| Post-Med | | | 1 | 5 | 3 | | | 1 | 75(5%) | |
| Totals | 32 | 50 | 295 | 1693 | 1518 | 283 | 181 | 1984 | 1375 | |

**This table is only provisional – until Mark and Phil confirm and finalise the phasing and it is altered on Oracle I can't get the correct info out of the relevant combi reports to finish this table. For example there will be no LOGR or ESUR in Period 32 if OA140 moves to Period 35 or 36 – at the moment Oracle tells me there are 30 sherds of LOGR in Period 32 – but I dispute this – this needs confirming by the strat team and then I will need time later in the year to amend these tables and text.
