A1 DISHFORTH TO NORTH OF LEEMING IMPROVEMENTS

Archaeological Fieldwalking

Interim Report

1. Area C

Introduction

The section of the improvement scheme referred to as Area C, is in fact composed of three separate areas: Area C1, C2 and C3 (Fig. 1). Each individual area was intensively fieldwalked using the 10m grid method, the results of which are displayed and discussed within this report.

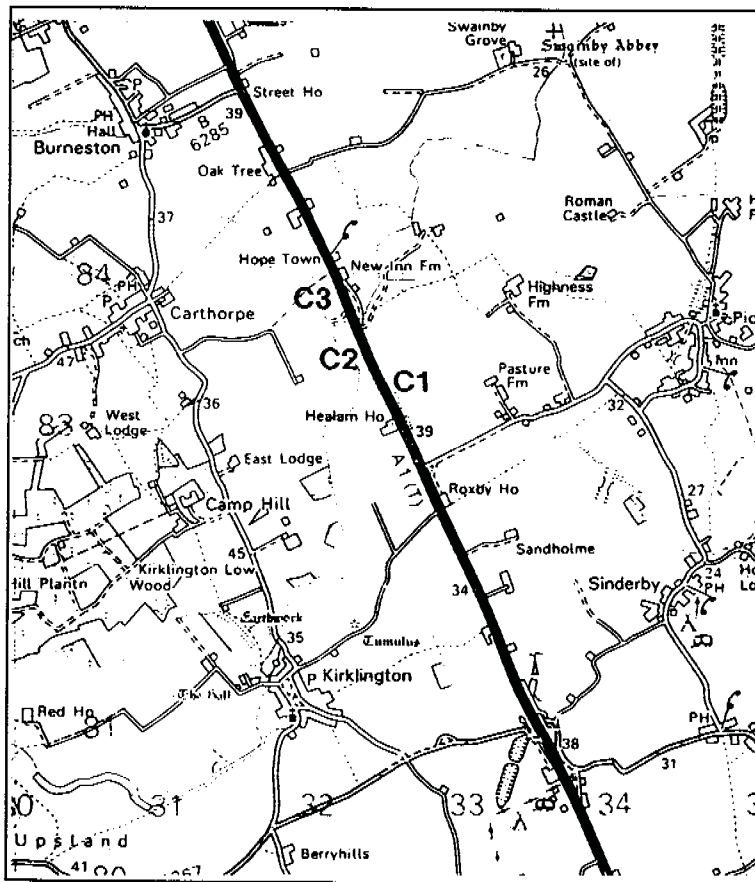

Figure 1. Site Locations. Scale 1:50000

All maps within this report have been produced from Ordnance Survey with the permission of the Controller of Her Majesty's Stationary Office, Crown Copyright. License No. AL 50453A.

Area C1

Area C1 is situated to the east of the A1, (Fig.1) at NGR SE 3251 8340 (centre). This area was selected to be intensively fieldwalked because of the known cropmark on the site and the close proximity of the known if not assessed Roman site at Healam Bridge. The field had been freshly sown which provided an even surface, a strip from A1 up to A7 and across to J7 of the area was roughly ploughed, traces of subsoil were recorded in these areas.

The area measured 290m North - South by 90m East - West, giving an area of 2.6 hectares to be intensively fieldwalked.

The grid was established on site by Anthony Walker and Partners in 10m squares tied into the Ordnance Survey National Grid. Material was collected and recorded from each 10m square and bagged by artifact category. A period of 5 minutes was allocated to each square and walked in a South-North direction. No significant individual finds were located in this area.

The area was walked over two days under varying conditions, on commencement the ground was fairly dry and light conditions even. In the latter stages the ground was wet and light conditions poor.

Results

Pottery: A total of 95 shreds were observed comprising 18 Roman including Samian, colour-coated and mortaria from lines A20, B20 and C22. Medieval sherds totalled 34 including Humberware and Tees Valley ware from lines C3, E4 and F18. In addition 27 post medieval, 13 modern sherds and 3 unidentified sherds were also located.

Brick and Tile: located all over the site relating to modern agricultural activity.

Glass: 15 fragments of glass were located in lines A15, 16, 26, 28, B17, C6, 7, 16, D26, E16, E19, F17, G6, G14 and J17.

Flint: 4 flint fragments were located in A17, B6, H8 and H19.

Claypipe: 9 fragments were located in A19, A26, D3, D4, D6, F14, G6 and H3.

Metal: 8 objects including a lead button from A5, all other metal objects were of a modern date and were found in A3, A5, A10, A13, A21, C16, D3 and D5.

Conclusions

The results of C1 are inconclusive and the scatter of Roman pottery probable relates to the known Romano-British site to the west of the A1 or some form of occupation along the western edge of the site. However the ground conditions of the field which had been freshly sown did not give ideal fieldwalking conditions and probably had some bearing on the inconclusive results.

Recommendations

Due to the known cropmark on the site and its close proximity to the site at Healam Bridge it is recommended that further work be carried out on the site in the form of a Geophysical Survey and depending on these results, Trial Trenching.

