What is OASIS+buildings?

OASIS+buildings is an online submission form. OASIS+buildings allows historic buildings investigators to document details about work they have done – the who, the what, the where, the when and the why of their work, along with the results of this work – the report they have generated. The purpose of the system is to feed other information resources, principally Historic Environment Records. The report uploaded will be passed to the HER but also included in the ADS Library, where it will join over 3000 other reports detailing historic building investigations nationally.

Who should use OASIS+buildings?

Anyone conducting an investigation of the historic environment, whether this be simply taking a few photographs for interest, to full building recording survey. OASIS+buildings is a module of the wider OASIS system, which encompasses the whole of the sphere of historic environment investigations, including below-ground archaeology, landscape survey and remote sensing. The system has been designed to be as intuitive as possible so that all forms of practitioner, whether professional or voluntary, can submit information. OASIS+buildings will help to inform strategic decisions for the historic environment by compiling a national picture of investigative work undertaken as part of the planning process and pre-planning process, (implemented through the National Planning Policy Framework), or in the voluntary sectors. As such, its use will be promoted and encouraged as best practice by National and Local Historic Environment bodies.

How does OASIS+buildings work?

OASIS+buildings is essentially a process. It collects information from the people who understand the work the best: the people who conducted it, and feeds it to places where the information can be made available and searched.
