*Summary: A watching brief was maintained during the excavation of a small trench in advance of the installation of a new viewing platform and information board by the side of the loch towards the far east end of the Royal Park at Linlithgow Palace. There were no finds or features of archaeological significance.*

## **1.0 INTRODUCTION**

Under the terms of its call-off contract with Historic Scotland, Kirkdale Archaeology was asked to undertake a short period of archaeological monitoring in Linlithgow Royal Park, during the excavation of a small trench beside the E end of the loch for a new viewing platform and information board. The site of the excavation was inside the scheduled area for Linlithgow Palace, Peel and Royal Park. The trench was hand dug by MCU staff. The work took place on the 04/02/08.

## **2.0 DESCRIPTION**

Work began with the removal of turf and topsoil **001** from an area 1500mm N-S by 1400mm E-W, approximately 18m from the E edge of the loch and approximately 81m from the public footpath kissing gate beside the road. Beneath turf and topsoil **001**, there was a dark brown silt **002** with some rounded stones and half a brick. Dark brown silt **002** extended to the base of the trench and was not fully excavated. The final dimensions of the trench were 1500mm N-S by 1400mm E-W by 300mm-450mm deep.

## **3.0 INTERPRETATION AND OBSERVATIONS**

Nothing of archaeological significance was discovered within the trench. It is possible that the ground has been landscaped relatively recently to create the public footpath around the loch.

**A1.0 APPENDIX 1: LIST OF CONTEXTS**

#	Description
001	Turf and topsoil.
002	Dark brown silt with some rounded stones and half a brick.

**A2.0 APPENDIX 2: LIST OF DRAWINGS**

No	Type	Description	Scale
1	Plan	Trench location: annotated OS data from pastmap.org.uk	

**A3.0 APPENDIX 3: LIST OF PHOTOGRAPHS**
