## ARCHAEOLOGICAL FIELDWALKING AT HOWE MOOR

### 1.0 INTRODUCTION

An intensive fieldwalking survey of two fields at Howe Moor was undertaken by Northern Archaeological Associates on behalf of Anthony Walker and Partners. The survey formed part of an archaeological assessment of the route corridor undertaken in advance of upgrading a 22km section of the A1 between Dishforth Interchange (SE 368 728) and Holtby Hall north of Leeming (SE 272 924) from a dual two lane carriageway to dual three lane motorway. The route corridor was approximately 50m wide and ran along the eastern side of the current A1.

### 2.0 LOCATION

The two fields which were surveyed were OS numbers 3800 and 4065 within the Civil Parish of Howe. The fields were situated between the derelict Bedale Hunt Inn (SE 344 791), and a farm called The Croft (fig 1). The Croft was just under 1km further north at SE 340 800. Both fields lay within the fluvio-glacial deposits of the Vale of Mowbray on the east side of a low ridge dividing the catchment areas of the rivers Swale and Ure. The soils of the area belong to the Escrick 2 Association (Jarvis *et al.* 1984) and are typically argillic brown earths.

### 3.0 OBJECTIVE

The aims of the fieldwalking survey can be defined as follows

- i) to test for the presence of archaeological material associated with those features identified within the road construction corridor through the desk-top survey
- ii) to obtain evidence for the date of features identified within the road corridor through the desk-top survey, where appropriate
- iii) to test for the presence of archaeological material within the road construction corridor not predicted by the desk-top survey
- iv) to provide recommendations for geophysical survey and/or trial excavation as appropriate

Two sets of cropmarks had been identified outside the 50m route corridor, SMR 8274 was a possible prehistoric ring ditch at SE 3434 7956, and SMR 8266 were some irregularly shaped enclosures at SE 344 794 (fig 2).

The third site, further north and on the brow of a south facing slope, was identified as a ploughed down square earthwork. It was situated in the north west corner of field 4065 at SE 3415 7975, inside the 50m route corridor. During an initial walkover survey by Anthony Walker and Partners, a silver denarius of Trajan (98-117) was found inside the enclosure.

#### 4.0 METHODOLOGY

Fieldwalking by two surveyors took place in field 3800 during September 1993, and in field 4065 during October 1993. A numbered grid consisting of 10m squares had previously been laid out by surveyors from Anthony Walker and Partners. The survey area in field 3800 measured 210m long by 80m wide, and in field 4065 it measured 450m long by 80m wide. In OS field 3800 ground visibility was reasonably good, although a young cereal crop (<6") was present. In OS field 4065 no crop was visible and the ground surface was weathered.

Each square was carefully walked over for five minutes, and any finds were collected and placed in a plastic self-sealing bag annotated with the relevant grid reference. Weather conditions on both occasions were generally dull and still, with some interruptions of heavy rain showers which caused temporary ponding in OS field 4065.

After completion of the survey all finds were washed, and when dry placed into clean clearly marked self-sealing plastic bags. Find locations were plotted on a 1:2500 scale plan and tabulated following specialist identification.

#### 5.0 RESULTS

| Field 3800             |           | Field 4065       |           |
|------------------------|-----------|------------------|-----------|
| Flint                  | 16        | Flint            | 30        |
| Roman pottery          | 3         | Medieval pottery | 7         |
| Roman/medieval pottery | 4         | Slag             | 4         |
| Slag                   | 1         | Tile fragments   | 2         |
|                        |           | Glass droplet    | 1         |
|                        |           | Lead fragment    | 1         |
| <b>TOTAL</b>           | <b>25</b> |                  | <b>46</b> |

Field 3800 (fig. 3) produced a low density, random scatter of mainly flint artefacts and three definite Roman pottery sherds ranging in date from 1st century to 3rd century AD. No pottery was recovered from field 4065 which could positively be identified as being Roman. With the exception of a definite concentration of flints corresponding to the possible squared earthwork in field 4065 (fig. 4), finds here also occurred at a low density and were generally randomly scattered. The flint concentration and the lack of Roman pottery may infer a prehistoric context for the earthwork rather than a Roman one as suggested by the coin recovered during the walkover survey.

In general the quantities of flint from both fields was low. Nevertheless the size of the assemblage and the range of tools was not dissimilar from that produced by fields surveyed in the Dishforth area on an adjacent section of the A1 (Fraser 1993). In those cases, the

flint reflected scattered evidence for Neolithic activity in the form of small pit clusters apparently peripheral to the henges at Hutton Moor and as such were possibly part of a wider ritual Neolithic landscape.

The fieldwalking survey has thrown no light upon the possible nature and extent of the other cropmark sites located within field 4065 but outside the road corridor.

## 6.0 CONCLUSION

Previous experience would suggest that the area adjacent to the cropmark features identified in field 4065 should not be dismissed without some precautionary geophysical survey, and even if this is unrevealing a watching brief condition should be imposed during topsoil stripping. Certain types of archaeological remains, in particular pits and post holes below 1m in diameter are often not identifiable by geophysical survey and may not be reflected in surface finds scatters.

**Roman coin**

A Roman coin was found at SE 3421 7969 in OS Field 4065 during the initial walkover survey undertaken by Anthony Walker and Partners in February 1993. The coin was identified as being a silver denarius of Trajan (AD98-117).

18mm diameter, 2.78 gms. Much concretion on the obverse, worn reverse. Obverse: Laureate bust with drapery below (IMP)TRAIANOVGGER (DACPMTRP) Reverse: Dacian wearing peaked cap seated left on a pile of arms, mourning; about him are two curved swords, 2 spears and an oblong shield. (...SPQR) OPTIMOPR (INC). Exergue: DAC CAP.

Coin identified by Mr B Sitch of Hull Museum.

# A1 DISHFORTH TO NORTH OF LEEMING IMPROVEMENTS

## Archaeological Fieldwalking

### Report

#### 1. Area C

##### Introduction

The section of the improvement scheme referred to as Area C, is in fact composed of three separate areas: Area C1, C2 and C3 (Fig. 1). Area C was selected for intensive fieldwalking because of the known Roman settlement in the area of Healam Bridge (Greene 1951, Frere 1987, and Price and Evans 1992).

The solid geology for Area C is Permian and Triassic sandstone, and the drift geology is glacial sand and gravels. The soils are in the Argillic Brown Earth, Escrick 2 series, and the land use of the area is arable.

Each individual area was intensively fieldwalked using the 10m grid method, and will be discussed separately and the conclusions for all three areas will be summarised in Section 5 (p. 14)

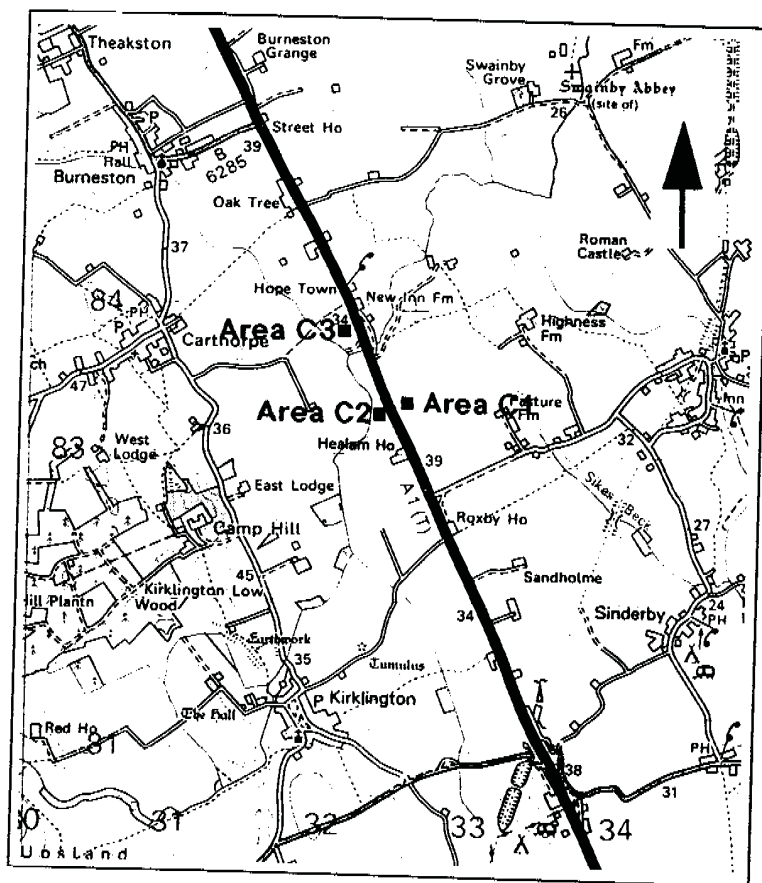

Figure 1. Site Locations. Scale 1:50000

All maps within this report have been produced from Ordnance Survey with the permission of the Controller of Her Majesty's Stationary Office, Crown Copyright. License No. AL 50453A.

## 2. Area C1

### Introduction

Area C1 is situated to the east of the A1, (Fig.1) at NGR SE 3251 8340 (centre). This area was selected to be intensively fieldwalked because of the known cropmark on the site and the close proximity of the known if not assessed Roman site at Healam Bridge. The field had been freshly sown which provided an even surface, a strip from A1 up to A7 and across to J7 of the area was roughly ploughed, traces of subsoil were recorded in these areas.

The area measured 290m North - South by 90m East - West, giving an area of 2.6 hectares to be intensively fieldwalked.

The grid was established on site by Anthony Walker and Partners in 10m squares tied into the Ordnance Survey National Grid. Material was collected and recorded from each 10m square and bagged by artifact category. A period of 5 minutes was allocated to each square and walked in a South-North direction. No significant individual finds were located in this area.

The area was walked over two days under varying conditions, on commencement the ground was fairly dry and light conditions even. In the latter stages the ground was wet and light conditions poor.

### Results

**Pottery:** A total of 97 sherds were observed comprising 20 Roman including Samian, colour-coated, orange ware and mortaria from lines A20, B20 and C22 (Figs. 2 & 8). Medieval sherds totalled 23 including Humberware and Tees Valley ware from lines C3, E4 and F18 (Fig. 9). In addition 37 post medieval, 14 modern sherds and 3 unidentified sherds were also located (Figs. 10, 11 & 12). For breakdown of fabric type and date range see Pottery Summaries in Section 8.

**Brick and Tile:** located all over the site relating to modern agricultural activity (Fig. 13: Table 7).

**Glass:** 15 fragments of glass were located in lines A15, 16, 26, 28, B17, C6, 7, 16, D26, E16, E19, F17, G6, G14 and J17 (Fig. 19: Table 1).

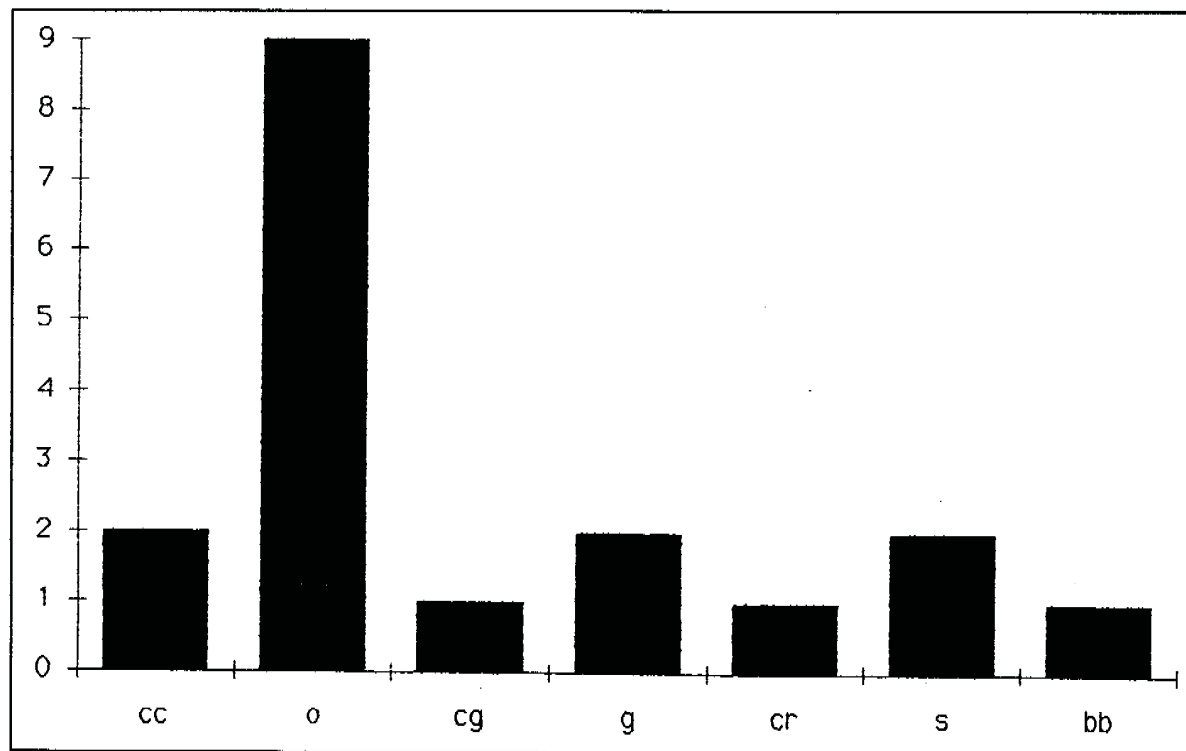

**Flint:** 3 flint artefacts were located including 2 flakes from A17 and J2, and a single bladelet from H8 (Fig. 14: Table 1). The assemblage is so small as to not merit excessive analysis. Three categories of flint can be distinguished in equal proportions mottled grey (1 item), dark grey flint (1 item), and 1 of translucent flint. Artefacts of the mottled type have a widespread distribution within the north of England, the nearest source of which is the Yorkshire Wolds. The translucent material is of a very high quality and a source of this material has been located at Flamborough Head in Humberside.

