### **Appendix 1: Greater London Sites and Monuments Record**

## **EXECUTIVE SUMMARY**

This Archaeological Impact Assessment is provided in support of a full planning application for the installation of a Cycle Hire docking station on the carriageway and footway adjacent to 1 Maltravers Street in the City of Westminster.

The general principles of the docking station design have been developed in consultation with the boroughs, Royal Parks and other key stakeholders. Pre-application advice has been sought from the Greater London Archaeological Advisory Service. This Assessment includes an appraisal of the recorded archaeological remains in the area and the extent to which the docking station would impact on any significant archaeological remains. The groundworks for the docking station will not penetrate deeper than 450mm below the current ground surface.

No further archaeological intervention is proposed.

# **1 INTRODUCTION**

## **1.1 Statement Overview**

Cycling within London has experienced rapid growth. It is estimated that there has been a 91 percent increase in the number of cycling trips within London since the year 2000 with around 500,000 cycle trips currently taking place every day. In 2006/07 cycling accounted for 1.6 percent of all modal trips in London and 3.7 percent of all journeys to work within inner London. The Mayor's aspiration is to increase the modal proportion of cycling trips within London to 5 percent and more generally, improve conditions for cyclists. The Mayor has set Transport for London (TfL) a target to increase cycle trips by 400 percent by 2025.

To help achieve this growth TfL has been tasked with implementing the Cycle Hire Scheme within central London by May 2010. The Scheme will deliver around 6,000 bicycles across approximately 400 sites.

The Scheme will allow people to hire a bicycle from a docking station, use it as desired and return it to either the same or another docking station. To ensure the adequate availability of docking points and bicycles for those hiring and returning bicycles, approximately 10,200 docking points at around 400 sites at a density of approximately nine sites per square kilometre are required.

The Scheme has been developed in collaboration with the Royal Parks and the following nine London Boroughs:

- London Borough of Camden;
- London Borough of Hackney;
- London Borough of Islington;
- Royal Borough of Kensington and Chelsea;
- London Borough of Lambeth;
- City of London;
- London Borough of Southwark;
- London Borough of Tower Hamlets; and
- City of Westminster.

## **1.2 Purpose of the Document**

TfL wish to apply for planning permission for a Cycle Hire docking station, comprising a terminal and 20 docking points on the footway and carriageway adjacent to 1 Maltravers Street in the City of Westminster.

Following discussions with the Archaeological Advisor to the Planning Authority, Ms Diane Walls at Greater London Archaeological Advisory Service (GLAAS), this Site has been identified as requiring further archaeological intervention.

The document

- describes the archaeological background to the area;
- describes the proposal;

- assesses the likely impact of the scheme on the basis of the available information; and
- proposes no further archaeological intervention.

### 1.3 Methodology

A list of cultural heritage sites has been compiled (Appendix 1) through consultation carried out by Hyder Consulting in April 2009.

The Assessment draws together the available archaeological, topographic and land-use information to clarify the archaeological potential of the Site.

The Assessment comprises of an examination of evidence in the Greater London Sites and Monuments Record (SMR). It considers the results of nearby archaeological investigations, incorporates published and unpublished material and charts historic land-use through examination of any readily available historic maps.

Clearly, any information on the depth of overburden for the archaeological assets would be a key consideration in determining whether the construction of the docking station would be likely to impact on archaeology. Detailed discussions to establish the nature of the archaeological potential have been undertaken with Ms Diane Walls and Mr Rob Whytehead at the Greater London Archaeological Advisory Service (GLAAS) and Ms Jenny Proctor of the Pre Construct Archaeology Ltd, who undertook the nearby excavation at Arundel Street.

## 2 ANALYSIS OF ARCHAEOLOGICAL BACKGROUND

### 2.1 Scheduled Ancient Monuments (SAMs)

There are no SAMs on the Site or within a distance where their setting would be affected by the proposed development.

### 2.2 Greater London Archaeology Advisory Service

#### *Archaeological Advisor*

Ms Diane Walls of GLAAS has advised that an archaeological assessment is necessary to determine the archaeological potential of the Site

Ms Walls had confirmed that the site lies in The Lundenwic and Thorney Island Special Area of Archaeological Priority (because it is within *Lundenwic*, the Saxon settlement of London).

