

## West Stow WSW030 Database Table Field List

Sorted alphabetically by table name / field name.

### WSW 030 Bulk Finds

#### *Bulk Finds*

|                             |   |
|-----------------------------|---|
| <b>Context No</b>           | Context number  |
| <b>Pottery No</b>           | Pieces of pottery from this context                   |
| <b>Pottery Wt</b>           | Total weight of pottery (in grams)                    |
| <b>CBM No</b>               | Pieces of ceramic building material from this context |
| <b>CBM Wt</b>               | Total weight of ceramic building material (in grams)  |
| <b>Animal bone No</b>       | Pieces of animal bone from this context               |
| <b>Animal bone Wt</b>       | Total weight of animal bone (in grams)                |
| <b>Flint No</b>             | Pieces of flint from this context                     |
| <b>Flint Wt</b>             | Total weight of flint (grams)                         |
| <b>Burnt Flint/Stone No</b> | Pieces of burnt flint and stone from this context     |
| <b>Burnt Flint/Stone Wt</b> | Total weight of burnt flint and stone (grams)         |
| <b>Fired clay No</b>        | Pieces of fired clay from this context                |
| <b>Fired clay Wt</b>        | Total weight of fired clay (grams)                    |
| <b>Charcoal</b>             | Pieces of charcoal from this context                  |
| <b>Miscellaneous</b>        | Miscellaneous items from this context (slag)          |
| <b>Notes</b>                | Notes   |
| <b>Spotdate</b>             | Any spotdates made during archive assessment          |

### WSW 030 CMB

#### *Ceramic Building Material*

|                     |                      |
|---------------------|----------------------|
| <b>Context</b>      | Context number       |
| <b>Sample depth</b> | Sample depth (cm)    |
| <b>Fabric</b>       | Fabric type          |
| <b>Type</b>         | Type of object       |
| <b>No</b>           | Total pieces         |
| <b>Wt/g</b>         | Total weight (grams) |
| <b>Notes</b>        | Notes                |

## WSW 030 Context Record

### *Context record*

|                               |   |
|-------------------------------|---|
| <b>context</b>                | Context number (includes small find numbers)              |
| <b>feature</b>                | Feature number  |
| <b>group</b>                  | Grouped with context(s)                                   |
| <b>ditch segment</b>          | Ditch segment identifier                                  |
| <b>grsq</b>                   |   |
| <b>identifier</b>             | Type of feature i.e. pit                                  |
| <b>description</b>            | Description of context                                    |
| <b>Length (cm)</b>            | Length of context (cm)                                    |
| <b>Width (cm)</b>             | Width of context (cm)                                     |
| <b>Depth (cm)</b>             | Depth of context (cm)                                     |
| <b>plan</b>                   | If the feature appears on a plan (TRUE/FALSE)             |
| <b>plan no</b>                | The plan number on which the context appears.             |
| <b>section</b>                | If the feature appears on a section drawing (TRUE/FALSE)  |
| <b>section sheet no</b>       | The section sheet on which the context appears            |
| <b>section no</b>             | The Section number assigned to the context                |
| <b>cuts</b>                   | This context cuts   |
| <b>cutby</b>                  | This context is cut by                                    |
| <b>over</b>                   | This context is stratigraphically over                    |
| <b>under</b>                  | This context is stratigraphically under                   |
| <b>Same as</b>                | This context is equivalent to                             |
| <b>soil sample</b>            | If a soil sample was taken from this context (TRUE/FALSE) |
| <b>photos</b>                 | If this context was photographed (TRUE/FALSE)             |
| <b>photographs</b>            | Photographs on which this context appears                 |
| <b>finds</b>                  | If this context contained finds (TRUE/FALSE)              |
| <b>finds on context sheet</b> | Finds as described on original context sheet              |
| <b>small finds</b>            | Small finds numbers from this context                     |
| <b>date</b>                   | Date  |
| <b>spotdate</b>               | Spotdate  |
| <b>phase</b>                  | Phase of occupation                                       |
| <b>period</b>                 | Archaeological period                                     |

## **WSW 030 Early Anglo-Saxon pottery**

### *Anglo-Saxon pottery*

|                 |                        |
|-----------------|------------------------|
| <b>Context</b>  | context number         |
| <b>Fabric</b>   | Fabric type            |
| <b>No</b>       | Total number of pieces |
| <b>Wt/g</b>     | Total weight (grams)   |
| <b>Abr</b>      | Level of abrasion      |
| <b>Notes</b>    | Notes                  |
| <b>Spotdate</b> | Spotdate               |

## **WSW 030 Faunal measurements from context 0001**

### *Faunal measurements from context 0001*

|                |  |
|----------------|--|
| <b>Context</b> | Context number   |
| <b>Species</b> | Species  |
| <b>Element</b> | Element  |
| <b>Fusion</b>  | Fused or unfused                                       |
| <b>Gl</b>      | Greatest length  |
| <b>Bd</b>      | distal breadth   |
| <b>Dd</b>      | Greatest depth of the distal end                       |
| <b>BT</b>      | breadth of the trochlea                                |
| <b>HTC</b>     | diameter of the distal trochlea at its narrowest point |
| <b>BatF</b>    | Maximum breadth distal fusion point, metapodial        |
| <b>Bfd</b>     | Greatest breadth of facies articularis distalis        |
| <b>A</b>       | Area   |
| <b>B</b>       | Breadth  |
| <b>SD</b>      | smallest breadth of the diaphysis                      |

