## 1 NON – TECHNICAL SUMMARY

Pre-Construct Archaeology Ltd (PCA) was appointed by Ecus Ltd to undertake an archaeological evaluation at New Cemetery, North Waltham, Basingstoke, Hampshire (NGR **SU 55837 45176**), hereafter 'the Site'. The Site is the subject of a new cemetery including the building of a chapel, depot and parking with access on Stockbridge Road. This report provides the result of evaluation, which comprised 42 trenches opened between the 12th and 19th September 2016, the digging of 11 geotechnical pits was also monitored. The evaluation was completed largely in keeping with the Written Scheme of Investigation.

The remains of an *in situ* urn, possibly an urned cremation burial, was identified. Also uncovered were three small pits, two with evidence of burning, and a possible ditch terminus. The possible urned cremation in Trench 19 and the small pits seen in trench 11, 19 and 34 represent moderately significant archaeological potential and will require further investigations it is also concluded that the urn may be part of a wide archaeological landscape.

## **2 INTRODUCTION**

### **2.1 Project Background**

2.1.1 Pre-Construct Archaeology Ltd (PCA) was appointed by Ecus Ltd to undertake an archaeological evaluation at New Cemetery, North Waltham, Basingstoke, Hampshire (NGR **SU 55837 45176**), hereafter 'the Site' (**Figure 1 & 2**). The Site is the subject of a new cemetery including the building of a chapel, depot and parking with access on Stockbridge Road.

2.1.2 The archaeological evaluation was required, in keeping with NPPF Section 12 and Local Plan Policy, by the Local Planning Authority (LPA) Basingstoke and Dean Borough Council to provide information concerning the archaeological implications of the proposed development and determining the subsequent treatment of any archaeological resources within it. The requirement has been secured by a condition (23) of planning permission for the development and follows the advice from Hampshire County Council Historic Environment Team. Condition 23 states:

*No development shall commence on site until an archaeological investigation of the site has been carried out in accordance with a written scheme of investigation, which has been submitted to and approved in writing by the Local Planning Authority. The investigation shall be carried out in accordance with the details so approved, unless otherwise agreed in writing by the local planning authority.*

2.1.3 This report provides the result of evaluation, which comprised 42 trenches opened between the 12th and 19th September 2016, the digging of 11 geotechnical pits was also monitored and the works were intended to address the requirement of condition 23 of planning permission. Works were carried out in accordance with the Chartered Institute for Archaeologists standard and guidance for archaeological field evaluation (CIfA 2014) and Management of Research Projects in the Historic Environment (Historic England 2015).

### **2.2 Location, Topography and Geology**

2.2.1 The Site is a sub-rectangular area of land 6.4 hectares in area and is located to the south of the village of North Waltham and Basingstoke 9km to the north-east. The Site is situated to the north-east of the existing Basingstoke Crematorium, with crop fields to the north and east and is accessed from the south from Stockbridge Road. The Site is bounded by hedgerows.

2.2.2 The Site slopes gently down at an even gradient from 150m AOD on the north side to 136m AOD in the southeast corner.

2.2.3 The British Geological Survey (BGS, 2016) maps the underlying bedrock geology as Chalk formations with superficial deposits of Clay-with-Flints.

### **3 AIM**

#### **3.1 Archaeological Evaluation**

3.1.1 The aim of the archaeological evaluation was to determine the character, extent, date, condition and significance of archaeological resources that may survive within the Site, taking account of their potential to contain biological and palaeo-environmental remains.

3.1.2 This document reports on the results of the evaluation and aims to provide sufficient information so that the future treatment of archaeological resources identified within the site, in respect of the proposed development, may be determined.

## **4 RESULTS**

### **4.1 Introduction**

4.1.1 The following presents a summary of the evaluation results based upon the Site archive, which comprises a Site diary, trench recording sheets, context sheets, Site drawings and digital photographs. A summary of recorded contexts is provided in a Trench Index in **Appendix 1** and photographs of the trenches and trench sections in **Appendix 2**. The archive is held at PCA's Winchester office under the site code NWBH16 and will in due course be deposited with the Hampshire Cultural Trust.

### **4.2 Methodology**

4.2.1 The archaeological evaluation was undertaken following the methodology that was detailed in the Written Scheme of Investigation (L-P:Archaeology, 2016), which was approved on behalf of the Local Planning Authority in advance of the commencement of works.

4.2.2 The evaluation comprised the excavation of 42 trenches measuring 30m x 1.8m (**Figure 2 & Plate 1**). The location of the trenches was intended to provide a sample of any surviving below ground archaeological resources.

### **4.3 Summary of Deposition Sequence**

4.3.1 The deposition sequence shown by the evaluation trenches was relatively constant across the whole site, with evidence of both chalk and clay-with-flints seen in every trench at an average depth of 0.30m BGL (**Figure 7, Plates 2 & 3, 4**).

Slight difference in the top soil and subsoil can be seen in most trenches with the diffuse interface at average depth of 0.23m BGL, although sub soil was not recorded in every trench.

4.3.2 Evidence of glacial and plough scarring was seen across the site.

### **4.4 Archaeological Features**

4.4.1 The remains of an *in situ* urn, possibly an urned cremation burial, ([1904]) were identified in Trench 19 (**Figure 3 and Plate 5**); this was not excavated as a part of the evaluation. The vessel had an approximate diameter of 0.28m and is likely to be of a later prehistoric date, however due to the small amount, of it that was exposed it was not possible to accurately date the urn fabric.

