

In 1958 the Whitby Shipbuilding and Engineering Co. located south of Spital Bridge almost on the site of the Whitehall Shipyard is described "*as presently building Seine-net fishing craft and as having ample space for expansion on to the old building slips of the Whitehall Ship Yard*" (Daysh 1958, 252). A photograph (Plate 2, S3608) of Seine-net fishing boats constructed in 1946 indicates that boats built on open ground in this way would leave little evidence of their construction.

Another photograph (Plate 3, S3606) annotated "*1963 Whitehall Shipyard in the days of Marcus Fletcher and W. Eves when a number of seine netters were built. After the 2<sup>nd</sup> World War the partners re-opened the yard and boats were built in the open again as well as in the No. 1 Shed*" appears to show the now demolished boat building shed in front of the sail loft in the area to the north of Dog Lane.

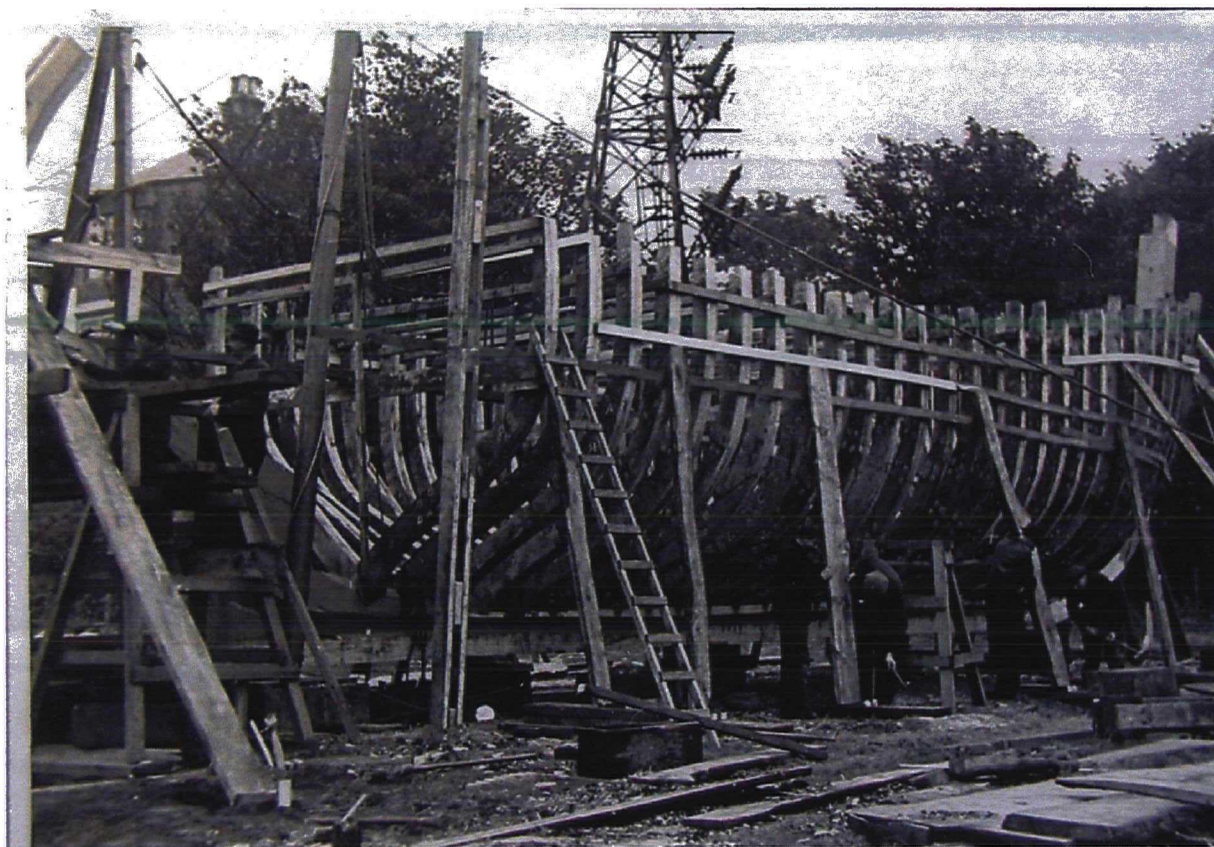

Plate 4. Photo, annotated "building a seine type fishing boat, Whitby" (S3608)

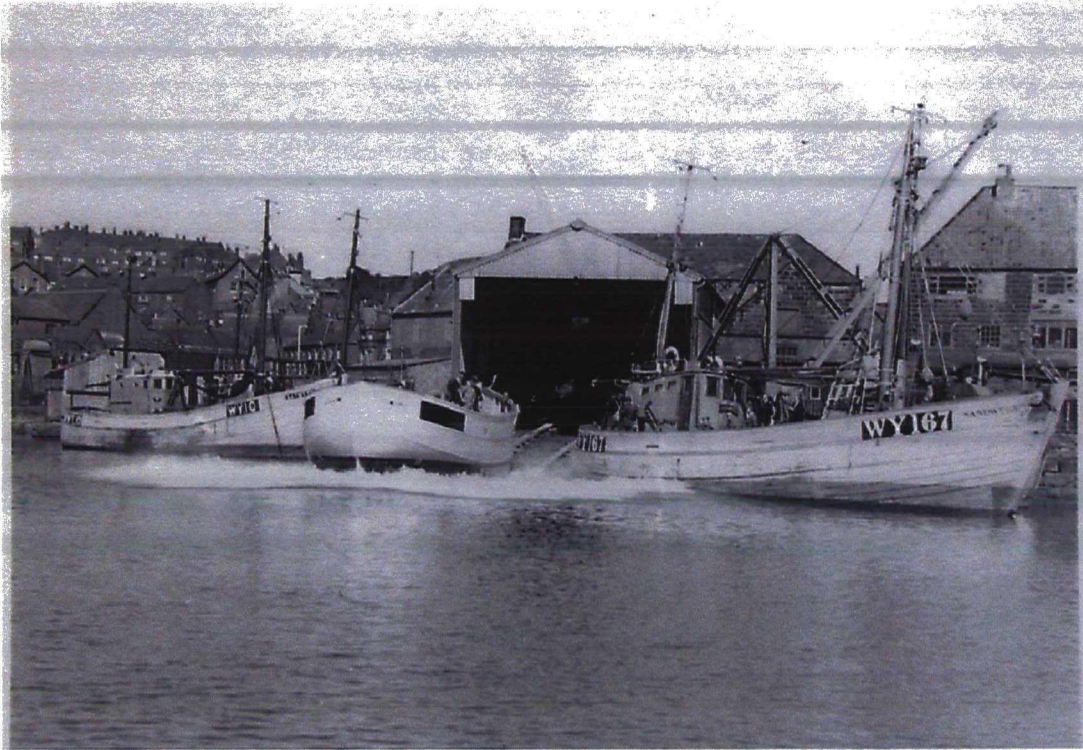

Plate 5. Photograph annotated “1963 Whitehall Shipyard in the days of Marcus Fletcher and W. Eves when a number of seine netters were built. After the 2<sup>nd</sup> World War the partners re-opened the yard and boats were built in the open again as well as in the No. 1 Shed” (photo S3606).