## **WSW 030 Faunal measurements by context**

### *Faunal measurements by context*

|                         |  |
|-------------------------|--|
| <b>Context</b>          | Context number                             |
| <b>Sample</b>           | Depth of sample within the context (mm)    |
| <b>Context Count</b>    | Total pieces of bone from context          |
| <b>Context Weight</b>   | Total weight of bones from context (grams) |
| <b>Species</b>          | Species present                            |
| <b>Species Quantity</b> | Quantity of bones per species              |
| <b>Ages</b>             | Age of bones (i.e. adult / juvenile)       |
| <b>Butchered</b>        | Butchery marks present                     |
| <b>Comments</b>         | Additional comments                        |

## WSW 030 Fired Clay

### *Fired Clay*

|                     |                                     |
|---------------------|-------------------------------------|
| <b>Context</b>      | Context number                      |
| <b>Sample depth</b> | Depth of sample within context (mm) |
| <b>Fabric</b>       | Fabric type                         |
| <b>Type</b>         | type                                |
| <b>No</b>           | Total number of pieces              |
| <b>Wt/g</b>         | Total weight of pieces (grams)      |
| <b>Notes</b>        | Additional notes                    |

## WSW 030 Flint by context

### *Flint by context*

|                 |   |
|-----------------|---|
| <b>Context</b>  | Context number                            |
| <b>Category</b> | Category: links to table Flint categories |
| <b>Type</b>     | Type: Links to table Flint types          |
| <b>Number</b>   | Total number of pieces                    |

## WSW 030 Flint categories

### *Flint categories*

|                 |   |
|-----------------|---|
| <b>Category</b> | Category code: used in table Flint by context |
| <b>Name</b>     | Full description of category                  |

## WSW 030 Flint types

### *Flint types*

|                    |                                     |
|--------------------|-------------------------------------|
| <b>type</b>        | Type used in table Flint by context |
| <b>description</b> | Full description of type            |

## WSW 030 Late Iron Age and Roman pottery

### *Late Iron Age and Roman pottery*

|                 |                                |
|-----------------|--------------------------------|
| <b>id</b>       | Identifier                     |
| <b>Context</b>  | Context number                 |
| <b>Fabric</b>   | Fabric type                    |
| <b>Sherd</b>    | Sherd type                     |
| <b>No</b>       | Number of sherds               |
| <b>Wt/g</b>     | Total weight of sherds (grams) |
| <b>Form</b>     |                                |
| <b>rim type</b> | Rim type                       |
| <b>rim dia</b>  | Rim diameter (mm)              |
| <b>Rim eve</b>  | Rim eve                        |
| <b>Notes</b>    | Additional notes               |

|                             |                |
|-----------------------------|----------------|
| <b>Date</b>                 | Date           |
| <b>Cont pot date period</b> | Period         |
| <b>other context</b>        |                |
| <b>draw</b>                 | Drawing number |
| <b>Site code</b>            | Site code      |

## **WSW 030 Prehistoric Pottery**

### *Prehistoric pottery*

|                     |                                   |
|---------------------|-----------------------------------|
| <b>Context</b>      | Context number                    |
| <b>fabric</b>       | Main fabric                       |
| <b>fabric2</b>      | Secondary fabric                  |
| <b>dsc</b>          | Description                       |
| <b>Count</b>        | total number of pieces            |
| <b>Weight</b>       | Total weight (grams)              |
| <b>Surface</b>      | Surface finish                    |
| <b>Abraded</b>      | Abraded (Yes/No)                  |
| <b>Comment</b>      | Additional comments               |
| <b>decoration</b>   | Type of decoration (i.e. incised) |
| <b>spot date</b>    | Spot date (i.e. Neolithic)        |
| <b>rim type</b>     | Description of rim type           |
| <b>cut</b>          | From context number               |
| <b>base type</b>    | Description of base               |
| <b>feature type</b> | Description of context (i.e. pit) |

## **WSW 030 Small finds**

### *Small finds*

|                            |  |
|----------------------------|--|
| <b>ID</b>                  | Small find ID number                   |
| <b>Small find no</b>       | Small find number                      |
| <b>Context</b>             | Context number                         |
| <b>Period</b>              | Attributed period                      |
| <b>Material</b>            | Material type                          |
| <b>Object Name</b>         | Object description                     |
| <b>Finds category</b>      | Finds category                         |
| <b>No of frags</b>         | Number of pieces                       |
| <b>Weight</b>              | Weight of small find (grams)           |
| <b>Dimensions (Length)</b> | Length of small find (mm)              |
| <b>Dimensions (Width)</b>  | Width of small find (mm)               |
| <b>Dimensions (Depth)</b>  | Depth of small find (mm)               |
| <b>Diameter</b>            | Diameter of small fin (mm)             |
| <b>X-ray number</b>        | X-ray number                           |
| <b>Comments</b>            | Additional comments                    |
| <b>Photograph</b>          | Recommended to photograph (TRUE/FALSE) |

**Draw**  
**Conservation**

Recommended to draw (TRUE/FALSE)  
Recommended for conservation (TRUE/FALSE)
