## STONE ARTEFACTS FROM DÚN AONGHASA [92E102]

## Coarse Stone Artefacts Catalogue (A. Clarke; petrological identifications by D. Harper) [Appendix 1.14 in Vol. 3]

## Pounder/grinders

| Find No. | Feature | Description | Dimensions |
| :---: | :---: | :---: | :---: |
| 140 | 9 | Granite. Flat oval in shape. On one end double ridged facets have been worked and the opposite end is pecked almost to a facet. One face is smoothed and flattened and has pecking in the centre. Some pecking too around the perimeter. | L. 125 mm ; W. 92 mm ; T. 52 mm |
| 246 | U/S | Limestone. Sub-circular in shape. Two facets form a ridge around half of the perimeter. Two faces are worn smooth. | L. 88 mm ; W. 70 mm ; T. 58 mm |
| 616 | 32 | Quartz sandstone, burnt fragment. Remnant ridged facets most probably originally around most of perimeter. | L. 85 mm ; W. 90 mm ; T. 36.5 mm |
| 1277 | 221 | Quartz. Miniature pounder/ grinder. Facets have been worked around most of the perimeter and one face has been worn flat and smooth. | L. 55 mm ; W. 47 mm ; $T .37 \mathrm{~mm}$ |
| 1336 | 209 | Quartz sandstone. Regular oval in shape. Single pecked facet on either end. Possibly some smoothing on one face. Probable underutilised pounder/grinder. | L. 210 mm ; W. 93 mm ; T. 90 mm |
| 1618 | 3 | Granite. Flat oval in shape. Broad facets have been pecked on either end. One face is smoothed and there is heavy flaking from another face. | L. 107 mm ; W. 86 mm ; T. 52 mm |
| 1801 | 244 | Quartz sandstone. Sub-spherical in shape. There are heavily worn ridged facets around the perimeter and some large flakes have been removed incidentally. One face has been worn flat and smooth. | L. 108 mm ; <br> W. 108 mm ; <br> T. 85 mm |
| 1998 | 76 | Limestone, broken down length. Ovoid in shape. Broad facets on either end with some flake removal. | L.84mm; <br> W. 69 mm ; T. 36 mm |
| 2132 | 267 | Quartz siltstone. Ovoid in shape. There is a single broad facet on one end. Both faces have been worn flat and smooth. | L. 184 mm ; W. 94 mm ; T. 63 mm |
| 2195 | 269 | Limestone. Sub-spherical in shape. On one end there is a flat facet and on the opposite end there are ridged facets. These facets are stained brown, possibly from the substance which was being processed. | L. 75 mm ; W. 73 mm ; T. 71 mm |
| 2217 | 269 | Granite. This cobble has been almost completely reshaped by grinding and rubbing wear. Either end bears a single rounded facet and both faces are smoothed. | L.64mm; <br> W. 67 mm ; <br> T. 55 mm |
| 2358 | 704 | Dolerite, broken. Sub-oval in shape. A broad facet has been worked on one end. The opposite end has been flaked and damaged over the original facet. Both faces have been worn smooth. | L. 88 mm ; <br> W. 63 mm ; <br> T. 42 mm |

| 2505 | 71 | Limestone. Sub-circular in shape. A broad facet has been worked around the whole of the cobble. | L. 106 mm ; W. 96 mm ; T. 84 mm |
| :---: | :---: | :---: | :---: |
| 2578 | 267 | Limestone. Two facets form a ridge on one end. Facets have been pecked on either side and on opposite ends. One face has been worn flat and smooth. | L. 77 mm ; W. 67 mm ; T. 42 mm |
| 2738 | 948 | Quartz sandstone. Flat oval in shape. Single broad facet on one end. One flattish face has been smoothed. | L. 90 mm ; W. 70 mm ; T. 40 mm |
| 2833 | 977 | Quartz sandstone. Flat oval in shape. At one end two facets form a ridge with some incidental flaking. Some pecking around opposite end and edges. One face is flattened and smoothed. | L. 127 mm ; <br> W. 107 mm ; <br> T. 42 mm |
| 3002 | 302 | Quartz sandstone. Sub-circular in shape. Broad ridged facets have been worked around most of the perimeter. One face has been smoothed. | L. 110 mm ; <br> W. 102 mm ; <br> T. 67 mm |
| 3003 | 302 | Quartz siltstone. Angular ovoid in shape. Two facets on one pointy end form a ridge. Single facet on opposite end. One flat smoothed face. | $\begin{array}{r} \mathrm{L} .107 \mathrm{~mm} ; \\ \text { W. } 102 \mathrm{~mm} ; \\ \text { T. } 65 \mathrm{~mm} \\ \hline \end{array}$ |
| 3016 | 314 | Quartz siltstone. Ovoid in shape. A single broad facet has been worn on either end. One face has been flattened and smoothed. | L. 117 mm ; <br> W. 79 mm ; <br> T. 50 mm |

Faceted cobbles

| 76 | 15 | Quartz sandstone. Flat circular. Facet around most of perimeter. Faces smoothed and there is one with possible gloss residue. | $\begin{array}{r} \mathrm{L} .95 \mathrm{~mm} ; \\ \mathrm{W} .87 \mathrm{~mm} ; \\ \mathrm{T} .35 \mathrm{~mm} \end{array}$ |
| :---: | :---: | :---: | :---: |
| 309 | 9 | Granite. Sub-oval. Two facets form ridge on one end. | $\begin{array}{r} \mathrm{L} .72 \mathrm{~mm} ; \\ \mathrm{W} .63 \mathrm{~mm} ; \\ \text { T. } 52 \mathrm{~mm} \end{array}$ |
| 744 | 202 | Pink quartzite. Sub-rectangular. One face particularly smooth and shiny. Small ground area on one pointy end. | $\begin{gathered} \mathrm{L} .82 \mathrm{~mm} ; \\ \text { W. } 69 \mathrm{~mm} ; \\ \text { T. } 28 \mathrm{~mm} \end{gathered}$ |
| 835 | U/S | Pink quartzite. Either end ground to rounded facets. One very flat polished face and another face with polish. | $\begin{array}{r} \mathrm{L} .85 \mathrm{~mm} ; \\ \mathrm{W} .40 \mathrm{~mm} \\ \text { T. } 55 \mathrm{~mm} \end{array}$ |
| 877 | 203 | Granite. Sub-triangular. There is a narrow ground facet on one edge and one flat face is shiny along one edge. | L. 66 mm ; W. 57 mm ; T. 40 mm |
| 1049 | 217 | Diorite. Sub-oval. One flat face is rubbed smooth. Tiny facet on either end. | $\begin{array}{r} \hline \text { L. } 90 \mathrm{~mm} ; \\ \text { W. } 53 \mathrm{~mm} ; \\ \text { T. } 32 \mathrm{~mm} \\ \hline \end{array}$ |
| 1065 | 217 | Sub-triangular buff quartzite pebble. Broad end has finely-shaped bevel which is polished. Very nice. | $\begin{array}{r} \hline \text { L. } 62 \mathrm{~mm} ; \\ \mathrm{W} .45 \mathrm{~mm} ; \\ \mathrm{T} .20 \mathrm{~mm} \end{array}$ |
| 1081 | 217 | Quartz sandstone. Sub-triangular. Two facets on one end form ridge. One facet on opposite end. One face flat and smoothed. | $\begin{gathered} \mathrm{L} .82 \mathrm{~mm} ; \\ \mathrm{W} .60 \mathrm{~mm} ; \\ \text { T. } 30 \mathrm{~mm} \end{gathered}$ |

| 1200 | 258 | Burnt fragment, quartz sandstone. Broad facet on unbroken end. One face flattened and smooth. | L. 77 mm ; W. 90 mm ; T. 39 mm |
| :---: | :---: | :---: | :---: |
| 1630 | 239 | Quartz siltstone. Ovoid. Two facets on one end form an overworn ridge. Pecking on opposite end and one face possibly worn. | L. 84 mm ; W. 54 mm ; T. 44 mm |
| 1922 | 257 | Quartzite. Angular cobble with one facet worked on a point. | L. 85 mm ; W. 72 mm ; T. 47 mm |
| 2338 | 269 | Pink quartzite. Sub-rectangular. All faces smooth and shiny. Two smooth facets on either end. | $\begin{array}{r} \mathrm{L} .97 \mathrm{~mm} ; \\ \mathrm{W} .36 \mathrm{~mm} ; \\ \mathrm{T} .32 \mathrm{~mm} \\ \hline \end{array}$ |
| 2448 | 279 | Pink quartzite. Sub-rectangular. Shiny on faces and ground facet on one end. | L. 80 mm ; W. 36 mm ; T. 31 mm |
| 2493 | 290 | Quartzite. Sub-triangular pebble with small facets on either end. One face has been worn flat and smooth/ shiny. | L.64mm; W. 48 mm ; T. 28 mm |
| 2569 | 297 | Pink quartzite. Irregular. Smooth and shiny on most faces. Small patches of grinding on edge and end form facets. | L. 84 mm ; W. 54 mm ; T. 41 mm |
| 2670 | 253 | Quartz siltstone. Ovoid. Light facet on one end. | L. 92 mm ; W. 52 mm ; T. 45 mm |
| 3017 | 313 | Pink quartzite. Sub-rectangular. One flat face and smooth and shiny over most of surfaces. Single ground facet on both ends. | L. 74 mm ; W. 35 mm ; T. 27 mm |

