Plate I  View of the A30 floodway area from the Runnymede Bridge, before excavation, in December 1975

Plate II  Flood water conduit exposing sequence of deposits at base of A30 embankment surrounded by recent disturbance
Plate III  Detail of 'natural' section, with interpretation, exposed at base of A30 embankment by conduit (see Plate II). Layers 15–26 represent recent disturbances associated with the construction of the A30 embankment and its adjacent floodway.
Plate IV  Area 1 trial trench. The ranging rod lies on the Bronze Age occupation surface

Plate V  General view of site under excavation, from the south. The Thames is in the background
Plate VI  Grid excavation of Feature 31

Plate VII  General view of site in May 1976, two months after completion of excavation, showing progress of motorway construction. Compare with Plate I
