ART. XXI.—An Inventory of the Ancient Monuments of Cumberland. By W. G. Collingwood, M.A., F.S.A.

Communicated at Carlisle, April 19th, 1923.

As it is twenty-five years since Chancellor Ferguson's Archæological Survey appeared, and much work has been done by the Society since then, it is perhaps time to revise and bring up to date that most valuable essay. Nothing of the kind is final; indeed, these lists which follow will show how many points need further study in the light of modern knowledge.

In this Inventory all sites and remains of historical interest known to us at present (excepting documents, church plate and other small movable articles) are arranged by parishes, and the parishes are grouped in twelve districts intended to conform to a scheme approved by H.M. Inspector of Monuments for the supervision of our antiquities by local correspondents. The index at the end of the article will enable a reader to turn up any given place.

Early authorities quoted by Chancellor Ferguson are omitted, except when they have not been superseded by later studies of the subjects. In the references, " o.s. " and " n.s. " stand for the old series and the new series of these Transactions; " Lap." for Dr. Bruce's Lapidarium Septentrionale; " C.I.L. vii " for Huebner's volume of the Corpus Inscriptionum Latinarum; " E.E. " for Ephemeris Epigraphica; " N. and B." for Nicolson and Burn. Other abbreviations will be easily recognised.

Much kind help in completing and correcting the Inventory is gratefully acknowledged. Mr. Robin G. Collingwood has supplied the entries relating to Roman
antiquities. Mr. T. H. B. Graham has gone through the whole of the proofs and given most valuable assistance in many details. Mr. J. H. Martindale has seen the manuscript, and various parts of the proof have been read by Mrs. Hesketh Hodgson; Mr. John F. Curwen; Mr. H. Penfold (Brampton); Colonel Haswell and Mr. R. Morton Rigg (Penrith); Mr. L. E. Hope (Carlisle); Mr. Francis Grainger and the Rev. W. Baxter (Holme Cultram); Mr. J. B. Bailey (Maryport); Messrs. J. R. Mason and H. Valentine (Workington); Dr. W. D. Anderson and Mr. A. W. Rumney (Keswick); Mr. P. H. Fox (St. Bees); Mr. I. J. Postlethwaite (Seascale); Miss Fair (Eskdale); and Mr. H. S. Cowper and the Rev. W. S. Sykes, who revised the description of South Cumberland. To these and to the writers whose works have contributed to the survey the compiler is deeply indebted.