Plain hammerstones

| 58 | 10 | Limestone. Cylindrical with some pecking on either end. | L. 130 mm ; W. 52 mm ; $T .50 \mathrm{~mm}$ |
| :---: | :---: | :---: | :---: |
| 810 | 32 | Limestone, broken. Light pecking on surviving end. | $\begin{array}{r} \text { L. } 91 \mathrm{~mm} \text {; } \\ \text { W. } .75 \mathrm{~mm} \text {; } \\ \text { T. } 63.5 \mathrm{~mm} \end{array}$ |
| 870 | 82 | Quartz sandstone, spall. This is a flake which has probably been removed from a cobble through its use as a hammerstone. | L. 54 mm ; W. 43 mm ; T.13.5mm |
| 881 | 208 | Limestone, abraded and broken. Fragment of a cobble with an area of pecking on the unbroken end. | L. 79 mm ; W. 95 mm ; T. 67 mm |
| 892 | 203 | Limestone, abraded. Ovoid in shape. Pecked on one end and opposite end has been very heavily damaged by flaking. | L. 142 mm ; <br> W.78mm; <br> T. 64 mm |
| 970 | 82 | Limestone, abraded and broken. Pecking around perimeter and over both faces. One face possibly also flat and smoothed. | $\mathrm{L} .75 \mathrm{~mm} ;$ $\mathrm{W} .117 \mathrm{~mm} ;$ T .55 mm |

| 1144 | 85 | Quartz sandstone. Tapering and oval in shape. One end flaked, opposite end pecked. | L. 160 mm ; W. 95 mm ; T. 53 mm |
| :---: | :---: | :---: | :---: |
| 1167 | 85 | Limestone, abraded. Elongated oval in shape. One end has been pecked and flaked. | L. 90 mm ; W. 48 mm ; T. 30 mm |
| 1301 | 220 | Limestone. Ovoid in shape. Some light pecking around perimeter and one flake removed. | L. 95 mm ; W. 70 mm ; T. 43 mm |
| 1454 | 239 | Limestone, abraded. Flat oval in shape. Some light pecking on either end. | L. 84 mm ; W. 59 mm ; T. 26 mm |
| 1462 | 239 | Limestone, spall. Flake detached from use of the cobble as a hammerstone. | L. 54 mm ; W. 72 mm ; T. 14 mm |
| 1553a | 107 | Quartz siltstone. Flat oval in shape. Light pecking on one end and down part of one side. | L. 89 mm ; W. 70 mm ; T. 30 mm |
| 2374 | 279 | Quartz sandstone. Flat oval in shape. Very light pecking on one end. | L. 53 mm ; W.30mm; T. 19 mm |
| 2620 | 297a | Limestone, abraded and broken. Fragment with heavy pecking on surviving end. | $\begin{array}{r} \mathrm{L} .37 \mathrm{~mm} ; \\ \mathrm{W} .48 .5 \mathrm{~mm} \\ \mathrm{~T} .36 .5 \mathrm{~mm} \end{array}$ |
| 2685 | U/S | Limestone. Oval in shape. Light pecking on either end and one face possibly flattened and smoothed. | L. 155 mm ; W.73mm; T. 55 mm |
| 2768 2808 | 939 1201 | Quartz, spall. Flake detached from use of cobble as hammerstone. <br> Pink quartzite. Irregular-shaped cobble with heavy pecking and flaking on three corners. | L. $50 \mathrm{~mm} ;$ W. $10 \mathrm{~mm} ;$ T .23 mm $\mathrm{~L} .140 \mathrm{~mm} ;$ $\mathrm{W} .130 \mathrm{~mm} ;$ T .77 mm |
| 3037 | 1219 | Limestone, spall. Probable spall from a hammerstone. | $\begin{array}{r} \mathrm{L} .81 \mathrm{~mm} ; \\ \mathrm{W} .59 .5 \mathrm{~mm} \\ \mathrm{~T} .20 \mathrm{~mm} \\ \hline \end{array}$ |
| 4002 | 400 | Limestone, abraded. Flat oval in shape. Flake damage on either end. | L. 76 mm ; W. 52 mm ; T. 22 mm |

Rounded cobbles with rubbed faces

| 20 | 6 | Red chert-like material. Oval pebble flaked irregularly on one end <br> and with some of the flake scars shiny as if from rubbing. A patch of <br> smoothing also on one face. | L.77m; <br> W. $38 \mathrm{~mm} ;$ |
| :--- | :--- | :--- | :--- | ---: |
| 251 | U/S | Limestone, fragment. One smoothed face has possible glossy <br> residue. | L. $49 \mathrm{~mm} ;$ <br> W. $35 \mathrm{~mm} ;$ |
|  |  |  | T. 27 mm |

| 252 | U/S | Granite, burnt fragment. One smooth face survives. | $\begin{array}{r} \hline \text { L. } 54.5 \mathrm{~mm} ; \\ \text { W. } 34 \mathrm{~mm} ; \\ \text { T. } 28 \mathrm{~mm} \end{array}$ |
| :---: | :---: | :---: | :---: |
| 256 | U/S | Quartz sandstone, abraded. Flat oval in shape with one flat smoothed face. | L. 88 mm ; W.68mm; T. 35 mm |
| 261 | 26 | Igneous. Elongated in shape. Surface is shiny all over as if from rubbing. | L. 70 mm ; W. 35 mm ; T. 30 mm |
| 264 | 31 | Granite. Oval in shape with one flat smooth face. | L. 68 mm ; W. 52 mm ; T. 34 mm |
| 284 | 14 | Limestone, fragment. One possibly smoothed face. | L. 69 mm ; W. 40 mm ; T. 21 mm |
| 293/294 | 10 | Granite, fragment. One flat smoothed face with traces of a glossy residue. | $\begin{array}{r} \mathrm{L} .100 \mathrm{~mm} ; \\ \mathrm{W} .41 .5 \mathrm{~mm} ; \\ \text { T. } 23 \mathrm{~mm} \end{array}$ |
| 316 | 9 | Granite. Irregular in shape with one flat face possibly smoothed. | L. 91 mm ; W. 42 mm ; T. 47 mm |
| 325 | 26 | Green banded chert. One face appears to be slightly smoothed. | L. 86 mm ; W. 59 mm ; T. 44 mm |
| 326 | 15 | Limestone. Flat oval in shape. Both faces have been worn smooth with some glossy residue. There is some flake damage on one end. | L. 100 mm ; <br> W. 80 mm ; <br> T. 25 mm |
| 359 | 10 | Quartz sandstone. Flat oval in shape. Two faces appear to have been worn smooth. | $\begin{array}{r} \mathrm{L} .65 \mathrm{~mm} ; \\ \mathrm{W} .40 \mathrm{~mm} ; \\ \mathrm{T} .23 \mathrm{~mm} \end{array}$ |
| 419 | 47 | Quartz sandstone. Irregular in shape. Lower face flattened and smoothed. | L. 190 mm ; W. 117 mm ; T. 69 mm |
| 531 | 98 | Quartz sandstone. Flat oval in shape. Both faces are flattened and rubbed. | $\begin{array}{r} \mathrm{L} .70 \mathrm{~mm} ; \\ \text { W. } .55 \mathrm{~mm} ; \\ \text { T. } 28 \mathrm{~mm} \\ \hline \end{array}$ |
| 608 | 32 | Quartz sandstone, spall. 608, 611 and 1048 conjoin to form fragment of a rubbing stone. Split across bedding planes. | L. $66 \mathrm{~mm} ;$ W. $61.5 \mathrm{~mm} ;$ T. 16 mm |
| 611 | 32 | See 608. | L. 84.5 mm ; W. 70 mm ; T. 14.5 mm |
| 696 | 66 | Pink quartzite. Flat oval in shape. Opposite faces appear to have been rubbed and smoothed. | $\begin{array}{r} \mathrm{L} .57 \mathrm{~mm} ; \\ \mathrm{W} .49 \mathrm{~mm} ; \\ \mathrm{T} .35 \mathrm{~mm} \end{array}$ |
| 723 | 202 | Limestone, abraded, broken. One smoothed face. | L. 57.5 mm ; <br> W. 72 mm ; |

|  |  |  | T.45mm |
| :---: | :---: | :---: | :---: |
| 726 | 95 | Pink quartzite, fragment. One face flat and smoothed. | $\begin{array}{r} \mathrm{L} .52 \mathrm{~mm} ; \\ \mathrm{W} .42 \mathrm{~mm} ; \\ \mathrm{T} .25 \mathrm{~mm} \\ \hline \end{array}$ |
| 778 | 32 | Quartz sandstone, fragment. Fragment of one flat smoothed face survives. | L. 62 mm ; <br> W. 24 mm ; <br> T. 33 mm |
| 802 | 32 | Pink quartzite. Sub-oval in shape. Two faces appear to have been smoothed. | L. 69 mm ; W. 48 mm ; T. 33 mm |
| 815 | 202 | Quartz sandstone, abraded. Flat oval in shape. One possible flat smoothed face. | L. 75 mm ; W. 49 mm ; T. 17 mm |
| 873 | 208 | Quartz sandstone. Flat oval in shape. Possibly worn on one face. | L.79mm; W. 45 mm ; T. 29 mm |
| 886 | 208 | Quartz sandstone. Flat oval in shape. Rubbing has formed a very slight bevelling of one end. One face worn smooth. | L.72mm; W. 51 mm ; T. 23 mm |
| 992 | 82 | Pink quartzite. Sub-oval in shape. One face has been flattened and smoothed. | L. 65 mm ; W. 57 mm ; T. 37 mm |
| 1008 | 43 | Granite. Sub-oval in shape. Smoothing on both faces and one end. | L. 55 mm ; W. 49 mm ; T. 36 mm |
| 1013 | 41 | Limestone, abraded. Elongated oval in shape. Part of one face is flat and smoothed. Some pecking on opposite end. | L. 108 mm ; W. 56 mm ; T. 44 mm |
| 1048 | 217 | See 608. | $\begin{array}{r} \mathrm{L} .35 \mathrm{~mm} ; \\ \mathrm{W} .30 .5 \mathrm{~mm} ; \\ \mathrm{T} .10 \mathrm{~mm} \end{array}$ |
| 1073 | 85 | Quartz sandstone, fragment. The surviving face is smooth and shiny. | $\mathrm{L} .62 \mathrm{~mm} ;$ $\mathrm{W} .39 .5 \mathrm{~mm} ;$ T .26 mm |
| 1135 | 209 | Diorite. Flat oval in shape. Both faces are smooth and slightly shiny. | L. 85 mm ; W. 76 mm ; T. 37 mm |
| 1187 | 85 | Pink quartzite, fragment One flat smoothed face. | L. 50 mm ; W. 50 mm ; T. 18.5 mm |
| 1193 | 219 | Quartz sandstone, fragment. Sub-rectangular in shape with two smoothed faces. | $\begin{array}{r} \text { L. } 50 \mathrm{~mm} ; \\ \text { W. } 28.5 \mathrm{~mm} \\ \text { T. } 22.5 \mathrm{~mm} \end{array}$ |
| 1265 | 220 | Pink quartzite. Smooth and shiny over most of the surface. | L. 65 mm ; <br> W. 37 mm ; <br> T. 30 mm |

| 1267 | 221 | Pink quartzite. Sub-triangular in shape. Smooth and shiny all over. | L.67mm; W. 31 mm ; T. 28 mm |
| :---: | :---: | :---: | :---: |
| 1297b | 223 | Metamorphic rock, abraded. Sub-spherical in shape. Parts of the surface may be worn through rubbing. | L. 73 mm ; W. 73 mm ; T. 65 mm |
| 1341 | 255 | Quartz sandstone, spall. Spall from a cobble with glossy residue on one face. | L. 93 mm ; W. 55 mm ; T. 25 mm |
| 1342 | 255 | Granite. Sub-triangular in shape. One face is flat and shiny and the upper face has a patch of glossy residue. | L. 63 mm ; W. 45 mm ; T. 30 mm |
| 1389 | 253 | Quartzite. One smooth shiny face. | L. 38 mm ; W. 34 mm ; T. 23 mm |
| 1391 | 253 | Quartz sandstone. Flat oval in shape. Rubbed and shiny on both faces. | L. 80 mm ; W. 47 mm ; T. 26 mm |
| 1392a | U/S | Pink quartzite. Sub oval in shape. One face is flat and smoothed with some possible glossy residue which also extends down one side. | L. 70 mm ; W. 54 mm ; T. 42 mm |
| 1392b | U/S | Pink quartzite. Sub-oval in shape. One flat face is smoothed. | L. 71 mm ; W. 50 mm ; T.35mm |
| 1401 | 220 | Limestone, abraded. Flat circular in shape. Both faces worn smooth. | L. 76 mm ; W. 66 mm ; T. 26 mm |
| 1518 | 101 | Limestone. Ovoid in shape. One flat face rubbed smooth. | L. 47 mm ; W. 33 mm ; T. 24 mm |
| 1543 | 107 | Pink quartzite. Flat oval in shape. Both faces are smoothed. | L. 57 mm ; W. 49 mm ; T. 27 mm |
| 1544 | 105 | Quartz siltstone. Flat oval in shape. Both faces appear flattened and smooth. | L. 135 mm ; W. 96 mm ; T. 52 mm |
| 1650 | 51 | Limestone. Flat oval in shape. Some rubbed areas around edges and on both faces. Light pecking too on either end. | L. 73 mm ; W. 39 mm ; T. 23 mm |
| 1685 | 239 | Quartz siltstone. Irregular in shape. One face may have been smoothed. | L. 95 mm ; W.73mm; T. 40 mm |
| 1692 | 95 | Quartz sandstone. Sub-circular in shape. One flat face has been worn smooth by rubbing. Some pecking around one edge. | L. 175 mm ; W. 170 mm ; T. 85 mm |

