SEVENTY-FIRST

REPORT

PRESENTED TO THE SOCIETY

AT THE

MEETING,

OCTOBER 16, 1911.

THE Society continues to progress steadily. Fifty-two new members have been elected during the year; twenty-seven resignations have been sent in and nine members lost to us by death.

On October 1, 1910, the names on the Society's roll were 439; the number now is 456 with 13 Honorary members.

Twenty-one meetings of the Society were held at which the average attendance has been 106.

The following communications were made:

The outstanding feature of the Society's undertakings during the past year was the Loan Exhibition of Stuart and Cromwellian relics which was opened in the Guildhall, Cambridge, by the Lord Bishop of Bristol on May 15 and remained open until May 20.

For some months during the early part of 1911 the work of preparation taxed the energies of the Council and of the two executive officers of the Exhibition, Mr W. B. Redfern and the Secretary, the Rev. F. G. Walker.

An exceedingly valuable and wonderful collection was entrusted to the Council's care by the owners of the loans.

It is worthy of note that some nine hundred articles were received and returned without any loss or injury whatever beyond the breakage of three small panes of glass which was due to rough handling in transit.

Nearly 3000 persons visited the Exhibition, but owing to many people not realising until too late that the Exhibition was open during only one week it was not the financial success it deserved to be.

The balance-sheet appended shows a deficit of £62. £46 of this is covered by a guarantee fund which was raised before any liabilities were incurred.

The Council takes this opportunity of again thanking very heartily the owners of the various loans for their kindness in lending such priceless relics.

The authorities of St John's College have been good enough to authorise the Secretary to be responsible for any remains of past ages found upon the College property when ground is broken for building and other purposes on the understanding that the articles found should remain at the disposal of the College and that a proper report be made from time to time.

During the summer several skeletons of the Romano-British type together with a few bronze buckles, &c., have been unearthed close to the spot where the old Roman road crosses the Grange Road. One skeleton was discovered with its skull, which was quite perfect, resting against a Roman vase, and having several Roman articles beside it.

It is much to be wished that other Colleges could see their way towards treating the Society with similar confidence in order that the record of the past life of Cambridge may be duly preserved.

During August the Secretary assisted for a time by Dr Duckworth, discovered and excavated seven Roman pottery kilns at Horningsea. Two of these have been carefully removed to the Museum of Archaeology and Ethnology.

Strange to say the only coin found is a small silver British one of the reign of Boduoc.

During September the Secretary excavated another skeleton—the eighth—from the pre-Roman cemetery near the War Ditches on Cherry Hinton Hill. It is that of a young woman about twenty years of age. In the left-hand had been placed a hen's egg for the purpose, according to an ancient custom, of providing sustenance during the journey from this life to the next. The broken egg-shell was found and is preserved.

The Excavation fund is well worthy the attention of members. Many most interesting sites close to Cambridge need investigating, the only hindrance being want of sufficient money.

The first block of the new Museum of Archaeology and Ethnology is rapidly approaching completion, but it is plainly evident the present lamentable congestion of exhibits in the old Museum will perforce continue in the new one until the other two blocks are finished. It is earnestly hoped that the funds needful for completing the Museum will be speedily forthcoming.

The publications this year have been five in number:

The three terminal parts of the fifteenth volume of Proceedings containing the Transactions and Communications for the Session 1910-11; the List of Members, Rules and Report &c.

for 1911; the Catalogue of the Loan Exhibition of Stuart and Cromwell Relics which was held in the Cambridge Guildhall May 15-20, 1911.

Through the generosity of Mr Alfred Paget Humphry, the Society is able to publish in Octavo form the Rev. Dr Stokes's paper on the Esquire Bedells of the University. This is now in the Press: the Council tenders its hearty thanks to Mr Humphry.

Five excursions were arranged during the past year.

On November 10, 1910, 80 members visited Jesus College where Mr Arthur Gray, before conducting the party round the College and its interesting Chapel, gave a lecture in the Hall on the history of the buildings. Afterwards the members were kindly entertained to tea by the Master and Fellows.

On December 8, 1910, a visit was paid by 48 members to the churches of St Benet, St Botolph and St Edward.

Mr T. D. Atkinson pointed out the interesting architectural features in the three buildings, and the Incumbents, the Rev. W. Greenwood, the Rev. A. W. Goodman, and the Rev. Canon Thornton, kindly related the history and showed the plate and registers of the churches.