The blade within the assemblage is of standard size for this tool (i.e. 20-45mm). The occurrence of blades suggests that this assemblage may date to the Late Neolithic/Early Bronze Age.

Distribution of the assemblage within Area C1 does not form any clusters or regional groupings.

The flint assemblage from Area C1 is far too small to provide any firm conclusions except that there would appear to be prehistoric activity on or near to Area C1, and it may be related in some form to the prehistoric activity represented in Areas C2 and C3 by similar flint assemblages.

**Claypipe:** 9 fragments were located in A19, A26, D3, D4, D6, D10, F14, G6 and H3 (Fig. 19: Table 1). The assemblage dates from the 17th - early 20th century.

- o - Orangeware
- cg - Calcite Gritted Ware
- g - Greyware
- cr - Crambeck
- s - Samian
- bb - Black Burnished Ware

Figure 2  
Bar Chart of Different Pottery Fabrics in Area C1

**Metal:** 8 objects including a lead button from A5, all other metal objects were of a modern date and were found in A3, A10, A13, A21, C16, D3 and D5 (Fig. 19: Table 1).

**Mammal and bird bone:** mammal bone was located in C15, E15, F6, F28, and G22 and a single piece of bird bone from E10. In total only 0.27kg of this material was collected (Fig. 19: Table 1)

### **Conclusions**

The results of C1 are inconclusive and the scatter of Roman pottery probable relates to the known Romano-British site to the west of the A1 or some form of occupation along the western edge of the site. Pottery from C1 has a wide date range from the late 1st to 4th century A.D. (Fig. 2 & 8) and suggests both military and domestic occupation within Area C. Orange ware, the largest pottery fabric group, is normally associated to military sites and the fine Table Wares such as Samian and Crambeck to settlement. No firm conclusions can be drawn from the small assemblage of pottery.

However the ground conditions of the field which had been freshly sown did not give ideal fieldwalking conditions and probably had some bearing on the inconclusive results.

### **Recommendations**

Due to the known cropmark on the site and its close proximity to the site at Healam Bridge it is recommended that further work be carried out on the site in the form of a Geophysical Survey and depending on these results, Trial Trenching.

### 3. Area C2

#### Introduction

Area C2 is situated to the west of the A1, (Fig.1) at NGR SE 3237 8340 (centre). This area was selected to be intensively fieldwalked because of the known cropmark on the site and the close proximity of the known if not assessed Roman site at Healam Bridge. The field was ploughed and the surface had weathered, which provided a rough surface, traces of subsoil were recorded in areas A19 - K19 and down to A20 - K33, also in areas B39-48, C38-53, and H, J, K60-61 which coincided with the old route of the stream bed and revealed a dark peaty soil. In the areas where the traces of the subsoil existed the deep ploughing had pulled up and damaged the land drains causing a scatter across the above mentioned areas, this material was not collected.

The area measured 620m North - South by 100m East - West, giving an area of 6.2 hectares to be intensively fieldwalked.

The grid was established on site by Anthony Walker and Partners in 10m squares tied into the Ordnance Survey National Grid. Material was collected and recorded from each 10m square and bagged by artifact category. A period of 5 minutes was allocated to each square and walked in a South-North direction. Numerous individual finds were located in this area.

The area was walked over five days under varying conditions, on commencement the ground was fairly dry and light conditions even. In the latter stages the ground was wet and light conditions poor.

#### Results

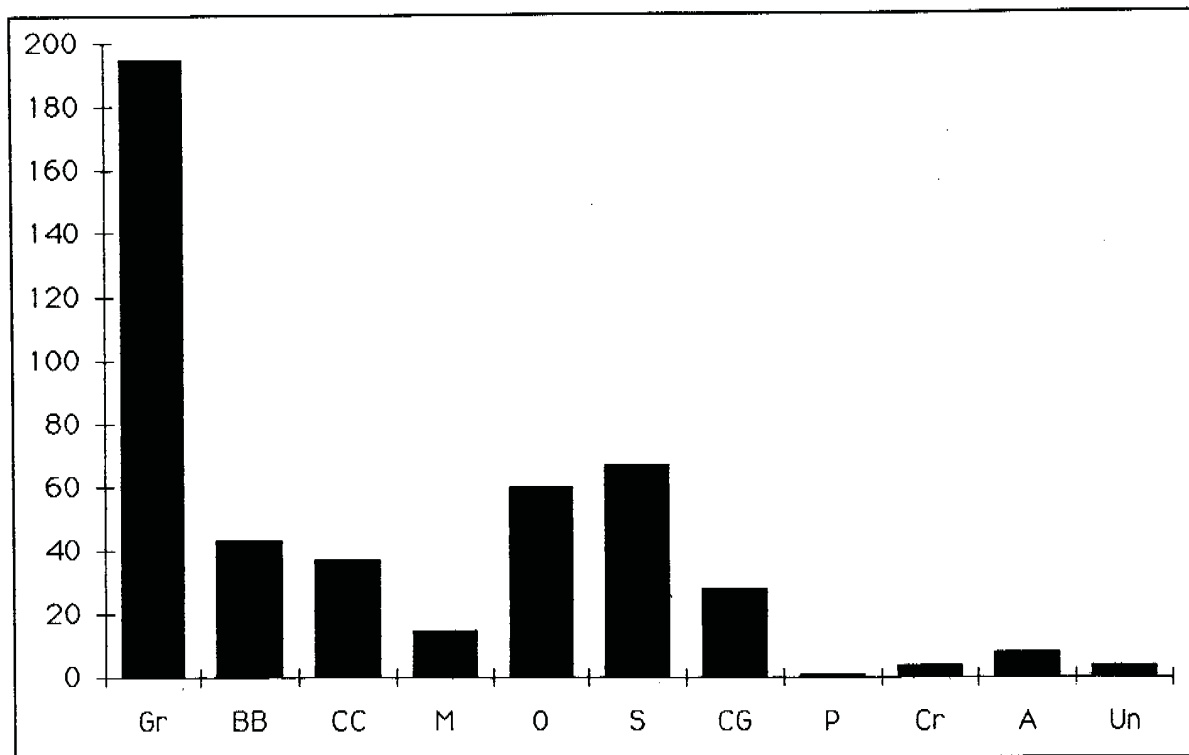

**Pottery:** A total of 926 shreds were collected comprising 2 Prehistoric, 462 Roman including Samian, colour-coated and mortaria (Figs.3 & 8). 54 Medieval sherds including Humberware and Tees Valley (Fig. 9), 169 post medieval (Fig. 10), 228 modern sherds (Fig. 11), and 11 unidentified sherds (Fig. 12). For breakdown of fabric type and date range see Pottery Summaries in Section 8.

The highest proportion of pottery is Roman and consists of various forms and fabrics, from the late 1st to the 4th century A.D. There is a definite scatter in the areas F36 across to K36 and down to F53 and across to K53, the highest ground on the site (see Table 10, Fig. 8). Another scatter appears in the areas A18 across to K18 and down to F26 across to K26. The largest fabric group is greywares (Fig. 3), although common throughout the Roman period, several forms in the assemblage along with the orange wares are associated to the military in the late 1st and 2nd centuries. 28% percent of the pottery is in fine table wares such as decorated Samian and colour-coated ware, normally associated with a high class settlement (Fig. 3). Coarse wares are located which might be associated with a settlement or army occupation. The initial inspection of the pottery tends to suggest a fort and settlement on or around Area C2. Indications are the fort could be Flavian in origin. There is evidence of Roman occupation on the site until at least the 4th century, but it is impossible to suggest if it was continuous occupation by the military and/or civilian population.

**Brick and Tile:** located all over the site relating to modern agricultural activity, one tile fragment of Roman origin was found in H60 (Fig.13).

**Glass:** 83 fragments of glass were located in lines A15, 16, 26, 28, B17, C6, 7, 16, D26, E16, E19, F17, G6, G14 and J17, mostly modern in date (Fig. 15).

**Flint:** a total of 17 flint artefacts were located including 5 blades in D8, D22, G48, G49 and K41, 2 scrapers in G47 and J16, and 10 flakes in D44, D47, F27, F45, G2, G48, H38, H41 and J34 (Fig. 14: Table 8). Waste products (i.e. flakes) outnumber the tool assemblage by almost 2:1. Four categories of flint can be distinguished of which the most common type is mottled grey (12 items: 70%), 1 of

Figure 3  
 Bar Chart of Different Pottery Fabrics in Area C2

grey/brown flint (6%), 3 of translucent flint (18%) and a single white piece (6%). Artefacts of the mottled type have a widespread distribution within the north of England, the nearest source of which is the Yorkshire Wolds. White patinated flint is possibly of drift origin, whereas the source for the ginger brown flint is more problematic, as a source for this material is as yet unknown. The translucent material is of a very high quality and a source of this material has been located at Flamborough Head in Humberside.

The blades within the assemblage are within the standard size for this tool (i.e. 20-45mm), and are dominant in the tool assemblage at a ratio of over 2:1 to scrapers. The occurrence of blades with scrapers suggests that this assemblage may date to the Late Neolithic-Early Bronze Age (Fig. 14).

Distribution of the assemblage within Area C2 does not form any clusters or regional groupings, except that the majority of the assemblage was located on the sloped areas of the site. There is also no close association with the prehistoric pottery from this area.

The flint assemblage from Area C2 is usually associated with the processing of raw materials (ie. plant and animal products) but due to its size no firm conclusions can be drawn.

Claypipe: 25 fragments including a bowl were located in B41, D22, D55, E11, E16, E36, E43, F25, F35, F37, F45, G29, G33, G34, G40, H39, J13, J34, J39, J57, K13, K25 and K36. The assemblage dates from the 17th to early 20th century (Fig. 16).

Metal: 32 objects were located mostly of a modern date and related to agricultural activity including D17, E14, G24 and H34 (Fig. 17).

Mammal and bird bone: 103 bone or teeth fragments were located (Fig. 18; Table 8); in total a weight of 2.299kg. Species include cattle, pig, sheep/goat and horse, and diagnostic fragments are dominantly teeth and leg bones. From K27 2 fragments of bird bone were collected (Fig. 18).

Miscellaneous Finds: numerous fragments of modern tar, shale and possible jet were located (Fig. 19).

Small Finds: Four were located in Squares, D54 one worked jet object (Fig. 5.8), K44 one copper alloy object possibly tweezers, D1 one Elizabeth I silver coin, K42 one colour-coated flagon neck Nene Valley 4th century A.D (Fig. 5.3) and G.17 one fragment of a Roman yellow paste glass bangle (Fig. 5.9).

## Conclusions

The high percentage of Roman pottery in Area C2 indicates an archaeological site in Area C2; Frere postulated an Agricolan fort on the site (Frere 1987). The date range of the pottery suggests that the site was in use from the 2nd to the 4th century, with a possible Flavian date for the origin of the fort. Indications are that the site was of a high status.

Although the report concentrates on the Roman activity, earlier occupation of the site cannot be excluded as flint implements and two sherds of Prehistoric pottery, including one rim from a possible Bronze Age Vessel (Fig 5.1) were observed and collected. In view of the results of recent work in other areas within the route of the extended A1 corridor, the small amount of prehistoric pottery from this area cannot be dismissed (R. Fraser pers com).

## Recommendations

Due to the known cropmark on the site, its close proximity to the site at Healam Bridge and the results of the fieldwalking, it is recommended that further work be carried out on the site in the form of a Geophysical Survey and Trial Trenching to determine the nature, extent and preservation of the site. The results of these recommendations would determine what further action be taken on the site.

## 4. Area C3

### Introduction

Area C3 is situated to the west of the A1, (Fig.1) at NGR SE 3225 8390 (centre). This area was selected to be intensively fieldwalked because of the close proximity of the known if not assessed Roman site at Healam Bridge. The field had been freshly ploughed which provided an uneven surface, traces of subsoil were recorded in areas along the periphery of the grid which corresponded to the field boundary.

The area measured 290m North - South by 100m East - West, giving an area of 2.9 hectares to be intensively fieldwalked.

