

## Project metadata for the Archaeology Data Service

Please complete this form as fully as possible with details of your project. This data will form the basis of an entry about your dataset in the ADS Catalogue, and underpins the computerised searching process that allows users to discover and retrieve information.

<p><b>1. Title</b> - please indicate the title (and any alternatives) for the dataset.</p>
<p>Archaeological Watching Brief with Option to Excavate at Test Park Community Sports Facility, Lower Brownhill Road, Southampton.</p>
<p><b>2. Description</b> - please provide a brief summary (max. 200-300 words) of the main aims and objectives of the project and the content of the dataset.</p>
<p>The project was an archaeological watching brief carried out on the construction of a new sports facility at Lower Brownhills Road, Southampton for Southampton Solent University. The natural was gravel overlain by brickearth.</p> <p>The aims of the investigation as defined in the written scheme of investigation were 'principally to determine the presence or absence of human use of the area, and the date, type, state of preservation, and extent of that use; to recover associated objects; and to record such evidence as does survive. In addition the nature, dimensions, and relationship of natural deposits will be noted and recorded'</p> <p>A total of 62 trenches were dug. Prehistoric activity was marked by three ditches, four pits and one posthole. Dating evidence was limited and some of the ditches were probably still functioning into the Roman period. Late Saxon activity was marked by one pit/posthole and four sherds from the subsoil. Medieval activity was marked by a pit and a posthole. Post-Medieval activity was marked by seven ditches, one pit and a posthole. The ditches are earlier than the field divisions shown on the mid-19th century tithe map and presumably pre-date the enclosure of the area.</p>
<p><b>3. Subject</b> - please suggest keywords for the subject content of the dataset. If possible, please used existing documentation standards (e.g. The RCHME thesaurus of Monument Types, the MDA Archaeological Object Name thesaurus) and indicate which standard you are following. If you use a documentation standard unique to your organisation, it would be extremely helpful if you could send a copy of it with your dataset.</p>
<p>Archaeological investigation, Bronze Age pottery,</p>
<p><b>4. Coverage</b> - please give the current and contemporary name(s) of the country, region, county, town or village covered by the data collection. If names or administrative units were different during the time period covered by the data please record them separately. Please give the dates/period covered by the dataset.</p>
<p>Europe, United Kingdom, Hampshire, Southampton, NGR SU 374148</p>
<p><b>5. Creators</b> - please list details about the creator(s), compiler(s), funding agencies, or other bodies or people intellectually responsible for the data collection. Information can include forename, surname, affiliation, address, phone, fax, email, or URL.</p>
<p>J I Russel MfA Southampton City Council Archaeology Unit, 93 French Street, Southampton, SO14 2DY, 023 8063 4906, Archaeology@southampton.gov.uk</p>
<p><b>6. Publisher</b> - please list details about any organisation which has published this</p>

data.
Southampton City Council
<b>7. Identifiers</b> - any project or reference numbers used by you or your organisation to identify the dataset e.g. OASIS ID, NMR ID, HER/SMR IDs, sitecodes, etc.
Site code: SOU 1547, Southampton Museums accession number A2011.31
<b>8. Dates</b> - when the dataset was created, when the archaeological project was carried out, processing dates, or computerisation dates as appropriate.
04/01/2011 to 10/07/2011.
<b>9. Copyright</b> - please provide the name of the copyright holder for the dataset. If the collection was created during your work as an employee, the copyright holder will normally be your employer under your contract of employment. If the material is covered by Crown copyright please indicate this.
Southampton City Council
<b>10. Relations</b> - if the data collection was derived in whole or in part from published or unpublished sources, whether printed or machine-readable, please give references to the original material. Please give details of where the sources are held and how they are identified there (e.g. by accession number). If the collection is derived from other sources please indicate whether the data represent a complete or partial transcription/copy and the methodology used for its computerisation. Please provide below full references to any publications about or based upon the data collection.
<b>11. Language</b> - please indicate which language(s) your dataset is in (e.g. English, French, Swahili).
English
<b>12. Resource Type</b> - is this dataset best described as primary data, processed data, an interpretation of data, or a final report?
Primary data, final client report
<b>13. Format</b> - please indicate what format your data is saved in (e.g. WordPerfect 5.1, HTML, AutoCAD).
MS Word 2003, MS Office Access 2003, AutoCAD 2010

The completed form should be submitted to the ADS in **digital** form along with the deposited data that it describes, or via e-mail to Catherine Hardman at [csh3@york.ac.uk](mailto:csh3@york.ac.uk)

## List of files deposited with the Archaeology Data Service

Please complete this form with a list of all files that are being deposited with the ADS. It is important that you accurately record each file name with the correct combination of upper and lower case letters and file extension. Please describe each file carefully and accurately. The file descriptions will be preserved alongside the data by the ADS, and will also be made available to those who wish to reuse the data in the future.

If you would prefer to give us this information in another format this should not be a problem.

## Database / Spreadsheet documentation for the Archaeology Data Service

Please fully document and record any databases that you intend to submit to the ADS for archiving. This will help us prepare them for archiving and online dissemination and will enable future re-use of the data by others.

If you already have documentation for your database in another format and would prefer us to work with this instead, this should not be a problem as long as it accurately describes your data tables and any relationships between them.
