## APPENDIX 1

### Criteria for the Assessment of Archaeological Sites

Period: All types of monument that characterise a category or period should be considered for preservation, in order that a representative sample may be preserved for posterity.

Rarity: There are some monument categories which in certain periods are so scarce that all surviving examples which still retain some archaeological potential should be preserved. In general, however, a selection must be made which portrays the typical and commonplace as well as the rare. This process should take account of all aspects of the distribution of a particular class of monument, both in a national and a regional context.

Documentation: The significance of a monument may be enhanced by the existence of records of previous investigations or, in the case of more recent monuments, by the supporting evidence of contemporary written records.

Group Value: The value of a single monument (such as a field system) may be greatly enhanced by its association with related contemporary monuments (such as a settlement and cemetery) or with monuments of different periods. In some cases, it is preferable to protect the complete group of monuments, including associated and adjacent land, rather than protect isolated monuments within the group.

Survival/Condition: The survival of a monument's archaeological potential both above and below ground is a particularly important consideration, and should be assessed in relation to its present condition and surviving features.

Fragility/Vulnerability: Highly important archaeological evidence from some field monuments can be destroyed by a single ploughing or by other unsympathetic treatment, and such monuments would particularly benefit from the protection which scheduling confers.

Diversity: Some monuments may be selected for scheduling because they possess a combination of high quality features, rather than a single important attribute: for example, a Roman town with associated field systems.

Potential: The nature of evidence cannot always be specified precisely, but it may be possible to demonstrate the potential value of a monument as a result of evaluation work.

## APPENDIX 2

### Context Listing

Context No.	Description
Trench 1	
1000	Topsoil. Brown sandy loam.
1001	Deposit. Friable sandy silt. Fill of furrow
1002	Cut. Furrow
1003	Subsoil. Yellowish brown sandy clay
Trench 2	
2000	Topsoil. Brown sandy loam.
2001	Subsoil. Yellowish brown sandy clay
Trench 3	
3000	Topsoil. Brown sandy loam.
3001	Deposit. Land drain fill.
3002	Deposit. Land drain fill.
3003	Deposit. Land drain fill.
3004	Subsoil. Yellowish brown sandy clay
Trench 4	
4000	Topsoil. Brown sandy loam.
4001	Deposit. Land drain fill.
4002	Deposit. Friable sandy silt
4003	Cut. Cobble land drain
4004	Subsoil. Yellowish brown sandy clay
Trench 5	
5000	Topsoil. Brown sandy loam.
5001	Deposit. Land drain fill.
5002	Subsoil. Yellowish brown sandy clay
Trench 6	
6000	Topsoil. Brown sandy loam.
6001	Deposit. Land drain fill.
6002	Subsoil. Yellowish brown sandy clay
Trench 7	
7000	Topsoil. Brown sandy loam.
7001	Subsoil. Yellowish brown sandy clay
Trench 8	
8000	Topsoil. Brown sandy loam.
8001	Deposit. Land drain fill.
8002	Deposit. Land drain fill.
8003	Subsoil. Yellowish brown sandy clay
Trench 9	
9000	Topsoil. Brown sandy loam.
9001	Deposit. Land drain fill.
9002	Subsoil. Yellowish brown sandy clay
Trench 10	
10000	Topsoil. Brown sandy loam.
10001	Deposit. Land drain fill.

1002	Subsoil. Yellowish brown sandy clay
Trench 11	
11000	Topsoil. Brown sandy loam.
11001	Subsoil. Yellowish brown sandy clay
Trench 12	
12000	Topsoil. Brown sandy loam.
12001	Subsoil. Yellowish brown sandy clay
Trench 13	
13000	Topsoil. Brown sandy loam.
13001	Deposit. Land drain fill.
13002	Cut. Furrow
13003	Subsoil. Yellowish brown sandy clay
Trench 14	
14000	Topsoil. Brown sandy loam.
14001	Subsoil. Yellowish brown sandy clay
Trench 15	
15000	Topsoil. Brown sandy loam.
15001	Subsoil. Yellowish brown sandy clay
Trench 16	
16000	Topsoil. Brown sandy loam.
16001	Subsoil. Yellowish brown sandy clay
Trench 17	
17000	Topsoil. Brown sandy loam.
17001	Deposit. Field track/road
17002	Cut. Wheel ruts?
17003	Subsoil. Yellowish brown sandy clay
