So that we are better able to measure the impact of our activities, please can you answer the following questions:

	All of them	Most of them	Some of them	None of them
The workshop was a valuable experience for my students		✓		
They developed their team working ability			✓	
Student attainment is likely to increase as result of today's event			✓	
The students' personal or academic aspirations were raised		✓		

To what extent do you anticipate that the activity will support student's development?

	Very likely	Quite likely	Neither	Quite unlikely	Very unlikely	Don't know
In increased motivation to learn		✓				
In increased confidence		✓				
More positive about themselves		✓				

Which part of today's workshop do think your students found most useful and enjoyable? Why?  
making the post cards as it was a kinesthetic activity where they could be creative.

Do you think this workshop will be helpful in motivating students with their studies? How?

talking to the university students was good - would have been better if each student worked with one group of pupils this would keep them focussed and would give them chance to ask questions

Do you think this workshop has provided your students with sufficient challenge? Please comment

yes it was challenging - sometimes the activities were a little vague - they may benefit from more structure particularly with the writing tasks.
