

Hyef 94
Lead Objects
(other than weights and castings).
[Draft]

12. Objects the Function of Which is Unknown or Uncertain.

12.0 Balls.

The site produced twenty of these objects ranging in diameter from 18 to 11mm with two others measuring 7 and 5mm. Only one has a casting seam, the rest being smooth. One of the balls was found in a Phase VI-V ditch, but not well sealed and could be intrusive. The rest came from unstratified contexts and may be post medieval.

| Context | Obj No | Area | Cut | Type | DateFrom | DateTo | Phase | Material Type | MSubtype | No | D | L | W |
|---------|--------|------|-------|----------------|----------|--------|-------|---------------|--------------|-----------|----|----|----|
