Editorial Note

This is the first volume of the Collections to be printed in a larger size, following the policy adopted by Council in 1981, namely to phase out the Research Report Series and to include larger papers, some containing microfiche, in the Collections. They will once more be published annually.

The first two, long, papers in this volume were originally prepared in the Research Report format, and for convenience of reference their contents lists are placed in the text immediately before them. Where a paper has a section in microfiche, this is made clear in the text. It should be noted that the fiche for each article has its own sequence of page numbers. There is a gap on the fiche between articles, for ease of identification.
