SUMMARY

A Level 1 standing building survey was carried out of the south half of the farmstead and a photographic survey of the north half on 21 November 2016. The main buildings 1 and 2 appear to have been constructed in one phase and form a C-shaped steading with later cattle court in the courtyard. Building 2 is the remains of a two-room bothy and there is a demolished Dutch barn on the E side of Building 2. There are initials (JN) and a date (1891) scratched into one of the stones on the S exterior wall of Building 1. These buildings were probably constructed in the early 19th-century and were fully developed by the First Edition OS map. It is recommended that no further archaeological work is required during the current planning application.

1 INTRODUCTION

- 1.1 The site (Illus 1) is located on the N of the B9119. It is centred on NGR NJ 7060 0785, at 160-165m OD (Illus 1) and in the parish of Midmar.
- 1.2 The work was commissioned by Cameron Forbes, Forbes Homes. Two planning applications for the site include Site A APP/2014/3572 Demolition of steading and erection of 3no. dwelling houses and garages; there is a condition which requires a photographic survey before works commence onsite and Site B APP/2014/4282 Demolition of existing bothy/steading and Dutch barn and erection of dwelling house and garage at site B; there is a condition which requires a Level 1 archaeological standing survey of existing structures to be undertaken.
- 1.3 All the archaeological work was carried out in the context of Scottish Planning Policy (SPP) Planning Advice Note (PAN 2/2011) and Scottish Historic Environment Scotland's Policy Statement (HESPS), which state that archaeological remains should be regarded as part of the environment to be protected and managed.

2 BACKGROUND

Farmstead still in use (Aberdeenshire HER NJ70NW0102). On the 1st edition OS map (Illus 15) of 1867 it is shown as a U-shaped building with the court facing east and two outbuildings and a mill pond to the west. A horse-gang is attached to the west side of the steading. By the 1888 2nd edition OS map (Illus 16) there is a mill dam marked. These buildings survive today. The horse-gang has been removed and the pond infilled. The lade survives as a boggy channel not accessible during this survey and the area of the mill pond is also boggy.

THE LEVEL 1 STANDING BUILDING SURVEY AND PHOTOGRAPHIC SURVEY

A level 1 standing building survey was carried out on 21 November 2016. A photographic survey was carried out of all the buildings. There was no access to the N side of the buildings due to the old lade and overgrown vegetation and little access to the courtyard because of overgrown vegetation. The roofs have collapsed in the bothy Building 2 and the N and some of the W wing of the courtyard buildings. The south wing of the courtyard building was overrun with pigeons and so a photographic survey was carried out and all measurements taken from the exterior only. A Level 1 survey was carried out on the S wing of the courtyard buildings and the bothy. Plans and elevations were drawn and this report details both surveys.

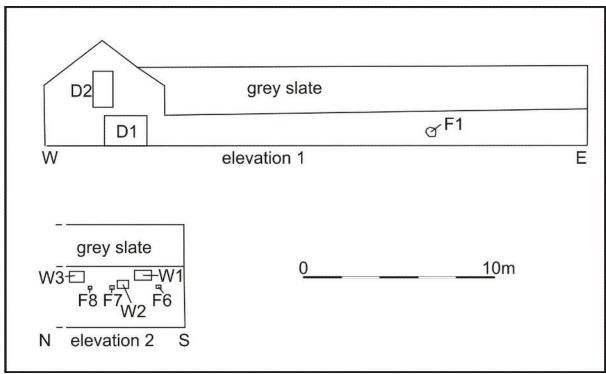

Illus 2 Buildings 1 and 2 plan annotated with numbers used in this survey

3.1 Building 1

Building 1 is 28m W-E and the wings are 5m wide. The S wing of the building was subjected to a Level 1 survey and the rest of the building was photographed. The building is constructed from grey and pink granite blocks with cherry cocking; the walls are 0.5m thick. The roofs are grey slate some of which have collapsed. There is a gable on the W end of the S wall with large door and smaller upper first floor door. The S wing consists of three rooms: the middle and E rooms have been joined into one room and the wall foundation (F3) and wall stub (F2) survive at the E end of the building (Illus 7). The W room is slightly larger with main door on S wall D1), a series of small upper windows and vents on the S end of the W wall (W1-3, F6-8; Illus 2-4). There is a door in the N wall (D7) which leads to the remainder of the steading which is not accessible and subjected to a photographic survey only; the door is blocked with wood. There is a door on the E wall of this room (D6; Illus 6) which led to the courtyard; this door is blocked with vegetation).

