

ARC 430/84+400/99 (Tutt Hill)

CONTEXT NUMBER

47

SKULL:

Mandible: 1 left body fragment with 1 partial tooth socket, 2 body fragments with partial tooth sockets.
Maxilla: 1 body fragment, 1 sinus fragment.

Teeth: 1 crown fragment, 1 molar root fragment, 1 maxillary 1st premolar root, 2 single roots, 3 root fragment.

3 frontal bone fragments, 3 occipital bone fragments (Sex: occipital protuberance; Male) right and left superior margins of the external acoustic meatus, right supra-orbital margin with temporal line (Sex: Male?), 3 mastoid fragments, 2 temporal bone fragments, 1 mandibular fossa fragment.

167 cranial vault fragments.

AXIAL SKELETON:

Innominate: 6 blade fragments.

Rib: 18 body fragments.

Axis: 1 body fragment.

Cervical: 2 body fragments.

Thoracic: 4 body fragments, 1 transverse process, 2 spinal processes, 1 right inferior articular process.

Lumbar: 1 spinal process, 1 left superior articular process., 1 right superior articular process.

17 vertebral body fragments, 2 pedicles, 2 articular process fragments.

UPPER LIMB:

Scapula: 2 glenoid fossa fragments, 2 spine fragments.

Clavicle: 1 shaft fragment.

Humerus: 1 head fragment, 2 antero-distal shaft fragments, 5 shaft fragments.

Ulna: 2 shaft fragments.

Radius: 5 shaft fragments.

Hands: Left lunate, hook of hamate, 4 proximal metacarpal shaft fragments, 3 head fragments, 2 distal ends of proximal phalanxes, 2 distal ends of intermediate phalanxes, 1 distal phalanx, 2 distal ends of distal phalanxes, 1 proximal end of a distal phalanx, 5 phalanx fragments.

LOWER LIMB:

Patella: 1 fragment.

Femur: 6 shaft fragments with linea aspera, 10 shaft fragments, 4 condyle fragments.

Tibia: 4 shaft fragments with anterior border, 1 lateral border fragment, 2 shaft fragment, 1 distal articular surface fragment, 4 anterior border fragments.

Fibula: 16 shaft fragments.

Foot: 2 sesamoids, 1 metatarsal shaft fragment, 1 metatarsal head fragment, 2 distal phalanxes, 3 phalanx fragments.

AGE: Adult

SEX: Male

PATHOLOGY SUMMARY: None

PYRE GOODS: 4 animal bone fragments.

CREMATION SUMMARY: 3 charcoal fragments (<1 g). Numerous small unidentifiable black and grey bone fragments, cranial vault fragments with a black core and white outer surface. Few abraded fragments.

COMMENTS: The residue contained a high proportion (200-300 g) of unidentifiable bone fragments from the 2 mm fraction.

ARC 430/84+400/99 (Tutt Hill)

CONTEXT NUMBER

45

SKULL:

Teeth: 1 mandibular molar root fragment, 1 incisor root, 2 incisor root fragments, 2 single root fragments, 5 molar root fragments.

1 occipital bone fragment.

28 cranial vault fragments.

AXIAL SKELETON:

Rib: 2 body fragments.

4 inferior articular process fragments.

UPPER LIMB:

Humerus: 1 right antero-distal shaft fragment, 10 shaft fragments, 1 trochlea fragment, 1 capitulum

fragment

Ulna: 1 shaft fragment.

Hands: 1 metacarpal head, 1 distal end of a distal phalanx.

LOWER LIMB:

Tibia: 5 shaft fragments.

Fibula: 1 shaft fragment.

AGE: Adult

SEX: Unknown

PATHOLOGY SUMMARY: None

PYRE GOODS: 1 cranial vault fragment and 3 unidentifiable fragments with turquoise stain.

All fragments were white.

CREMATION SUMMARY: 2 fragments of burnt flint (1 g).

COMMENTS: The residue contained a small amount of unidentifiable bone fragments from the 2 mm fraction.

ARC 430/ 84+400/99

Context Number	Max. frag. size	Weight	Identifiable fragments	Colour	MNI	Age	Sex	Grave/pyre goods	Comments
48	19.94 mm	4 g	Humeral capitulum fragment, auricular surface fragment, 1 tooth root fragment.	White	1	Adult	Male?	None	
48	-	96 g	None	White					Residue containing a small amount of bone and charcoal fragments.
71	33.40	3 g	2 parietal fragments (refits).	White	1	?	?		
71	-	32 g	None						Residue containing a small amount of bone and charcoal fragments.
72	12.36 mm	1 g	1 fibula shaft fragment, 1 cranial vault fragment.	White	1	?	?		
72	-	123 g	None						Residue containing a small amount of bone and charcoal fragments.
270	9.24 mm	1 g	None	White	1	?	?		
270	-	55 g	None						Residue containing a small amount of bone and moderate amount of charcoal fragments.
271	14.92 mm	2 g	None	White	1	?	?		
271	-	210 g	None						Residue containing a small amount of bone and moderate amount of charcoal fragments.
272	16.38 mm	1 g	None	White	1	?	?		
272	-	43 g	None						Residue containing a small amount of bone.
298	10.98 mm	7 g	None	White	1	?	?		
298	-	379 g							Residue containing a small amount of bone and charcoal.
99	10.58 mm	6 g	None	White	1	?	?		
99		179 g	None						Residue containing a small amount of bone and charcoal fragments.
49	8.12 mm	> 1 g	None	White	1	?	?		
49	-	41 g	None						Residue containing small amount of bone fragments.

24	9.42 mm	> 1 g	None	Grey	1	?	?	2 bone fragments
4	12.26 mm	> 1 g	None	White	1	?	?	2 bone fragments
