

APPENDIX 1 - SHELL

1.1 Assessment of the Shell

by Jessica M. Winder

A single fragment of shell of the common flat oyster *Ostrea edulis* L. was recovered from Boys Hall Balancing Pond excavations (Table 13). It offers no potential for further work in pursuit of the research aims of the CTRL project, and need not be retained.

Table 13: summary of oysters

Context number	Left valve (LV) oyster	Unmeasurable LV oyster	Right valve (RV) oyster	Unmeasurable RV oyster	Total valves oyster (P = present)	Comments on oysters
37182					P	1 small fragment