| 1694 | 14 | Quartz sandstone. Irregular in shape with part of one surface smoothed. | L. 75 mm ; W.68mm; T. 52 mm |
| :---: | :---: | :---: | :---: |
| 1861 | 244 | Igneous. Irregular in shape. One flattish face smooth and shiny. | $\begin{array}{r} \text { L. } 85 \mathrm{~mm} ; \\ \mathrm{W} .48 \mathrm{~mm} ; \\ \text { T. } 33 \mathrm{~mm} \end{array}$ |
| 1876 | 244 | Pink quartzite. Sub-rectangular in shape. Smooth and shiny over most of surface. | L. 53 mm ; W. 28 mm ; $T .21 \mathrm{~mm}$ |
| 1985 | 76 | Quartz sandstone. Flat oval in shape. There is a glossy residue or polish around the edge of one face. | L. 112 mm ; W. 86 mm ; T. 32 mm |
| 1986 | 76 | Granite. Flat circular cobble with one face worn smooth. Large flakes have also been removed from around the edge. | $\begin{array}{r} \hline \text { L. } 108 \mathrm{~mm} ; \\ \text { W. } 101 \mathrm{~mm} ; \\ \text { T. } 32 \mathrm{~mm} \\ \hline \end{array}$ |
| 2050 | 244 | Limestone. Flat oval in shape. One face worn smooth. | $\begin{array}{r} \hline \mathrm{L} .82 \mathrm{~mm} ; \\ \mathrm{W} .55 \mathrm{~mm} ; \\ \mathrm{T} .27 \mathrm{~mm} \end{array}$ |
| 2084 | 69 | Limestone, abraded. One smoothed face. | L. 25 mm ; W. 24 mm ; T.13mm |
| 2127 | 267 | Pink quartzite. Sub-oval in shape. One flattened and smoothed face. | L. 91 mm ; W. 55 mm ; T. 48 mm |
| 2182 | 269 | Quartz siltstone. Flat circular in shape. Two faces worn smooth. | L. 55 mm ; W. 45 mm ; T. 19 mm |
| 2231 | 270 | Pink quartzite, fragment. Blocky fine-grained lump. Two/three surfaces are smooth and undulating as if from use as a sharpening stone. | L. 86.5 mm ; W. 84 mm ; T. 56 mm |
| 2245 | 69 | Quartz sandstone. Flat sub-triangular in shape. Worn and shiny on one face. | L. 47 mm ; W. 42 mm ; T. 18 mm |
| 2270 | 285 | Quartz sandstone. Sub-triangular in shape. Some shiny parts on a face. | L. 78 mm ; <br> W.65mm; <br> T. 32 mm |
| 2349 | 244 | Limestone, fragment. One shiny face. | $\begin{array}{r} \mathrm{L} .35 \mathrm{~mm} ; \\ \text { W. } 32.5 \mathrm{~mm} \\ \text { T. } 27 \mathrm{~mm} \\ \hline \end{array}$ |
| 2354 | 139 | Quartz sandstone, broken. Sub-rectangular in shape. Lower flat face is smoothed with a light polish. | L. 104 mm ; W. 62 mm ; T. 70 mm |
| 2378 | 70 | Quartz sandstone, spall. Probable spall from rubbing stone. | L. 31 mm ; W. 22 mm ; T. 4.5 mm |
| 2403 | 253 | Quartz siltstone. Sub-triangular in shape. One slightly uneven but smoothed face. | L. 109 mm ; W. 75 mm ; T. 37 mm |

| 2412 | U/S | Pink quartzite, fragment. One face has been smoothed and multidirectional striations are visible. | L. 79 mm ; W. 86 mm ; T. 43 mm |
| :---: | :---: | :---: | :---: |
| 2428 | 76 | Quartz sandstone. Small round pebble with two shiny faces. | L. 35 mm ; W.30mm; T. 18 mm |
| 2440 | 26 | Pink quartzite, fragment. One flat polished face. | L. 33 mm ; <br> W. 23 mm ; <br> T. 8 mm |
| 2455 | 26 | Quartz sandstone, burnt fragment. Surviving faces appear smooth. | $\begin{array}{r} \mathrm{L} .64 \mathrm{~mm} ; \\ \mathrm{W} .124 \mathrm{~mm} ; \\ \mathrm{T} .32 \mathrm{~mm} \\ \hline \end{array}$ |
| 2488 | 283 | Quartz sandstone. Flat oval in shape. One smoothed face. | L. 49 mm ; W. 37 mm ; T. 24 mm |
| 2513 | 258 | Pink quartzite. Sub-oval in shape. Especially flat and shiny on one face. | $\begin{array}{r} \mathrm{L} .53 \mathrm{~mm} ; \\ \text { W. } 29 \mathrm{~mm} ; \\ \text { T. } 26 \mathrm{~mm} \end{array}$ |
| 2630 | 297a | Limestone, broken. Very shiny on one flattened face. One facet also on unbroken end. | L. 50 mm ; W. 39 mm ; T. 21 mm |
| 2674 | 253 | Quartz sandstone. Small round pebble with shiny patches on opposite faces. | L. 40 mm ; W. 40 mm ; T. 30 mm |
| 2679 | 87 | Quartz siltstone. One face is particularly smooth. | L. 90 mm ; W. 53 mm ; T. 28 mm |
| 2682 | 912 | Dolerite. Sub-rectangular in shape. Worn shiny and smooth all over. | $\begin{array}{r} \text { L. } 80 \mathrm{~mm} ; \\ \text { W. } 49 \mathrm{~mm} ; \\ \text { T. } 25 \mathrm{~mm} \\ \hline \end{array}$ |
| 2743 | 948 | Pink quartzite. Irregular in shape. Both undulating faces have patches of smoothing and possible glossy residue. | $\begin{array}{r} \hline \mathrm{L} .130 \mathrm{~mm} ; \\ \mathrm{W} .103 \mathrm{~mm} ; \\ \mathrm{T} .47 \mathrm{~mm} \\ \hline \end{array}$ |
| 2755 | 951 | Granite. Irregular in shape. One shiny worn face. | $\begin{array}{r} \hline \text { L. } 38 \mathrm{~mm} ; \\ \text { W. } 29 \mathrm{~mm} ; \\ \text { T. } 22 \mathrm{~mm} \\ \hline \end{array}$ |
| 2765 | 1212 | Pink quartzite. Flat semi-circular in shape. One face smoothed. | L. 130 mm ; W. 60 mm ; T. 30 mm |
| 2805 | 965 | Pink quartzite. Oval in shape. One smoothed face. | L. 54 mm ; W. 40 mm ; T. 27 mm |
| 2891 | 976 | Limestone. Flat circular in shape. One face flattened and smoothed. | L. 90 mm ; <br> W. 78 mm ; <br> T. 36 mm |
| 3013 | 313 | Quartz siltstone. Flat oval in shape. Both faces worn smooth. | L. 27 mm ; <br> W. 23 mm ; <br> T. 13 mm |

| 3038 | 951 | Pink quartzite. Sub-oval in shape. One flattened and smoothed face. | L. $91 \mathrm{~mm} ;$ <br>  |  |
| :--- | :---: | :--- | :--- | ---: |
| 3040 | 958 | Limestone. Flat circular in shape. One or both faces have been | T. $41 \mathrm{~mm} ;$ |  |
|  |  | smoothed. | W. $65 \mathrm{~mm} ;$ |  |
|  |  |  | T.30mm |  |
| 3056 | $6 \backslash 14$ | Pink quartzite, broken. Sub-rectangular in shape. Possible smoothed | L. $64 \mathrm{~mm} ;$ |  |
|  |  | faces. | W. $31 \mathrm{~mm} ;$ |  |
|  |  |  | T. 23 mm |  |

| 308 | 42 | Limestone. Tabular cobble on which one side has been flattened and smoothed through use. | $\begin{array}{r} \mathrm{L} .97 \mathrm{~mm} ; \\ \mathrm{W} .72 \mathrm{~mm} ; \\ \mathrm{T} .30 \mathrm{~mm} \\ \hline \end{array}$ |
| :---: | :---: | :---: | :---: |
| 434 | 41 | Quartz sandstone, fragment. One flat polished face. Refits with 1337. | $\begin{gathered} \text { L. } 50 \mathrm{~mm} ; \\ \text { W. } 42 \mathrm{~mm} \text {; } \\ \text { T. } 30 \mathrm{~mm} \\ \hline \end{gathered}$ |
| 511 | 98 | Pink quartzite, fragment. One smooth flat face. | $\begin{array}{r} \hline \text { L. } 82 \mathrm{~mm} ; \\ \mathrm{W} .40 \mathrm{~mm} ; \\ \text { T. } 15 \mathrm{~mm} \\ \hline \end{array}$ |
| 871 | 70 | Quartz siltstone. Sub-rectangular in shape. One face has been rubbed flat and smooth and some striations are visible. There are areas of pecking on either end. | L. $48 \mathrm{~mm} ;$ W. 43 mm ; T. 23 mm |
| 1027 | 217 | Pink quartzite. Tiny fragment with one very flat face which is smooth and polished. | $\begin{array}{r} \hline \mathrm{L} .30 \mathrm{~mm} ; \\ \mathrm{W} .21 \mathrm{~mm} ; \\ \mathrm{T} .7 \mathrm{~mm} \\ \hline \end{array}$ |
| 1040 | 85 | Diorite. Sub-cuboid in shape with at least four faces which have been worn flat and smooth. One of the faces has an angled facet. There is a broad ground facet on one of the ends and a side and possibly a rougher facet on the opposite end. | L. 91 mm ; W. 75 mm ; T. 56 mm |
| 1253 | 258 | Quartz sandstone. Flat oval in shape. Very nice piece with flattened and smoothed faces and edges. Patches of a glossy residue especially around the edges. | $\begin{array}{r} \hline \mathrm{L} .75 \mathrm{~mm} ; \\ \mathrm{W} .55 \mathrm{~mm} ; \\ \mathrm{T} .15 \mathrm{~mm} \\ \hline \end{array}$ |
| 1337 | 255 | Quartz sandstone, burnt fragment. Refits with 434. | L. 50 mm ; W. 38 mm ; T. 44 mm |
| 1346 | 258 | Quartz sandstone, abraded. Irregular-shaped cobble with one flattened and smoothed face. | L. 91 mm ; W. 60 mm ; T. 60 mm |
| 1445 | 43 | Quartz sandstone, broken. Sub-circular in shape. One face has been worn completely flat and smooth right out to the edges. Nice piece. | L. 47 mm ; W. 74 mm ; T. 24 mm |
| 1696 | 14 | Quartz sandstone, broken. Ovoid in shape. One face has been flattened and smoothed and partially polished. | L. 105 mm ; W. 73 mm ; T. 53 mm |
| 1824 | 247 | Quartz sandstone. Flat circular in shape. One face has been flattened and smoothed. There is also a patch of pecking around the perimeter. | L. 55 mm ; W. 51 mm ; T. 20 mm |