There is a socket stone at the N end of the building (F6; Illus 8) a stone platform against the W wall (F7; Illus 9) and the wall contains stones that have been guarried (Illus 10).

There are initials (JN) and a date (1891) scratched into one of the stones on the S exterior wall of Building 1 (F1; cover illus).

Illus 8 Building 1 N wall showing drilled granite blocks; facing N

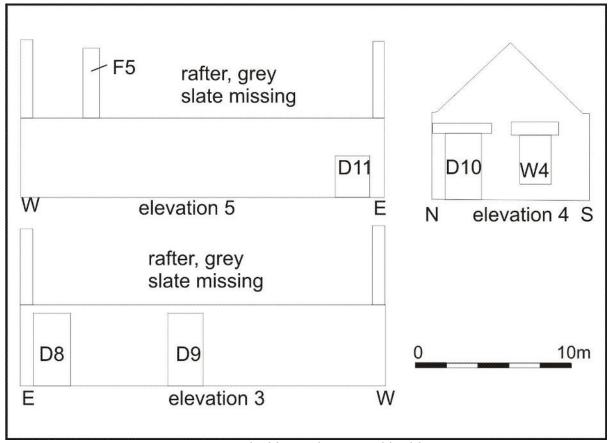

Illus 9 Building 1 W room socket stone F6, facing S

Illus 10 stone platform F7, facing W

3.2 Building 2

Building 2, the bothy, is 11.5m long and 5m wide. It is constructed of grey and pink granite blocks with cherry cocking and the walls are 0.45-0.5m thick. The building had 2 main rooms and the grey slate roof has collapsed and there was little access to the interior. There was a chimney on the S wall of the W room of this building (Illus 13). There are doors into each main room on the N wall (D8 and D9; Illus 11, 12), a door and window in the W gable (Illus 14) and a small door on the E end of the S wall which is overgrown with vegetation and therefore inaccessible during this survey.

4 CONCLUSIONS AND RECOMMENDATIONS

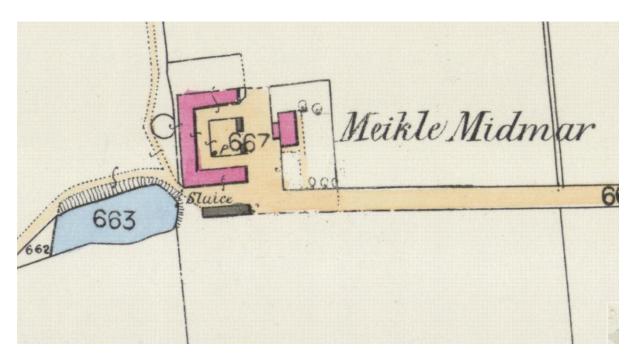

A Level 1 standing building survey was carried out of the south half of the farmstead and a photographic survey of the north half on 21 November 2016. The main buildings 1 and 2 appear to have been constructed in one phase and form a C-shaped steading with later cattle court in the courtyard. Building 2 is the remains of a two-room bothy and there is a demolished Dutch barn on the E side of Building 2. There are initials (JN) and a date (1891) scratched into one of the stones on the S exterior wall of Building 1. These buildings were probably constructed in the early 19th-century and were fully developed by the First Edition OS map. It is recommended that no further archaeological work is required during the current planning application.

5 ACKNOWLEDGEMENTS

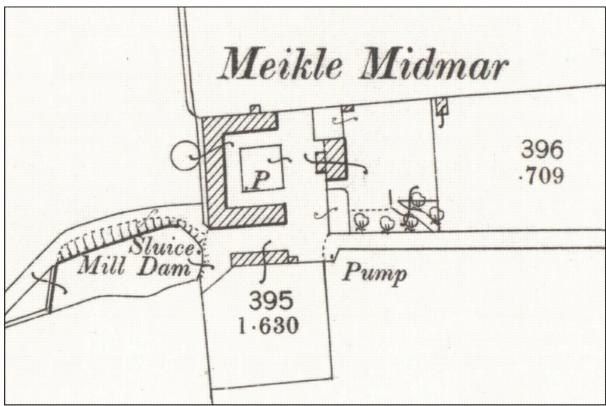

Thanks to Cameron Forbes, Forbes Homes for commissioning this project and to Claire Herbert, Aberdeenshire Council Archaeology Service for her advice during the work.
