

## **Introducing SEADDA**

**CHNT, Vienna, 6 November 2019** 

Julian Richards | University of York

#### **Challenges**

- Archaeological data often derived from non-repeatable interventions
- Digital data more fragile and subject to obsolescence
- Data is often born digital
- We risk losing a generation of research Urgency!

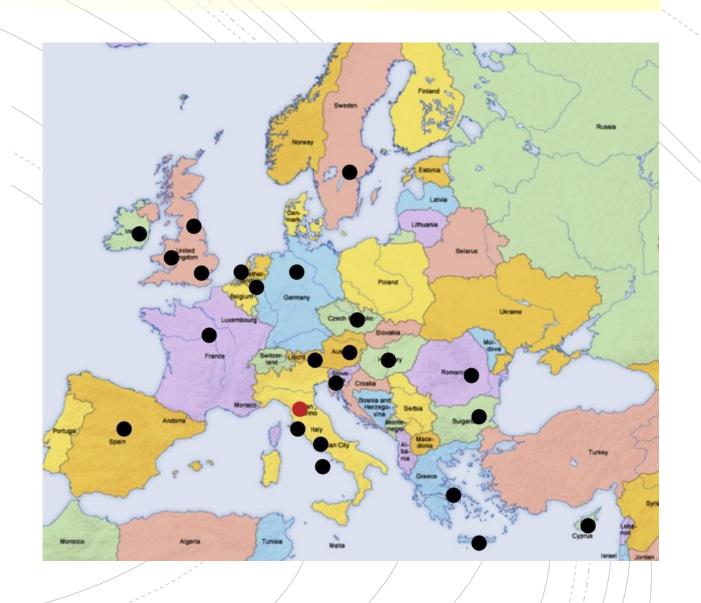

## **ARIADNE Community**

- 9 ICT organisations
- 14 archaeological organisations
- 15 Associate partners
- Community building
  - Transnational access
  - Training events
  - Special interest groups

## **Internal Capacity Building**

- Paper was given by partners in Slovenia and Ireland talking about "have's and have nots" when it comes to having an acceptable place for their archaeological data
- Plans were made to offer data management workshops to partners in their own countries - Austria and Slovenia both accepted
- Much more successful than anticipated!

## Data management workshops

Local ARIADNE partners
worked hard to make sure
governmental and institutional
stakeholders attended, and
took on understanding and
presenting the state of play in
their country

#### Data management workshops

Level of interest was much higher than expected:

- Pressure from funders to deposit data into an open repository
- Pressure from institutions to deposit data into an open repository
- Funding available; but no guidance
- No appropriate options for archaeological data
- Conversations continued on how to take expertise within ARIADNE and collaborate beyond current network
- Good practice guidance but "one size did not fit all" and working together was going to critical to moving forward

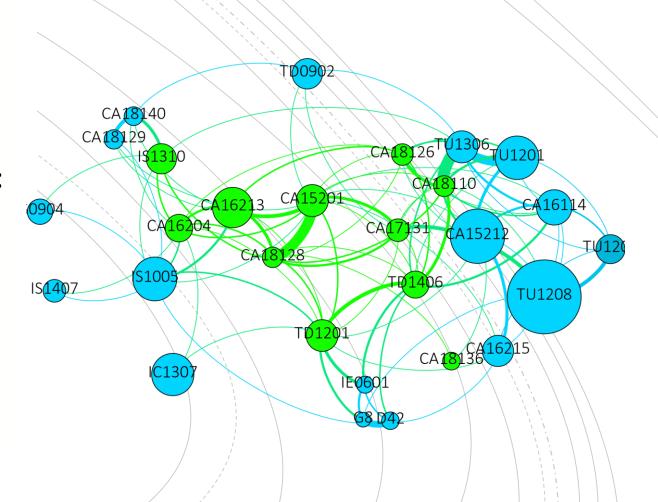

#### **SEADDA COST**

# COST Action SEADDA: Saving European Archaeology from the Digital Dark Age

EU funding (four years) for networking: meetings, training sessions, scientific missions, open access publications

Meant to complement
 Archaeological practices and
 knowledge work in the digital
 environment (ARKWORK)

