

FWP 99

SUMMARY OF THE PROJECT'S 'TOTAL PRODUCT' AND ITS ARCHIVAL DEPOSITION

1. The primary archive at the Museum of the Wiltshire Archaeological and Natural History Society, at Devizes, Wiltshire (see FWPs 61, 890)
2. Material available electronically at <http://ads.ahds.ac.uk/catalogue/> (see FWP 33)
3. Material available in print (see FWP 98)

1. The **primary archive** consists of a paper record from 1959 onwards, all the existing excavated material, and a select photographic collection.

a. The **paper records** are themselves subdivided:

- i. a graphic component in a plan chest containing 526 field drawings and subsequent working drawings, catalogued as FWP 61 (see *below*); to which has been added the artwork for the illustrations in this volume and in FWP 63-66
 - ii. a largely verbal component arranged in box files which, when finalised, will be catalogued as an addition to FWP 61.
-

b. The **excavated material** is systematically arranged in numbered boxes, currently on racking in the museum basement apart from the material on display. The contents of the boxes have been catalogued (FWP 99).

c. In addition, a **photographic archive** is also catalogued but is not yet complete (FWP 97)

2. The **electronic archive** is managed by the Archaeological Data Service, York University, and is available at <http://ads.ahds.ac.uk/catalogue/>.

It consists of:

a. **Four volumes of conventional, illustrated excavation reports** covering the three main excavations and, in a fourth volume, all the smaller excavations:

P.J.Fowler 2000 ***Excavation within a later prehistoric field system on Overton Down, West Overton, Wilts: land-use over 4,000 years*** (FWP 63)

P.J.Fowler 2000 ***Excavation of a Settlement of the Fourth and Fifth Centuries AD on Overton Down, West Overton, Wilts.*** (FWP 64)

P.J.Fowler 2000 ***Excavation of the Medieval Settlement of 'Raddun', Wroughton Mead, Fyfield Down, near Marlborough, Wilts.*** (FWP 65)

P.J.Fowler 2000 ***Seven Small Excavations on Fyfield and Overton Downs, with summaries of eighteen other excavations in and near Fyfield and West Overton Parishes, Wiltshire*** (FWP 66)

b. **One hundred 'Fyfod Working Papers' (FWPs)**. Beginning as assemblings of data and drafts of parts of early versions of a volume in 1995, these in-house papers quickly became, first, 'building blocks' in working towards a single major volume and then a device for both handling ideas and material. A full catalogue of the FWPs, with bibliographic and other information, is in FWP 33. Most, some

with various additions and revisions, are available at
<http://ads.ahds.ac.uk/catalogue/>:

3. Printed Material available in multiple copies:

a. 'Popular': Fowler and Blackwell 1998 = P. Fowler and I. Blackwell, *The Land of Lettice Sweetapple. An English Countryside Explored*, Tempus, Stroud

b. 'Academic': this volume, Fowler 2000 = P.J.Fowler, *Landscape Plotted and Pieced. Landscape History and Local Archaeology in Fyfield and Overton, Wiltshire*, Research Report 2000, Society of Antiquaries, London

c. 'research/archival': P.J.Fowler assisted by I.W.Blackwell, *Landscape Plotted and Pieced. Field Archaeology and local history in Fyfield and Overton, Wiltshire*, July, 1997 (though with '1998' optimistically but misleadingly on its front cover), produced in-house by the Computer Centre, Newcastle University. A copy will be deposited with the paper archive in DM, and in the library of the Society of Antiquaries, London (FWP 75).

e. Other printed material

The study area has also generated a considerable bibliography quite apart from the principal monograph. Primary printed sources and significant studies are listed in FWP 98.
