

## **Redditch**

### *Context Groups and Phases: a brief description*

#### **G1, Natural**

IIIA 2272

The natural subsoil

#### **G2, Phase I**

IA 2264, IB 2230, IIA 2225, IIC 2239,  
2281 (2280)  
F204

Medieval plough soils

#### **G3, Phase IIA**

IIIA 2273  
F211

The moat and its early turflines and silts.

#### **G4, Phase IIB**

IIIA 2269	red clay under=2263?
2285	silt
2284	turflines
2267 2275	silt

The remodelling of the main ditch and earliest silting.

#### **G5, Phase III**

IIIA 2262 IVB 2245=2247  
2283  
2270  
2287  
2282  
2274

Deliberate backfilling of the ditch with clays etc from the northern edge.

#### **G6, Phase IV**

IIIA 2268 F20

A ditch within the upper fill of the main ditch possibly caused by subsidence.

**G7, Phase V**

IA 2214	IB 2217	IIA 2221	IIC 2206	IIIA 2231	IVB 2242
2211=2213	2218	2222	2227	2237	2243
2212=2215=2216	2226	2223	2266		2244
2261		2224			
F213					

IVB cont. 2291 (2253)  
2290=2244=2266 2204 F209

**G8, Phase VI**

All areas 2201

IA 2210	IIC (2208)	IVA 2202 = 2240
2276	F205	2203 = 2205 = 2241
F201		

All contexts likely to be associated with industrial development of the site.

**G9, Phase IV**

IA 2261 (see G7)  
2239  
2265 2277 F203 = The masonry.

Construction of the building, sandstone walls

**G10, Phase IIB**

IVA (2234) (2235)	IVB
F207 F206	
2232 yellow =	2249
2233 red clay =	2250

F212=posthole

The fills of a beam slot and post holes situated in main building platform.

**G11, Phase IIA**
