Three Watching Briefs in Malton and Norton (MAP Ltd 1994)

Three Watching Briefs in Malton and Norton (MAP Archaeological **Consultancy Ltd. 1994)**

Site 1: Wentworth Street car park, Malton (SE 78617197). A Watching Brief S18900 was conducted at the site in January 1994 during the excavation of foundations, and $\in [0, 2)$ the following August during the installation of services for Ryedale District paper Council's new Community Hall. No archaeological deposits were present. Natural coarse sandy limestone gravel was present c.1.35m below present ground level. A large of the area had been disturbed by a silty-clay filled rubbish pit containing modern material. A single medieval Humber Ware sherd was recovered from the topsoil.

Site 2: Land to the rear of 47 Greengate, Malton (SE 78867179). A Watching Color Brief was carried out for Mr A Hague at this site during the excavation of E 6122 foundations for new housing in December 1993. Further observations took place in July / August 1994 when the services were installed. No archaeological features were present within the trenched areas affected by the footings or services. The site itself was situated within the rear yard of one or more burgage plots which fronted onto Greengate itself. The foundation trenches showed relatively modern levelling layers to overlie a dark yellowish brown silty soil which contained several Romano-British greyware and calcite-gritted ware sherds; notable among the several medieval sherds recovered was one from a decorated York Glazed Ware jug. The service trench runs either did not penetrate archaeological deposits at the street frontage, or else ran along areas disturbed by previous services.

Site 3: 137 Langton Road (SE 79477073). The Watching Brief at this site took the E bi 23 form of observations of the cutting of foundation trenches in mid-January 1994, Sugsos with observations of services in August. No archaeological features were present. P3006 The sole find was a struck flint flake from the topsoil.

M R Stephens, November 1994.
