

Sheet Name: Sheet1

Sheet Description: contains georeferencing coordinate data for geophysical composites

Number of rows: 5

Number of columns: 5

Field name: Area 1 **Description:** refers to geophysical composite described

Field name: Point 1 **Description:** describes point on composite being referred to

Field name: Point 2 **Description:** describes point on composite being referred to

Field name: Area 2 **Description:** refers to geophysical composite described

Field name: Point 1 **Description:** describes point on composite being referred to

Field name: Point 2 **Description:** describes point on composite being referred to

Field name: Terrasurveyor Coordinates **Description:** relates to coordinates being described within the terrasurveyor software program

Field name: OSGB Coordinate **Description:** relates to coordinates being described within OSGB projections
