

1.1 Assessment of the Stone

by Ruth Shaffrey

Methodology

1.1.1 All retained stone was examined.

Quantifications

1.1.2 Three pieces of stone were recovered during the excavations. These are listed in Table 7.

Provenance

1.1.3 The few pieces of stone from this site were all of Greensand or Ironstone, both of which would have been available locally. All of the material appears to be unworked.

Conservation

No conservation is required. All stone may be discarded.

Potential for further work

1.1.4 No further work is recommended.

Table 7: Summary of stone

Context	Count	Material	Comments
7	1	Greensand	Subrounded chunk
5	1	Ironstone	Fragment
31	1	Greensand	Possibly slightly shaped though more likely to be unworked.