| 2141 | 270 | Limestone, broken. One flattened and smoothed face. | $\begin{array}{r} \mathrm{L} .57 \mathrm{~mm} ; \\ \mathrm{W} .80 \mathrm{~mm} ; \\ \text { T. } 62 \mathrm{~mm} \\ \hline \end{array}$ |
| :---: | :---: | :---: | :---: |
| 2340 | 282 | Quartz sandstone. Sub-rectangular in shape. Two contiguous faces have been worn flat and smooth and there is some polish here too. | L. 117 mm ; W. 64 mm ; T. 54 mm |
| 2351 | 239 | Granite, fragment. A flat smooth face has been formed on the break. | L. 136 mm ; W. 91 mm ; T. 67 mm |
| 2656 | 253 | Quartz siltstone. Large oval cobble with one flattened and smoothed face. Possibly pecked on either end. | $\begin{array}{r} \mathrm{L} .170 \mathrm{~mm} \\ \mathrm{~W} .115 \mathrm{~mm} \\ \text { T. } 78 \mathrm{~mm} \\ \hline \end{array}$ |
| 3018 | 313 | Quartz. Sub-triangular in shape. Highly polished, particularly on one flattened face. | L. 54 mm ; W. 47 mm ; T. 23 mm |
| 3019 | 314 | Mudstone. Sub-rectangular in shape. There is a high polish all over the original cortex and on parts of the broken underside. The rubbing has also formed a light bevel on one end. | L. 107 mm ; W. 35 mm ; T.14mm |

Tabular cobbles with rubbed faces

| 409 | 43 | Quartz sandstone. Tabular, fragment. Remains of a very flat face which is smoothed out to edges. Some polish/ gloss residue around the edge. | $\begin{array}{r} \hline \text { L. } 100 \mathrm{~mm} ; \\ \text { W. } 80 \mathrm{~mm} ; \\ \text { T. } 32 \mathrm{~mm} \\ \hline \end{array}$ |
| :---: | :---: | :---: | :---: |
| 922 | 82 | Quartz sandstone. Narrow tabular stone with one face worn smooth and a light bevel rubbed on one end. | L. 17 mm ; <br> W. 24 mm ; <br> T. 9 mm |
| 1349 | 255 | Rectangular in shape with one smoothed face. | L. 62 mm ; W. 45 mm ; T. 15 mm |
| 1365 | U/S | Limestone, broken. Thick tabular fragment. One flat face has been smoothed and polished. Uni-directional striations are visible. | $\begin{array}{r} \mathrm{L} .145 \mathrm{~mm} ; \\ \mathrm{W} .100 \mathrm{~mm} ; \\ \mathrm{T} .58 \mathrm{~mm} \\ \hline \end{array}$ |
| 1418 | 239 | Quartz siltstone, broken. Partial survival of flat highly polished face. | $\begin{array}{r} \mathrm{L} .112 \mathrm{~mm} ; \\ \text { W. } 102 \mathrm{~mm} \text {; } \\ \text { T. } 55 \mathrm{~mm} \\ \hline \end{array}$ |
| 1424 | 202 | Quartz siltstone. Sub-triangular in plan. One flat face and one side are very smooth and almost polished. Opposite face is smoothed. | L. 112 mm ; W. 70 mm ; T. 25 mm |
| 1453 | 239 | Quartz sandstone. Thick tabular fragment. One face has been partially smoothed. | L. 63 mm ; W. 53 mm ; T. 33.5 mm |
| 1461 | 239 | Limestone, abraded. Small tabular fragment with one smoothed face. | L. 58 mm ; W. 42 mm ; T. 18 mm |
| 1509 | 101 | Quartz sandstone. Tabular fragment. Very slightly uneven smoothed face. | L. 115 mm ; W. 100 mm ; T. 46 mm |

| 1662 | 239 | Limestone, abraded. Tabular fragment with one flat smoothed face. | L. 70 mm ; W. 68 mm ; T. 25 mm |
| :---: | :---: | :---: | :---: |
| 1722 | 10 | Red sandstone. Tabular, fragment. One flat smoothed face. | L. 66 mm ; W. 63 mm ; T. 29.5 mm |
| 2407 | 279 | Quartz siltstone. Triangular in plan. Both faces are flat and smoothed and there is a polish on one corner. | L. 86 mm ; W. 69 mm ; T. 19 mm |
| 2451 | S/H | Igneous. Cuboid block. At least three faces appear to have been deliberately flattened and smoothed. | $\begin{array}{r} \text { L. } 100 \mathrm{~mm} ; \\ \text { W. } 100 \mathrm{~mm} ; \\ \text { T. } 94 \mathrm{~mm} \\ \hline \end{array}$ |
| 2650 | 297a | Quartz siltstone, broken. Tabular with curved sides. Both of the faces and all edges have been finely smoothed over original rough surface. | L. 96 mm ; W.63mm; T. 10 mm |
| 2751 | 1209 | Calcareous siltstone, broken. Tabular. One face altered to be very flat and smoothed right out to the edges. | L. 106 mm ; W. 62 mm ; T. 24 mm |
| 2809 | 1207 | Quartz sandstone, broken. Tabular with one flat smoothed face. | L. 42 mm ; W. 61 mm ; T. 12 mm |
| 2915 | 1225 | Limestone, fragment. Tabular flake with one possible smoothed face. | L. 113 mm ; W. 99 mm ; T. 15.5 mm |
| 2922 | 1226 | Quartzitic schist, fragment. Tabular with one flat smoothed face. | L. 75 mm ; W. 53 mm ; T. 29 mm |
| 2967 | 1226 | Limestone, broken. Tabular with one smoothed face. | L. 96 mm ; W. 86 mm ; T. 17 mm |
| 3071 | 255 | Quartz siltstone. Trapezoidal-shaped thin slab. Uncertain as to whether deliberately shaped or not. | L.31mm; W. 32 mm ; T. 6 mm |

Tabular cobbles with altered edges

| 629 | 32 | Tabular quartz sandstone, fragment. Surviving edge is rounded and polished. | $\begin{array}{r} \hline \mathrm{L} .49 .5 \mathrm{~mm} ; \\ \mathrm{W} .37 \mathrm{~mm} ; \\ \text { T. } 7 \mathrm{~mm} \end{array}$ |
| :---: | :---: | :---: | :---: |
| 978 | 43 | Tabular piece of quartz sandstone. A facet formed down one side and one end bevelled. | L. 100 mm ; W. 74 mm ; T. 12 mm |
| 1910 | 244 | Tabular piece of calcareous siltstone, triangular in plan. The entire circumference is rounded and shiny and one long edge has been shaped to an acute angle. | $\begin{array}{r} \mathrm{L} .104 \mathrm{~mm} ; \\ \mathrm{W} .68 \mathrm{~mm} ; \\ \mathrm{T} .7 \mathrm{~mm} \end{array}$ |
| 2402 | 283 | Tabular piece of quartz sandstone. One end has been bevelled and the opposite end is faceted. One face may have been partially smoothed. | L. 87 mm ; W. 52 mm ; T. 18 mm |

| 2433 | S/H | Tabular piece of mudstone, abraded and broken. There is a high <br> polish down one irregular edge. | L. $81 \mathrm{~mm} ;$ <br> W.77m; |
| :--- | :--- | :--- | ---: |

## Unused cobbles

| 60 | 10 | Granite. Irregular-shaped boulder. | L. 228 mm ; W. 166 mm ; T. 160 mm |
| :---: | :---: | :---: | :---: |
| 61 | 10 | Limestone, abraded and broken. | L. 112 mm ; W. 72 mm ; T. 42 mm |
| 62 | 10 | Limestone, broken. | $\begin{array}{r} \text { L. } 93 \mathrm{~mm} ; \\ \mathrm{W} .83 \mathrm{~mm} ; \\ \text { T. } 50 \mathrm{~mm} \end{array}$ |
| 250 | 10 | Limestone, fragment. The cortical face is most probably natural. | L. 108 mm ; <br> W. 105 mm ; <br> T. 28 mm |
| 253 | U/S | Granite. | L. 87 mm ; W. 72 mm ; T. 55 mm |
| 254 | U/S | Limestone, abraded and broken. | L. 54 mm ; W. 53 mm ; T. 40 mm |
| 275 | 10 | Limestone, abraded and broken. | L. 72 mm ; W. 90 mm ; $T .34 \mathrm{~mm}$ |
| 292 | 10 | Limestone, abraded and broken. | $\begin{array}{r} \mathrm{L} .63 \mathrm{~mm} \\ \mathrm{~W} .76 .5 \mathrm{~mm} \\ \mathrm{~T} .40 \mathrm{~mm} \end{array}$ |
| 313 | 9 | Granite. | L. 27 mm ; <br> W.23mm; <br> T. 7 mm |
| 320 | 29 | Granite, fragment. | L. 83.5 mm ; W. 63 mm ; T. 38 mm |
| 339 | 26 | Quartz sandstone, burnt fragment. | L. 50 mm ; W. 48 mm ; T.30mm |
| 340 | 10 | Granite, abraded. | L. 52 mm ; W. 45 mm ; T. 26 mm |
| 344 | 10 | Limestone, abraded and broken. | L. 38.5 mm ; W. 59 mm ; T. 21.5 mm |
| 493 | 56 | Pink quartzite, fragment. | L.33mm; W.12mm; T. 12 mm |

