Index

Principal authors’ names do not appear in the Index as these are given in the Table of Contents at the beginning of this volume. Authors of specialist reports are listed with a brief indication of subject matter. Site names cited as parallels are not as a rule indexed. Place-names are individually indexed, but also appear under the relevant old or historic county name. County names appear in capitals; names of the most relevant new council areas (ie post-1996) are given in brackets. Correspondence between the post-1996 councils areas and the old historic counties is not always exact. Fellows are urged to consult the Foreword and maps in the General Index to Volumes 106–126 for clarification. Multi-period entries, eg coins, houses, pottery are listed chronologically, then alphabetically (thus, various sorts of medieval pottery will follow Romano-British pottery).
