <a href="#">HAN516</a>).</p>						
<p><b>Statement of Significance</b> An important insula for demonstrating the quality of the remains in the town and their visibility even without excavation.</p>						
<b>Period</b>		Roman (1 <sup>st</sup> – 6 <sup>th</sup> cent.)				
<b>Documentation</b>		<p>D.R. Wilson 1984 The Plan of Viroconium (Wroxeter) <i>Antiquity</i> 58, 117-20  G. Webster 1988 Wroxeter (Viroconium) IN G. Webster (ed.) <i>Fortress into City</i>, 132-6  C. <b>Associated HER Nos.</b>		<b>AMP ref.</b>	<b>NT ref.</b>		<b>EH Ref. No.</b>	<b>Compiler / Date</b> RHW July 2010
<p><b>Summary description of evidence</b> An area of poor aerial photographic coverage with some evidence from the gradiometry survey. The extreme topography of the Bell Brook valley – 11m deep in places – means that this area cannot have been extensively built up. No known excavations.</p>			 <p>Figure 4: Plan of Wroxeter showing insulae numbers.</p>		 <p>Plan of HAN531 from the gradiometry survey (Gaffney 2000)</p>	
<p><b>Designation</b> Site of insula xxxi. Difficult to understand how this area was used within the town but may have had a role in agricultural production. Very little structural evidence but there could be alluvium in places masking activity. The northern frontage appears to have some development of low status housing.</p>						
<p><b>Statement of Significance</b> An interesting insula for showing the diversity of remains within the town.</p>						
<b>Period</b>		Roman (2 <sup>nd</sup> -6 <sup>th</sup> cent.)				
<b>Documentation</b>		C. Gaffney et al. 2000 Large-scale systematic fluxgate gradiometry at the Roman City of Wroxeter <i>Archaeol Prospection</i> 7.2, 81-99 R. White and V. Gaffney (forthcoming) <i>Wroxeter, The Cornovii and the Urban Process. Volume 2: Characterising the City</i>

**Summary description of evidence**  
Excavated evidence for numerous cremations and the find spot of the majority of tombstones found at Wroxeter. In use from the 1<sup>st</sup> cent. With the latest tombstone that of Cunorix (ca.500).

Figure 4: Plan of Wroxeter showing insulae numbers.

Part of HAN550 as shown in Johnson 1862

**Designation**

Middle Crows Green cemetery / Wheatfield cemetery. Seemingly in use throughout the Roman period.

**Statement of Significance**

The site of the most important of Wroxeter's cemeteries.

**Period**

Roman (1<sup>st</sup> - 6<sup>th</sup> cent.)

**Documentation**

T. Wright 1872 *Uriconium*, 340-2  
H. Johnson 1862 The Excavations at the cemetery, *Uriconium Gentleman's Magazine* 132.1, 398-405

<p><b>Summary description of evidence</b> In occupation terms probably limited to the existing village clustered around the ford and the church. The remainder of the town was under cultivation as shown by the evidence for ridge and furrow cultivation in the lines of roads, in geophysics, etc. The baths site (Old Work) was probably in use as a medieval barn.</p>			 <p>Figure 4: Plan of Wroxeter showing insulae numbers.</p>		 <p>HAN555 as shown on the Rocque map of 1756, just before enclosure</p>	
<b>Designation</b> The medieval settlement of Wroxeter village						
<b>Statement of Significance</b> Very important for telling the whole of the story at Wroxeter and the significant transmission of the heritage assets.						
<b>Period</b>		Medieval, ca. AD 650(?) - 1500				
<b>Documentation</b>		R. White & P. Barker 1998 <i>Wroxeter. Life and Death of a Roman City</i> , 137-150				
<b>Assessment of importance/significance</b>						
<b>Criteria</b>	<b>High</b>	<b>Med.</b>	<b>Low</b>			
<b>Rarity</b>		✓				
<b>Group value</b>	✓					
<b>Survival/condition</b>		✓				
<b>Fragility/vulnerability</b>			✓			
<b>Diversity</b>	✓					
<b>Potential</b>	✓					
<b>Amenity value</b>	✓			Important for conveying the wider story of Wroxeter and its evolution / survival.

<p><b>Summary description of evidence</b> Extensive area of cropmarks covering much of the field immediately north of the town rampart (HAN309) and to the west of the Whitchurch road (HAN400). The earthworks appear to comprise trackways that apparently run beneath the town rampart and must thus pre-date it. Also visible are marching camps probably associated with Legionary activity and a possible enclosed cemetery.</p>			 <p>Figure 4: Plan of Wroxeter showing insulae numbers.</p>		 <p>The Norton cropmarks (HAN556) as plotted by English Heritage</p>	
<b>Designation</b> Extensive extramural settlement of Roman date some of which certainly pre-dates the town.						
<b>Statement of Significance</b> Extramural settlement evidence of this kind is extremely rare nationally and its preservation from current ploughing regimes must be seen as a high priority.						
<b>Period</b>		Roman (1 <sup>st</sup> cent – 4 <sup>th</sup> cent.?)				
<b>Documentation</b>		H. Welfare and V. Swan 1995 <i>Roman Camps in England. The Field Archaeology</i> , 159 R. White & P. Barker 1998 <i>Wroxeter. Life and Death of a Roman City</i> , 67				
<b>Assessment of importance/significance</b>						
<b>Criteria</b>	<b>High</b>	<b>Med.</b>	<b>Low</b>			
<b>Rarity</b>	✓					
<b>Group value</b>	✓					
<b>Survival/condition</b>		✓		Uncertain. Under the plough but apparently still surviving as has been demonstrated in recent geophysical surveys		
<b>Fragility/vulnerability</b>	✓			Needs investigation as a matter of urgency		
<b>Diversity</b>	✓					
<b>Potential</b>	✓			Great potential for exploring the relationship of the town to its immediate hinterland		
<b>Amenity value</b>	✓			Could form part of a wider landscape trail from Attingham Park

<p><b>Summary description of evidence</b> Site of former aqueduct channel, a V-shaped leat following the highest contour of the southern side of the Bell Brook valley to bring water into Wroxeter's highest point. When surveyed in the 1930s it was said to be 2.5 miles long.</p>			 <p>Figure 4: Plan of Wroxeter showing insulae numbers.</p>		 <p>Photo showing the aqueduct channel HAN557 just before its destruction in the late 1950s</p>	
<p><b>Designation</b> The aqueduct / leat supplying water to the Roman city. Destroyed in the late 1950s as an earthwork, it may still survive beneath the ground.</p>						
<p><b>Statement of Significance</b> Fourth largest Roman town in Britain and among the best preserved.</p>						
<b>Period</b>		Roman ca AD120-500				
<b>Documentation</b>		R.W. Pocock 1934 Note on the water supply of Uriconium <i>Trans Shropshire Archaeol Soc</i> 47, 79-80 G. Webster & D. Hollingsworth 1959 The Wroxeter Aqueduct <i>Trans Shropshire Archaeol Soc</i> 56, 133-7				
<b>Assessment of importance/significance</b>						
<b>Criteria</b>	<b>High</b>	<b>Med.</b>	<b>Low</b>			
<b>Rarity</b>	✓					
<b>Group value</b>	✓					
<b>Survival/condition</b>			✓	Unknown whether the monument survives or not.		
<b>Fragility/vulnerability</b>	✓			Still under the plough		
<b>Diversity</b>		✓				
<b>Potential</b>	✓			Needs archaeological evaluation. This may be possible in the narrow strip of land to the east of the ramparts.		
<b>Amenity value</b>	✓			Potential largest lost although its site can be pointed out and interpreted.
