## Recomember 创忆遗产 数字经济 Heritage-driven Economy

2018 / 9 / 12 - 9 / 16 北京·清华大学

# CHCD2018 SYMPOSIUM

The 5° International Symposium on Cultural Heritage Conservation and Digitization

第五届文化遗产保护与数字化国际论坛

Research Infrastructures for Digital Heritage: Challenges of Preservation and Access

Professor Julian Richards/University of York, UK

### Lecture outline

- Challenges of Preservation and Access:
  - Digital Preservation
  - Resource Discovery and Interoperability finding & joining up fragmented and diverse data sets
  - Political (& Economic) Context of Open Data
- Research Infrastructures:
  - UK: Archaeology Data Service
  - Europe: ARIADNE, E-RIHS

### Digital Preservation Challenges:

- Digital data are fragile
- They are often still archived as objects rather than computerised information
- Defining digital data standards
- What are the significant properties of our data?

暨国际青年专家训练营&案例竞赛&主题展会

Remmember 创忆遗产 数字经济 Heritage-driven Economy

# Digital Data and Archaeology

- Archaeology is destructive
- Comprehensive records of field work are imperative

## The Archaeology Data Service

- Set up in 1996
- Based within the University of York
- 12 staff
- Business model based upon charging policy
- Trusted Digital Repository: Data Seal of Approval
- Received Digital Preservation
   Coalition's Decennial Award in 2012
- Oct 2016: 12Tb; 2,143,497 files;
   21,327 recorded processes

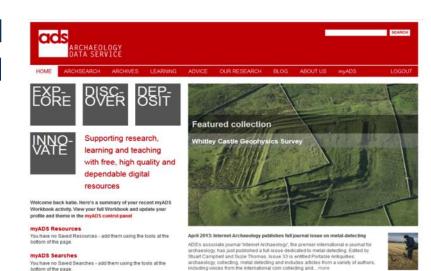

# The Archaeology Data Service

"Supporting research, learning and teaching with free, high quality and dependable digital resources"

- Collects and preserves datasets
- Provides easy and free access to datasets
- Provides guidance and support to data creators

March 2013: Five new archives added to Southampton's Designated Archaeology Collections Programme

The Archaeology Data Service and Southampton Arts and Heritage are pleased to announce that the new archives have been added to Southampton's Designated Archaeology Collections Programme. Southampton Arts and Heritage is the final recipient of all archives generated by archaeological fieldwork within the Southampton (b) houndark as role is to store and care for the objects and the space plon. more

This new and revised series of Guides to Good Practice have been produced as the result of a two-year collaborative project between the UK Archaeology Data Service and Digital Antiquity in the US. The project has encompassed important revisions of the existing six ADS Guides as well as the development of entirely new documents covering areas such as marine survey, laser scanning, close-range photogrammetry, digital audio and digital video. The project has involved previous Guides authors revising existing content alongside new authors, from both Europe and the US, also contributing to the development of the guides into new themes and areas.

The project has been undertaken in collaboration with the Digital Antiquity initiative, a US-based project with the aim of enhancing the preservation of and access to digital records of archaeological investigations. A major aim of the Guides is to provide the basis for archaeological project workflows that will create digital datasets that can be archived and shared effectively by Digital Antiquity's tDAR archive and repository in the US and by the Archaeology Data Service in the UK. The development of the Guides involves close collaboration with teams in the US at both the University of Arkansas and Arizona State University.

Other ADS projects have also fed into the revision and development of the Guides. ADS involvement in the European VENUS projects has formed the basis of a guide focussed on marine survey. In addition, the incorporation of findings from the ADS Big Data project, together with the revision of the existing guide on aerial photography and remote sensing data, has seen a significant contribution to the guides from English Heritage funded projects

Previous versions of the ADS/AHDS Guides to Good Practice have been archived and are still available on the old Guides to Good Practice apage.

Number 1 Poultry (ONE 94)

← Back to search results

ு ≅⊗∞

The site of 1 Poultry is located near the Bank of England, in the heart of the City of London. During the 1990s, one of the largest excavations in the City recovered a remarkable archaeological sequence from the 1st to the 20th century AD. This was augmented by findings from nearby sites at Bucklersbury, Lothbury, Lombard Street, 72-75 Cheapside, 76-80 Cheapside, 36-37 King Street and Mansion House. 1 Poultry lies immediately west of the point where the main east-west road through Roman London bridged the Walbrook stream and uncovered an unparalleled sequence of buildings, roads, and open spaces. A timber drain of AD 47 beneath the main road is the earliest, securely dated structure yet known from Londinium, and a pottery shop, destroyed in the Boudican revolt, gives a snapshot of life in AD 60/61. A 2nd-century AD writing tablet preserves the only evidence for the sale of a slave found in Britain to date, while the 3rd- and 4th-century AD buildings on the Responsible persons and organisations site provide a rare demonstration of the continuities and changes that occurred in Roman urban life.

#### Introduction

The site of 1 Poultry is located near the Bank of England, in the heart of the City of London. During the 1990s, one of the largest excavations in the City recovered a remarkable archaeological sequence from the 1st to the 20th century AD. This was augmented by findings from nearby sites at Bucklersbury, Lothbury, Lombard Street, 72-75 Cheapside, 76-80 Cheapside, 36-37 King Street and Mansion House.

1 Poultry lies immediately west of the point where the main east-west road through Roman London bridged the Walbrook stream and uncovered an

Poultry occupied a prominent position at the eastern end of Cheapside, the city's principal medieval n street: integrating documentary evidence with the archaeological record has provided an outstandingl Post-Excavation Project Manager detailed account of this area. Reoccupation of the site in the later 10th century AD began with the construction of scattered sunken-floored buildings; a more regular pattern of settlement, characterised narrow-fronted timber buildings along the roadsides, had developed by the early 11th century. Occupa London became progressively denser up to the 13th century, when large stone-built houses began to be constructed in previously open areas behind the street frontages. Metalworking evidence from the excavated buildings indicates early economic activity, corresponding with later documentary evidence smiths, ironmongers and other metalworkers in the area. The Great Conduit, the City's first piped wat Send e-mail enquiry supply, was established in the 13th century; its vaulted lower chamber survived at the junction of Bucklersbury and Cheapside.

This project was published following a joint venture between English Heritage and Museum of Londor ADS Collection: 1297 Archaeology as:

# Conclusions:

- Digital data preservation has a cost but data collection / data loss is more expensive
- Digital data is re-used and studies show research and economic return
- Importance of research infrastructures for preservation and access
- Need to work at international level

2018/09/13-14 清华·北京
