West Yorkshire Historic Landscape Characterisation Project (WYHLC) was carried out by staff within West Yorkshire Archaeology Advisory Service (part of West Yorkshire Joint Services). It was funded by Historic England (formerly English Heritage). The project would like to thank Historic England for commissioning this project and in particular, acknowledge the encouragement and enthusiasm of Roger Thomas and Graham Fairclough (Characterisation Team), and David MacLeod and Matthew Oakey of the Yorkshire Regional Team.

Project Manager: Ian Sanderson (WYAAS).

Project Officers: John Lord (2011 – 2012), Jennifer Marchant (2011 – 2012), Christopher Thomas (2012 – 2014), Edward Lewis (2012 – 2017) and Karl Lunn (2015 – 2017). This report was written by Edward Lewis and Karl Lunn.

Historic England (formerly English Heritage) Steering and Monitoring Group: Roger M. Thomas, Head of Urban Archaeology (Historic England), David MacLeod, former Operational Manager, Aerial Investigation and Mapping Remote Sensing Investigation and Analysis Department, and Matthew Oakey, Senior Investigator, Aerial Investigation and Mapping.

This project would not have been possible without the resource and commitment primarily of West Yorkshire Joint Services, along with the support of the five local authorities of Bradford, Calderdale, Kirklees, Leeds and Wakefield. Special mention must be made of the help and guidance of Sarah Mawson of Wakefield Metropolitan District Council Planning Services.

The project officers would especially like to thank the permanent and temporary members of the WYAAS team during the life of the project: Stuart Wrathmell, Ian Sanderson, Rebecca Remmer, David Hunter, Elizabeth Chamberlin, Jason Dodds, Rosalind Buck, Rhona Finlayson and Celia Ellis. The project officers would like to thank the technical support of Ashley Kozaczek.

We would also like to acknowledge the generosity and skills of the contributors to the 'Geograph British Isles' website www.geograph.org.uk, which was the source of many of the photographs used in the report, licensed by creative commons licenses – www.creativecommons.org/licenses/by-sa/2.0/. These photos remain the copyright of the original contributors and if reused must carry the present attribution and licence terms. All other project images are © All Rights Reserved. Please contact the original copyright holders indicated if you would like to reproduce any images not expressly licensed for reuse. Where no authorisation is given, the © is WYAAS.

The maps in this report have been derived from a variety of historic maps: a range of historic OS mapping supplied by English Heritage (now Historic England) & used and reproduced under licence (© and database right Crown Copyright and Landmark Information Group Ltd (All Rights Reserved 2016) Licence numbers 000394 and TP0024), plus a range of county, estate, tithe and enclosure maps from the 18th and 19th centuries held by the West Yorkshire Archives Service (to whom thanks are due). The modern OS mapping base was used under the WYAAS Local Authority Ordnance Survey Licence. Maps reproduced from Ordnance Survey material within this document, are done so with the permission of Ordnance Survey on behalf of Her Majesty's Stationer © Crown Copyright. Unauthorised reproduction infringes Crown Copyright and may lead to prosecution or civil proceedings. Geological and base contour maps were based upon the DiGMapGB-625 dataset, with the permission of the British Geological Survey. Reproduced with the permission of the British Geological Survey ©NERC. All rights Reserved.

West Yorkshire Archaeology Advisory Service reserves all rights of Copyright which are owned in the material provided. Dissemination to a third party without the written consent of West Yorkshire Archaeology Advisory Service is a breach of that copyright. Information supplied shall be used for the purposes specified only. The data is supplied on condition that any derived information is clearly marked as your own work and not the work West Yorkshire Archaeology Advisory Service employees. We would, of course, be happy to answer any questions you may have regarding the data.