| 505 | 56 | Limestone. Sub-spherical in shape. Nice, but most probably not used. | $\begin{array}{r} \hline \text { L. } 33 \mathrm{~mm} ; \\ \mathrm{W} .30 \mathrm{~mm} ; \\ \text { T. } 27 \mathrm{~mm} \\ \hline \end{array}$ |
| :---: | :---: | :---: | :---: |
| 515 | 56 | Limestone, abraded and broken. | L. 50 mm ; W. 50 mm ; T. 53 mm |
| 536 | 95 | Limestone, abraded. | L. 125 mm ; <br> W. 112 mm ; T. 52 mm |
| 545 | 41 | Quartz sandstone, burnt fragment. | L. 100 mm ; <br> W. 71 mm ; <br> T. 22 mm |
| 609 | 32 | Limestone, abraded and broken. | L. 46 mm ; W. 29 mm ; T. 16.5 mm |
| 625 | 32 | Limestone, burnt fragment. | L. 35 mm ; W.48mm; T. 28.5 mm |
| 631 | 32 | Limestone, burnt fragment. | L. 69 mm ; W. 55 mm ; T. 32 mm |
| 672 | 32 | Limestone, abraded and broken. | $\begin{array}{r} \text { L. } 25 \mathrm{~mm} ; \\ \text { W. } 30 \mathrm{~mm} ; \\ \text { T. } 28 \mathrm{~mm} \end{array}$ |
| 714 | 95 | Limestone, abraded and broken. | $\begin{array}{r} \text { L. } 58.5 \mathrm{~mm} ; \\ \mathrm{W} .71 .5 \mathrm{~mm} \\ \text { T. } 48 \mathrm{~mm} \end{array}$ |
| 716 | 66 | Limestone, abraded. | L. 65 mm ; W. 55 mm ; T. 35 mm |
| 719 | 51 | Quartz sandstone, burnt fragment. | L. 39 mm ; W. 51 mm ; T. 21 mm |
| 720 | 70 | Limestone, abraded. | L. 50 mm ; W. 45 mm ; T. 31 mm |
| 769 | 95 | Diorite, spall. | $\begin{array}{r} \mathrm{L} .75 \mathrm{~mm} \\ \mathrm{~W} .41 .5 \mathrm{~mm} \\ \mathrm{~T} .11 \mathrm{~mm} \end{array}$ |

## Grinding slabs

| 47 | 6 | Sub-rectangular slab of granite, possibly burnt. The upper face <br> which has been worked smooth is flaking off. Both long sides are <br> undulating but smoothed and polished. C.F. 115. | L.215mm; <br> W.114m; |
| :--- | :--- | :--- | ---: | ---: |

| 115 | 26 | Sub-rectangular slab of granite. One face has been worn right out to the edges and this is flat but not as smooth as others of this type. Most heavily worn around the outer edge. One long side is undulating and smooth and polished. | L. 340 mm ; W.150mm; T. 60 mm |
| :---: | :---: | :---: | :---: |
| 215 | ?6 | Sub-rectangular slab of granite. One face has been worn right out to the edges. This is slightly convex in cross-section and smooth, particularly around the edges. | L. 270 mm ; <br> W. 14 mm ; <br> T. 65 mm |
| 226 | 14 | Fragment of a slab of granite. One flat face has been worn smooth right out to the edges. Particularly smooth around the outer rim. | L. 139 mm ; <br> W. 165 mm ; <br> T.72mm |
| 285 | 14 | Sub-rectangular slab of granite. One face has been worn right out to the edges. This face is slightly irregular but the raised areas are most heavily worn and quite smooth. Most heavily smoothed around the outer edge. | $\begin{array}{r} \mathrm{L} .255 \mathrm{~mm} ; \\ \mathrm{W} .200 \mathrm{~mm} ; \\ \text { T. } 70 \mathrm{~mm} \end{array}$ |
| 286 | ?6 | Sub-rectangular slab of granite. One face has been worn right out to the edges. This face is flat and very smooth and polished especially around the edges. | L. 295 mm ; W.170mm; T. 70 mm |
| 683 | 51 | Sub-rectangular slab of fine-grained sandstone. There are areas of smoothing on one face which extend out to one edge. The side contiguous to this edge is also worn flat and smooth. Some smoothing on the opposite face too. | L. 230 mm ; <br> W. 100 mm ; <br> T.70mm |
| 822 | 32 | Fragment of quartz sandstone with smoothed face. Probable grinding slab. | $\begin{array}{r} \hline \text { L. } 118 \mathrm{~mm} ; \\ \text { W. } 107 \mathrm{~mm} ; \\ \text { T. } 68 \mathrm{~mm} \\ \hline \end{array}$ |
| 1361 | S/H | Sub-rectangular block of quartz sandstone. One face has been worn right out to the edges and is very slightly convex in cross-section and smooth. | $\begin{array}{r} \text { L. } 300 \mathrm{~mm} ; \\ \text { W. } 170 \mathrm{~mm} ; \\ \text { T. } 68 \mathrm{~mm} \end{array}$ |
| 1393 | 293 | Fragment of a slab of quartz siltstone. Worked face has been worn right out to the edges. | L. 78 mm ; W.48mm; T. 42.5 mm |
| 1447 | 43 | Fragment of a slab of quartz sandstone. One face has been flattened and smoothed particularly around the outer edge. | L. 160 mm ; W. 99 mm ; T. 49 mm |
| 1689 | 6 | Fragment of a sub-rectangular block of quartz sandstone. One face is very smooth and has been worked right out to the edges. | L. 195 mm ; <br> W. 98 mm ; <br> T. 84 mm |
| 2119 | 267 | Slab of coarse-grained granite. Ovoid in plan with a rounded base. The worked surface is smooth and it is worn right out to the edges. | L. 370 mm ; <br> W. 260 mm ; <br> T. 90 mm |
| 2246 | 270 | Sub-rectangular block of quartzite. One face has been worn right out to the edges and this is very smooth. | $\begin{array}{r} \text { L. } 280 \mathrm{~mm} ; \\ \text { W. } 160 \mathrm{~mm} ; \\ \text { T. } 82 \mathrm{~mm} \end{array}$ |
| 2313 |  | Trapezoidal-shaped slab of limestone, abraded. One face may have been worn smooth although this is difficult to determine because of abrasion. | $\begin{array}{r} \hline \text { L. } 310 \mathrm{~mm} ; \\ \mathrm{W} .182 \mathrm{~mm} ; \\ \text { T. } 42 \mathrm{~mm} \\ \hline \end{array}$ |
| 2664 | 257 | Half of a large coarse-grained sandstone cobble, abraded. The broken face has been flattened and smoothed. | L. 250 mm ; <br> W. 160 mm ; <br> T. 48 mm |

Fist-type grinders

| 209 | 47 | Syenite. Shaped by flaking and then ground over most of this upper surface to a rough, sub-spherical form. Part of one side bears polish over an irregular surface. Base is very flat and polished. | $\begin{array}{r} \hline \text { L. } 102 \mathrm{~mm} ; \\ \text { W. } 85 \mathrm{~mm} ; \\ \text { T. } 72 \mathrm{~mm} \\ \hline \end{array}$ |
| :---: | :---: | :---: | :---: |
| 876 | 203 | Ultra-basic rock. Probable blank. Shaped by flaking to form a humpback with flattish sides. The piece has then been pecked/ground along the long axis and one side bears polish. Base is still roughly worked, no smoothing or polishing. | L. 105 mm ; W. 53 mm ; T. 85 mm |
| 1297a | 223 | Amphibolite. Shaped by flaking to form a hump-back with flattish sides. Pecked/ground along long axis. One side is polished over irregular surface. Base is very flat and polished. | L.79mm; W. 53 mm ; T. 60 mm |
| 1323 | 257 | Amphibolite. Shaped by flaking to form a hump-back with flattish sides. Pecked/ground along long axis. One side has smoothing over an irregular surface. Base is very flat and polished with visible unidirectional striations. | $\begin{gathered} \hline \text { L. } 109 \mathrm{~mm} ; \\ \text { W. } 58 \mathrm{~mm} ; \\ \text { T. } 92 \mathrm{~mm} \end{gathered}$ |

| Perfor |  | ls |  |
| :---: | :---: | :---: | :---: |
|  | 1 | Limestone slab, abraded, trapezoidal in plan. A perforation has been made off-centre and a semi-circular groove is aligned with the hole on the narrow edge. Probably some sort of weight. Hole 28 mm x 16 mm ; groove 28 mm ; 18 mm . | L. 180 mm ; W. 170 mm ; T. 25 mm |
| 44 | 6 | Irregular-shaped lump of vesicular limestone. Resembles a piece of pumice. There is a perforation at one end, which may be an enhanced natural perforation. Diameter of hole 8 mm . | L. 37 mm ; W. 25 mm ; T. 14 mm |
| 1886 | 244 | Bead. Quartz siltstone. Circular, with a flat cross-section and straight sides. Ground and polished all over. Straight-sided central perforation. | L. 17 mm ; W. 17 mm ; T. 7 mm |
| 2449 | 26 | Spindle whorl. Limestone. Ground all over to form a circular shape with a flat cross-section and rounded edges. The central perforation has a slightly skewed biconical cross-section, 12 mm in diameter. | L.40mm; W. 40 mm ; T. 15 mm |
| 3006 | 309 | Spindle whorl. Limestone, burnt fragment. Circular in plan with a flattish cross-section and rounded edges. Most probably originally ground to shape. Central conical-shaped perforation. | L. 48 mm ; W. 48 mm ; T. 13 mm |

Stone discs and counters

| 607 | 32 | Small stone disc. Thick tabular piece of limestone. Roughly chipped around the edge to form a sub-circular outline. | L.40mm; W. 37 mm ; T. 12 mm |
| :---: | :---: | :---: | :---: |
| 840 | 97 | Stone disc. Slab of quartz sandstone which has been flaked bifacially around the edge to form an oval shape. Patches of red discolouration on one face may indicate heat damage. | L. 185 mm ; <br> W. 165 mm ; <br> T. 15 mm |
| 1161 | 219 | Small stone disc. Thick tabular piece of limestone. Roughly chipped around the edge to form a sub-circular outline. | L. 48 mm ; W. 46 mm ; T. 13 mm |
| 1921 | 14 | Stone disc. Tabular piece of quartz feldspar sandstone. Chipped bifacially around most of perimeter to form a roughly triangular shape. | L. 175 mm ; <br> W. 165 mm ; <br> T. 17 mm |

| 2432 | 270 | Limestone. Probable counter. Disc-shaped. Ground all over to form flattish faces and a rounded edge. | L. 13 mm ; W. 13 mm ; T. 8 mm |
| :---: | :---: | :---: | :---: |
| 3047 | 994 | Small stone disc. Thick tabular piece of limestone. Roughly chipped around the edge to form a sub-circular outline. | $\begin{gathered} \hline \text { L. } 33 \mathrm{~mm} ; \\ \text { W. } 29 \mathrm{~mm} ; \\ \text { T. } 15 \mathrm{~mm} \end{gathered}$ |
| 3066 | 82 | Quartz sandstone, abraded. Probable counter but too abraded to determine whether it is ground or not. | L. 14 mm ; <br> W. 14 mm ; <br> T. 4 mm |

