**Valiant Soldier 1973-4
Excavation
EA project number: none
Site Archive number: 44
Site code: VS73 / VS74**

Museum accession number: 46/2005

Note:

Most of the archive for Valiant Soldier was deposited at RAMM in the 1970s and 80s. This index was created in 2007 when Exeter Archaeology discovered material relating to the archive still in its possession. *JW.*

Note:

In the early 1990s this site was subject to post-excavation work. This resulted from the Cunliffe report which specified that an 'archive report' should be created for sites which had not been published. The 'archive report' formed a synthesis of the site material.
