

**Fig. 18: Scotland's First Settlers: the use of different raw materials across the Inner Sound (data from Clarke 1990, Hardy *et al*, and SFS as of 30.8.2000). Note: this distribution takes no account of methods of collection nor of type of site and it deals with a sample of SFS material. The material from An Corran and Sand results from detailed excavation unlike the rest of the sites.**  
**Key: 1 Chalcedonic Silica/flint/chert; 2 Baked Mudstone; 3 Rum Bloodstone; 4 Quartz and Quartzite**
