Cow Tag **6** Type **Beam fragments part of cow tag 4**

Description These two pieces were connected but have now separated severely damaged possibly by machine during excavation. Very little of the original surface remains. There appear to be two partial treenail holes, approx 3cm in diameter however damage makes measuring difficult. Original wood number is 1131

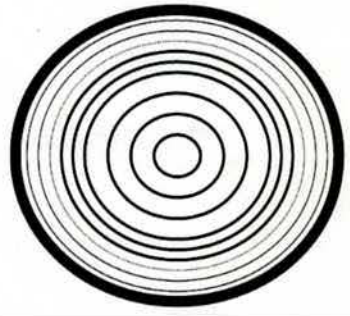

Part of composite beam #4

* A third fragment of beam 4 has been located and added to the drawing.
