Council for British Archaeology
2006**

Tables and figures

Table 3.2 Soil micromorphology, Home Ground: summary descriptions of contexts in thin section

context	thickness	composite properties	mineral components	organic components	pedofeatures
242	>18cm	Vughy microstructure with 10% porosity. Horizontally bedded.	Silty clay. Few fine sand-sized grains. Grey and brown (PPL); grey, brown and orange (OIL).	Rare. Highly fragmented and strongly decomposed. Very dark brown cell contents.	<ul style="list-style-type: none"> • gleying features • soil fauna features • slaking features
281 (upper dark horizon)	2cm	Vughy-channel microstructure with 15% porosity. No bedding.	Silty clay. Few fine sand-sized grains. Dark grey and brown (PPL); grey and brown (OIL).	Rare. Highly fragmented and strongly decomposed. Reddish/brown and very dark brown cell contents.	<ul style="list-style-type: none"> • earthworm granules • gleying features • soil fauna features • reworked fragments of other contexts
282	5cm	Vughy-channel microstructure with 5% porosity. No bedding.	Silty clay. Few fine sand-sized grains. Greyish/brown (PPL); grey and brown (OIL). Rare fine charcoal fragments.	Rare. Highly fragmented and strongly decomposed. Dark brown cell contents.	<ul style="list-style-type: none"> • silty clay coatings on pore walls • earthworm granules • reworked fragments of other contexts • gleying features • slaking features
283	>25cm	Vughy microstructure with 10% porosity. No bedding.	Silty clay. Few fine and rare medium sand-sized grains. Whole and fragmented shells. Rare charcoal flecks. Grey (PPL and OIL).	Rare. Highly fragmented and strongly decomposed. Dark brown cell contents.	<ul style="list-style-type: none"> • soil fauna features • silty clay coatings on pore walls • gleying features • reworked fragments of other contexts • slaking features

2 North Somerset Levels during the 1st to 2nd Millennia AD

Table 3.4 Assessment of pollen from sediment samples from the upper part of the Home Ground alluvial sequence

	context	242	281	281	281	314
sample depth in cm from top of tin 1	15–16	17–17.5	18–18.5	19–20	67–68	
total pollen counted	30	28	45	77	10	
<i>Lycopodium</i> recovered	56	50	90	92	63	
TREES AND SHRUBS						
	<i>Pinus</i> (pine)	1	3		4	
	<i>Quercus</i> (oak)	3	1			
	<i>Alnus</i> (alder)	1		2	1	1
	<i>Corylus</i> -type (hazel)	1	2	1		
HERBACEOUS TYPES						
d	<i>Plantago lanceolata</i> (ribwort plantain)	4		1		1
d	<i>Plantago major</i> (greater plantain)	1				
d	Lactuceae (dandelion and related Asteraceae)	1	1	21	58	2
d, m	<i>Ranunculus acris</i> -type (buttercup family)				1	
d	Brassicaceae (cabbage family)	1			2	
d	<i>Cirsium</i> -type (thistles)				1	
d	Dipsacaceae (teasel family)					1
v	Poaceae (grasses)	12	14	17	5	1
v	Cyperaceae (sedges)		3	1	1	
v, c	<i>Cereal</i> -type (cereals etc)				1	
s, d	Chenopodiaceae (goosefoot family)	3	3	1	1	3
s	<i>Plantago coronopus</i> (buck's horn plantain)		1			1
v	Apiaceae (carrot family)				2	
h	Ericaceae (heaths)	1				
f	<i>Sparganium emersum</i> -type (bur reeds, lesser bulrush)	1				
Counted Outside Pollen Sum						
	Filicales undifferentiated (ferns)	4	8	9	32	4
	<i>Polypodium vulgare</i> (polypody fern)	2	3	3	12	8
	<i>Pteridium aquilinum</i> (bracken)	12	15	1	8	2
	<i>Sphagnum</i> (bog moss)	1			1	
	<i>Spirogyra</i> spores			1	7	
	<i>Mougeotia</i> spores			2	5	
	Spore Type 128			10	38	
	Degraded grains (unidentified)	16	13	41	85	12
	Crumpled grains (unidentified)	3	1			
	Pollen preservation	P	P	P	VP	VP
	Pollen concentration	VP	P	P	P	P
	Relative concentration of charcoal >40 µm	8000	9000	75000	56000	10100

