CONTEXT RECORDING SHEET

SITE CODE:	Location:	Grid Ref:	Type:	Context No.
	Tr2		Fill	(207)

DEPOSIT:

1. Colour — 1. Mid yellowish brown with dark brown lenses.
2. Composition/Particle size — 2. Clayey silt.
3. Compaction — 3. Friable, gritty and non-malleable.
4. Inclusions — 4. Common abundance of sub-rounded stone (≤ 60mm).
5. Horizon clarity — 5. Good.
6. Contamination risk — 6. N/A (no finds).
7. Methods and conditions — 7. Trowel, mattock and shovel. Dug in dry and breezy conditions, overcast.

Interpretation and discussion: Internal / External / Structural / Other

Primary fill of ditch [206]. Colour and consistency of soil suggests to be weathered natural, due to likely rooting damage (e.g. dark brown lenses throughout the context) and friable consistency.

Provisional date: Unknown

Secondary fill of ditch [206]. Colour and consistency of the soil suggests it to be relatively humic, possibly indicating an association with farmland and/or occupation.