An excursion to Sawston Hall was arranged to take place on March 23, 1911, but owing to a sudden bereavement in the family of Mr Huddleston the visit was postponed.

On June 29, 1911, 35 members took part in an excursion to Huntingdon, where after visiting Hinchinbrooke, the register of Oliver Cromwell's Birth and Baptism in All Saint's Church was inspected. A visit was also made to the Norman Hospital of St John, which has been part of the Grammar School for more than three centuries, where the Protector received his early education. After tea at the George Inn the party walked to Godmanchester, noticing, on the way, the house where the poet Cowper lived with the Unwins, the Castle Hills and the fine thirteenth century bridge over the Ouse. The Rev. Canon Sloman, R.D., pointed out the interesting features of Godmanchester Church and its registers. In the Court Hall the original charter granted to the town by King John and many early documents of Plantagenet times were inspected.

On July 29, 1911, 34 members took part in an expedition by motor-car to the four great Fen monastic buildings, Peterborough Cathedral, Crowland, Thorney and Ramsey Abbeys. On the way the party crossed the Ouse by the old stone bridge at St Ives with the remains of the mediaeval chapel upon it, and on the return journey the passage of the same river was made by means of the ferry at Over.

The balance sheet, showing the Society's financial position to December 31, 1910 is published with this report.

The Secretary attended the Congress of Archaeological Societies held at Burlington House, W., on July 5. An account of the Proceedings will be circulated.

The thanks of the Society are presented to Mr Elliot Stock for the gift of "The Antiquary."

The following changes on the Council have taken place during the year.

Mr W. B. Redfern has been elected President in succession to the Rev. Dr Stokes, who retires according to Rule XII. Mr H. M. Chadwick and Mr R. Bowes have resigned their seats upon the Council their places being taken by Dr C. S. Myers and Mr S. Gaselee.

## APPENDIX I.

## EXCAVATION FUND APPEAL.

The Council, after due consideration of the matter, believe the best interests of the Cambridge Antiquarian Society will be served by conducting each year some excavations upon the many relics of bygone ages to be found in the County.

It has, therefore, determined to appeal to members, and to others interested in original research, for support in raising a fund for carrying out this most valuable work.

It is impossible to meet the cost of such investigations out of current income, since the scope of the Society's undertakings is widening, causing thereby greater demands upon its ordinary resources.

During the past two years over 100 members have been added to the Society's roll, a goodly proportion of whom have joined in consequence of the interest aroused by the recent excavations at Barton, Lord's Bridge, Cherryhinton and elsewhere.

This fact shows that the Society, as well as archaeological research, will benefit by the adoption of this course of action.

It is scarcely necessary to point out the value of excavations in elucidating the past history of the County.

The exploration of the various tumuli scattered over Newmarket Heath, and elsewhere within our borders, will help to fix the boundaries of the ancient peoples who inhabited this part of East Anglia, and to mark the limits reached by earlier invasions, before the Roman conquest ended those incursions for some 200 or 300 years.

The War Ditches near Cherryhinton have been explored only partially; at least two-thirds of the circle of the camp remains untouched, as well as the cemetery belonging to this pre-Roman settlement. Rich finds ought to be the reward of patient investigation on this site.

The ford way at Hauxton Mill of the ancient road, which ran from the Ermine Street near Old North Road Station, along the ridge of Chapel Hill, through Hauxton to Red Cross, should yield to the careful digger many objects of the Celtic, Roman, and Saxon ages.

Two tumuli, and what appears to be an early fortification near Fen Drayton, await the explorer's hands.

Caxton Moats, with ditches 60 feet wide, are an unexplained puzzle to antiquaries.

The curious earthmarks at the field called 'Bullocks Haste' near Cottenham, undisturbed grassland since Roman times, and other sites near by, deserve more attention than they have hitherto received, for this is a most important centre for study of the Roman occupation.

For the investigation of these, and many other such places, and for excavation work on localities, which though undiscovered as yet, become known as year by year goes by, funds are imperatively needed.

The Cambridge Antiquarian Society, holding such a position as it does, and numbering now more than 480 members, ought to spend at least £100 each year on original research.

In order to do this a sum of money should be raised, the interest arising from it to be spent yearly.

The Council makes this appeal in the confident hope that a generous response on the part of its members and others will enable it to do its share in solving the many archaeological problems remaining in Cambridgeshire.

## APPENDIX II.
