Date Identified 07/July/2005
Method of Discovery Intensive Survey
Associated Tracts 2005-324
Site Name Theth Grunas
Site Description
Prehistoric site composed of large terraces and possible fortification wall. Five structures, at least three of which are Early Modern and two are Modern (a water "tank" associated with a raised irrigation canal and what may be the remains of a mill or electrical substation). Site was excavated in 2006, 2007, and 2008.
Periods Represented
Iron Age
Early Modern
Representative Artifacts
Chronology Notes Shenime per kronologjine
Radiocarbon dates indicate construction of terraces at 800 BC, with occupation through 500 BC or sometime shortly thereafter. Artifacts confirm these dates. Three of the structures are Early Modern, as confirmed by excavation.
Preservation Ruajtja
Good preservation of terraces and prehistoric strata, as well as of Early Modern and Modern
Geological Observations Vezhgime per Gjeologjine
Terraces block a tributary gorge of the river produced by the water fall.
Features Tipare
Very large terraces, five structures, modern irrigation canal.
Possible Function
Settlement
Directions to Site Udhezime per Vendndodhjen e Sitit
Site occupies the very last bit of terraced land in Theth, in the Grunas neighborhood.

Sketch of Trench (show boundary of level, features, etc.)
Scale of Sketch: 1 : 1
NOTE: THESE SKETCHES WERE NOT WORTH REPRODUCING
Interpretation of Level
Might be the bedrock. The darker spot in the SW part of the unit interpreted earlier as possible feature (Feature 1) is a natural phenomenon, loose fill between 2 large pieces of rocks. The feature has to be deleted.