The grid was established on site by Anthony Walker and Partners in 10m squares tied into the Ordnance Survey National Grid. Material was collected and recorded from each 10m square and bagged by artifact category. A period of 5 minutes was allocated to each square and walked in a South-North direction. Two individual finds were located in this area.

The area was walked in one day under varying conditions, on commencement the ground was fairly damp and light conditions sunlight with shadow, in the latter stages light conditions became poor.

### Results

**Pottery:** A total of 273 sherds were observed comprising 5 Roman including 1 Samian and Greyware from squares C16 and G26 (Figs.4 & 8). Medieval sherds totalled 12 sherds including Humberware and Tees Valley ware from lines D5, G13 and H18 (Fig. 9). In addition 37 post medieval (Fig. 10) and 219 modern sherds were located (Fig. 11). For breakdown of fabric type and date range see Pottery Summaries in Section 8.

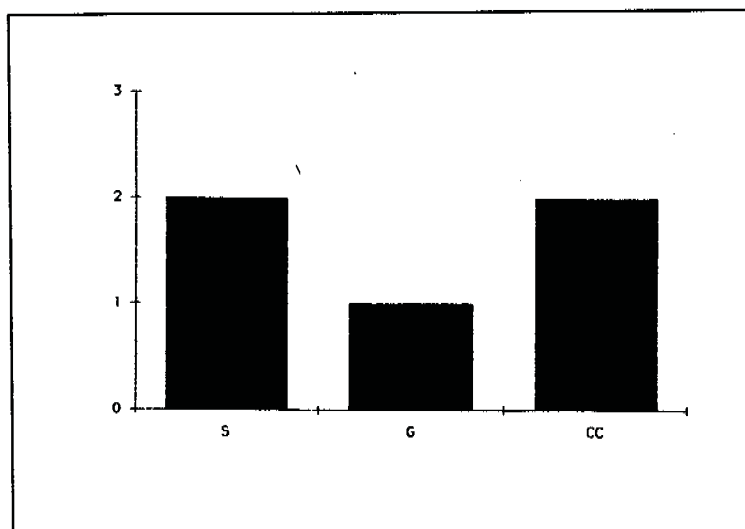

**Brick and Tile:** located all over the site due to modern agricultural activity, although in D14 and D18 Roman tile was located (Fig. 13: Table 21).

**Glass:** 51 fragments of glass were located mostly modern in date including A6, C27, F15, G28 and H20 (Fig. 15: Table 16).

**Flint:** a total of 18 flint artefacts were located including 2 blades in C13 and D5, 1 scraper in C9, 2 cores in A14 and K25 and 13 flakes in B2, B21-26, C16, C25, D29, E8, G20, and G22 (Fig. 14: Table 16). Waste products (i.e. flakes and cores) outnumber the tool assemblage by 5:1. Four categories of flint can be distinguished of which the most common type is mottled grey (15 items: 85%), 1 of grey/brown flint (5%), 1 of dark grey flint (5%) and a single white piece (5%). Artefacts of the mottled type have a widespread distribution within the north of England, the nearest source of which is the Yorkshire Wolds. White patinated flint is possibly of drift origin, whereas the source for the ginger brown flint is more problematic as a source for this material is as yet unknown.

The blades within the assemblage are within the standard size for this tool (i.e. 20-45mm), and although a regular component of Mesolithic assemblages, the absence of microliths and typical mesolithic waste products i.e. micro-burins, along with the occurrence of a scraper, suggests that the assemblage may date to the Late Neolithic-Early Bronze Age. Distribution of the assemblage within Area C3 does not form any cluster or regional groupings, except that the majority of the assemblage was located on the sloped areas of the site. The fact that the site is under continual arable cultivation and the portable nature of these artefacts suggests caution in attempting to explain their distribution.

**Claypipe:** 7 fragments were located in A2, B3, B6, C5, C8, and D4 (Fig. 16: Table 16). This small assemblage dates from the 17th through to the early 20th century.

S - Samian  
G - Greyware  
CC - Colour Coated Ware

Figure 4  
Bar Chart of Different Pottery Fabrics in Area C3

Metal: 4 objects from A3, F18, H16 and H17 all modern in date (Fig. 16).

Mammal Bone: one fragment was located in J24, an ovicaprid rib fragment.

In addition to the above, there were several miscellaneous finds including 12 fragments of bakelite and 1 daub fragment from H25 (Fig. 16).

### **Conclusions**

The results of C3 are inconclusive, however the relatively small amounts of Roman and Medieval pottery may indicate that the area was not used for domestic occupation but for agricultural use. However the use of the land for burials cannot be ruled out due to the unconfirmed existence of stone coffins to the east of the site (Appendix I).

Prehistoric activity on site is illustrated by a small flint assemblage dated by form to the late Neolithic to the Early Bronze Age; the exact nature of this activity is as yet undefined. There are other limited prehistoric assemblages from C1 and to larger extent from C2 where prehistoric pottery was also located.

### **Recommendations**

Although the results of C3 are inconclusive, due to the close proximity of the site at Healam Bridge it is recommended that further work be carried out on the site in the form of a Geophysical Survey. This could help to establish what prehistoric activity is taking place on the site. The results of Geophysical Survey may still not indicate the presence of burials or ephemeral prehistoric features and Trial Trenching should not be ruled out if these results are negative.

## 5. Summary of Area C

Prehistoric activity at the site is attested by flint assemblages from Areas C1, C2 and C3 and a small assemblage of pottery from C2. Assessment of the flint assemblage produced varying ratios of waste to tools which are discussed within the results. Even so it is clear from the occurrence of blades and scrapers in close association that these assemblages can be dated tentatively to the late Neolithic/Early Bronze Age. The flint assemblages were predominantly of mottled opaque flint of which the main known resource location is the Yorkshire Wolds; within the assemblages there are a few pieces of high quality flint possibly from known sources in Humberside and also much poorer quality flint of Drift origin.

As mentioned only two sherds of Prehistoric pottery were located and were not in direct association to the flint assemblage. Further consideration of the Prehistoric activity must be taken into account in any further evaluation of Area C.

The orange ware sherds collected from the intensive fieldwalking of Area C strongly suggest that a fort is located on the site, probably associated with the Northern Frontier defence system. Orange ware is manufactured by the military for their own use, and is synonymous with military occupation. Inspection of the pottery implies that a fort was located on and around E41 across K41 and up to F53 and to K53 which is also the highest point in Area C (Fig. 6, Overlay 1 & 2). The pottery in this location tends to suggest a Flavian date for the origin of the possible fort. Evidence for occupation is apparent to the fourth century; whether it is continuous and of a military and/or domestic nature is impossible to say without excavation.

The high proportion of the fine table wares might suggest other forms of Roman occupation on the site in the form of a villa or shrine (pers Com Jerry Evans).

No further evidence exists to suggest occupation after the Roman period. The presence of post Roman material can be explained by agricultural deposition.

The field walking has born out the high grade nature of the site with implications for not only the Roman but Prehistoric periods.

## 6. Spatial Analysis

At the time that this report was produced comparative material for fieldwalking projects in North Yorkshire is limited. Reports on the large scale evaluations of the Easingwold Bypass are still not available for consultation nor are other sections of the A1 improvement scheme. Therefore this section is based solely on the results from the sections of the A1 improvement Dishforth to Leeming and Walshford to Dishforth. Below are the spatial results for Areas A, B, D, and E which were line walked and for Areas A4 and C which were intensively walked. The analysis has concentrated on the artefact categories flint, prehistoric, roman and medieval pottery; as these groups are regarded as being the most relevant in assessing past land use.

The spatial results for Areas A, B, C, D and E (p.17, 19-20 and 22) are followed by comparative data from a fieldwalking programme carried out along the A1 motorway extension from Walshford to Dishforth (data kindly supplied by the Archaeology Section, North Yorkshire County Council and Northern Archaeological Associates: p. 18, 19, 21 and 22).

All areas with the exception of Area D are situated on solid geology of Permian and Triassic Sandstone with a Drift geology of Glacial Sands and Gravel; the soil type is an Argillic brown earth (Escrick 2 Association) in Area A, B, and C; with a Typical brown earth in Area E (Wick 1 Association). Area D Drift geology is Boulder Clay and Morainic Drift with a Stagnogley soil type (Salop Association).

For the comparative material, Fields 7, 74, 76 and 115 are Stagnogleyic argillic brown earth of the Bishampton 1 Association over Till and Glacio-fluvial drift. Fields 89, 94, 95 and 96 are Argillic brown earths, Escrick 2 Association, over Glacio-fluvial drift. Field 78 (southern part) has pelo-alluvial gley soils of the Fladbury 3 Association over river alluvium; Argillic brown earth of the Escrick 2 Association extends to the north.

### Flint Assemblage

The density of flint artefacts per hectare varied greatly within areas evaluated in the Dishforth to North of Leeming improvement. As mentioned above the geology is fairly constant and therefore provides a good base for comparison. Of the areas initially fieldwalked where worked flint occurred (Areas A1-5 and E) density per hectare varies from 0.4 (Area A5) to 6.67 (Area A4i); this variation is also paralleled by area in density per 100m line (0.031 v 0.672). In the initial fieldwalking sections evaluated in the Walshford to Dishforth improvement scheme, Fields 74, 76, 89, 94-96, 101 and 115, the density per hectare varied from 1.1192 (Field 115) to 11.761 (Field 89); per 100m line density varied from 0.101 (Field 115) to 1.323 (Field 89).

Comparison of ratios of flint tools to waste products (i.e. flakes) for both sections of the improvement schemes are relatively similar with wide variations in ratios between individual sites.

The problem with comparing these two sets of data is that the initial fieldwalking methods are dissimilar. Evaluation of the Dishforth to Leeming section was by linewalking at 10m intervals; the rapid fieldwalking of Walshford to Dishforth was at 5m intervals. Equally Fields 7, 89, and 94 were of known AP sites with Field 74 adjacent to a major known site (Devils Arrows). Therefore, the evaluation of these fields provided dating evidence for known features as opposed to actually locating new sites; although apparently the evaluation of Field 76 did provide information which located an unknown Roman site with earlier prehistoric activity.

Within the evaluation of the Dishforth to Leeming section, of the initial fieldwalking only Area A2 possessed an AP data site, the remainder of the areas where flint occurred, especially Area A4, do not possess such information, therefore the occurrence of flint in such high densities suggests the probable presence of a previously unknown prehistoric site. Equally Area E where evaluation was designed to assess medieval activity, relating to a battle site, a high density of flint suggests prehistoric activity of an as yet undefined nature. Of the areas intensively fieldwalked (Areas A4i and C1-3), all produced a flint assemblage with density variations from 2.6 (Area C1) to 11.11 per hectare (Area A4i). From the evaluation to the south, Field 7 produced the lowest density per hectare of 9.897 raising dramatically to 64.706 in Field 89. It must be stressed that two prehistoric sites were located in this area and that Field 89 was suffering severe plough damage. In Area C the flint assemblage again suggests a prehistoric presence of undefined nature. This occurrence is also paralleled by the flint assemblage from Field 76 (identified by geophysical and excavation as a

## **Roman pottery**

All areas considered within the evaluation of the A1 improvement scheme were in close association to a known Roman road, therefore it is not surprising to see small numbers of sherds within the corridor. Of more significance is a comparison of the quantities and distribution of Area C2 and Field 76.

Both areas are apparently on the sites of Roman forts. Results from Area C showed distinct distributions by fabric type and date ranging from the 1st to the 4th centuries A.D. The results from Field 76 on fieldwalking provided a date range of late 1st to early 2nd centuries A.D; however, from a total of 174 sherds, only 10 were identified, so comparison of this data is restrictive. Even so it is possible to draw parallels between the 10 identified sherds and the early pottery assemblage from Area C as they do show close comparisons of fabrics and date range.

## **Medieval Pottery**

The ratio of medieval sherds per hectare varies from area to area, and comparisons between linewalking and intensive methods would be incorrect as only a fraction of an area is covered by linewalking as opposed to intensive.

Of the linewalked areas (Areas A, B, D and E) the area with the highest proportion of medieval sherds per hectare is Area A2 (2.5). Along with Areas A1 and A3, Area A2 is believed to have been unenclosed until the early 19th century. Conversely, the two Areas B and D which show evidence of ridge and furrow (and hence were presumably cultivated in medieval times), have relatively low proportions of sherds per hectare (0 and 0.69 respectively). The land immediately to the east of Area E also showed evidence on aerial photographs of ridge and furrow, and this may be reflected in the occurrence of medieval pottery in Area E (1.3 per ha.). Areas A4 and A5 have the lowest proportion of sherds per ha (0.38 and 0 respectively) and were thus probably outside the area of medieval cultivation.

The intensively walked areas (Areas C and A4) also show a variation in the number of sherds per hectare, ranging from 2.1 in Area A4(i) to 10 in Area C2. The relatively low proportion of sherds per hectare observed during the line walking of Area A4 was echoed by the Intensive walking of Area A4 (i).

