ART. XVI.—Some Accounts of Anne, Countess of Pembroke. By THE REV. JOSEPH WHITESIDE, M.A.

Communicated at Carlisle, Sept. 8th 1904.

THESE accounts (would that there were more of them!) are the remnants of a pile of manuscripts committed to the flames by the owner of an estate in the North. The narrow escape of this solitary survivor seems to shew the vast importance of securing as large a membership as possible for the Society, so that, though they may be indifferent to antiquarian pursuits, the representatives of what we call the county families may be induced to remember their responsibilities and to call in the advice of the Council before clearing out the contents of their lumber rooms.

The book consists of thirteen pages of foolscap, being the accounts for August and October, 1673, and of one page, subsequently attached, referring to the Countess' Pillar and the distribution thereon in April of that year. They are written in the very neat clerkly hand * of a secretary who had entered the items at length each day; her ladyship, who was then about 79 years of age, afterwards ran over the the statement, wrote down the figures herself and added up each page, and finally had them examined at the end of the month by Thomas Gabetis,[†] her "shiriffe" and auditor.

Thos. Gabetis Esqre The Wise, The Eloquent, the jvst, Lyes here interr'd Amongst ye dvst Below, who Forty Years and more Was sheriffe, Now is Heaven's Store,

^{* &}quot;Her books of account were most exactly kept."—See Nicolson and Burn, 294-303.

[†] Gabetis was buried in Brough Churchyard. A mural tablet on the east wall of the church has these quaint lines :—

ANNE, COUNTESS OF PEMBROKE.

The accounts are interesting as giving a very happy picture of the homely life and virtuous character of a great lady of Westmorland in the seventeenth century; they bear out most exactly what we are told of her by George Sedgwick, whose account is contained in Nicolson and Burn's *History*, from which the quotations in the footnotes are made. Unlike the modern magnate, she is seen to be busy with the management of her own estates, and to have a personal inside knowledge of her castles: no detail is too important, and none certainly too trivial for her consideration. It goes to one's heart to read of an allowance for a cat! The local tradesmen of her day have no reason, like their successors, to grumble because the "big houses" deal at the "stores" or use the parcels post. Lady Pembroke encourages the shopkeepers of the town. and buys her own dresses, not to mention her garters, in Appleby. It is not "bad form" for a lady to take snuff. according to the approved fashion of the time: she purchases a pound of the best Virginian tobacco for her own use. With remarkable simplicity she chronicles the "clipping of all the hairs of her head" by one George Goodgion, who was truly a very handy man, the Countess' factotum, buying tor her plums and gallipots, fetching white thread from Yorkshire to make her stockings, and going to Craven with Thomas Strickland for the receiving Her charity knows no narrow bounds. of rents. There are frequent entries of presents of money to lame and deaf people in her almshouses, tips to children of neighbouring families, gifts of scarlet cloth, linen and gloves (all pur-

chased locally) to various un-named people, and gratuities in sums of 5s. to f_{I} to servants of the gentry. In fact, anyone who did anything or almost nothing was more than sufficiently rewarded. Nor did she disdain to receive sweetmeats, &c., in return from neighbours desirous of shewing their respect and affection.

Her piety was conspicuous, and religious actions are mentioned in the most natural manner—how she bought and distributed books of devotion, how she helped the distressed wife of a clergyman, how she and her household received the Blessed Sacrament in her Castle.

Appleby was her chief residence, and it must have been a delightful place to visit or to reside in, with so courteous a dame as hostess, whose hospitality was so profuse, and where beer and wine flowed so freely!! The household consisted of a housekeeper (who was always a man), a cook, butler, under-butler, porter and barber, brewer, coachman, chief groom, under-groom, postilion and warriner, who are enumerated; but there must have been subordinate servants. The Castles of Brough and Brougham were occupied by housekeepers on board wages. There are further entries relating to Bardon Tower and Pendragon.

Though there is nothing of any real importance, the perusal of the accounts leaves one with a feeling of irritation that hundreds of similar monthly accounts have been so thoughtlessly destroyed.

^{*} I cannot find "stocklock" in any dictionary. A muzzle-loader is suggested, but I think it is excluded by the epithets "great large," which insinuate that some of the species were "little small," and guns would hardly be so described. Recently having a Brigsteer joiner at work in Helsington vestry, I asked him if he knew what a "stocklock" was. He pointed to the floor and said, "Why, theer's yan." It was a heavy lock in a wooden frame just taken off the door. These may have been getting fashionable in place of the bars, beams, or stocks, that slid into sockets in the wall, and the Countess gave the novelties as presents. This explanation satisfies the epithets; the price seems prohibitive, but the good lady added large gratuities to her payments, as we see later on, when George Goodgion receives 6s. for cutting her hair. At Collin Field is a large lock initialled "A P." Mr. G. F. Braithwaite, these *Transactions*, vol ix., p. 191, says that the Countess was fond of giving away such locks along with a portrait of herself. Brigsteer, by the way, is one of the most likely places in Westmorland where ancient words and ways may linger longest.