- 4.4.2 Three small pits or post holes were seen in Trench 11, 19 and 34. Trench 11 (**Figure 5, Plate 8**) contained a single circular posthole/pit ([1103]) 0.23m wide and 0.9m deep. Whereas the small pits in trenches 19 and 34 ([1905], [3403]) (**Figures 3 & 9, Plates 6 & 9**) were similar in shape, depth and fill. They were slightly sub circular in shape approximately 0.30m in width and 0.07m in depth with steep uneven sides and a shallow concave base. There was a single fill which had evidence of charcoal and burnt red clay, which could represent evidence of *in-situ* burning.
- 4.4.3 A possible ditch terminus was seen in Trench 4 ([403]) (**Figure 4, Plate 7**) which was 0.33m in width and 0.16m in depth with gentle sloping sides and a small concave base.
- 4.4.4 Three modern features thought to be the cut and backfill of the geotechnical trial pits from January 2015 were seen in Trenches 8, 23 and 38.

#### **4.5 Conclusion**

- 4.5.1 A consistent deposition sequence was seen over the evaluation site with the natural geology of either chalk or clay-with-flints seen at an approximate depth of 0.30m.
- 4.5.2 The possible urned cremation in Trench 19 and the small pits seen in trench 11, 19 and 34 represent moderately significant archaeological potential and will require further investigations.
- 4.5.3 There is moderate archaeological activity in the area dating to this time period with both Bronze Age and Iron Age activity within 1km of the Site represented by cropmarks, banjo enclosures and round barrows, with a number of flint scrapers and blades found within the site, possibly dating to the Bronze Age. A watching brief undertaken during the construction of the Basingstoke Crematorium to the south-west recovered Iron Age pottery (L-P:Archaeology, 2015). Therefore, it may be concluded that the urn and Site form part of a wider archaeological landscape.

## **5 ARCHIVE PRERARATION AND DEPOSITION**

### **5.1 The Site Archive**

5.1.1 The Site archive, to include all project records and cultural material produced by the project, will be prepared in accordance with 'Guidelines for the Preparation of Excavation Archives for Long-term Storage' (UKIC 1990) and the Institute for Archaeologists 'Standard and Guidance for the creation, compilation, transfer and deposition of archaeological archives' (ClfA 2014). On completion of the project PCA will arrange for the archive to be deposited with the Hampshire Cultural Trust on behalf of Hampshire County Council.

### **5.2 Copyright**

5.2.1 The full copyright of the written/illustrative archive relating to the site will be retained by Pre-Construct Archaeology Ltd under the Copyright, Designs and Patents Act 1988 with all rights reserved. Hampshire County Council, however, will be granted an exclusive licence for the use of the archive for educational purposes, including academic research, providing that such use shall be non-profitmaking, and conforms to the Copyright and Related Rights regulations 2003. Further distribution and uses of the report either in its entirety or part thereof in paper or electronic form is prohibited without the prior consent of Pre-Construct Archaeology Ltd.

5.2.2 The licence extends to the use of all documents arising from this project in all matters relating directly to the project, as well as for bona fide research purposes (which includes the Hampshire County Council Archaeology and Historic Building Record).

5.2.3 Pre-Construct Archaeology Ltd has made every effort to ensure the accuracy of the content of this report. However, Pre-Construct Archaeology Ltd cannot accept any liability in respect of, or resulting from, errors, inaccuracies or omissions this report contains.

## **6 ACKNOWLEDGEMENTS**

Pre-Construct Archaeology is grateful to Paul White of Ecus Ltd for commissioning the evaluation and to Neil Adam, Senior Archaeologist, Hampshire County Council for advice. James Williams of Readypower Ltd is also thanked for his assistance on site.

The evaluation was supervised by Katherine Marshall, assisted by Thom Hayes and Gareth Hatt. This report was prepared by Katherine Marshall with Illustrations prepared by Charlotte Faiers. The project was managed for PCA by Paul McCulloch.

### Project details

Project name	An Archaeological Evaluation: New Cemetery, North Waltham, Basingstoke, Hampshire
Short description of the project	Pre-Construct Archaeology Ltd (PCA) carried out an archaeological evaluation at New Cemetery, North Waltham, Basingstoke, Hampshire The evaluation comprised the excavation of 42 trenches measuring 30m x 1.8m, with the remains of an in situ urn, possibly an urned cremation burial, being identified. Also uncovered was three small pits, two with evidence of burning, and a possible ditch terminus
Project dates	Start: 11-09-2016 End: 23-09-2016
Previous/future work	No / Yes
Any associated project reference codes	NWBH16 - Sitecode
Any associated project reference codes	A2016.88 - Museum accession ID
Type of project	Field evaluation
Site status	None
Current Land use	Cultivated Land 3 - Operations to a depth more than 0.25m
Monument type	CREMATION BURIAL Late Prehistoric
Monument type	PIT Uncertain
Monument type	DITCH Uncertain
Significant Finds	POTTERY Late Prehistoric
Methods & techniques	"Sample Trenches", "Targeted Trenches"
Development type	Cemetery Extension
Prompt	National Planning Policy Framework - NPPF
Position in the planning process	After outline determination (eg. As a reserved matter)

### Project location

Country	England
Site location	HAMPSHIRE BASINGSTOKE AND DEANE NORTH WALTHAM New Cemetery, North Waltham