Of the comparative data, even the relatively large quantities of medieval pottery such as were found in Fields 74, 76 and 78 (with ratios of sherds per ha. of 67.3, 20.9 and 32.8 respectively) were explained by the writers (NAA) as representing medieval manuring activity, and the same process presumably accounts for the presence of medieval material in the areas walked as part of the project under discussion.

| Total Flint              |     |      |         | Flint Waste              |     |      |         | Flint Tools              |     |      |         |

## 8. General Finds Catalogue

### AREA C1

#### Roman Pottery

- A4 - 1 body sherd, colour coated Nene Valley, 3rd-4th century
- A9 - 1 body sherd, orangeware mortaria?, 1st/2nd century
- A13 - 1 body sherd, calcite gritted ware, roman
- A19 - 1 body sherd, grey fabric - orange red, roman
- A20 - 1 base sherd, orangeware, roman
- 1 body sherd, orangeware, roman
- B6 - 1 body sherd, Crambeck mortaria, 4th century
- B15 - 1 body sherd, colour coated Nene Valley, 3rd/4th centuries
- B20 - 1 body sherd, Samian, roman
- C6 - 1 body sherd, unidentified orange fabric, roman
- C7 - 1 body sherd, greyware, roman
- C22 - 1 body sherd, very abraded decorated Samian, roman
- D11 - 2 body sherds, unidentified, roman
- D14 - 1 body sherd, Crambeck, 4th century
- D25 - 1 body sherd, orangeware, roman
- E11 - 1 rim sherd, Crambeck mortaria, 4th century
- F4 - 1 body sherd, black burnished ware, 3rd century
- 1 body sherd, orangeware, brown slip, roman
- J10 - 1 body sherd, orangeware, roman

#### Medieval Pottery

- A7 - 1 body sherd, Humber ware, medieval
- A14 - 1 body sherd, Tees Valley ware, medieval
- C2 - 1 body sherd, Humber ware, medieval
- C3 - 1 body sherd, Humber ware, medieval
- C13 - 1 body sherd, Humber ware, medieval
- D12 - 1 body sherd, unidentified, ?medieval
- D13 - 1 handle fragment, Tees Valley ware, medieval
- D16 - 1 body sherd, unidentified, ?medieval
- E5 - 3 body sherds, very abraded Tees Valley ware, medieval
- E6 - 1 body sherd, Tees Valley ware, medieval
- 1 body sherd, Humber ware, medieval
- F2 - 1 rim sherd, unidentified, ?medieval
- F18 - 1 body sherd, Humber ware, medieval
- G9 - 1 body sherd, ?Tees Valley ware, medieval
- G11 - 1 body sherd, ?Humber ware, medieval
- G13 - 1 body sherd, Humber ware, medieval
- G22 - 1 body sherd, ?Tees Valley ware, medieval
- H7 - 1 body sherd, unidentified, medieval
- H10 - 1 body sherd, Humber ware, medieval
- 1 body sherd, Tees Valley ware, medieval
- J10 - 1 body sherd, unidentified, ?medieval

#### Post-medieval Pottery

- A6 - 1 base sherd, salt-glazed stoneware, post-medieval
- A10 - 1 body sherd, Mn-glazed coarseware, post-medieval
- A15 - 1 rim sherd, coarseware bowl, post-medieval
- B4 - 1 body sherd, Koln/Freschen stoneware, post-medieval
- B5 - 2 rim sherds, green glazed coarseware, post-medieval
- B16 - 1 body sherd, Staffordshire yellow glaze ware, post-medieval
- C3 - 1 body sherd, coarseware, post-medieval

- C4 - 1 body sherd, coarseware, post-medieval
- C5 - 1 handle fragment, Nottingham-type stoneware, post-medieval
- C10 - 1 body sherd, salt glazed stoneware, post-medieval
- C12 - 1 body sherd, coarseware, post-medieval
- C15 - 1 body sherd, stoneware, post-medieval
- C21 - 1 body sherd, Staffordshire yellow glazed ware, post-medieval
- D2 - 1 body sherd, Staffordshire yellowglazed ware, post-medieval
- 1 body sherd, brown glazed coarseware, post-medieval
- D3 - 1 body sherd, Mn-glazed coarseware, post-medieval
- D4 - 2 body sherds, coarse white earthenware, post-medieval
- D7 - 1 base sherd, Mn-glazed coarseware, post-medieval
- D8 - 1 body sherd, coarseware, post-medieval
- D13 - 1 body sherd, creamware, post-medieval
- D15 - 1 body sherd, coarseware, post-medieval
- E4 - 1 rim sherd, coarseware, post-medieval
- 1 body sherd, Staffordshire yellow glazed ware, post-medieval
- E8 - 1 rim sherd, Mn-glazed coarseware, post-medieval
- 1 rim sherd, moulded plate, post-medieval
- E10 - 1 body sherd, Mn-glazed coarseware, post-medieval
- F2 - 1 body sherd, coarseware, post-medieval
- F7 - 1 body sherd, yellow glazed coarseware, post-medieval
- G4 - 1 body sherd, green glazed coarseware, post-medieval
- H6 - 1 body sherd, coarseware, post-medieval
- H8 - 1 rim sherd, Nottingham-type stoneware, post-medieval
- H17 - 1 body sherd, salt glazed stoneware, post-medieval
- J3 - 1 rim sherd, coarseware, post-medieval
- J5 - 1 body sherd, Mn-glazed coarseware, post-medieval
- J15 - 1 base sherd, Nottingham-type stoneware, post-medieval

### **Modern Pottery**

- A4 - 1 body sherd, blue/white transfer ware, modern
- A10 - 1 body sherd, moulded plate sherds, modern
- B18 - 1 body sherd, white earthenware, modern
- C22 - 1 rim sherd, blue/white transfer ware, modern
- D8 - 1 body sherd, white glaze, modern
- D10 - 1 body sherd, white glaze, modern
- E6 - 5 body sherds, white glaze, modern
- H14 - 1 body sherd, white glaze, modern
- H22 - 1 body sherd, white glaze, modern
- J29 - 1 body sherd, stoneware bottle, modern

### **Unidentified Pottery**

- C2 - 1 body sherd, unidentified
- C4 - 1 body sherd, unidentified
- E4 - 1 body sherd, unidentified

### Flint

A17 - 1 flake, translucent brown. L 20mm Width 16mm Th 1mm  
H8 - 1 bladelet, dark grey. L 24mm W 8mm Th 3mm.  
J2 - 1 flake, mottled grey. L 28mm W 12mm Th 5mm

### Mammal and Bird Bone

|     |                                   |         |
|-----|-----------------------------------|---------|
| C15 | - 1 rabbit leg bone               | Weight  |
| E10 | - 1 leg bone - large bird ?turkey | 0.001kg |
| E15 | - 1 leg bone fragment             | 0.02kg  |
| F6  | - 1 leg bone fragment             | 0.01kg  |
| F28 | - 1 scapula - ?rabbit             | 0.02kg  |
| G22 | - 1 leg bone fragment             | 0.002kg |
|     |                                   | 0.001kg |

### Clay Pipe

A19 - 1 stem fragment  
A26 - 1 stem fragment  
D3 - 1 stem fragment  
D4 - 1 stem fragment  
D6 - 1 stem fragment  
D10 - 1 stem fragment  
F14 - 1 stem fragment  
G6 - 1 stem fragment  
H3 - 1 stem fragment

### Metal

A3 - Fe sheet fragment  
A5 - Pb button with cross hatched incised decoration  
A10 - Fe nail fragment with sub circular shank and no head, bent  
A13 - Fe object  
A21 - Fe sheet fragment  
C16 - Fe perforated disc - ?washer  
D3 - Fe nail with rectangular shank with no head  
D5 - Fe ring

### Glass

A15 - 1 clear glass fragment, modern  
A16 - 1 clear glass fragment, modern  
A26 - 1 clear glass fragment, modern  
A28 - 1 clear glass fragment, modern  
B17 - 1 clear glass fragment, modern  
C6 - 1 clear glass fragment, modern  
C7 - 1 green glass fragment, post-medieval

C16 - 1 clear glass fragment, modern  
D26 - 2 clear glass fragment, modern  
E16 - 1 clear glass fragment, modern  
E19 - 1 clear glass fragment, modern  
F17 - 1 clear glass fragment, modern  
G6 - 1 blue glass fragment, ?roman  
G14 - 1 clear glass fragment, modern  
J17 - 1 clear glass fragment, modern

### **Other Finds**

H19 - 1 coal flake

## AREA C2

### Prehistoric Pottery

- G32 - 1 body sherd, Bronze Age/Beaker? (Fig.5.1)
- H36 - 1 body sherd, prehistoric

### Roman Pottery

- A6 - 1 body sherd, greyware
- A17 - 1 rim sherd, greyware
- A19 - 1 rim sherd, black burnished ware, 2nd century
  - 2 body sherds, black burnished ware
- A20 - 1 rim sherd, Samian Dr 37 (after A.D 70)
- B18 - 1 body sherd, black burnished ware, 2nd century
- B19 - 1 rim sherd, colour coated ware, Nene Valley, 4th century
  - 1 rim sherd, black burnished ware, 2nd century
  - 1 base sherd, black burnished ware, 2nd century
  - 1 body sherd, black burnished ware, 2nd century
  - 3 body sherds, greyware
- B20 - 1 body sherd, narrow mouthed jar, 2nd century (No. 6, Corbridge 1947)
  - 1 body sherd, greyware
- B44 - 1 body sherd, Samian
- B46 - 1 body sherd, greyware
  - 1 flagon handle
- C1 - 1 rim sherd, orangeware, 1st/2nd century
- C12 - 1 body sherd, Samian
- C17 - 1 rim sherd, mortaria
- C21 - 1 base sherd, black burnished ware, 2nd century
- C22 - 1 body sherd, colour coated ware, Nene Valley, 4th century
  - 1 body sherd, orangeware, 1st/2nd century
- C41 - 1 rim sherd, greyware
- C47 - 1 body sherd, orangeware, 1st/2nd century
- C48 - 1 body sherd, Samian
  - 1 body sherd, orangeware, 1st/2nd century
- C50 - 1 body sherd, greyware, decorated
  - 1 body sherd, poppy head beaker, 2nd century
- D13 - 1 body sherd, calcite gritted ware, roman
- D14 - 1 body sherd, colour coated ware, Nene Valley, 4th century
- D19 - 1 body sherd, very abraded decorated Samian
- D20 - 1 body sherd, decorated Samian, Dr30
  - 1 body sherd, Parisian ware, 2nd century
- D25 - 1 base sherd, orangeware, 1st/2nd century
- D42 - 1 base sherd, black burnished ware, 2nd century
- E6 - 1 body sherd, greyware
- E11 - 1 body sherd, greyware
- E15 - 1 body sherd, mortaria
- E21 - 1 body sherd, black burnished ware, 2nd century
- E22 - 1 body sherd, decorated Samian
  - 1 body sherd, black burnished ware, 2nd century
  - 1 body sherd, colour coated ware, Nene Valley, 4th century
- E23 - 1 body sherd, greyware, 4th century
- E25 - 1 body sherd, Samian abraded
- E31 - 1 body sherd, orangeware, 1st/2nd century
- E34 - 1 body sherd, black burnished ware, 2nd century
  - 1 body sherd, greyware
- E35 - 1 rim sherd, Samian, Central Gaul, Dr 37, 2nd century
  - 1 rim sherd, greyware
  - 2 base sherds, greyware

- 1 body sherd, greyware
- 1 body sherd, greyware, beaker
- 1 body sherd, abraded orangeware, 1st/2nd century
- 1 body sherd, Crambeck face flagon?, 4th century
- 1 body sherd, black burnished ware, 2nd century
- E36 - 1 base sherd, greyware
- E41 - 1 body sherd, greyware
- E43 - 1 rim sherd, cooking jar, calcite gritted ware, roman
- E44 - 1 body sherd, greyware
- E45 - 1 rim sherd, white fabric
- E54 - 1 body sherd, orangeware, 1st/2nd century
- F12 - 1 body sherd, greyware
- F13 - 1 rim sherd, very abraded Samian, rivetted, Dr 37
- 1 body sherd, gritty orangeware, 1st/2nd century
- F19 - 1 body sherd, orangeware, 1st/2nd century
- F21 - 2 body sherds, colour coated ware, Nene Valley, 4th century
- F26 - 1 rim sherd, mortaria, 4th century (Fig 5.6)
- F29 - 1 rim sherd, cooking jar, calcite gritted ware, 3rd century
- 1 base sherd, greyware
- F31 - 1 rim sherd, black burnished ware, 2nd century

