

Geophysical Survey Land at Shrivenham Oxfordshire

Abstraction and interpretation of magnetometer anomalies

-  Positive linear anomaly - cut feature of archaeological potential
-  Positive curvilinear anomaly - ring ditch
-  Linear anomaly - ridge and furrow
-  Positive linear anomaly - possible ditch-like feature
-  Negative linear anomaly - material of low magnetic susceptibility
-  Discrete positive response - cut feature of archaeological potential
-  Discrete positive response - possible pit-like feature
-  Positive anomaly - magnetically enhanced material
-  Negative anomaly - material of low magnetic susceptibility
-  Variable magnetic response - associated with ground disturbance/quarrying
-  Magnetic debris - spread of magnetically thermoremanent/ferrous material
-  Magnetic disturbance from ferrous material
-  Strong multiple dipolar linear anomaly - pipeline / cable / service
-  Strong dipolar anomaly - ferrous object