## Bracelets

| 161 | 29 | Dark green-black igneous or metamorhic rock. Fragment. The bracelet has been ground and polished all over and it has an oval cross-section. Inner diameter 67 mm ; outer diameter 95 mm . 14 mm thick. | L. 52 mm ; W. 12 mm ; T. 14 mm |
| :---: | :---: | :---: | :---: |
| 773 | 32 | Dark green-brown ultra-basic rock. Fragment. The bracelet has been ground and polished all over and it has a D-shaped section. 13 mm thick. | L. 27 mm ; W.13mm; T. 13 mm |
| 1839 | 244 | Small cylindrical-shaped object of ?siltstone. Surface has been polished but either end has been more roughly ground to form convex surfaces. A small conical hole has been made on one side ?attempted perforation. Probable reworked bracelet fragment. | L. 13 mm ; W. 14 mm ; T. 14 mm |
| 2521 | 290 | Amphibolite or basic igneous rock. Fragment. The bracelet has been ground and polished all over and has a circular section. Probable internal diameter of 73 mm . 16 mm wide and thick. | $\begin{array}{r} \mathrm{L} .40 \mathrm{~mm} ; \\ \mathrm{W} .17 .5 \mathrm{~mm} \\ \mathrm{~T} .15 \mathrm{~mm} \end{array}$ |

Hones and whetstones

| 11 | 6 | Whetstone made of a finger-shaped pebble of limestone, broken across width. Probable light use as a whetstone with no significant alteration of the pebble surface. Possibly originally perforated? See 128. | $\begin{array}{r} \mathrm{L} .85 \mathrm{~mm} ; \\ \mathrm{W} .25 \mathrm{~mm} ; \\ \mathrm{T} .18 \mathrm{~mm} \end{array}$ |
| :---: | :---: | :---: | :---: |
| 41 | 6 | Hone made of quartz sandstone. It has a rectangular cross-section with artificially smoothed faces which are slightly waisted towards the centre. On one face a single well-defined V-shaped groove runs along the length of the hone. | L. 155 mm ; W. 53 mm ; T. 26 mm |
| 54 | 56 | Hone made of quartz sandstone, fragment. It has a rectangular crosssection with artificially smoothed faces which are slightly waisted towards the centre. On one face a single well-defined V-shaped groove runs along the length of the hone. | $\begin{gathered} \mathrm{L} .67 \mathrm{~mm} ; \\ \mathrm{W} .38 \mathrm{~mm} ; \\ \mathrm{T} .30 \mathrm{~mm} \end{gathered}$ |
| 128 | 10 | Limestone fragment. Straight-sided perforation placed at one end of a probable finger-shaped pebble. Possibly part of a whetstone (see 11) which was perforated for suspension. | $\begin{array}{r} \mathrm{W} .27 \mathrm{~mm} ; \\ \mathrm{T} .23 \mathrm{~mm} \end{array}$ |
| 916 | 203 | Hone made of quartz sandstone, broken. Rectangular cross-section with artificially flat and smoothed faces. The breakage bisects a single well-defined $V$-shaped groove running down the length of the hone probably used for sharpening a pin or blade. | $\begin{array}{r} \mathrm{L} .91 \mathrm{~mm} ; \\ \mathrm{W} .58 \mathrm{~mm} ; \\ \mathrm{T} .21 \mathrm{~mm} \end{array}$ |
| 2384 | 253 | Whetstone. Flat, narrow, spatulate-shaped pebble of quartz sandstone. Some striations on one face possibly from use as a whetstone. | L. 140 mm ; W. 27 mm ; T. 8 mm |

| 2662 | 253 | Very fine perforated whetstone of quartz siltstone. It has an <br> expanded head with a central biconical-sectioned perforation. The <br> shank has been worn to a rectangular cross-section with rounded <br> edges and it tapers to a multi-faceted tip. Polished all over. | L. $87 \mathrm{~mm} ;$ <br> W.15m; |
| :--- | :--- | :--- | ---: | ---: |

Ground and polished micaceous siltstone
All of these pieces are made on quartz mica siltstone, most are unidentifiable

| 452 | 41 | Small flake from a highly polished object. Abrupt curve on one side of dorsal edge. | L. 23 mm ; W. 13 mm ; T. 4 mm |
| :---: | :---: | :---: | :---: |
| 643 | 51 | Polished piece. Stubby and sub-rectangular in cross-section. Both ends originally shaped to a slight curve. Both ends damaged. Refits with 2461 a flake from one of the ends. | L.40mm; W. 21 mm ; T. 18 mm |
| 800 | 32 | Tabular fragment, badly damaged. Possibly polished on one uneven face. On the opposite face there is smoothing with visible multidirectional striations. | L. 97 mm ; W. 75 mm ; T. 20 mm |
| 2129 | 270 | Fragment. Surviving curved face is highly polished with visible multi-directional striations. | L. 47 mm ; W. 56 mm ; T. 20 mm |
| 2189 | 269 | Tabular fragment. Polished all over with visible striations. The edges are formed by narrow rubbed facets with some flake damage. 10 mm thick. | L. 45 mm ; W. 40 mm ; T. 8.5 mm |
| 2461 | 270 | Fragment. Polished. Refits with 643. | L. $.29 \mathrm{~mm} ;$ $\mathrm{W} .20 .5 \mathrm{~mm} ;$ T .6 .5 mm |

| Stone balls |  |  |  |
| :---: | :---: | :---: | :---: |
| 865 | 208 | Sub-spherical ball of pink sandstone. Probably pecked or ground to shape with one definite flattened face. | L. 74 mm ; W. 73 mm ; T. 68 mm |
| 2005 | 26 | Sub-spherical ball of limestone, abraded and broken. Probably pecked to shape although difficult to determine because of surface abrasion. | L. 57 mm ; W.68mm; T. 69 mm |
| 2195 | 269 | Sub-spherical ball of limestone. There is pecking over the ball to shape it with particular emphasis on the ends. One flattened face. A brown stain on the pecked areas may be from substances processed, or else the stain was to colour the piece. | L. 75 mm ; W.73mm; T. 71 mm |

Bevelled and polished cobble

| 1065 | 217 | Sub-triangular buff quartzite pebble. Broad end has finely-shaped <br> bevel which is polished. Very nice. | L. $62 \mathrm{~mm} ;$ |
| :--- | :--- | :--- | ---: |

## Appendix 1.15 Flaked Lithics Catalogue (A. Clarke)

## Flaked Lithics

| Find No. | Feature | Description | Dimensions |
| :---: | :---: | :---: | :---: |
| 1 | 1 | Chert. Flake core with cortex on one face. Flaked from opposed platforms, one cortical, the other flat inner. | L. 30 mm ; W. 39 mm ; T. 14 mm |
| 17 | U/S | Chert. Three large blocky chunks most likely to be natural. | L. 80 mm ; W. 50 mm ; T.44mm; L. 50 mm ; W. 48 mm ; T. 22 mm ; L. 35 mm ; W. 22 mm ; T. 17 mm |
| 72 | 10 | Small chunk of orange flint. Heavily patinated. | L. 15 mm ; <br> W. 13 mm ; <br> T. 8 mm |
| 87 | 14 | Not seen. Small piece with one smooth surface. The rest are rough and uneven. | L. 13 mm ; W. 15 mm ; T. 8.5 mm |
| 221 | 26 | Chert. Flake core, without cortex. Irregular flaking from opposed platforms. | L.33mm; W. 47 mm ; T. 28 mm |
| 278 | 14 | Chert. Blocky inner chunk possibly natural. | L. 45 mm ; W. 24 mm ; T. 13 mm |
| 300 | 9 | Chert. Small multi-platform flake core. With cortex. | L. 30 mm ; W. 13 mm ; T. 12 mm |
| 343 | 10 | Chert. Blocky inner chunk possibly natural. | L. 32 mm ; W. 15 mm ; T. 12 mm |
| 407 | 43 | Chert. Broken inner flake. | L. 20 mm ; <br> W. 18 mm ; <br> T. 8 mm |
| 519 | 56 | Chert. Inner flake. | L. 20 mm ; W. 17 mm ; T. 11 mm |
| 520 | 98 | Chert. Probable fragment from a scalar core. Without cortex. | L. 52 mm ; <br> W. 17 mm ; <br> T. 7 mm |
| 525 | 98 | Chert. Inner flake. | L. 20 mm ; W. 15 mm ; T.11mm |

| 537 | 98 | Grey flint. Retouched inner flake. Steep retouch around most of the edge of this squat flake. | $\begin{array}{r} \hline \text { L. } 12 \mathrm{~mm} \text {; } \\ \text { W. } 20 \mathrm{~mm} \text {; } \\ \text { T. } 6 \mathrm{~mm} \\ \hline \end{array}$ |
| :---: | :---: | :---: | :---: |
| 559 | 41 | Chert. Inner chunk. | L. 51 mm ; W. 26 mm ; T. 15 mm |
| 925 | 203 | Chert. Inner flake, broken. | $\begin{gathered} \hline \text { L. } 42 \mathrm{~mm} ; \\ \text { W. } 25 \mathrm{~mm} ; \\ \text { T. } 6 \mathrm{~mm} \end{gathered}$ |
| 1032a | 217 | Pink quartzite. Primary flake. | $\begin{array}{r} \mathrm{L} .43 \mathrm{~mm} ; \\ \mathrm{W} .47 \mathrm{~mm} ; \\ \mathrm{T} .12 \mathrm{~mm} \\ \hline \end{array}$ |
| 1032b | 217 | Pink quartzite. Primary flake. | $\mathrm{L} .26 \mathrm{~mm} ;$ $\mathrm{W} .25 \mathrm{~mm} ;$ T .7 mm |
| 1127a | 216 | Chert. Inner chunk. | $\begin{array}{r} \hline \text { L. } 50 \mathrm{~mm} ; \\ \mathrm{W} .27 \mathrm{~mm} ; \\ \mathrm{T} .15 \mathrm{~mm} \end{array}$ |
| 1127b | 216 | Chert. Inner flake. | $\begin{aligned} & \text { L. } 30 \mathrm{~mm} \text {; } \\ & \text { W. } 5 \mathrm{~mm} \text {; } \\ & \text { T. } 5 \mathrm{~mm} \end{aligned}$ |
| 1132 | 88 | Chert. Blocky inner chunk most probably natural. | $\begin{array}{r} \mathrm{L} .44 \mathrm{~mm} ; \\ \mathrm{W} .26 \mathrm{~mm} ; \\ \mathrm{T} .17 \mathrm{~mm} \end{array}$ |
| 1138 | 88 | Chert, ?burnt. Inner flake, broken. | $\begin{array}{r} \mathrm{L} .27 \mathrm{~mm} ; \\ \mathrm{W} .20 \mathrm{~mm} ; \\ \text { T. } 9 \mathrm{~mm} \\ \hline \end{array}$ |
| 1182 | 217 | Chert. Inner, broken blade-like flake. | L. 22 mm ; W. 10 mm ; T. 4 mm |
| 1189 | 88 | Chert. Inner flake. | $\begin{array}{r} \mathrm{L} .18 \mathrm{~mm} ; \\ \mathrm{W} .30 \mathrm{~mm} ; \\ \mathrm{T} .10 \mathrm{~mm} \end{array}$ |
| 1197 | 219 | Chert. Inner flake. | L. $22 \mathrm{~mm} ;$ W. $18 \mathrm{~mm} ;$ T. 7 mm |
| 1258 | 255 | Chert. Inner flake. | $\begin{array}{r} \mathrm{L} .30 \mathrm{~mm} ; \\ \mathrm{W} .40 \mathrm{~mm} ; \\ \mathrm{T} .14 \mathrm{~mm} \\ \hline \end{array}$ |
| 1364 | 221 | Chert. Inner flake, burnt. | $\begin{array}{r} \hline \text { L. } 35 \mathrm{~mm} ; \\ \mathrm{W} .21 \mathrm{~mm} ; \\ \text { T. } 7 \mathrm{~mm} \end{array}$ |
| 1373 | U.S. | Chert. Probably a natural chunk. ?burnt. | L. 27 mm ; W.14mm; T. 9 mm |

| 2485a | 290 | Chert. Inner flake. | L.44mm; W. 31 mm ; T. 12 mm |
| 2485b | 290 | Chert. Inner chunk. | L. 37 mm ; W. 33 mm ; T.19mm |
| 3050a | 3 | Chert. Blocky inner chunk, most probably natural. | L.31mm; <br> W.22mm; <br> T. 9 mm |
| 3050b | 3 | Chert. Single-edged scalar core. Without cortex. | L. 43 mm ; W. 23 mm ; T.11mm |