### Flint

|     |  |
|-----|--|
| D8  | - 1 bladelet, mottled grey. L 21mm W 12mm Th 2mm   |
| D44 | - 1 flake, dark mottled grey. L 26mm W16mm Th 10mm   |
| D47 | - 1 flake, grey brown. L 21mm W 20mm Th 2mm  |
| F27 | - 1 flake, mottled grey. L 28mm W 20mm Th 5mm  |
| F45 | - 1 flake, mottled grey left lateral corticated. L 25mm 23mm Th 2mm  |
| G2  | - 1 flake, mottled white. L 26mm W 15mm Th 4mm   |
| G22 | - 1 blade fragment, proximal broken, left lateral corticated. No retouch. Mottled grey. L17mm W16mm Th 6mm   |
| G47 | - 1 side scraper, translucent grey, percussion bulb. No edge retouch, although left lateral working edge. L 30mm W 21mm Th 4mm   |
| G48 | - 1 bladelet, mottled grey. L 30mm W 18mm Th 2mm   |
|     | - 1 flake, mottled grey, cortex remnant. L38mm W 23mm Th 17mm  |
| G49 | - 1 ?bladelet, mottled grey. L 35mm W 11mm Th 3mm  |
| H38 | - 1 flake, translucent, cortex remnant. L 33mm W 18mm Th 8mm   |
|     | - 1 flake mottled grey cortex remnant. L 26mm W 14mm Th 6mm  |
| H41 | - 1 flake, white. L 19mm W 17mm Th 6mm   |
| J16 | - 1 end and side scraper, distal and right lateral broken ?antiquity. Partial edge retouch on distal and left lateral at 45 degrees. Dark grey mottled. L 17mm W 16mm Th 8mm |
| J34 | - 1 flake, mottled grey. L 21mm W 10mm Th 2mm  |
| K41 | - 1 blade, partial bilateral edge retouch at 45 degrees; distal broken. Translucent brown-grey. L 21mm W 15mm Th 3mm   |

### Mammal and Bird Bone

- K25 - 1 stem fragment
- K36 - 1 stem fragment

### **Metal**

- B8 - 1 Fe nail with square head and shank
- C18 - 1 Fe horseshoe
- D17 - 1 Fe latchlifter for modern gate
- D20 - 1 Fe blade fragment
- E3 - 1 Fe nail with large circular head and circular shank, bent tip
- E14 - 1 Fe horseshoe
- E17 - 1 Fe nail with rectangular shank, no head
- E22 - 1 Fe bolt
- F5 - 1 Fe rod
- F20 - 1 rolled thin sheet of iron
- F21 - 1 Fe ash pan lifter
- F22 - 3 Fe fence pins
- F26 - 1 Fe fence pin
- F28 - 1 Fe horseshoe fragment
- G24 - 1 Fe bent fence pin
- G32 - 1 Fe object
- G37 - 1 Fe key fragment
- G49 - 1 Fe nail square shank no head
- G59 - 1 Fe horse shoe nail
- H27 - 2 Fe fence pins
- H28 - 2 Fe fence pins and 1 hasp
- H30 - 1 Fe ?plug
- H34 - 1 Fe gate latch
- K27 - 1 Fe ring
- K43 - 1 Fe rod, 1 Fe nail with rectangular shank
- K52 - 1 Fe nail with circular head and shank

### **Other Finds**

- C12 - 1 worked ?bituminous shale fragment
- C14 - 1 tar fragment
- C15 - 1 tar fragment
- E20 - 4 tar fragments

- E21 - 1 ?bituminous shale - unworked, 1 tar fragment
- E33 - 1 limestone fragment, 0.25kg
- E46 - 1 worked stone fragment, 0.1kg
- F19 - 1 tar fragment
- F21 - 2 tar fragments
- F23 - 1 tar fragment
- F25 - 1 tar fragment
- G24 - 3 tar fragments
- G25 - 3 tar fragments
- G26 - 1 tar fragment
- G30 - 1 burnt sandstone fragment, 0.21kg
- G38 - 1 limestone fragment, 0.175kg
- H7 - 1 ?bituminous shale fragment
- H25 - 1 ?bituminous shale fragment
- H27 - Slag - vitreous 0.003kg
- 3 tar fragments
- 1 ?bituminous shale fragment, unworked
- H28 - 1 ?bituminous shale fragment, unworked
- 1 tar fragment
- H32 - 1 tar fragment
- H44 - Burnt sandstone fragment, 0.1kg
- H46 - 1 worked stone?, 0.40kg
- J24 - 1 tar fragment
- J26 - 1 ?bituminous shale fragment
- J27 - 3 tar fragments
- J28 - 1 tar fragment
- J33 - 1 tar fragment
- J35 - 1 rubber bush
- J38 - 1 ?bituminous shale fragment - unworked
- J45 - 1 burnt sandstone fragment, 0.1kg
- K28 - Slag - metallic 0.075kg
- 1 tar fragment
- K30 - 1 tar fragment
- K32 - 1 burnt stone fragment, 0.1kg
- K35 - 1 tar fragment
- K41 - 1 burnt sandstone fragment, 0.1kg
- K43 - 1 ?bituminous shale fragment, unworked

### Glass

- A6 - 1 green glass fragment, modern
- B48 - 1 green glass fragment, modern
- C38 - 1 green glass fragment, modern
- 1 clear glass fragment, modern
- C52 - 1 green glass bottle fragment, modern
- D19 - 1 green glass fragment, modern
- D22 - 1 clear glass fragment, modern
- E23 - 1 brown glass fragment, modern
- E24 - 1 green glass fragment, post-medieval
- E33 - 1 green glass bottle base, post-medieval
- E34 - 1 clear glass fragment, modern
- E35 - 1 green glass fragment, modern
- E36 - 1 green glass fragment, modern
- F5 - 1 clear glass fragment, very abraded
- F18 - 1 brown glass bottle neck, modern
- F25 - 1 clear glass fragment, modern
- F34 - 2 clear glass fragments, modern
- F37 - 3 green glass fragments, modern

|     |   |
|-----|---|
| F39 | - 1 blue glass fragment, modern             |
| F54 | - 1 green glass fragment, modern            |
| G6  | - 1 green glass fragment, post-medieval     |
| G17 | - 1 handle fragment, modern                 |
| G28 | - 1 clear glass fragment, modern            |
| G31 | - 2 clear glass fragments, modern           |
| G33 | - 1 green glass fragment, post-medieval     |
| G34 | - 1 green glass fragment, modern            |
| G35 | - 1 green glass fragment, modern            |
| G37 | - 1 green glass fragment, modern            |
| G58 | - 1 green glass fragment, modern            |
| H24 | - 1 blue glass fragment, modern             |
| H26 | - 2 clear glass fragments, modern           |
| H27 | - 2 clear glass fragments, modern           |
|     | - 1 green glass fragment, modern            |
| H28 | - 1 clear glass bottle base, modern         |
|     | - 1 brown glass bottle base, modern         |
|     | - 4 green glass fragments, modern           |
| H29 | - 1 clear glass fragment, modern            |
| H30 | - 1 clear glass fragment, modern            |
|     | - 1 green glass fragment, post-medieval     |
| H34 | - 1 green glass fragment, post-medieval     |
| H37 | - 2 clear glass fragments, modern           |
| J4  | - 1 green glass fragment, modern            |
| J17 | - 1 green glass fragment, modern            |
| J20 | - 1 brown beer bottle, modern               |
| J22 | - 1 brown glass fragment, modern            |
| J24 | - 1 clear glass fragment, modern            |
| J27 | - 1 green glass fragment, post-medieval     |
| J31 | - 1 clear glass bottle base, modern         |
| J32 | - 1 clear glass fragment, modern            |
| J34 | - 2 clear glass fragments, modern           |
| J35 | - 3 clear glass fragments, modern           |
| J36 | - 2 clear glass fragments, modern           |
| J38 | - 1 black glass fragment, modern            |
| J46 | - 1 green glass fragment, post-medieval     |
| J57 | - 1 green glass fragment, post-medieval     |
| K19 | - 1 green glass fragment, modern            |
| K20 | - 4 clear and green glass fragments, modern |
| K21 | - 1 brown glass fragment, modern            |
| K24 | - 1 light blue glass fragment, modern       |
| K25 | - 1 brown glass fragment, modern            |
| K27 | - 1 brown bottle neck, modern               |
| K29 | - 1 clear glass fragment, modern            |
| K36 | - 1 dark green glass fragment, modern       |
| K37 | - 1 brown glass fragment, modern            |
| K38 | - 1 green glass fragment, modern            |
| K59 | - 1 green glass fragment, post-medieval     |

### Small Finds

1. D54 - 1 worked jet object (Fig. 5.8)
2. K43 - Cu alloy tweezers
3. D1 - Silver coin, Elizabeth I
4. K42 - 1 Colour-coated ware flagon neck (Fig. 5.3)
5. G17 - 1 Yellow paste glass bangle Fragment (Fig. 5.9)