Habitat preferences: v, various; d, disturbed ground; m, meadows or grazed land; c, cultivated land; s, saltmarsh or other maritime habitat; h, heathland; f, freshwater ditch. Preservation and concentration categories: P = poor; VP = very poor

Table 3.5 Foraminifera from the Home Ground alluvial sequence.
Depths are below present ground surface. Numbers of forams are in 10cm³ of wet sediment

depth	context	no. of forams	species present	ecology of individual species
50cm (4.40m OD)	218 (upper dark horizon)	<10	<i>Haynesina germanica</i> <i>Agglutinated sp.</i>	brackish, mid/low marsh–mudflat brackish, high–mid marsh
60cm (4.30m OD)	219	<100	<i>Haynesina germanica</i> <i>Elphidium williamsoni</i> <i>Ammonia beccarii v. limnetes</i>	brackish, mid/low marsh–mudflat brackish, mid/low marsh brackish–marine
70cm (4.20m OD)	219	<100	<i>Haynesina germanica</i> <i>Elphidium williamsoni</i> <i>Brizalina sp. <125u</i>	brackish, mid/low marsh–mudflat brackish, mid/low marsh estuary mouth–marine
80cm (4.10m OD)	219	>100	<i>Haynesina germanica</i> <i>Elphidium williamsoni</i> <i>Brizalina sp. <125u</i>	brackish, mid/low marsh–mudflat brackish, mid/low marsh estuary mouth–marine
90cm (4.00m OD)	321	>200	<i>Elphidium williamsoni</i> <i>Haynesina germanica</i> <i>Nonion depressulus</i> <i>Elphidium sp</i>	brackish, mid/low marsh brackish, mid/low marsh–mudflat estuary mouth–marine estuary mouth–marine
100cm (3.90m OD)	321	>200	<i>Elphidium williamsoni</i> <i>Haynesina germanica</i> <i>Nonion depressulus</i> <i>Elphidium sp</i>	brackish, mid/low marsh brackish, mid/low marsh–mudflat estuary mouth–marine estuary mouth–marine
110cm (3.80m OD)	321	>200	<i>Elphidium williamsoni</i> <i>Haynesina germanica</i> <i>Nonion depressulus</i> <i>Elphidium sp</i>	brackish, mid/low marsh brackish, mid/low marsh–mudflat estuary mouth–marine estuary mouth–marine
120cm (3.70m OD)	321	>200	<i>Elphidium williamsoni</i> <i>Haynesina germanica</i> <i>Nonion depressulus</i> <i>Elphidium sp</i>	brackish, mid/low marsh brackish, mid/low marsh–mudflat estuary mouth–marine estuary mouth–marine
130cm (3.60m OD)	324 (?palaeochannel associated with lower dark horizon)	>100	<i>Elphidium williamsoni</i> <i>Haynesina germanica</i> <i>Ammonia beccarii</i> <i>Agglutinated marsh sp</i> <i>Elphidium sp.</i>	brackish, mid/low marsh brackish, mid/low marsh–mudflat brackish–marine brackish, high/mid-marsh estuary mouth–marine
140cm (3.50m OD)	252	>200	<i>Elphidium williamsoni</i> <i>Haynesina germanica</i> <i>Elphidium sp.</i> <i>Ammonia beccarii</i> <i>Agglutinated marsh sp.</i>	brackish, mid/low marsh brackish, mid/low marsh–mudflat estuary mouth–marine brackish–marine brackish, high/mid-marsh
150cm (3.40m OD)	252	c 100	<i>Elphidium williamsoni</i> <i>Haynesina germanica</i> <i>Elphidium sp.</i> <i>Ammonia beccarii</i> <i>Agglutinated marsh sp.</i> <i>Brizalina sp. <125u</i>	brackish, mid/low marsh brackish, mid/low marsh–mudflat estuary mouth–marine brackish–marine brackish, high/mid-marsh estuary mouth–marine

4 North Somerset Levels during the 1st to 2nd Millennia AD

Table 3.6 Plant macrofossils from upper dark horizon (context 417) at Hardingworth

	context	417	
	size of sample	25.8kg/26 litres

*'Whole' skulls refers to specimens where the snout and palate region was in one piece, even if the cranium was broken or missing. Where two figures are given, the first represents larger ('adult') specimens and the second is smaller ('juvenile') specimens.