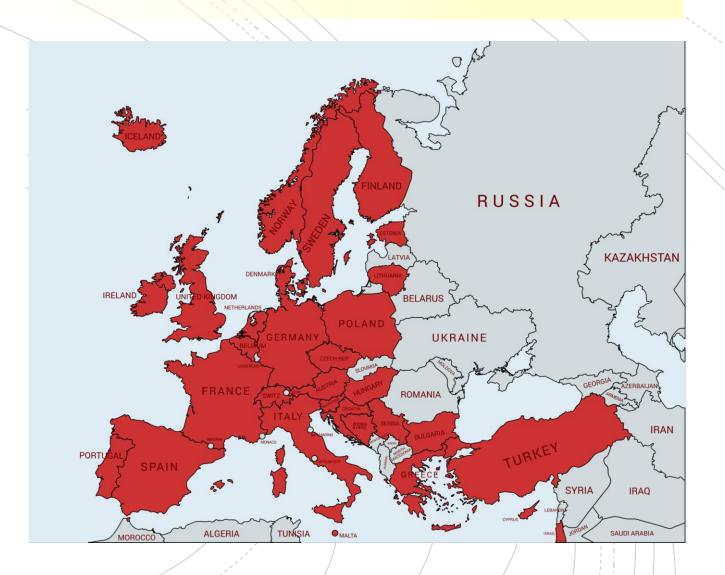

#### **SEADDA COST**

#### 31 countries

- 14 Inclusiveness Target Countries (ITCs) - 45%
- 64% of ITCs
- 100% of non ITCs

#### 4 International Partner Countries:

- 1. Argentina
- 2. Canada
- 3. Japan
- 4. United States

#### Research Coordination Objectives

- Coordinate information collection to understand the current state-of-the-art regarding the preservation, dissemination and re-use of archaeological data.
- Develop a common understanding of international best practice for preservation, dissemination and re-use of archaeological data
- Develop a range of fundable research projects to solidify the priority research area, focussed on creating new longterm international partnerships

## **Capacity Building Objectives**

- Foster knowledge exchange around international best practice for preservation, dissemination and re-use of archaeological data
- Increase representation of women in both archaeology and computer science (43% of current MC are women)
- Extend capacity online, conferences, workshops, etc.
- Foster knowledge exchange through innovation, working with other leading initiatives

#### Stewardship of archaeological data

**Objective:** To bring together members with varying levels of experience to share their successes and challenges around the stewardship of archaeological data to create a sub-network.

Practical and ethical considerations will be explored:

- Encouragements and resistances to sharing data and making it openly accessible within archaeology
- Who should be responsible in short and long-term for preservation
   The starting point for those who wish to begin or progress dialogue in their region or country.

Gothenburg: November 12th

#### **Planning for Archiving**

**Objective:** To identify the practical and technical issues surrounding the creation of an appropriate repository for archaeological data

- Understanding hardware and software options
- Management structures
- Training of archivists

The WG will identify existing best practice, changing future needs, and pragmatic technical and structural solutions.

Vienna December 13<sup>th</sup>!

#### **Preservation and Dissemination Best Practice**

**Objective:** Understand current international best practice for archiving and dissemination, and implementation by existing repositories.

- Open Archival Information System (OAIS) model
- The FAIR Principles
- Repository accreditation
- Cost modelling
- Dealing with data types

Will bring together archaeological digital archivists to share current practice, and survey future trends to understand the changing archaeological and digital landscapes (domain and technology watch).

The Hague March/April 2020

#### **Use and Re-Use of Archaeological Data**

**Objective:** To understand how to optimise archives and interfaces to maximise the use and re-use of archaeological data. To explore how archaeological archives can better respond to user needs, and ways to document and understand both quantitative and qualitative re-use.

- Explore barriers to re-use, such as IPR and licencing
- Explore design of underlying data structures and their interfaces Will focus on initiatives like the FAIR Principles and technologies that improve and optimise searching, issues around how data is created, organised and disseminated, different options for interface design, and developing best practice around qualitative re-use.

York: March/April 2020!

#### **Current and Planned Activities**

Surveys: each WG has at least one survey to complete during the course of the Action, to understand and share the current state-of-the-art Exploratory Workshops: each WG will hold a workshop to refine strategy and hear from key advisors and stakeholders outside the Action Short Term Scientific Missions: institutional visits aimed at supporting individual mobility, fostering collaboration between individuals.

ITC Conference Grants: Funding to present about the Action for members from Inclusiveness Target Countries

**Publications:** Surveys and other work will form the basis for a range of publications to communicate the current international state-of-the-art

#### **Activities**

#### ARIADNEplus Transnational Access Opportunities

SEADDA members will be interested in these opportunities offered by ARIADNEplus. 2019 TNA CALL The ARIADNEplus project invites researchers to apply to participate in individual training visits to carry forwards their own research. These opportunities are offered as part of

#### SEADDA COST Action @SEADDA\_COST · 1s

Looking forward to meeting with members of our management committee tomorrow before the start of @eaa2019 in Bern. We will be planning our working group exploratory workshops, learning about synergies with @ARIADNEplus and much more! @COSTprogramme
