

Spreadsheet documentation

Title of project:	Engendering Roman Spaces – Hesselbach
Name of database/ spreadsheet file:	Hesselbach_Reduced 23Jan08+provenances.xls

Name of table / worksheet 1:	Hesselbach reduced catalogue	
Purpose of table/worksheet:	Records artefact catalogue	
Number of rows of data:	18	
Primary key (database only):		
Name of field	Full description of field and codes or terminology used	Data type and field length (database only)
Site name	Descriptive field: name of site - Hesselbach	
Cat. no.	Unique field: published artefact catalogue number (used in GIS)	
Provenance code	Provenance code, generated from find number, for linking to provenance data table (used in GIS)	
X coordinate	Coordinate for linking artefact table to provenance table (used in GIS)	
Y coordinate	Coordinate for linking artefact table to provenance table (used in GIS)	
No. of artefacts	Numeric field: quantity of artefacts for record (used in GIS)	
Artefact category	Descriptive field: functional category of artefact (not used in GIS)	
act_cat	Descriptive field: SQL-abbreviation for functional category of artefact (used in GIS)	
Material	Descriptive field: artefact material (not used in GIS)	
Material detail	Descriptive field: detail of artefact material (not used in GIS)	
Type	Descriptive field: artefact type (not used in GIS)	
Sub-type	Descriptive field: artefact sub-type (not used in GIS)	
Description	Descriptive field: short description of artefact (not used in GIS)	
Inscription & type	Descriptive field: transliteration of inscriptions on artefact, if any (not used in GIS)	
Date	Descriptive field: date or date range of artefact, if known (not used in GIS)	
Stratigraphical info	Descriptive field: stratigraphical information, if any (not used in GIS)	
Building phase	Descriptive field: building phase of fort (not used in GIS)	
Building phase code	Descriptive field: codes for phases of fort (used in GIS)	
Location	Descriptive field: Building or excavation feature where artefact found (not used in GIS)	
Gender	Descriptive field: gender, or possible gender, category (not used in GIS)	
Gender code	Descriptive field: SQL-abbreviation for gender category (used in GIS)	
Dim. (cm)	Descriptive field: dimensions of artefact, if known (not used in GIS)	

Find no.	Descriptive field: find number of artefact indicated provenance (not used in GIS)	
Published illustration	Descriptive field: reference to published illustration of artefact in main publications (not used in GIS)	
Published reference	Descriptive field: references to parallels for artefact (not used in GIS)	

Name of table / worksheet 2:	provenance data	
Purpose of table/worksheet:	Records provenances and provides linking field to Hesselbach reduced catalogue	
Number of rows of data:	75	
Primary key (database only):		
Name of field	Full description of field and codes or terminology used	Data type and field length (database only)
Provenance code	Unique numeric field: identity for each precise provenance generated from excavation area and feature, for linking artefact table (used in GIS)	
X	Coordinate for each provenance identity (used in GIS)	
Y	Coordinate for each provenance identity (used in GIS)