#### *Greater London Sites and Monuments Record (SMR) and unpublished archaeological sources*

The SMR identifies a number of assets within 50m of the Site and these are listed in Appendix 1.

At Globe House (MLO68892) adjacent to the Site at the south, Saxon foreshore deposits were observed but at considerable depth.

Ms Jenny Proctor who undertook the excavation at Arundel House to the south west of the Site has pointed out that there are successive foreshore and waterfront deposits from the Saxon period and later. That site was basemented with Tudor walls lying immediately below the basement floors. However, these were at a depth far greater than the 450mm maximum of the proposal

## **2.3 Historic Maps**

The general arrangement of Milford Lane at this point does not seem to have changed significantly since Rocque's 1746 map and Horwood's map of 1799. No footway is indicated on either map but the cartographers may have chosen not to clutter their maps by indicating it.

The Site was re-developed in the second half of the 20<sup>th</sup> century.

## **3 THE PROPOSALS AND THEIR POTENTIAL IMPACT**

### **3.1 Site Description**

The Site lies on the carriageway on Milford Lane. Please refer to the Planning Design and Access Statement (PDAS) for further information.

The adjacent building Globe House was re-developed in 1996.

### **3.2 Docking Station**

The development comprises terminal and 20 docking points. The foundations would be at a depth no deeper than 450mm below the current ground level. The form that the foundations will take has not been finalised. Further information regarding the docking station can be found in the PDAS.

### **3.3 The Potential Impact**

Given that the foundations would be no deeper than 450mm, it seems unlikely that the works will penetrate to archaeological levels. Other archaeological sites in the vicinity (see 2.2 above) have revealed remains only at considerable depth. The possibility of finding anything other than comparatively recent make-up on the Site is, therefore, very limited.

Under these circumstances no further archaeological intervention is proposed.

## **4 CONCLUSIONS**

This Assessment has revealed that there is no potential for significant archaeological remains in the carriageway and footway adjacent to 1 Maltravers Street, WC2.

No further archaeological intervention is proposed.

