3rd October 2001

Dear Gail,

**Archaeological Watching Brief : Finkle Street, Thirsk, North Yorkshire (NGR SE 4320 8215)**

An Archaeological Watching Brief was conducted at the above site on the 2nd of October 2001. This consisted of the observation of all groundworks associated with the drainage investigation scheme undertaken by North Yorkshire County Council Environmental Management. A trench measuring 0.70m x 1.30m was excavated to a depth of 1.10m, exposing existing drainage pipes. An additional trench measuring 0.70m x 0.50m was excavated to a depth of 0.45m, similarly exposing existing services. The site topography consisted of paving slabs overlying approximately 1m of modern made-up ground comprising grey sand and fragments of concrete, brick and ceramic and cast iron pipe.

No archaeological features or artefacts were observed during the Watching Brief.

If you require any further information please do not hesitate to contact the office.

Yours sincerely,

*JHiggins*
