2. The Excavated Material
from Chapter 3

from Chapter 4

from Chapter 5

TWA report headings to be dropped in here as per next entry

from Chapter 6

A small amount of material came from the Experimental Earthwork excavations and is with that project's archive, currently at North Farm, West Overton (but destined for DM).

Otherwise the material comes exclusively from Site Overton Down X and XI and is treated comprehensively in a ring-bound report **PART 1 OF 3: OVERTON DOWN IRON AGE SETTLEMENT (ODXI), TWA Report No. 38877a, June 1995. Prepared for: Prof. P.J. Fowler, Dept. of Archaeology, University of Newcastle-upon-Tyne** (© 1995 copyright Trust for Wessex Archaeology Ltd.). This Report, and more particularly a heavily-edited version of it to correct for site data and revisions (by iwb and pjf, dated 12 June 1997) which is used as the basis for any textual comments and the captions in Chapter 6, and for the abbreviated accounts in Appendix I. Its contents are:
