## SUMMARY SHEET

<b>Site name/Address:</b> No 80 Hardwick Lane, Bury St Edmunds	
<b>Planning application:</b> DC/13/0594/HH	
<b>Parish:</b> Bury St Edmunds	<b>District:</b> St Edmundsbury BC
<b>NGR:</b> TL 8534 6290	<b>Site Code:</b> BSE 444
<b>Type of Work:</b> Inspection and recording of a single hand excavated evaluation trench across the footprint of the planned eastern rear extension.	<b>Site Director/Group:</b> John Newman Archaeological Services
<b>Date of Work:</b> 1 April, 2016	<b>Size of Area Investigated:</b> One 3.90m long & 600mm wide trench excavated on an east-west orientation <b>Current land use:</b> Back garden
<b>Location of Finds/Curating Museum:</b> NA	<b>Funding source:</b> Mr S Steele
<b>Further Seasons Anticipated?:</b> No	<b>Archaeological interest:</b> The site is in the general area where previously Early Anglo-Saxon burials (HER BSE 007 & 028) have been recorded.
<b>Final Report:</b> NA	
<b>Periods Represented:</b> None	
<b>SUMMARY OF FIELDWORK RESULTS:</b> (See also Fig & Images) The trench had a deposit profile comprising 200mm of topsoil over 200mm of clean mid brown sandy subsoil above the locally occurring natural orange sand with small flints and chalk fragments where no features were revealed and the upcast spoil did not contain finds of any age.	
<b>Conclusion:</b> The results from this small scale evaluation supports the findings of a previous monitoring for a western, side, extension at the house and an evaluation for a garage to the front further suggesting that if the scatter of Early Anglo-Saxon burials recorded in the Barons Road/Hardwick Lane area extend to this area then their density appears to be low.	
<b>Author of Summary:</b> John Newman	<b>Date of Summary:</b> 1 April, 2016