## Pumice Catalogue (A. Clarke and A. Newton) [Appendix 1.16 in Vol. 3]

Pumice lumps which exhibit worn faces and grooves or else just with grooves
Find No. Feature Description Dimensions

| 237 | 21 | Worn faces make a cuboid shape. Possibly some very shallow grooving on the faces. | $\begin{array}{r} \hline \text { L. } 23 \mathrm{~mm} ; \\ \mathrm{W} .21 \mathrm{~mm} ; \\ \text { T. } 20 \mathrm{~mm} \end{array}$ |
| :---: | :---: | :---: | :---: |
| 530 | 98 | Nice piece. At least four U-shaped grooves worn at angles around the surface of the piece. Grooves $6 \mathrm{~mm}-8 \mathrm{~mm}$ wide. | $\begin{array}{r} \mathrm{L} .41 \mathrm{~mm} ; \\ \mathrm{W} .33 \mathrm{~mm} ; \\ \mathrm{T} .27 \mathrm{~mm} \end{array}$ |
| 624 | 51 | One concave worn face across which there are two light narrow grooves. | L. 37 mm ; W. 21 mm ; T.19mm |
| 781 | 32 | A series of three U -shaped grooves, 6 mm wide, run around the piece. | $\begin{gathered} \mathrm{L} .43 \mathrm{~mm} ; \\ \mathrm{W} .36 \mathrm{~mm} \\ \text { T. } 25 \mathrm{~mm} \end{gathered}$ |
| 957 | 203 | One convex worn face with a U-shaped groove 7 mm wide running across it. One other shallower groove 11 mm wide, along one side. | $\begin{gathered} \text { L. } 42 \mathrm{~mm} ; \\ \mathrm{W} .32 \mathrm{~mm} \\ \text { T. } 19 \mathrm{~mm} \end{gathered}$ |
| 1009 | 85 | Slightly worn faces with a possible shallow worn U-shaped groove. | $\begin{array}{r} \hline \text { L. } 30 \mathrm{~mm} ; \\ \mathrm{W} .25 \mathrm{~mm} ; \\ \mathrm{T} .20 \mathrm{~mm} \\ \hline \end{array}$ |
| 1070 | 217 | Two possible grooves which are very shallow. | $\begin{array}{r} \mathrm{L} .28 \mathrm{~mm} ; \\ \mathrm{W} .19 \mathrm{~mm} ; \\ \mathrm{T} .19 \mathrm{~mm} \end{array}$ |
| 1326 | 253 | Shallow U-shaped groove, 7 mm wide, running across a skewed worn face. | $\begin{array}{r} \text { L.38mm; } \\ \text { W. } 31 \mathrm{~mm} ; \\ \text { T. } 18 \mathrm{~mm} \end{array}$ |
| 1843 | 244 | Shallow U-shaped groove across one face. | L. 30 mm ; W. 25 mm ; T. 18 mm |
| 2149 | 244 | Sub-triangular piece with at least three short, U-shaped grooves running at angles across faces. | $\begin{array}{r} \mathrm{L} .55 \mathrm{~mm} ; \\ \mathrm{W} .53 \mathrm{~mm} ; \\ \text { T. } 28 \mathrm{~mm} \end{array}$ |
| 2180 | 281 | Wide shallow U-shaped groove. | $\begin{array}{r} \mathrm{L} .25 \mathrm{~mm} ; \\ \mathrm{W} .23 \mathrm{~mm} ; \\ \mathrm{T} .15 \mathrm{~mm} \end{array}$ |
| 2492 | 283 | One face has two wide, very shallow U-shaped grooves. | $\begin{array}{r} \hline \text { L. } 43 \mathrm{~mm} ; \\ \text { W. } 32 \mathrm{~mm} ; \\ \text { T. } 22 \mathrm{~mm} \end{array}$ |

Pumice lumps with one or more worn faces

| 198 | 42 | Some flat, worn faces. Sampled by A. Newton. | L. $40 \mathrm{~mm} ;$ |
| :--- | :---: | :--- | ---: |
|  |  |  | W. $35 \mathrm{~mm} ;$ |
|  |  |  | T. 27 mm |
| 333 | 216 | One concave, worn face. Sampled by A. Newton. | W. $54 \mathrm{~mm} ;$ |
|  |  |  | W.40mm; |
|  |  |  | T.38mm |

| 334 | $2 \backslash 6$ | Sampled by A Newton. | L. 38 mm ; W. 31 mm ; T.19mm |
| :---: | :---: | :---: | :---: |
| 335 | $2 \backslash 6$ | One convex, worn face. | $\begin{array}{r} \mathrm{L} .37 \mathrm{~mm} ; \\ \text { W. } 30 \mathrm{~mm} ; \\ \text { T. } 20 \mathrm{~mm} \\ \hline \end{array}$ |
| 357 | 41 | One face worn flat. Opposite face worn to a concave crosssection. | $\begin{array}{r} \mathrm{L} .37 \mathrm{~mm} ; \\ \mathrm{W} .31 \mathrm{~mm} ; \\ \text { T. } 20 \mathrm{~mm} \end{array}$ |
| 360a | 5 | One concave face worn at the end. | $\begin{gathered} \mathrm{L} .37 \mathrm{~mm} ; \\ \mathrm{W} .32 \mathrm{~mm} ; \\ \mathrm{T} .18 \mathrm{~mm} \end{gathered}$ |
| 360b | 5 | Opposite faces possibly worn. | $\begin{array}{r} \text { L. } 46 \mathrm{~mm} ; \\ \text { W. } 33 \mathrm{~mm} ; \\ \text { T. } 15 \mathrm{~mm} \end{array}$ |
| 408 | 43 | One face worn to be skewed in profile. | $\begin{array}{r} \mathrm{L} .31 \mathrm{~mm} ; \\ \mathrm{W} .31 \mathrm{~mm} ; \\ \mathrm{T} .28 \mathrm{~mm} \\ \hline \end{array}$ |
| 440 | 41 | Large piece with one long flat face and perpendicular to this is a worn skewed face. | $\begin{array}{r} \mathrm{L} .70 \mathrm{~mm} ; \\ \mathrm{W} .33 \mathrm{~mm} ; \\ \text { T. } 27 \mathrm{~mm} \\ \hline \end{array}$ |
| 501 | 56 | Circular in plan. Both faces are worn flat, one at an angle. The sides are rubbed and faceted too. | $\begin{array}{r} \text { L. } 23 \mathrm{~mm} ; \\ \text { W. } 20 \mathrm{~mm} ; \\ \text { T. } 15 \mathrm{~mm} \end{array}$ |
| 568 | 41 | Large fragment with remains of a worn skewed face. | $\begin{array}{r} \mathrm{L} .57 \mathrm{~mm} ; \\ \mathrm{W} .40 \mathrm{~mm} ; \\ \mathrm{T} .43 \mathrm{~mm} \\ \hline \end{array}$ |
| 578 | 95 | Four faces worn flat give a rectangular cross-section. | $\begin{array}{r} \mathrm{L} .30 \mathrm{~mm} ; \\ \mathrm{W} .15 \mathrm{~mm} ; \\ \mathrm{T} .14 \mathrm{~mm} \\ \hline \end{array}$ |
| 658a | 66 | Rounded lump with one flat worn face. | $\begin{array}{r} \mathrm{L} .48 \mathrm{~mm} ; \\ \mathrm{W} .32 \mathrm{~mm} ; \\ \text { T. } 25 \mathrm{~mm} \end{array}$ |
| 704 | 208 | Generally smoothed faces, two of which are concave. | $\begin{array}{r} \mathrm{L} .41 \mathrm{~mm} ; \\ \mathrm{W} .35 \mathrm{~mm} ; \\ \mathrm{T} .25 \mathrm{~mm} \end{array}$ |
| 709 | 208 | Two flat worn faces. | $\mathrm{L} .25 \mathrm{~mm} ;$ $\mathrm{W} .18 \mathrm{~mm} ;$ <br> T. 14 mm |
| 718 | 51 | Possibly one worn skewed face. | $\begin{array}{r} \hline \text { L. } 45 \mathrm{~mm} ; \\ \mathrm{W} .30 \mathrm{~mm} ; \\ \text { T. } 22 \mathrm{~mm} \end{array}$ |
| 722 | 56 | Rounded lump with one long edge worn to a slightly concave face. | $\begin{array}{r} \mathrm{L} .68 \mathrm{~mm} ; \\ \mathrm{W} .45 \mathrm{~mm} ; \\ \text { T. } 38 \mathrm{~mm} \end{array}$ |
| 727 | 202 | Large fragment with remains of a worn skewed face. | $\begin{array}{r} \hline \text { L. } 46 \mathrm{~mm} ; \\ \mathrm{W} .42 \mathrm{~mm} ; \\ \text { T. } 30 \mathrm{~mm} \\ \hline \end{array}$ |