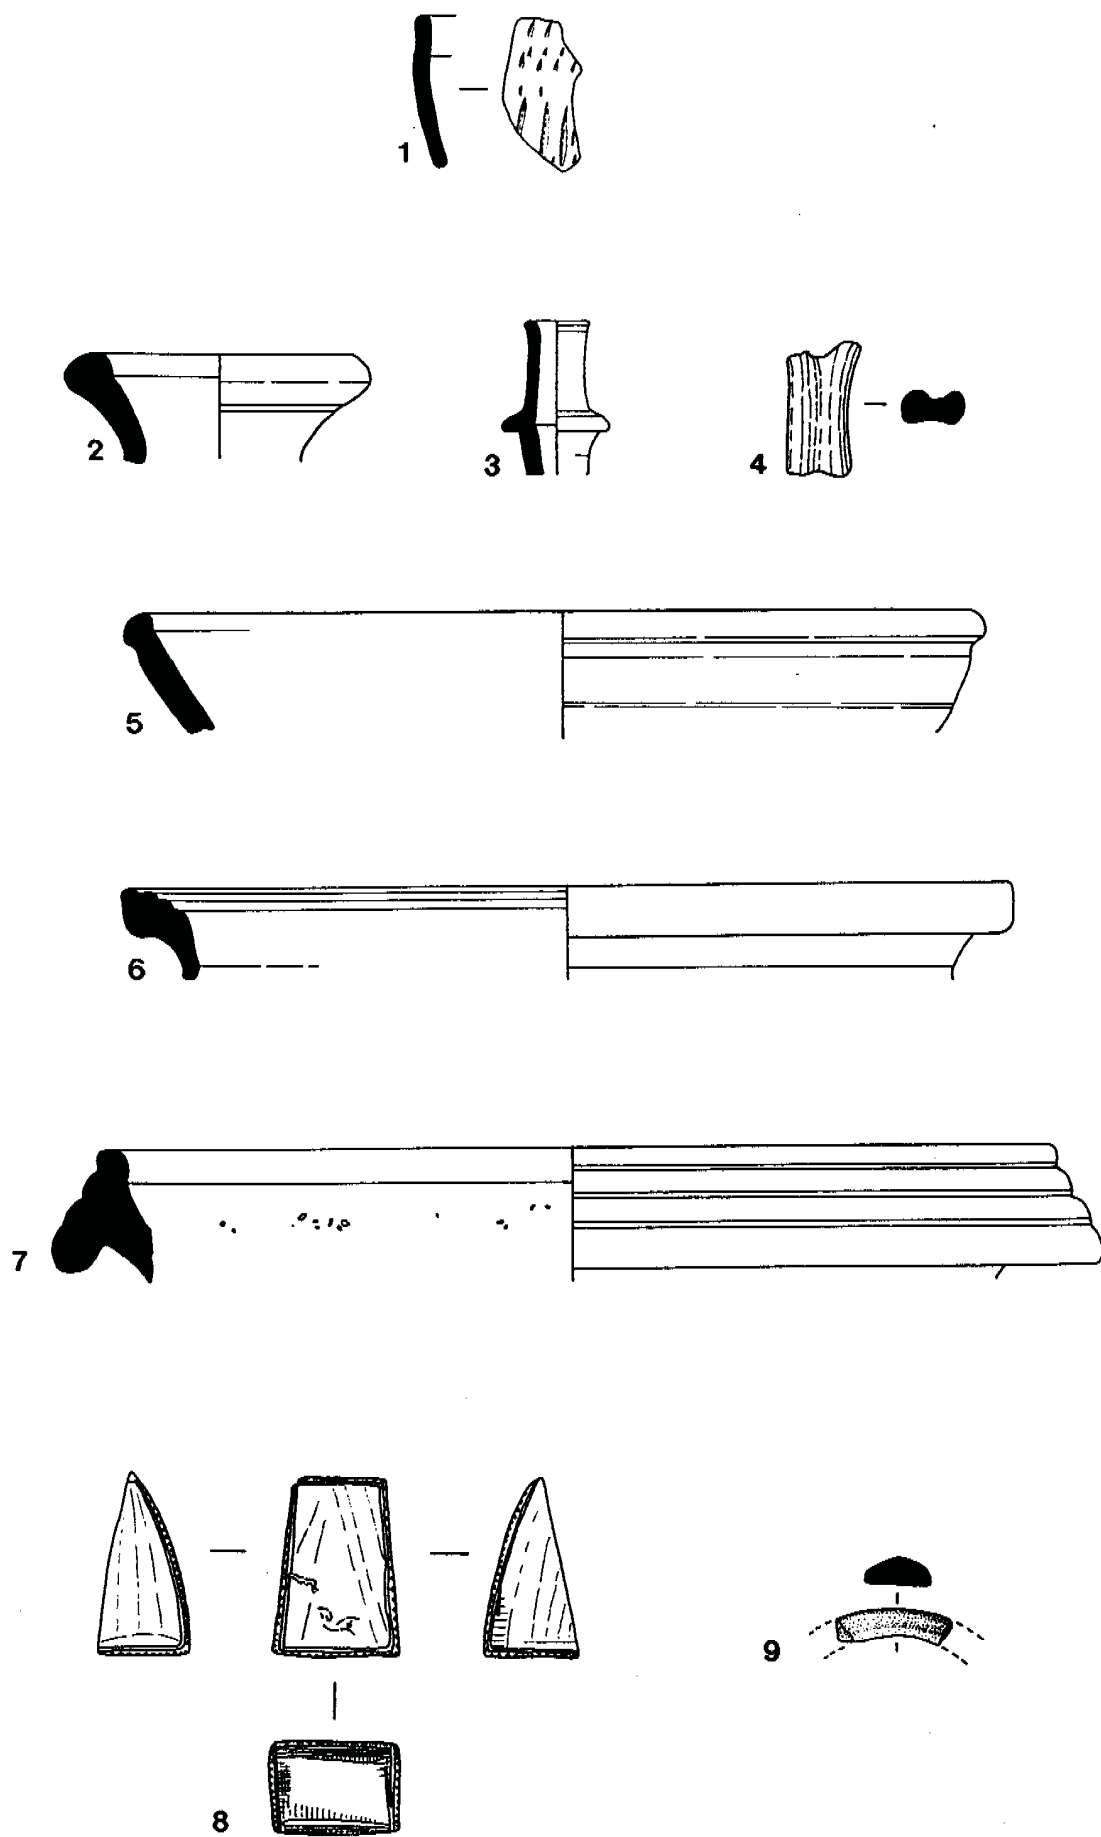

Figure 5 - C2 Pottery and Small Finds Illustrations. Scale 1:2.

## AREA C3

### Roman Pottery

- D16 - 1 body sherd, very abraded decorated Samian, roman
- F11 - 1 body sherd, colour coated Nene valley, 3rd/4th centuries
- F15 - 1 body sherd, greyware, roman
- G26 - 1 body sherd, very abraded Samian, no slip, roman
- H27 - 1 body sherd, colour coated Nene Valley, 3rd/4th centuries

### Medieval Pottery

- A16 - 1 handle fragment, Humber ware, medieval
- C26 - 1 base sherd, Tees Valley ware, medieval
- D5 - 1 body sherd, unidentified, medieval
- D12 - 1 rim sherd, Humber ware, medieval
- E17 - 1 body sherd, unidentified, medieval
- F5 - 1 body sherd, Tees valley ware, medieval
- F11 - 1 body sherd, colour coated Nene valley, 3rd/4th centuries
- 1 body sherd, Tees Valley ware, medieval
- F29 - 1 rim sherd, Humber ware, medieval
- 1 body sherd, ?Humber ware, medieval
- G4 - 1 body sherd, Tees Valley ware, medieval
- G5 - 1 rim sherd, Humber ware, medieval
- G13 - 1 body sherd, Humber ware, medieval
- G15 - 1 rim sherd, Humber ware, medieval
- H18 - 1 body sherd, Tees Valley ware, medieval

### Post-medieval Pottery

- A19 - 1 body sherd, green glazed coarseware, post-medieval
- A26 - 1 fragment, coarseware, post-medieval
- B24 - 1 body sherd, marbled Staffordshire slipware, post-medieval
- B28 - 1 body sherd, Staffordshire yellow glaze, post-medieval
- C3 - 1 body sherd, brown glazed coarseware, post-medieval
- C26 - 1 rim sherd, slipped coarseware, post-medieval
- C28 - 1 base sherd, slipped coarseware, post-medieval
- C29 - 1 body sherd, post-medieval
- D4 - 1 body sherd, slipped coarseware, post-medieval
- D5 - 1 body sherd, brown glazed coarseware, post-medieval
- D19 - 1 rim sherd, brown glazed coarseware, post-medieval
- E2 - 1 handle fragment, Nottingham type stoneware, post-medieval
- 1 body sherd, Nottingham type stoneware, post-medieval
- E4 - 1 body sherd, salt glazed stoneware, post-medieval
- E6 - 1 rim sherd, slipped coarseware, post-medieval
- E14 - 1 body sherd, Mn-glazed coarseware, post-medieval
- E25 - 1 body sherd, Mn-glazed coarseware, post-medieval
- F5 - 1 body sherd, slipped coarseware, post-medieval
- 1 body sherd, Mn-glazed coarseware, post-medieval
- F6 - 1 body sherd, slipped coarseware, post-medieval
- 1 body sherd, Nottingham type stoneware, post-medieval
- F26 - 1 base sherd, salt glazed stoneware, post-medieval
- F29 - 1 base sherd, yellow glaze, post-medieval
- G3 - 1 body sherd, slipped coarseware, post-medieval
- G4 - 1 body sherd, slipped coarseware, post-medieval
- G14 - 1 base sherd, stoneware bottle, post-medieval
- G28 - 1 body sherd, white glaze, post-medieval
- H13 - 1 body sherd, Mn-glazed coarseware, post-medieval
- H25 - 1 body sherd, salt-glazed stoneware, post-medieval

- H26 - 1 body sherd, coarseware, post-medieval
- H29 - 1 body sherd, Nottingham-type stoneware, post-medieval
- J20 - 1 body sherd, slipped coarseware, post-medieval
- J25 - 1 body sherd, Nottingham-type stoneware, post-medieval
- K19 - 1 handle fragment, brown glazed coarseware, post-medieval
- K29 - 1 rim sherd, moulded salt glazed stoneware plate, post-medieval
- 1 body sherd, slipped coarseware, post-medieval

### Modern Pottery

- A2 - 1 rim sherd, yellow glazed earthenware, modern
- 1 base sherd, white glaze, modern
- 1 body sherd, blue/white transfer ware, modern
- A3 - 4 body sherds, white glaze, modern
- A4 - 1 rim sherd, stoneware bottle, modern
- 1 body sherd, stoneware bottle, modern
- A5 - 1 rim sherd, white glaze, modern
- 1 body sherd, white glaze, modern
- 2 body sherds, transfer ware, modern
- A6 - 1 rim sherd, blue/white transfer ware, modern
- 1 base sherd, white glaze, modern
- 2 body sherds, white glaze, modern
- 1 body sherd, blue/white transfer ware, modern
- A7 - 1 body sherd, transfer ware, modern
- 1 body sherd, white glaze, modern
- A10 - 1 body sherd, blue/white transfer ware, modern
- 1 body sherd, white glaze, modern
- A14 - 1 body sherd, white glaze, modern
- A17 - 1 body sherd, white glaze, modern
- A20 - 1 body sherd, blue/white transfer ware, modern
- A28 - 1 fragment, white glaze, modern
- B2 - 1 rim sherd, blue/white transfer ware, modern
- 2 body sherds, blue/white transfer ware, modern
- B3 - 6 body sherds, white glaze, modern
- B4 - 3 body sherds, white glaze, modern
- B5 - 1 base sherd, white glaze, modern
- 2 body sherds, white glaze, modern
- B6 - 2 base sherds, white glaze, modern
- 4 body sherds, white glaze, modern
- B7 - 1 base sherd, white glaze, modern
- 1 body sherd, white glaze, modern
- B8 - 1 body sherd, white glaze, modern
- B9 - 2 body sherds, white glaze, modern
- B10 - 1 body sherd, white glaze, modern
- B12 - 1 body sherd, white glaze, modern
- B13 - 1 body sherd, white glaze, modern
- B14 - 1 rim sherd, white glaze, modern
- 1 body sherd, white glaze, modern
- B16 - 1 body sherd, white glaze, modern
- B18 - 2 body sherds, white glaze, modern
- B19 - 1 body sherd, white glaze, modern
- B23 - 1 body sherd, blue/white transfer ware, modern
- B28 - 1 body sherd, white glaze, modern
- C2 - 1 body sherd, white glaze, modern
- C3 - 3 body sherds, white glaze, modern
- 1 body sherd, yellow glaze, modern
- C4 - 2 rim sherds, white glaze, modern
- 3 body sherds, Blue/white transfer ware, modern

- C5 - 1 body sherd, white glaze, modern
- 2 body sherds, white glaze, modern
- 2 body sherds, blue/white transfer ware, modern
- C6 - 1 rim sherd, white glaze, modern
- 1 rim sherd, brown transfer ware, modern
- 3 body sherds, white glaze, modern
- 1 body sherd, blue/white transfer ware, modern
- C7 - 1 handle fragment, white glaze, modern
- 1 rim fragment, white glaze, modern
- C9 - 1 body sherd, blue/white transfer ware, modern
- C11 - 2 body sherds, white glaze, modern
- C12 - 1 body sherd, white glaze, modern
- C14 - 1 body sherd, blue/white transfer ware, modern
- C16 - 1 base sherd, white glaze, modern
- 1 body sherd, white glaze, modern
- C17 - 1 body sherd, white glaze, modern
- C24 - 1 body sherd, white glaze, modern
- C25 - 1 body sherd, white glaze, modern
- C26 - 1 rim sherd, white glaze, modern
- C27 - 1 handle fragment, white glaze, modern
- 1 body sherd, white glaze, modern
- C28 - 1 body sherd, modern
- D2 - 1 base sherd, white glaze, modern
- 2 body sherds, white glaze, modern
- 1 body sherd, blue/white transfer ware, modern
- D3 - 2 body sherds, white glaze, modern
- D4 - 2 body sherds, blue/white transfer ware, modern
- 2 body sherds, white glaze, modern
- D5 - 1 rim sherd, blue/white transfer ware, modern
- 1 body sherd, white glaze with red painted decoration, modern
- D6 - 2 body sherds, white glaze, modern
- D7 - 1 body sherd, white glaze with blue painted decoration, modern
- D8 - 1 body sherd, white glaze, modern
- D15 - 1 body sherd, blue/white transfer ware, modern
- D22 - 1 body sherd, white glaze, modern
- D24 - 1 body sherd, white glaze, modern
- D27 - 1 body sherd, white glaze, modern
- D29 - 1 body sherd, white glaze, modern
- E2 - 3 body sherds, white glaze, modern
- 1 body sherd, blue/white transfer ware, modern
- E3 - 4 body sherds, white glaze, modern
- E4 - 1 base sherd, white glaze, modern
- 3 body sherds, blue/white transfer ware, modern
- 1 body sherd, white glaze, modern
- E5 - 2 body sherds, blue/white transfer ware, modern
- 2 body sherds, white glaze, modern
- E6 - 1 rim sherd, blue/white transfer ware, modern
- E7 - 1 rim sherd, blue/white transfer ware, modern
- 3 body sherds, white glaze, modern
- 1 body sherd, blue/white transfer ware, modern
- E8 - 1 rim sherd, blue/white transfer ware, modern
- 1 body sherd, white glaze, modern
- E9 - 1 base sherd, white glaze, modern
- E11 - 1 rim sherd, white glaze, modern
- E18 - 1 body sherd, white glaze, modern
- E23 - 1 base sherd, white glaze, modern
- E26 - 1 body sherds, blue/white transfer ware, modern
- E27 - 2 body sherds, blue/white transfer ware, modern

