

Data Table 24 Comparative details of small-long brooches from Cemetery II

Gr/object no.	Headplate	Footplate	Terminal	Bow cross-section	Punchmarks	Material	Position/usage	Comment
323/1	cross pattée derivative	straight-sided	narrow triangular, raised rib at end	pointed curve	triangles	leaded bronze; Fe spring	L side of upper chest; matching pair with 323/2	
323/2	as 323/1	as 323/1	as 323/1	as 323/1	as 323/1	bronze; pin missing	R side of upper chest; matching pair with 323/1	
336/1	cross pattée derivative	straight-sided	triangular	pointed curve		copper alloy; Fe pin	L side of upper chest; non-matching pair with 336/2	
336/2	openwork square	short with curved lappets	triangular	?flattened curve	circles, triple dot-in-triangles and 'notching'	copper alloy; Fe pin	R side of upper chest; non-matching pair with 336/1	
374/1	square with raised edge	straight-sided, ribbed	missing	shallow curve		copper alloy; ? pin	centre of chest; singleton	
397/1	cross potent	straight-sided, ribbed	spatulate	slightly pointed curve		?tinned copper alloy; Fe pin/spring attached to lateral pin lugs	centre of lower chest/waist area, ?disturbed; ? pair with Fe annular brooch	Böhme's type Liebenau-West Stow, subgroup Borgstedt-Rothwell – 5th century
448/1	rectangular	straight-sided with semicircular lappets	expanded spatulate	shallow pointed curve	D-shape within D-shape	copper alloy; ?Fe pin	R side of upper chest; matching pair with 448/2	
448/2	as 448/1	as 448/1	as 448/1	as 448/1	as 448/1	copper alloy; ?pin	L side of upper chest; matching pair with 448/1	
529/1	square (panelled)	straight-sided, ribbed, with downward-pointing zoomorphic lappets	expanded triangular with concave sides and raised rib at end	pointed curve	D-shape within D-shape and paired triangles, apex-to-apex	copper alloy; Fe pin/spring	R side of upper chest; matching pair with 529/2	
529/2	as 529/1	as 529/1	as 529/1	as 529/1	as 529/1	copper alloy; ? pin	L side of upper chest; matching pair with 529/1	
537/1	cross pattée derivative	circular with pointed lappets below	expanded triangular with concave curved sides	flattened curve	triangles	?silvered bronze; pin missing	?R shoulder; matching pair with 537/2	
537/2	as 537/1	as 537/1	as 537/1	as 537/1	as 537/1	?silvered copper alloy; ?Fe pin	?L shoulder; matching pair with 537/1	
584/1	square, with slight bevel around edge and on footplate	straight-sided	?triangular (damaged)	pointed curve		copper alloy; Fe pin	?R shoulder; non-matching pair with 584/2	
584/2	cross pattée derivative	straight-sided, faceted	narrow triangular	as 584/1		?tinned copper alloy; Fe pin	?L shoulder; non-matching pair with 584/1	Böhme's type Liebenau-West Stow, subgroup Bordsesholm-Haslingfield – 5th century
634/1	cross pattée derivative	lozenge-shaped	moulded half-round finial	slightly flattened, pointed curve, with facets top and bottom		copper alloy; Fe pin	at neck, ?L side; ? pair with Fe annular brooch	Böhme's type Liebenau West Stow, 5th century
648/1	trapezium-shaped	circular	expanded spatulate	pointed curve	D-shape within D-shape	leaded bronze; Fe pin	R side of neck; matching pair with 648/2	
648/2	as 648/1	as 648/1	as 648/1	as 648/1	as 648/1	copper alloy; ? pin	L side of neck; matching pair with 648/1	
649/1	cross pattée derivative	circular with pointed lappets below	expanded triangular with concave curved sides	shallow curve	D-shape within D-shape	copper alloy; ? pin	R side of upper chest; matching pair with 649/2	
649/2	cross pattée derivative, pecking around edge	as 649/1	as 649/1	shallow curve, flat-topped	as 649/1	copper alloy; Fe pin	L side of upper chest; matching pair with 649/1	
842/2	square (panelled)	straight-sided, ribbed, with downward-pointing	expanded triangular with concave curved sides and raised rib at end	ridged		copper alloy; Fe pin/spring	L shoulder; singleton, but ?originally matching pair (see 940/1)	sharp moulding; with two 5th-century objects (but has lappets)

		zoomorphic lappets						
860/6	trapezium-shaped	terminal takes up whole foot	triangular	grooved		copper alloy; Fe pin	R side of upper chest; matching pair with 860/7	replacement pin lug soldered on, now separate
860/7	as 860/6	as 860/6	as 860/6	as 860/6		copper alloy; Fe pin	L side of upper chest; matching pair with 860/6	
940/1	square (panelled)	as 842/2	as 842/2	ridged		copper alloy; Fe pin/spring	just below knee; possibly disturbed by animal burrowing and originally matching pair in Gr 842 with 842/2	
987/3	trefoil	straight-sided, sharply-moulded facets and ribbing	narrow spatulate	slightly flattened pointed curve		copper alloy; Fe pin	L upper chest; pair with supporting-arm brooch	sharp moulding (5th-century context)
US/2	cross pattée derivative	straight-sided, ribbed	expanded ?triangular with groove along edge	slightly flattened, pointed curve		copper alloy; Fe spring