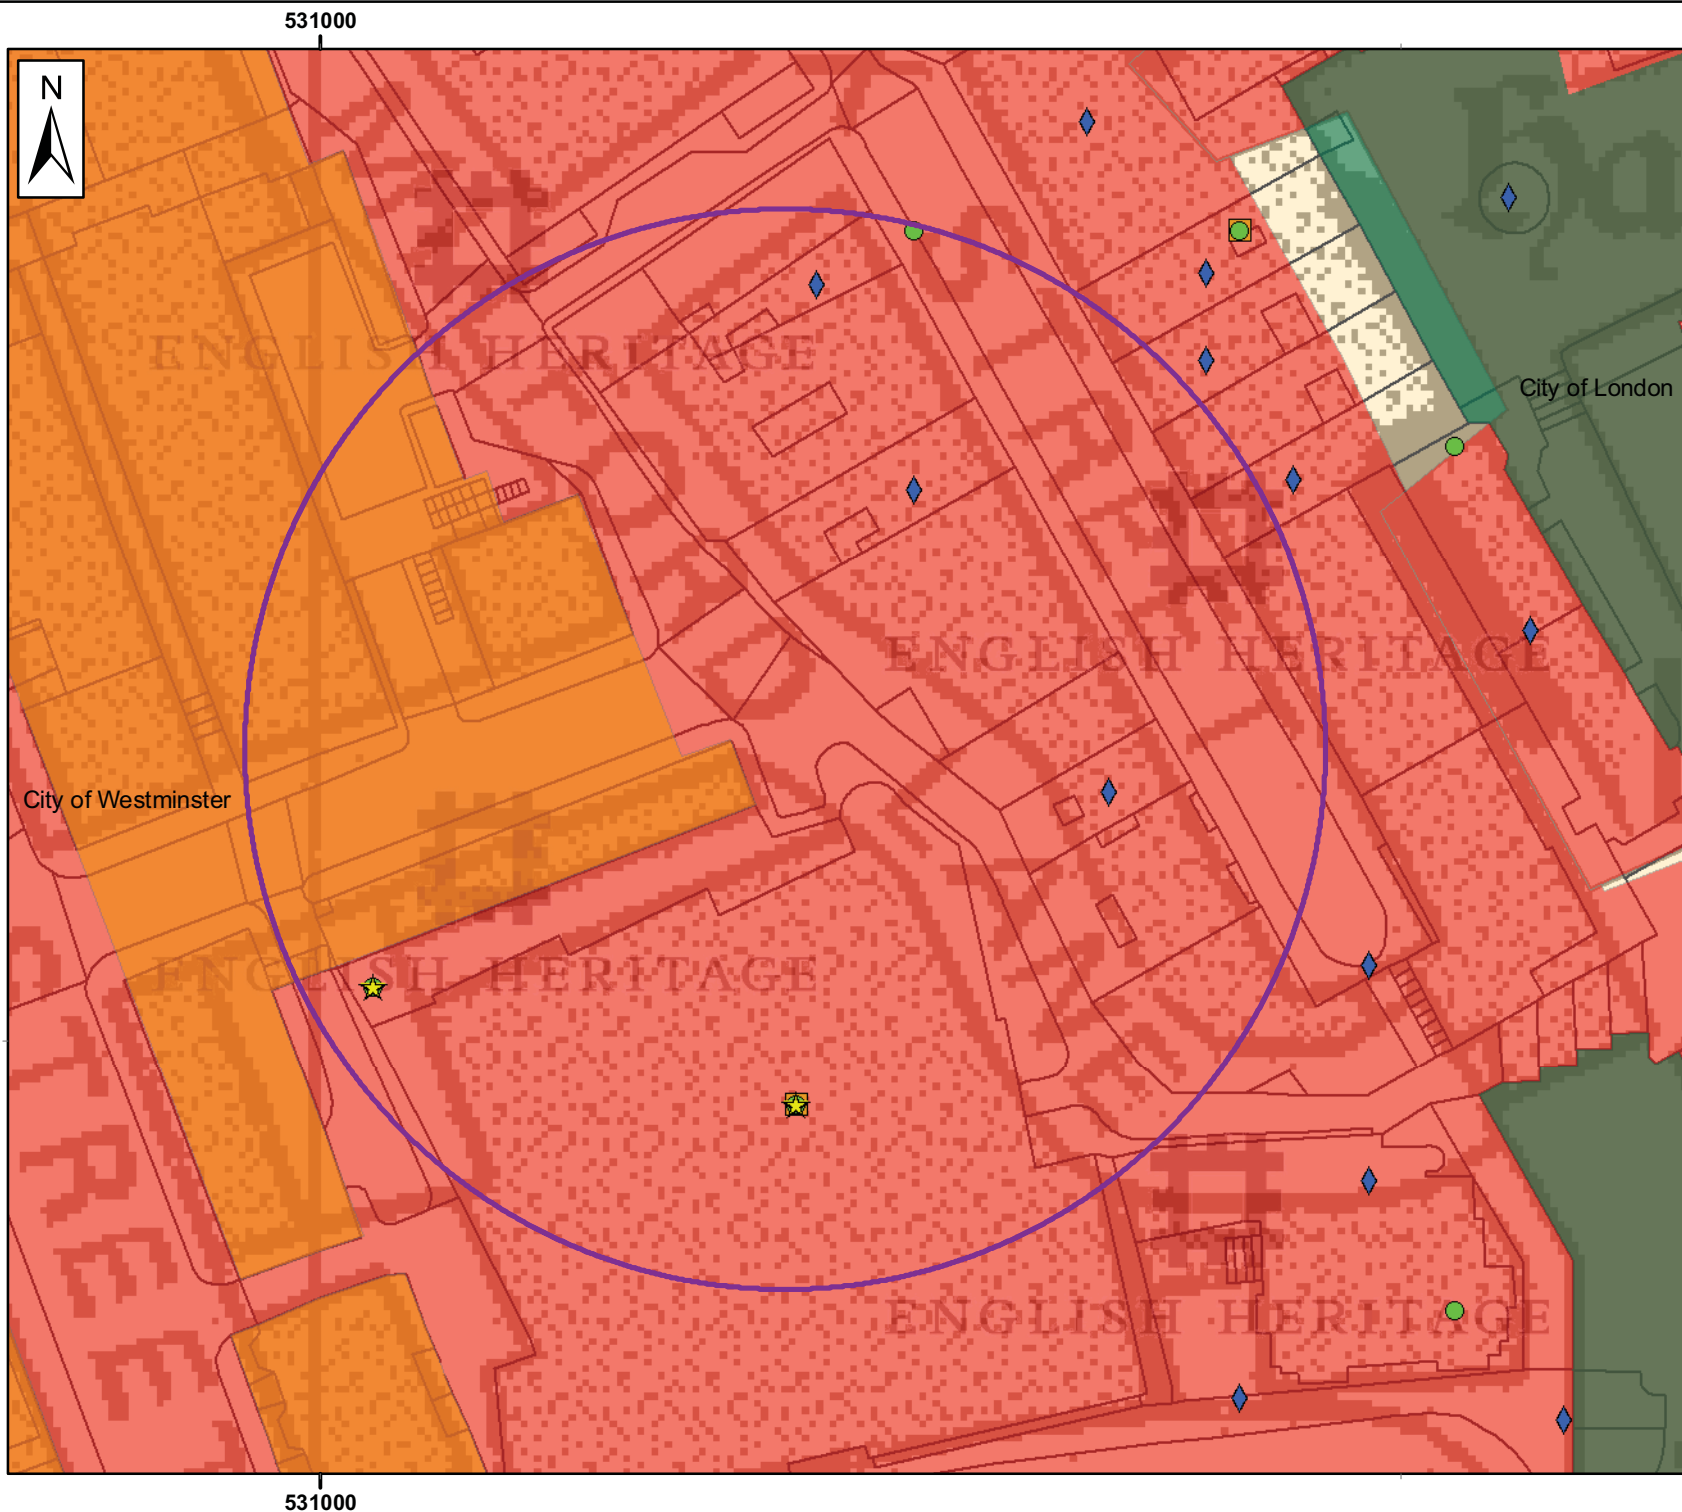

## **Appendix 1**

**Consultation response from the Greater London Archaeology Service Sites and Monuments Record.**

## Greater London Sites and Monuments Record - Search Report

### Enquiry: Report 8227 London Cycle Hire Scheme Milford Lane TQ 31043 80927 50m radius search

Thank you for your enquiry to the GLSMR. Please find below all records held on the GLSMR database within the area specified in your request. Please note that there is a backlog of listed buildings and archaeological reports awaiting entry into the system and we cannot guarantee that the information supplied is fully up to date.

#### \*\*\* GLSMR NEWS \*\*\*

- 3-Aug-2006 *Record Sort Order Changed*  
The records within the SMR search report are now sorted by 'Name' (and then by 'MonUID') rather than 'MonUID' as this should display multiple records for a single site together in the indexes and report. However, many site names begin with numbers from the address and so records from same street will not necessarily appear together. All new records added to the GLSMR, and those altered during data rationalisation and other projects, are being named with the street name before the number (for example The Street (No. 1), London) so that in future results from the same street will appear together.
- 31-July-2006 *Full Address Data Added*  
The HTML report and XML data file have been altered to include the full address which was perviously missing.
- 25-Jan-2006 *Listed Building Data and Designations Updated*  
All of the Listed Buildings entries within the GLSMR have been updated using the latest dataset from the National Monuments Record and the GLSMR search report (the document you are reading now) has been updated to display the full designation description for the listed buildings encountered within your search area.

#### \*\*\* END \*\*\*

**NOTE:** Please ensure you read this document from a saved version and not directly from the e-mail as this may cause problems with the displayed data and hyperlinks.

If you have any further enquiries, or if you have any problems interpreting the data, please do not hesitate to contact us.

Yours Sincerely,

The Greater London SMR Team

<b>Map Sheet</b>	TQ38SW
<b>Grid References</b>	Centre Point: Centroid TQ 3104 8089 (MBR: 10m by 10m)
<b>Summary</b>	
<b>Description</b>	Watching brief undertaken by JMC. Bowsher, Feb-Jun'96; site code TMP96. A few medieval finds may indicate later truncated foreshore accumulations. The finds included ceramic building materials and some fragments of leather including the sole of a child's shoe. Periods recorded under this site code: prehistoric (083726), Roman (083727), Saxon (083728), medieval (083729).