- F2 - 2 body sherds, white glaze, modern
- F3 - 1 rim sherd, red/white transfer ware, modern
- 1 body sherd, blue/white transfer ware, modern
- F4 - 1 rim sherd, white glaze, modern
- 1 body sherd, blue/white transfer ware, modern
- F5 - 2 rim sherds, white glaze, modern
- 1 body sherd, red/white transfer ware, modern
- F7 - 2 body sherds, white glaze, modern
- F8 - 4 body sherds, white glaze, modern
- F9 - 1 body sherd, white glaze, modern
- F13 - 1 body sherd, white glaze, modern
- F16 - 1 base sherd, white glaze, modern
- 1 base sherd, blue/white transfer ware, modern
- F19 - 1 rim sherd, white glaze, modern
- F21 - 1 body sherd, white glaze, modern
- F22 - 1 body sherd, white glaze, modern
- F25 - 1 body sherd, white glaze, modern
- F29 - 1 base sherd, white glaze, modern
- G2 - 1 rim sherd, white glaze, modern
- G3 - 2 body sherds, white glaze, modern
- G4 - 1 rim sherd, white glaze, modern
- G5 - 1 body sherd, white glaze, modern
- G6 - 1 rim sherd, white glaze, modern
- 1 base sherd, white glaze, modern
- 1 body sherd, blue/white transfer ware, modern
- G8 - 1 body sherd, blue/white transfer ware, modern
- G12 - 1 base sherd, white glaze, modern
- G16 - 1 body sherd, white glaze, modern
- H3 - 1 body sherd, white glaze, modern
- H5 - 1 body sherd, white glaze, modern
- H6 - 1 body sherd, blue/white transfer ware, modern
- H7 - 3 body sherds, blue/white transfer ware, modern
- 1 body sherd, white glaze, modern
- 1 body sherd, white glaze with brown painted decoration, modern
- H9 - 1 body sherd, white glaze, modern
- H13 - 1 body sherd, white glaze, modern
- H14 - 1 base sherd, white glaze, modern
- 2 handle fragments, white glaze, modern
- H19 - 1 body sherd, white glaze, modern
- H23 - 1 rim sherd, white glaze, modern
- 6 body sherds, white glaze, modern
- H27 - 1 body sherd, white glaze, modern
- H28 - 1 body sherd, white glaze, modern
- J5 - 1 rim sherd, blue/white transfer ware, modern
- 1 body sherd, blue/white transfer ware, modern
- J7 - 1 body sherd, blue/white transfer ware, modern
- J8 - 2 body sherds, white glaze, modern
- 1 body sherd, stoneware, modern
- J9 - 1 body sherd, white glaze, modern
- 1 body sherd, blue/white transfer ware, modern
- J10 - 1 rim sherd, slipped coarseware, modern
- J15 - 1 body sherd, white glaze, modern
- 1 body sherd, blue/white transfer ware, modern
- J17 - 1 rim sherd, blue/white transfer ware, modern
- J18 - 1 body sherd, white glaze, modern
- J27 - 1 body sherd, white glaze, modern
- J28 - 1 body sherd, white glaze, modern
- K16 - 1 base sherd, creamware, modern

K22 - 1 body sherd, white glaze, modern

### Flint

- A14 - 1 core, flake scarred, dark mottled grey. L 35mm W 22mm Th 21mm
- B2 - 1 flake mottled grey. L 18mm W 10mm Th 2mm
- B21 - 1 flake, mottled grey. L 44mm W 20mm Th 4mm
- B22 - 1 flake, mottled grey. L 19mm W 17mm Th 7mm
- B23 - 1 flake, mottled grey. L 30mm W 21mm Th 10mm
- B24 - 1 flake, white. L 16mm W 11mm Th 4mm
- B25 - 1 flake, mottled grey, percussion bulb. L 18mm W 16mm Th 6mm
- B26 - 1 flake, mottled grey. L 25mm W 10mm Th 5mm
- C9 - 1 horseshoe scraper, no edge retouch, percussion bulb, mottled grey. L 24mm W 23mm Th 12mm
- C13 - 1 bladelet, partial edge retouch on right lateral at 30 degrees - ?serrated blade, mottled grey. L 18mm W 9mm Th 3mm
- C16 - 1 flake, percussion bulb, mottled grey. L 17mm W 10mm Th 3mm
- C25 - 1 flake, mottled grey. L 17mm W 10mm Th 3mm
- D5 - 1 bladelet, mottled grey. L 26mm W 11mm Th 4mm
- D29 - 1 flake, cortex remnant, mottled grey. L 26mm W 26mm Th 6mm
- E8 - 1 flake, mottled grey. L 13mm W 10mm Th 2mm
- G20 - 1 flake, mottled brown. L 26mm W 20mm Th 6mm
- G22 - 1 flake, dark grey. L 24mm W 14mm Th 9mm
- K25 - 1 ?core, flake scarred, mottled grey. L 30mm W 24mm Th 15mm

### Animal Bone

- J24 - 1 sheep/goat rib fragment 0.005kg

### Clay Pipe

- A2 - 1 stem fragment
- B3 - 1 stem fragment
- B6 - 2 stem fragments
- C5 - 1 stem fragment
- C8 - 1 stem fragment
- D4 - 1 stem fragment

### Metal

- A3 - 1 Cu alloy screw top ?for light fitting/bulb
- F18 - 1 Fe flattened rod
- H16 - 1 Cu alloy button
- H17 - 1 Fe nail with circular head and shank

### Other Finds

- A5 - 1 Bakelite fragment
- B5 - 2 bakelite fragments
- C2 - 1 bakelite fragment
- C3 - 1 bakelite fragment
- E4 - 1 bakelite fragment
- F3 - 4 bakelite fragments
- F11 - 1 bakelite fragment
- H3 - 1 bakelite fragment
- H25 - 1 daub fragment

### Glass

- A3 - 1 clear window glass fragment, modern

|     |   |
|-----|---|
| A4  | - 2 clear glass fragments, modern                   |
| A5  | - 1 green glass bottle fragment, modern             |
| A6  | - 1 green glass bottle fragment, post-medieval      |
|     | - 1 greenish glass window fragment                  |
| A13 | - 1 clear glass base fragment                       |
| B2  | - 1 green glass bottle fragment, modern             |
| B6  | - 1 clear glass fragment, modern                    |
| B9  | - 1 green glass bottle fragment, modern             |
| C2  | - 1 clear glass fragment, modern                    |
|     | - 1 yellow glass fragment, modern                   |
| C3  | - 1 clear moulded glass fragment, modern            |
| C6  | - 2 green glass fragments, post-medieval            |
| C9  | - 1 green glass bottle fragment, modern             |
| C20 | - 1 green glass fragment, post-medieval             |
| C22 | - 1 clear glass fragment, modern                    |
| C27 | - 1 clear glass fragment, modern                    |
| D2  | - 3 green glass bottle fragments, modern            |
| D3  | - 1 clear glass fragment, modern                    |
| D4  | - 1 green glass bottle fragment, modern             |
| D5  | - 1 clear glass fragment, modern                    |
|     | - 1 green glass fragment, modern                    |
| D8  | - 1 green glass bottle fragment, modern             |
| E7  | - 1 clear glass fragment, modern                    |

### Roman Pottery Summary

The assemblage of the Roman pottery from the 1993 intensive fieldwalking in Area C consisted of 495 pottery sherds, of which 491 were identified. A large range of types and forms were found showing occupation of the site from the late 1st - 4th century A.D. The pottery assemblage included fine wares such as Samian and Nene Valley ware to the more everyday greyware and orangeware associated to the military and locally produced Calcite gritted wares.

The Calcite gritted ware of the late 2nd - 4th century A.D. consisted of 30 sherds, in various forms, from cooking pots to jars and bowls. The coarse dark grey to black fabric with inclusions of calcite, is known to have been produced regionally, in large amounts and is a development of the Parisi production carried on from Iron Age. By the late second century A.D. Calcite gritted wares are being supplied to forts as military potters were in decline.

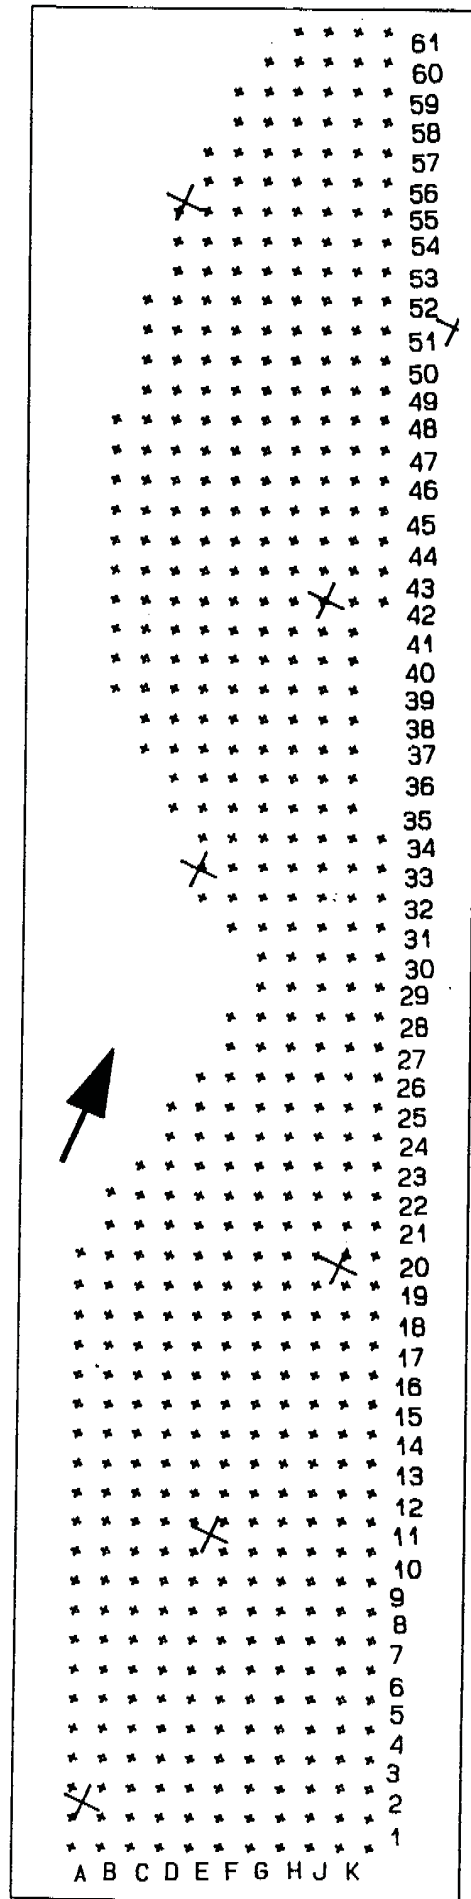

Figure 6  
Site Grid - Area C2

The Greywares consisted of 198 sherds, the largest group; the fabric is self-coloured and dates from the late 1st to the 4th century A.D. and is in various forms, from the more general cooking pot to the fine small flasks, poppy-head beakers and flagons. By the 3rd century greywares begin to dominate (Fig. 5.6).

Black Burnished wares, consisted of 44 sherds, in cooking pots, jars and dish form; they occur in black or grey fabric with specially treated, highly polished surfaces. The earliest fabrics tend to be dense black slightly gritty fabrics; in the 2nd and 3rd centuries A.D. the fabric becomes grey, reverting back to the black fabric by the 4th century A.D. Both the Black Burnished and the Grey wares reflect the civilian occupation of the area after the military withdrawal.

Crambeck ware consisted of 22 sherds, with a varied selection of fabrics, from hard white fabrics in the painted platters, to smooth, lead grey, heavily fired fabrics, and the self-coloured, sandy fabric with gritty inclusions of the mortaria. Crambeck comes into production at the end of the 3rd century and continues to 5th century A.D (Fig 5.7).

Colour-coated wares consisted of 41 sherds. The fabric of these are normally white/grey with a coating of colour applied, the coating can be of various colours; orange, olive green, brown etc. Nene Valley wares predominate the colour-coated group and although manufactured from late 2nd to 4th century, Area C has mainly 4th century forms (Fig. 5.3 and 5.5).

Samian ware consisted of 71 sherds, distinctive pale fabrics coated in a glossy red or brown slip, consisting of plain forms and decorated forms manufactured from the 1st - mid 3rd centuries A.D. and imported from Gaul. Manufacture of Samian in Britain is very limited and confined to the south-east and distribution confined to this area.

Orange ware consisted of 69 sherds. Orange ware is normally associated to military sites and dominates 1st and 2nd centuries before indigenous potteries were established. By the 3rd century orange ware was the exception rather than the norm. Orange ware forms consisted of everyday kitchen utensils including flagons, beakers and jars (Fig 5.2).

Amphorae consisted of 8 sherds. Most amphorae was manufactured in Mediterranean areas and were large containers with handles. Amphorae was used throughout the Roman world for the trade in perishable goods from the Mediterranean including wine, olive oil and are dated to the 1st - 2nd centuries in Britain.

Parisian ware consisted of one sherd, manufactured from the 1st to the late 2nd centuries in black or grey burnished fabrics and impressed with simple motifs.

The wide range of pottery forms, fabrics and date range, indicates that the site was occupied from the 1st to 4th century. Early occupation of the site suggests a military presence with possibly a later settlement attached.

### Medieval Pottery Summary

The medieval pottery from Area C consisted of a fairly small assemblage of 89 sherds (C1, 23 sherds; C2, 54 sherds; C3 12 sherds).

York Glazed Ware is lightly gritted with sub-angular quartz sand, and is usually fired to white or pinkish in colour. Date range: 12-13th centuries.

Tees Valley Ware is a moderately gritted fabric, with quartz tempering. The colour is usually pinkish or orange. Date range: 12-14th centuries.

Humber Ware is a smooth fine sand-tempered fabric, usually fired to pink or orange at the outer surface with a grey core or interior surface. In manufacture, the fabric was produced from the 12-15th centuries, but in the northern part of North Yorkshire, Humber Ware is believed to supplant Tees Valley ware in the 14th century.

A number of medieval Orange Ware sherds were recovered. Orange Ware includes fabrics found (and manufactured?) in Hull and Beverley, and also at Scarborough. The fabric is reddish-yellow and fine sandy with a dark green glaze. Date range: 12-14th centuries.

Hambleton-type Ware is a fairly smooth fabric, fired to pale pinks and browns, often with a flakey green glaze. This fabric is dateable to the 14-15th centuries.

