

**Geophysical Survey  
Five Islands School  
St Mary's  
Isles of Scilly**

**Abstraction and interpretation of  
magnetometer anomalies**

- Positive linear anomaly - possible ditch-like feature/ accumulation of enhanced soil
- Linear anomaly - of agricultural origin (indicative only)
- Negative linear anomaly - land drain/ditch
- Negative linear anomaly - material of low magnetic susceptibility
- Discrete positive response - possible pit-like feature
- Positive area of uncertain origin
- Magnetic debris - spread of magnetically thermoremanent/ferrous material
- Magnetic disturbance from ferrous material
- Strong dipolar anomaly - ferrous object
