Worksheet Name	Worksheet purpose	Number of rows	Field name	Description
Chalcolithic and Early Bronze Age Mortuary Deposits in Northeast England	Provide searchable dataset on Early Bronze Age mortuary deposits in Northeast England	355	FeatureName	Name of the feature where deposit was located
			DepositName	Unique identifier: name of each mortuary deposit
			SiteName	Name of the archaeological site where deposit was located
			Region	County in which deposit was located
			NGR	National Grid Reference for the site
			East	Easting supplied in format for GIS software
			North	Northing supplied in format for GIS software
			SiteLocation	Description off the site location
			RelationToNearestSummit	Direction of the site with respect to the nearest summit
			LandscapeZone	Description of the landscape zone in which the site is located
			ApproxHeight ASL (m)	Height above sea level of the site
			CountrysideCharacterArea2012	Natural England Countryside Character area in which the site is located
			LocationType	Location of the site with respect to local landscape features
			RelationToLocalSites	Identification of other mortuary sites local to the site
			SiteDescription	Description of the site
			DiameterRoundSites	Diameter of the site where the site is a circular monument
			SiteType	Type of site
			FeatureType	Type of feature
			FeatureOrientation	Orientation of the feature with respect to compass where the feature is linear
			FeatureDimensions	List of all information relating to the feature dimensions
			FeatureLength(cm)	Length of feature
			FeatureWidth(cm)	Width of feature
			FeatureDepth(cm)	Depth of feature
			FeatureLocation	Location of feature with respect to local landscape and/or site
			LocationRelToCentre	Position of the feature with respect to the centre of circular monuments
			FeatureDescription	Description of the feature in which the deposit was located
			AssociatedFeatures	Summary of other features at the same site
			TreatmentOfRemains	Treatment of the human remains present
			MaterialsInDeposit	Description of any materials in the deposit
			ArrangementOfDeposit	Arrangement of materials, artefacts and human remains within the deposit
				Position of the body as indicated by any human remains within the deposit, recoding the direction in which the head lay, which side the body lay on, and which direction the front of the body faced
			HeadSideFace	
			MNIWithinDeposit	Minimum number of individuals within the deposit
			SexOfIndsWithin Deposit	Sex of any human remains present
			AgeOfIndsWithinDeposit	Age at death of any human remains present
			OtherSkeletalInformation	Additional information on the human remains present
				Accession numbers for human remains within collections curated by Tyne and Wear Archives and Museums and examined by Michelle Gamble in preparing this data
			AccessionTWAMHumanRemains	
			BoneAnalysisUsed	Source of information for the data on the human remains
			ArtefactsInDepositList	Brief summary of any artefacts found within the deposit
			ArtefactDescriptions	Description of any artefacts found within the deposit
			VesselType	Type of any vessel found within the deposit
			RefinedTypologies	Detailed typological identification of any artefacts found within the deposit

VesselIllustrations	Whether or not an illustration of any vessel in the deposit was available during analysis
OtherFindIllustrations	Whether or not an illustration of any other artefacts in the deposit was available during analysis
DatingOfDeposit	Any radiocarbon dating information relating to the deposit
DatingOfHumanRemains	Any radiocarbon dates derived from human remains in the deposit
EstimatedDateRange(Fowler2012)	Estimation of the likely date range to which the deposit can be attributed, as suggested by author of the spreadsheet
PrimaryReferences	Primary references used in compiling the data about the site, deposit and artefacts
DecadeOfExcavation	Decade in which the deposit was excavated
OtherNotes	Any other notes
Excavator	Persons responsible for excavation of the deposit
UsedforFowler2013?	Whether or not the deposit was considered in Fowler (2013)
UsedforRitualChanges Analysis?	Whether or not the deposit was considered in Fowler (in press)