A single imported sherd was identified, part of a mug/jug in Siegburg/Raeren stoneware, imported from the Rhineland in the 14th or 15th centuries.

Any conclusions to be drawn from such a relatively small assemblage, recovered from field-walking, must be tentative. However, it is possible to say that the assemblage shows influences from

both the southern Vale of York and the Tees Valley Basin, which have somewhat different traditions of pottery manufacture. This might be expected given the geographical position of Area C, situated as it is between the two regions.

### **Post-medieval Pottery Summary**

A number of coarseware fabrics were identified. Green-glazed coarseware includes Ryedale-type ware, and brown-glazed coarsewares including vessels of Staffordshire manufacture. Later, ie. 18-19th century coarsewares are represented by Manganese-glazed wares and vessels with an under-glaze slip, both glazed interiorly; these are presumably of fairly local manufacture.

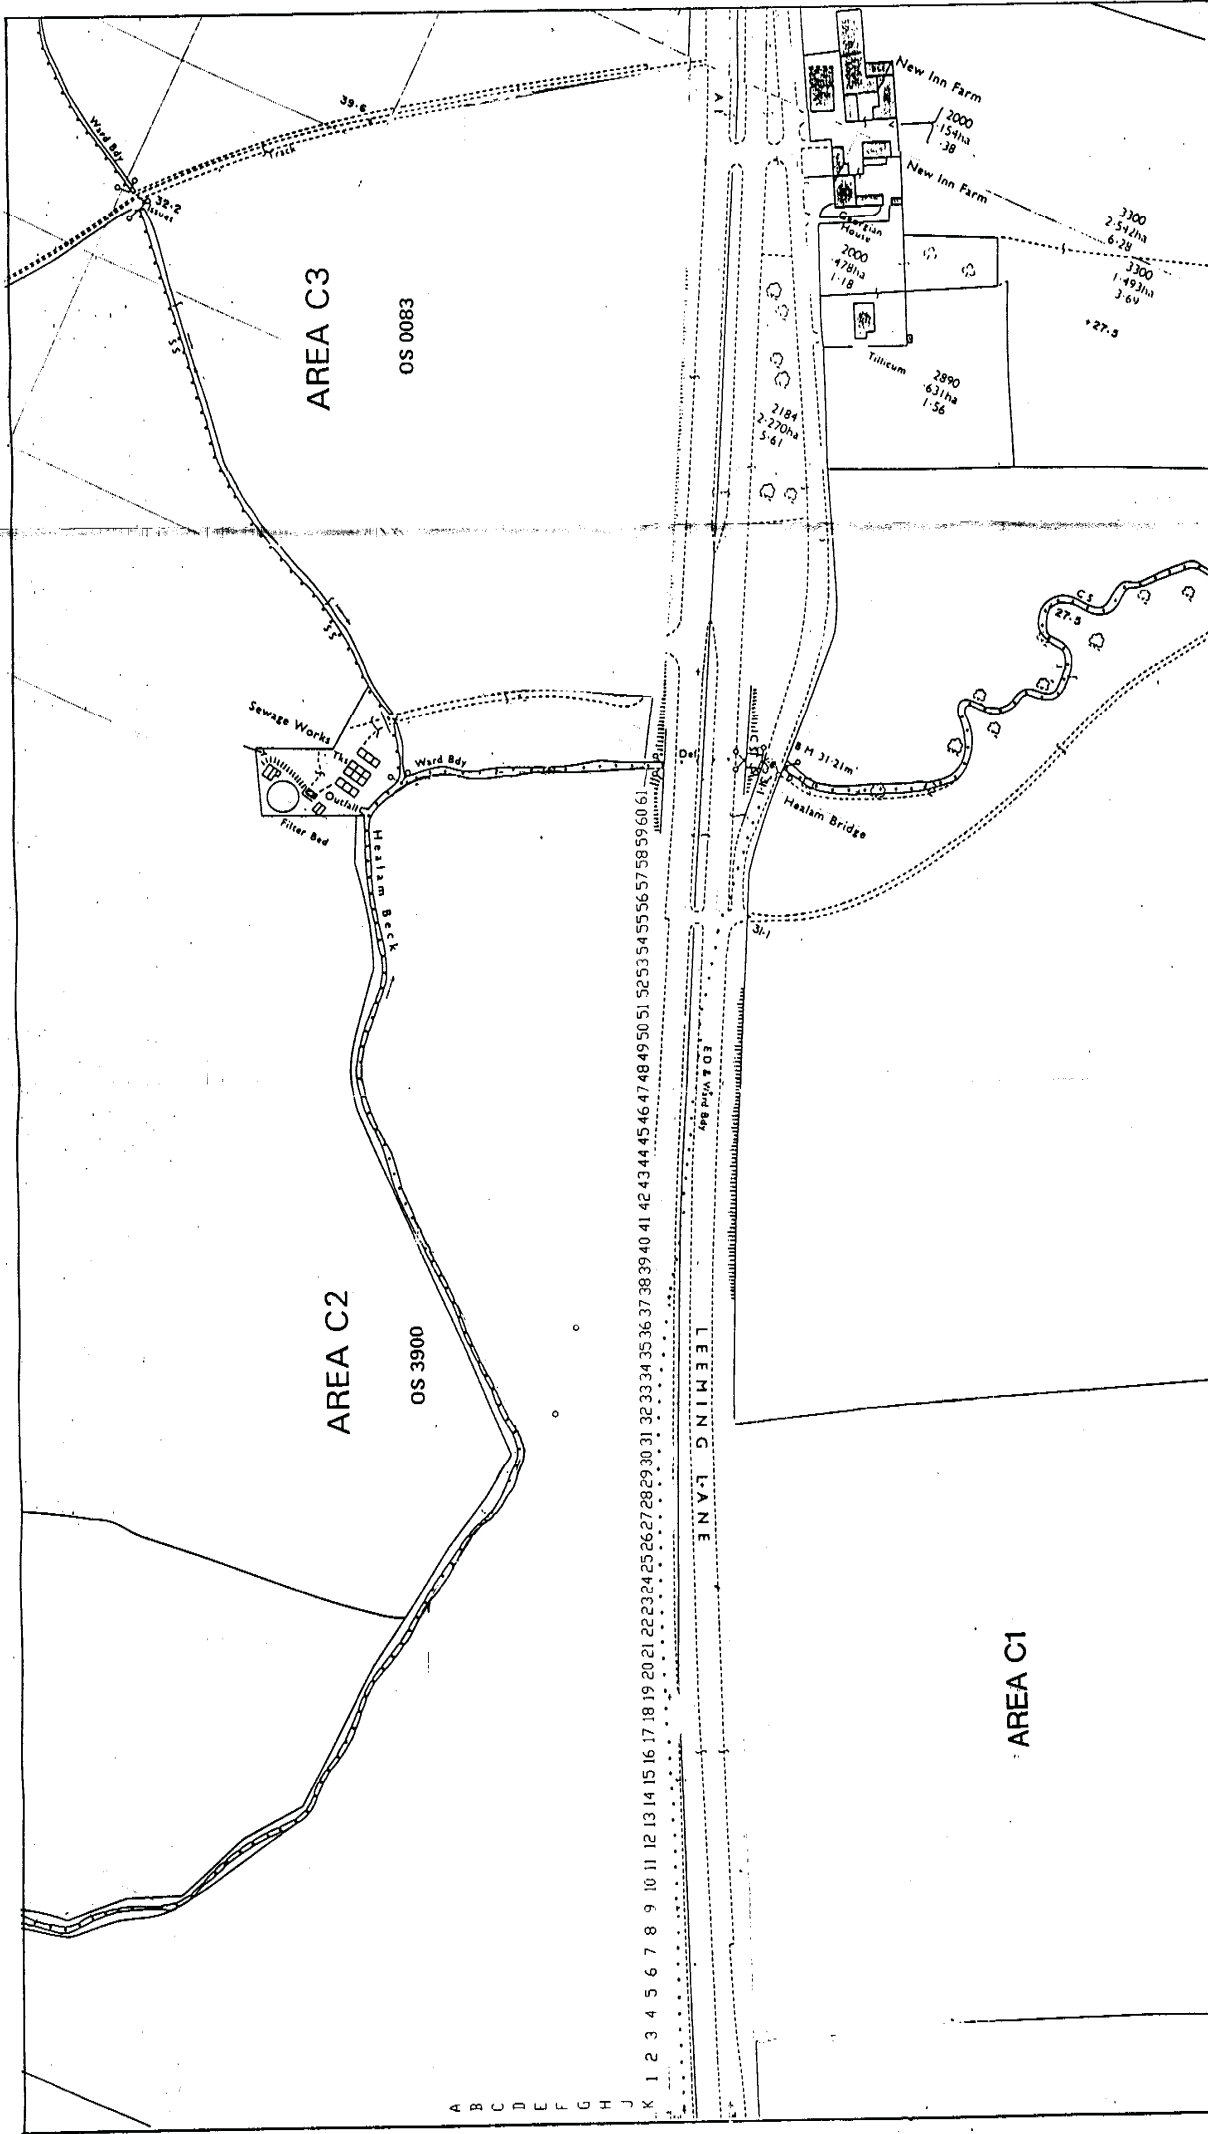

Other Staffordshire fabrics are represented by yellow-glazed earthenware, and by "marbled slipware" of mid-late 18th century date. There are also sherds of salt-glazed stoneware from Staffordshire.

Another post-medieval stoneware fabric is represented: Nottingham-type stoneware, with a lustrous brown-glaze and impressed decoration.

True fine wares are represented by Wedgwood Basaltis ware, and Creamware, a direct forerunner of the modern white-glazed earthenware.

### **Modern Pottery Summary**

The modern pottery is represented by white earthenwares, often transferred in blue, more rarely in green or purple. There are also a number of sherds from 19-20th century bottles and jars. Finally, a sherd of porcelain (from C2 F46) illustrates a more high class ware.

TABLE 21  
AREA C3 - BRICK AND TILE DISTRIBUTION

## APPENDIX I

### Additional Information

#### Introduction

The following information is included because of its potential significance on the archaeological implications for Area C and surrounding area.

#### Mr Gibson's Pottery Collection

This collection of pottery was assembled over ten years from the field to the north of Area C1 at NGR SE 3250 8355 (centre). Thanks must be extended to Mr Gibson for the loan of the pottery.

#### Finds Catalogue

Total sherds 28,

##### 26 Roman sherds

Amphora – 2 sherds from different vessels 1st/3rd century

1 base

1 body (with potters finger prints)

Samian – 11 sherds at least four vessels 2nd /3rd century

4 rims

4 body – 3 decorated but very abraded

3 bases – 1 Drag 37 Central Gaul late 2nd century

Mortaria – 2 sherds 3rd/4th century possible Crambeck

1 body

1 base

Colour-Coated – 3 sherds, Nene Valley 3rd century

2 body

1 base

Rhenish Ware – 1 sherd imported mica dusted beaker 3rd century

1 body

Black Burnished – 2 sherds 3rd century

1 rim

1 body

Calcite-Gritted Ware – 3 sherds local coarse ware 4th century

1 rim cooking pot

2 bases cooking pots

Greyware – 2 sherds 3rd century

1 rim jar

1 body

## 2 Medieval

Tees Valley – 2 sherds 12th /14th century

1 rim

1 body

The pottery collected by Mr Gibson shows similar results to Area C2 with a high proportion of the pottery collected being fine Tablewares with a similar date range 2nd to 4th century. As this assemblage was not collected in a controlled method the results have to be treated with some caution.

### Stone Coffins

Mr Gibson also informed us of stone coffins located at NGR SE 3225 8390 when either a bungalow was erected or an orchard planted. The coffins remain undisturbed.

### Previous work

Jeremy Evans (pers com) suggested from his pottery analysis of the 1986 fieldwalking (Price and Evans, 1992), that the indications were that a high status site such as a shrine or villa may well be located at Area C.

5th Nov. 1993

C2 D54 sfno.1

The object (?pendant) is made of jet, most likely from the Whitby area. It is interesting to note that the object is intended to be viewed from the 'front' and the 'bottom', rather than from the sides or back, since the nicked and incised decoration does not extend to these latter areas. It is also worth commenting on the natural flows within the material left exposed on the front surface. There are clear rotary polishing and grinding marks in several places, and the decorations (lines and nicks) have been produced by a lap-wheel.

Jet objects can only readily be dated on stylistic grounds, few clues being provided by the simple technology employed in jet working in all periods. However, the use of lathes and lap-wheels for such work suggests that the piece is either Roman or Viking and later.

C2 K43 sfno.2

This object is a crudely bent copper alloy strip with rounded ends. It does not have any surface decoration but is covered in the remains of a pale green patina. For information on conservation, please refer to the York Archaeological Trust Conservation Record.

C2 D1 sfno.3

This object is a silver coin in a fair condition with much of the inscription surviving. The coin appears to be of Elizabeth I but numismatic expertise will have to be sought if more detailed information is required. For conservation information please refer to the YAT Conservation Record.