Area C2

Area C2 is situated to the west of the A1, (Fig.1) at NGR SE 3237 8340 (centre). This area was selected to be intensively fieldwalked because of the known cropmark on the site and the close proximity of the known if not assessed Roman site at Healam Bridge. The field was ploughed and the surface had weathered, which provided a rough surface, traces of subsoil were recorded in areas A19- K19 and down to A20 - K33, also in areas B39-48, C38-53, and H, J, K60-61 which coincided with the old route of the stream bed and revealed a dark peaty soil. In the areas where the traces of the subsoil existed the deep ploughing had pulled up and damaged the land drains causing a scatter across the above mentioned areas, this material was not collected.

The area measured 620m North - South by 100m East - West, giving an area of 6.2 hectares to be intensively fieldwalked.

The grid was established on site by Anthony Walker and Partners in 10m squares tied into the Ordnance Survey National Grid. Material was collected and recorded from each 10m square and bagged by artifact category. A period of 5 minutes was allocated to each square and walked in a South-North direction. Numerous individual finds were located in this area.

The area was walked over five days under varying conditions, on commencement the ground was fairly dry and light conditions even. In the latter stages the ground was wet and light conditions poor.

Results

Pottery: A total of 930 shreds were collected comprising 425 Roman including Samian, colour-coated and mortaria. 122 Medieval sherds including Humberware and Tees Valley, 150 post medieval, 222 modern sherds and 11 unidentified sherds.

The highest proportion of pottery is Roman and consists of various forms and fabrics, from the late 1st to the 4th century A.D. There is a definite scatter in the areas F36 across to K36 and down to F53 and across to K53, the highest ground on the site (see Table 9, Fig. 9). Another scatter appears in the areas A18 across to K18 and down to F26 across to K26. A high percentage of the pottery is in fine table wares such as decorated Samian and colour-coated ware. Coarse wares are located but not in the large amounts which might be associated with a settlement or army occupation. The initial inspection of the pottery tends to suggest a high status site, with the possibility of a shrine or villa (detailed pottery report to be included in the final report).

Brick and Tile: located all over the site relating to modern agricultural activity, one tile fragment of Roman origin was found in H60.

Glass: 83 fragments of glass were located in lines A15, 16, 26, 28, B17, C6, 7, 16, D26, E16, E19, F17, G6, G14 and J17, mostly modern in date.

Flint: 19 flint fragments were located including D47, G22, G49 and a bladelet from K41.

Claypipe: 25 fragments including a bowl were located in B41, D22, D55, E11, E16, E36, E43, F25, F35, F37, F45, G29, G33, G34, G40, H39, J13, J34, J39, J57, K13, K25 and K36.

Metal: 32 objects were located mostly of a modern date and related to agricultural activity including D17, E14, G24 and H34.

Animal Bone: 103 bone or teeth fragments were located including A19, B20, E33 and K18.

Miscellaneous Finds: numerous fragments of modern tar, shale and possible jet were located.

Small Finds: Four were located in Squares, D54 one worked jet object , K44 one copper alloy object possibly tweezers, D1 one Elizabeth I silver coin and K42 one colour-coated flagon neck Nene Valley 4th century A.D. (all small finds other than the flagon neck are at YAT conservation Labs)

Conclusions

The high percentage of Roman pottery indicates a site in Area C2, Frere postulated an Agricolan fort on the site (Frere 1987). The date range of the pottery suggests that the site was in use from the 2nd to the 4th century. There is nothing to indicate from the finds from Area C2, a military presence on the site. Indications are the site was a high status site.

Although the report concentrates on the Roman activity, earlier occupation of the site cannot be excluded as flint implements were observed and collected.

Recommendations

Due to the known cropmark on the site and its close proximity to the site at Healam Bridge it is recommended that further work be carried out on the site in the form of a Geophysical Survey and Trial Trenching to determine the nature, extent and preservation of the site. The results of these recommendations would determine what further action be taken on the site.

Area C3

Area C3 is situated to the west of the A1, (Fig.1) at NGR SE 3225 8390 (centre). This area was selected to be intensively fieldwalked because of the close proximity of the known if not assessed Roman site at Healam Bridge. The field had been freshly ploughed which provided an uneven surface, traces of subsoil were recorded in areas along the periphery of the grid which corresponded to the field boundary.

The area measured 290m North - South by 100m East - West, giving an area of 2.9 hectares to be intensively fieldwalked.

The grid was established on site by Anthony Walker and Partners in 10m squares tied into the Ordnance Survey National Grid. Material was collected and recorded from each 10m square and bagged by artifact category. A period of 5 minutes was allocated to each square and walked in a South-North direction. Two individual finds were located in this area.

The area was walked in one day under varying conditions, on commencement the ground was fairly damp and light conditions sunlight with shadow, in the latter stages light conditions became poor.

Results

Pottery: A total of 273 sherds were observed comprising 5 Roman including 1 Samian and Greyware from squares C16 and G26. Medieval sherds totalled 12 sherds including Humberware and Tees Valley ware from lines D5, G13 and H18. In addition 37 post medieval and 219 modern sherds were located.

