## SUMMARY SHEET

<b>Site name/Address:</b> No 80 Hardwick Lane, Bury St Edmunds	
<b>Planning application:</b> DC/13/0594/HH	
<b>Parish:</b> Bury St Edmunds	<b>District:</b> St Edmundsbury BC
<b>NGR:</b> TL 8534 6290	<b>Site Code:</b> BSE 444 (OASIS johnnewm1-177818)
<b>Type of Work:</b> Monitoring of ground works for 10m long x 4.5m wide extension on the western side of the house	<b>Site Director/Group:</b> John Newman Archaeological Services
<b>Date of Work:</b> 30 April, 2014	<b>Size of Area Investigated:</b> 45m <sup>2</sup> <b>Current land use:</b> Garage & garden
<b>Location of Finds/Curating Museum:</b> NA	<b>Funding source:</b> Mr S Steele
<b>Further Seasons Anticipated?:</b> Yes	<b>Archaeological interest:</b> The site is in the general area where previously Early Anglo-Saxon burials have been recorded.
<b>Final Report:</b> NA	
<b>Periods Represented:</b> Neolithic/early Bronze Age & Iron Age- individual stray finds	
<b>SUMMARY OF FIELDWORK RESULTS:</b> (See also Fig) Following the demolition of a garage c30m of 600mm wide and 900mm deep foundation trench revealed a deposit profile of 300mm of mid brown sandy subsoil grading to 200mm of a paler sandy subsoil with the local glaciofluvial deposits varying between yellow sand with flints on the eastern side and an orange very silty sand with flints and degraded chalk fragments on the western side. No archaeological features were revealed and the only stray finds of any age were a flint flake of Neolithic/earlier Bronze Age date and an abraded flint tempered sherd (4g) of Iron Age date.	
<b>Conclusion:</b> The results from this monitoring suggests that if the scatter of Early Anglo-Saxon burials recorded in the Barons Road/Hardwick Lane area extends to this site then their density appears to be low. The eastern extension will be constructed at a later date.	
<b>Author of Summary:</b> John Newman	<b>Date of Summary:</b> 2 May, 2014