| 765 | 10 | Three of the worn faces are skewed and form ridges between the worked areas. | $\begin{array}{r} \hline \mathrm{L} .41 \mathrm{~mm} ; \\ \mathrm{W} .28 \mathrm{~mm} ; \\ \mathrm{T} .27 \mathrm{~mm} \\ \hline \end{array}$ |
| :---: | :---: | :---: | :---: |
| 879 | 203 | Both faces worn slightly skewed. | L. 38 mm ; W. 24 mm ; T. 13 mm |
| 883 | 203 | One smoothed flattish face with a bevel formed along one edge. | L. 37 mm ; W. 27 mm ; T. 15 mm |
| 891 | 208 | One flat worn face. | $\begin{array}{r} \text { L. } 30 \mathrm{~mm} ; \\ \text { W. } 20 \mathrm{~mm} ; \\ \text { T. } 12 \mathrm{~mm} \end{array}$ |
| 894 | 203 | Opposite faces worn flat. | $\begin{array}{r} \mathrm{L} .40 \mathrm{~mm} ; \\ \mathrm{W} .20 \mathrm{~mm} ; \\ \mathrm{T} .12 \mathrm{~mm} \\ \hline \end{array}$ |
| 903 | 203 | One deeply worn concave face. | $\begin{array}{r} \mathrm{L} .58 \mathrm{~mm} ; \\ \mathrm{W} .35 \mathrm{~mm} ; \\ \mathrm{T} .25 \mathrm{~mm} \\ \hline \end{array}$ |
| 914 | 208 | Two worn contiguous faces. Convex and concave. | $\begin{array}{r} \text { L. } 37 \mathrm{~mm} ; \\ \mathrm{W} .37 \mathrm{~mm} ; \\ \text { T. } 23 \mathrm{~mm} \end{array}$ |
| 917 | 203 | Two worn concave faces form an angle to each other. | $\begin{array}{r} \mathrm{L} .33 \mathrm{~mm} ; \\ \text { W. } 30 \mathrm{~mm} ; \\ \text { T. } 23 \mathrm{~mm} \end{array}$ |
| 930 | 203 | One worn concave face. | $\begin{array}{r} \text { L. } 30 \mathrm{~mm} ; \\ \text { W. } 28 \mathrm{~mm} ; \\ \text { T. } 18 \mathrm{~mm} \end{array}$ |
| 933 | 82 | Fragment. Opposite faces are heavily worn, one face flat and other concave. | $\begin{array}{r} \mathrm{L} .40 \mathrm{~mm} ; \\ \mathrm{W} .28 \mathrm{~mm} ; \\ \mathrm{T} .16 \mathrm{~mm} \\ \hline \end{array}$ |
| 934 | 77 | One flattish face and three concavely worn faces. | $\begin{array}{r} \hline \text { L. } 52 \mathrm{~mm} ; \\ \mathrm{W} .35 \mathrm{~mm} ; \\ \mathrm{T} .25 \mathrm{~mm} \\ \hline \end{array}$ |
| 953 | 82 | Irregular piece with two worn faces down long sides. | $\begin{array}{r} \mathrm{L} .60 \mathrm{~mm} ; \\ \mathrm{W} .55 \mathrm{~mm} ; \\ \mathrm{T} .30 \mathrm{~mm} \end{array}$ |
| 955 | 203 | Large piece. Opposite faces are worn very slightly convex in section. | $\begin{array}{r} \mathrm{L} .68 \mathrm{~mm} ; \\ \mathrm{W} .48 \mathrm{~mm} \\ \mathrm{~T} .32 \mathrm{~mm} \\ \hline \end{array}$ |
| 956 | 82 | One slightly concave face on rounded lump. | L. 34 mm ; W. 25 mm ; T. 18 mm |
| 986 | 82 | Rounded lump with one flat worn face. | $\begin{array}{r} \mathrm{L} .30 \mathrm{~mm} ; \\ \mathrm{W} .24 \mathrm{~mm} ; \\ \mathrm{T} .20 \mathrm{~mm} \\ \hline \end{array}$ |
| 987 | 82 | One face appears to have been worn to an irregular concave section. | $\begin{array}{r} \mathrm{L} .45 \mathrm{~mm} ; \\ \mathrm{W} .34 \mathrm{~mm} \\ \mathrm{~T} .26 \mathrm{~mm} \end{array}$ |

| 1018 | 82 | One possible smoothed face. | L. 27 mm ; W. 17 mm ; T. 12 mm |
| :---: | :---: | :---: | :---: |
| 1036 | 217 | Heavily worn piece. Two concave faces and one convex face give this piece an unusual shape. | $\begin{array}{r} \hline \text { L. } 32 \mathrm{~mm} ; \\ \text { W. } 27 \mathrm{~mm} ; \\ \text { T. } 21 \mathrm{~mm} \\ \hline \end{array}$ |
| 1055 | 217 | Flat, sub-triangular in shape with large vesicles. At least one side has been worn flat. | $\begin{array}{r} \hline \text { L. } 78 \mathrm{~mm} ; \\ \text { W. } 67 \mathrm{~mm} ; \\ \text { T. } 30 \mathrm{~mm} \\ \hline \end{array}$ |
| 1064 | 217 | One flat, worn face. | L. 22 mm ; W. 21 mm ; T.14mm |
| 1074 | 216 | One worn side forms a slight point. | L. 25 mm ; W. 21 mm ; T. 15 mm |
| 1080 | 217 | Nice concave face, almost dished. | $\begin{array}{r} \hline \text { L. } 37 \mathrm{~mm} ; \\ \text { W. } 33 \mathrm{~mm} ; \\ \text { T. } 15 \mathrm{~mm} \\ \hline \end{array}$ |
| 1174 | 219 | One worn concave face. | $\begin{array}{r} \hline \text { L. } 22 \mathrm{~mm} \text {; } \\ \text { W. } 22 \mathrm{~mm} ; \\ \text { T. } 12 \mathrm{~mm} \\ \hline \end{array}$ |
| 1218 | 255 | One irregularly-smoothed face. | L. 37 mm ; W. 26 mm ; T. 15 mm |
| 1222 | 253 | One concave almost dished face. | L. 34 mm ; W. 26 mm ; T. 20 mm |
| 1225 | 219 | Rounded lump with one slightly concave face. | $\begin{array}{r} \hline \mathrm{L} .21 \mathrm{~mm} ; \\ \mathrm{W} .21 \mathrm{~mm} ; \\ \mathrm{T} .21 \mathrm{~mm} \\ \hline \end{array}$ |
| 1236 | 255 | One worn concave face. | L. 48 mm ; W. 35 mm ; T. 25 mm |
| 1248 | 255 | Two flat faces worn at angles to form a wedge-shaped piece. | L. 40 mm ; W. 27 mm ; T. 25 mm |
| 1276 | 255 | Two contiguous worn faces form a wedge shape. | $\begin{array}{r} \text { L. } 38 \mathrm{~mm} \text {; } \\ \text { W. } 21 \mathrm{~mm} \text {; } \\ \text { T. } 12 \mathrm{~mm} \end{array}$ |
| 1281 | 253 | Opposite faces worn flat. | L. 32 mm ; <br> W. 28 mm ; <br> T. 13 mm |
| 1283 | 220 | One skewed worn face. | L. 35 mm ; <br> W. 24 mm ; <br> T. 18 mm |
| 1288 | 220 | Some irregularly-worn faces. | $\begin{array}{r} \hline \text { L. } 52 \mathrm{~mm} ; \\ \text { W. } 44 \mathrm{~mm} ; \\ \text { T. } 39 \mathrm{~mm} \\ \hline \end{array}$ |

# Stone Axe Catalogue (G. Cooney) [Appendix 1.17 in Vol. 3] 

## Introduction to the catalogue

The drawn face is referred to as face 1 , the obverse as face 2 . The cutting edge is called the edge and the part of each face above the edge is referred to as the blade. The opposite end is the butt. The lateral junctions between the two faces are called the sides and the side view is referred to as the profile. The Irish Stone Axe Project number is also appended to the description where relevant. For more on the Irish Stone Axe Project see Cooney and Mandal 1998.

Find No. Feature Description

## Dimensions

| 1327 | 253 | Shale axe, ground and partially polished. Right side irregular pointed, almost straight. Numerous flakes removed, upper portion extensively flaked to produce distinct indentation or notch, for hafting. Left side straight, slightly convex, naturally flat (joint surface). Junctions with blade. Left side of edge badly chipped, right side sharper. Edge asymmetrical, straight in section. Faces are bedding planes, some grinding on lower areas. Face 1 rougher (for hafting?). Butt naturally flat, slightly oblique, has been ground flat. Profile is asymmetrical; thin, cross-section is narrow oval (one flat side). Irish Stone Axe Project: 20040. | L. 112 mm ; W. 63 mm ; T.20mm; Wt. 264g |
| :---: | :---: | :---: | :---: |
| 2322 | 2 | Shale axe/adze, partially ground. Left side straightish, naturally flattened. Right side concave, naturally flat. Junctions with blade. Edge blunt, may be reground, face 2. Faces, unworked bedding planes apart from slight grinding face 1 . Grinding on face 1 blade is very coarse/heavy. Butt more oblique in plan than rounded. This is a cobble worked at the blade end. Profile is asymmetrical; thin, cross-section is sub-rectangular. Irish Stone Axe Project: 20041. | L. 120 mm ; W. 53 mm ; T.18mm; Wt. 147g |
| 2167 | 269 | Possible fragment of shale axehead, either of butt or junction of side and badly damaged edge. However, could be a fragment of a number of artefact types. Roughly triangular in shape, more consistent with being fragment of side of axe and edge. If so both faces ground, side round, edge very heavily chipped and damaged. | L.36mm; W. 27 mm ; T. 11 mm |
| 1065 | 217 | Modified cobble, probably of sandstone rather than quartzite. Sides irregular, expand from the 'butt', naturally flattened. Right side concave, naturally flat. Junctions with 'blade' or broad end. This end is flat in face view and bevelled in section, with a broader area adjoining face 1 and a narrower 'blade' area adjoining face 2 . This is a result of working from both faces, giving a markedly asymmetrical 'blade' profile that exhibits junctions with both faces. Broader blade area has distinct pattern of wear striae running perpendicular to the bevel. Faces flat, naturally smoothed. Face 2 appears to have substance adhering in patches to the surface. Butt end rounded in shape. This is a cobble | $\begin{array}{r} \hline \text { L. } 60 \mathrm{~mm} ; \\ \mathrm{W} .43 \mathrm{~mm} ; \\ \mathrm{T} .19 \mathrm{~mm} \end{array}$ |

|  |  | worked at the broad end. Profile is symmetrical; medium, crosssection is sub-rectangular. Form of the object is inconsistent with it being used as an axe or in a related way. Perhaps a type of burnisher. |  |
| :---: | :---: | :---: | :---: |
| Related artefacts |  |  |  |
| 452 | 41 | Flake or spall. Dorsal surface convex with ground/smooth surface zone extending along length. Small spall from shale cobble or possibly from shale cobble utilised as a tool such as an axehead. | L. 28 mm ; <br> W. 12 mm ; <br> T. 3 mm |
| 2129 | 270 | Stone with irregular sub-rectangular cross-section and curved, smooth outer surface. Spall from shale cobble. Outer surface is not ground, appears to be from a beach cobble. | L. 51 mm ; <br> W. 46 mm ; <br> T. 19 mm |
| 2599 | 906 | Triangular shaped shale flake, broader part of face 1 (dorsal) surface is smooth (ground?). Left side shows evidence of flaking, re-working after the flake was produced. May have been detached from an axe but more likely to have been a spall or flake from a shale cobble with a naturally smooth/ ground surface, such as a beach cobble. | L. 103 mm ; W. 72 mm ; T. 11 mm |