Brick and Tile: located all over the site due to modern agricultural activity, although in D14 and D18 Roman tile was located.

Glass: 51 fragments of glass were located mostly modern in date including A6, C27, F15, G28 and H20.

Flint: 28 flint fragments were located including a possible microlith in C13.

Claypipe: 7 fragments were located in A2, B3, B6, C5, C8, and D4.

Metal: 4 objects from A3, F18, H16 and H17 all modern in date.

Animal Bone: one fragment was located in J24.

In addition to the above, there were several miscellaneous finds including 12 fragments of bakerlite and 1 daub fragment from H25.

Conclusions

The results of C3 are inconclusive, however the relatively small amounts of Roman and Medieval pottery may indicate that the areas was not used for domestic occupation but for agricultural use. Equally the use of the land for burials cannot be ruled out due to the unconfirmed existence of stone coffins to the east of the site (Appendix I).

Recommendations

Although the results of C3 are inconclusive, due to the close proximity of the site at Healam Bridge it is recommended that further work be carried out on the site in the form of a Geophysical Survey. The results of Geophysical Survey may still not indicate the presence of burials and Trial Trenching should not be ruled out if these results are negative.

Animal Bone

J24 - 1 animal bone fragment

Clay Pipe

A2 - 1 stem fragment
 B3 - 1 stem fragment
 B6 - 2 stem fragments
 C5 - 1 stem fragment

- C8 - 1 stem fragment
- D4 - 1 stem fragment

Metal

- A3 - 1 Cu alloy object, spring
- F18 - 1 Fe object
- H16 - 1 Cu alloy object, button
- H17 - 1 Fe object

Other Finds

- A5 - 1 bakerlite fragment
- B5 - 2 bakerlite fragments
- C2 - 1 bakerlite fragment
- C3 - 1 bakerlite fragment
- E4 - 1 bakerlite fragment
- F3 - 4 bakerlite fragments
- F11 - 1 bakerlite fragment
- H3 - 1 bakerlite fragment
- H25 - 1 daub fragment

Glass

- A3 - 1 clear window glass fragment, modern
- A4 - 2 clear glass fragments, modern
- A5 - 1 green glass bottle fragment, modern
- A6 - 1 green glass bottle fragment, post-medieval
- 1 greenish glass window fragment
- A13 - 1 clear glass base fragment
- B2 - 1 green glass bottle fragment, modern
- B6 - 1 clear glass fragment, modern
- B9 - 1 green glass bottle fragment, modern
- C2 - 1 clear glass fragment, modern
- 1 yellow glass fragment, modern
- C3 - 1 clear moulded glass fragment, modern
- C6 - 2 green glass fragments, post-medieval
- C9 - 1 green glass bottle fragment, modern
- C20 - 1 green glass fragment, post-medieval
- C22 - 1 clear glass fragment, modern
- C27 - 1 clear glass fragment, modern
- D2 - 3 green glass bottle fragments, modern
- D3 - 1 clear glass fragment, modern
- D4 - 1 green glass bottle fragment, modern

APPENDIX 1

APPENDIX I

Additional Information

Introduction

The following information is included because of its potential significance on the archaeological implications for Area C and surrounding area.

Mr Gibson's Pottery Collection

This collection of pottery was assembled over ten years from the field to the north of Area C1 at NGR SE 3250 8355 (centre). Thanks must be extended to Mr Gibson for the loan of the pottery.

Finds Catalogue

Total sherds 28,

26 Roman sherds

Amphora - 2 sherds from different vessels 1st/3rd century

1 base

1 body (with potters finger prints)

Samian - 11 sherds at least four vessels 2nd /3rd century

4 rims

4 body - 3 decorated but very abraded

3 bases - 1 Drag 37 Central Gaul late 2nd century

Mortaria - 2 sherds 3rd/4th century possible Crambeck

1 body

1 base

Colour-Coated - 3 sherds, Nene Valley 3rd century

2 body

1 base

Rhenish Ware - 1 sherd imported mica dusted beaker 3rd century

1 body

Black Burnished - 2 sherds 3rd century

1 rim

1 body

Calcite-Gritted Ware - 3 sherds local coarse ware 4th century

1 rim cooking pot

2 bases cooking pots

Greyware - 2 sherds 3rd century

1 rim jar

1 body

2 Medieval

Tees Valley - 2 sherds 12th /14th century

1 rim

1 body

The pottery collected by Mr Gibson shows similar results to Area C2 with a high proportion of the pottery collected being fine Tablewares with a similar date range 2nd to 4th century. As this assemblage was not collected in a controlled method the results have to be treated with some caution.

Stone Coffins

Mr Gibson also informed us of stone coffins located at NGR SE 3225 8390 when either a bungalow was erected or an orchard planted. The coffins remain undisturbed.

Previous work

Jeremy Evans (pers com) suggested from his pottery analysis of the 1986 fieldwalking (Price and Evans, 1992), that the indications were that a high status site such as a shrine or villa may well be located at Area C.
